COST OF RISK Jun.17 (YtD)

0.38% vs. 0.37% Dec.16 (YtD)

MAIN MESSAGES

- Slight loan growth QoQ (+0.7%) thanks to SMEs and Consumer, offsetting deleverage in mortgages
 - NII excluding CIB remains stable in 1H17. Lower contribution from CIB due to Global Markets and securities portfolio sales
 - Good trends in fees and insurance
 - Cost and impairments reductions as the main P&L drivers
 - Sound asset quality indicators with NPLs decreasing by 8% YoY
-
- Good market trends
 - Delivering on our strategy: reducing exposure using all available sources
-
- Profitable growth strategy, focusing on growing consumer loans (+1.2% qoq)
 - Strong growth in core revenues, leveraging NII
 - Contained costs. Room for improvement in efficiency
 - Significant reduction of impairments and provisions. CoR evolution better than expected
 - DFAST & CCAR results prove the strength of our capital and risk processes

NPL RATIO Jun.17

3.5% vs. 2.9% Dec.16

COST OF RISK Jun.17 (YtD)

1.52% vs. 1.15% Dec.16 (YtD)

MAIN MESSAGES

- +8.8% YoY loan growth, in line with expectations. Focus on profitable growth
 - Excellent top line growth thanks to core revenues (NII and fees)
 - Positive operating jaws maintained ; best in class efficiency
 - Stability of risk indicators; better than expected CoR evolution
 - Bottom-line growth above year-end expectations
-
- High activity growth in TRY supported by the Credit Guarantee Fund
 - Strong core revenue growth (NII and fees)
 - Cost growth in line with inflation; improving efficiency
 - CoR evolution better than expected
 - Outstanding bottom-line growth
-
- Moderate loan growth, as macro recovers at a slower pace than expected
 - Good growth in core revenues (NII and Fees)
 - Cost growing with inflation; positive jaws excluding Argentina
 - Deterioration in NPLs mainly in Colombia and Peru due to macro environment, as expected. CoR to remain around current levels

Risk-Weighted Assets distribution

TOTAL RWAs Jun.17

373,265 €m

Spain (1)	118,052 €m
USA	60,653 €m
Mexico	48,547 €m
Turkey	67,270 €m
South America	53,755 €m
Rest of Eurasia	14,144 €m
Corporate Center	10,844 €m

Optimizing Capital Allocation is one of BBVA's Strategic Priorities

~ 80% of the RWAs located in Investment Grade countries

Limited usage of internal models in Credit Risk RWAs

Potential lower impact from future regulatory requirements (Basel IV)

Capital ratios well above requirements

2017 SREP Requirement and distance to MDA⁽¹⁾ at Group level

Jun.17

Well above 2017
Total Capital and CET1
SREP requirements

Significant buffer
to MDA: **387bps**

(1) Maximum Distributable Amount; (2) The Capital Conservation Buffer (CCB) stands, in fully loaded terms, at 2.5% CET1; (3) The Other Systemic Important Institution buffer (O-SII) stands, in fully loaded terms, at 0.75% CET1; (4) 387 Bps of Buffer to MDA = 11.76% Jun.17 CET1 phased-in ratio – 7.625% 2017 CET1 SREP Requirement – 0.27% AT1 Shortfall.

High level of Available Distributable Items (ADIs)

BBVA, S.A. (Parent Company)

December 2016, € bn

**Significant
payment capacity
from distributable items
despite conservative
calculation**
(Share Premium not included)

**Supported by
sustainable profitability**

Note: ADIs calculated at a parent company level (BBVA S.A) as: Net Income + Voluntary Reserves - Dividends distributed until December 31st, 2016 - AT1 coupons. BBVA does not include within the ADIs figure the Share Premium (amounting to +€24 bn as of December 31st, 2016).

FX Hedging policy

Capital

POLICY BBVA hedges c.70% of the excess capital (what is not naturally hedged by the ratio)

GOAL Reduce Consolidated CET1 ratio volatility as a result of FX movements

CET1 FL Ratio Sensitivity to a 10% Depreciation of EM Currencies (Jun.17)

BELOW
-2b.p. For each currency
 (i.e.: TRY, MXN and Rest of EM Currencies)

P&L

POLICY BBVA hedges on average between 30%-50% of foreign subsidiaries expected net attributable income

GOAL Reduce Net Attributable Profit volatility as a result of FX movements

2017 Net Attributable Profit FX Hedging (Jun.17):

c. 55% At a Group level

c. 60% For EM Currencies
 (of which Mexico c.60% and Turkey c.50%)

P&L hedging costs booked in the Corporate Center's NTI

BBVA maintains a prudent FX hedging policy to ensure low volatility on the CET1 ratio and limited FX impact on the P&L account

ALCO & Equity AfS Portfolio

ALCO Portfolio breakdown by region

(Jun.17, € bn)

o.w. HTM Portfolio breakdown

(Jun.17, € bn)

Diversified portfolio across BBVA's footprint

HTM portfolio contributes to maintain the overall impact of market volatility at sound levels

Equity AfS portfolio – Main stakes

(1): BBVA's own position (does not include clients' induced positions)

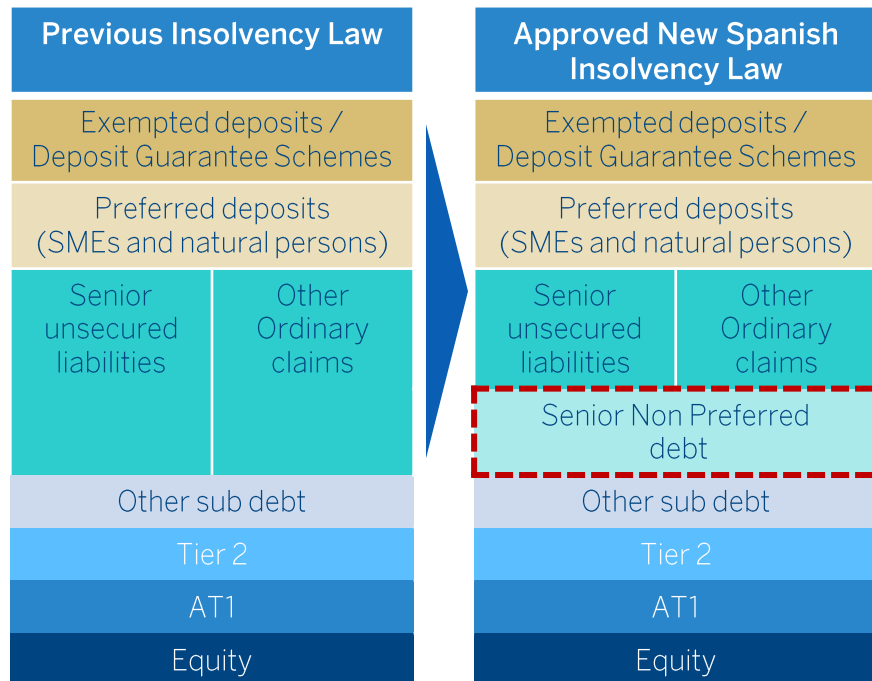

05

MREL

MREL framework: creation of SNP layer in Spain

Insolvency Hierarchy

- Spanish legal framework creating the Senior Non Preferred layer (RDL 11/17) was approved in June
- Clear identification and prioritization of debt securities available to absorb losses:
 - In case of insolvency, ordinary claims will be classified into preferred and non-preferred ordinary claims, the latter having a lower ranking than the former
 - Non-preferred ordinary claims will rank ahead of subordinated claims
- An ordinary claim will only be considered as non-preferred if it meets the following conditions:
 - It has been issued or created with an effective tenor ≥ 1 year,
 - It is not a derivative and has no embedded derivative, and
 - The terms include a clause establishing that it has a lower ranking vis-à-vis the remaining ordinary claims
- The creation of this new layer, expressly acknowledges the possibility for Spanish entities to issue senior debt instruments that meet MREL's subordination requirement (similar to the French statutory approach)

MREL framework: uncertainty remains but closer to the final outcome

MREL requirements and calendar are yet to be communicated

- *“As a first step, the SRB intends to set binding MREL targets at a consolidated level or appropriate sub-consolidated level according to the resolution strategy for major banking groups under its remit in 2017” (SRB, Feb-17)*
- The SRB will endeavor to establish a robust methodology for determining MREL for banking groups subject to an MPE resolution strategy in 2017

Hypothesis for BBVA

- BBVA is an O-SII entity: subject to MREL (not TLAC)
- Based on its decentralized model, BBVA follows a MPE resolution strategy
- MREL perimeter: BBVA Euro subconsolidated level
- Potential transition period around 4 years (similar to UK framework)

Key themes to manage (still under discussion)

Perimeter for quantification of MREL

Calibration

Treatment of intragroup investments for MREL calculation

Eligibility of instruments

Calendar / Transition period

BBVA's MREL Strategy: 2017-2018 Plan

Capital

- BBVA has already filled its AT1 and T2 layers
- BBVA expects to maintain the 1.5% AT1 and 2% T2 regulatory buckets

SNP

- BBVA plans to issue €1-2bn of SNP during the remainder of 2017, starting with this inaugural transaction
- In 2018, BBVA expects to refinance its non-capital wholesale funding maturities into new SNP instruments

(1) Subject to market conditions

Maturity profile

- Wholesale debt maturity profile offers flexibility to refinance current instruments into new SNP, if required:

2017-20 BBVA S.A. senior & covered bonds maturity profile (BBVA S.A.; Jun.17; € bn)

SNP noteholders have significant buffer

- Significant capital buffer of €44bn of subordinated capital (CET1, AT1 and T2)

This plan would position BBVA's capital structure in a very solid stance to meet any further MREL needs (if required by the final calibration), over the rest of the transition period

06

Liquidity & Funding

Liquidity & Funding

Self-sufficient subsidiaries from a liquidity point of view, with robust supervision and control by parent company

Retail profile of BBVA Group balance sheet with limited dependence on wholesale funding

Parent and subsidiaries proven ability to access the wholesale funding markets (medium & long term) on a regular basis

Ample high quality collateral available, compliant with regulatory liquidity requirements at a Group and Subsidiary level

Principles of BBVA Group's self-sufficient business model

B Subsidiaries

- Self-sufficient balance-sheet management
- Own capital and liquidity management
- Market access with its own credit, name and rating
- Responsible for doing business locally

Corporate Center

- Guidelines for capital and liquidity / ALCO supervision
- Common risk culture

😊 Advantages

- Market discipline and proper incentives / sustainable credit growth
- Medium term orientation / consistent with retail banking
- Natural firewalls / limited contagion
- Safeguards financial stability / proven resilience during the crisis
- Helps development of local capital markets
- Buffers in different balance sheets

No liquidity transfers between the parent and subsidiaries or among subsidiaries

Financial soundness based on the funding of lending activity

BBVA Group Liquidity balance sheet (1)

(Jun.17)

(1) Management liquidity balance sheet (net of interbank balances and derivatives)

BBVA Group Liquidity metrics

(Jun.17)

	Euroz.(2)	USA	Mexico	Turkey	S. Amer
LTD	108%	95%	92%	118%	102%
LCR	141%	143% (3)	121%	135%	well >100%

(2) Perimeter: Spain+Portugal+Rest of Eurasia

(3) Compass LCR calculated according to local regulation (Fed Modified LCR)

**Comfortable
liquidity position**

**LCR ratios clearly above regulatory requirements (> 80% in 2017),
both at a Group level and in all banking subsidiaries**

Broaden geographical diversification of access to market

Medium & long-term wholesale funding maturities (Jun.17; € bn)

■ Senior Debt
 ■ Covered Bonds
 ■ Preferred Shares / AT1
■ Subordinated
 ■ Others

Outstanding amounts as of Jun.17
 FX as of Jun.17: EUR = 1.14 USD; EUR = 20.58 MXN; EUR = 4.01 TRY

Ability to access the funding markets in all our main subsidiaries using a diversified set of debt instruments
