

Disclosure for global systemically important banks (G-SIBs) indicators as of 31 December 2016

In order to comply with disclosure requirements and methodology described in the July 2013 document entitled "Global systemically important banks: updated assessment methodology and the higher loss absorbency requirement"¹, we attach information, corresponding to the fiscal year 2016.

Although BBVA group is not currently a GSIB, the obligation to disclose is defined as follows: "In accordance with the BCBS standards, all banks with a leverage ratio exposure measure exceeding 200 billion euros (using the exchange rate applicable at the financial year-end) are required to publically disclose information containing at least the 12 indicators defined in GSIB methodology within four months of the financial year end".

The Basel Committee on Banking Supervision (BCBS) assesses the systemic importance of banks in a global context.

Global systemic importance is measured in terms of the impact a bank's failure can have on the global financial system and the wider economy, rather than the risk that a failure could occur.

The measurement approach of the global systemic importance is indicatorbased. The indicators shall reflect the size of banks, their interconnectedness, the lack of readily available substitutes or financial institution infrastructure for the services they provide, their global (cross-jurisdictional) activity and their complexity.

The indicators provided below are calculated based on specific instructions by the BCBS and thus are not directly comparable against other disclosed information.

Please, be aware that this disclosed information could be subject to changes because is still under review by National Supervisor Authority and also by Basel Committee on Banking Supervision.

Articles 128 and 131 of Directive 2013/36/EU of the European Parliament incorporate at European level the obligation to maintain capital buffers for global systemically important entities. This has been transposed to Spanish regulation

by the law 10/2014, "de ordenación, supervisión y solvencia de entidades de crédito". According to this law, capital buffer for systemic entities is being required from January 1st, 2016, subject to transitional period.

Madrid, April 28, 2017

In Million €

Category	Individual indicator	31.12.2016
Cross-Jurisdictional Activity	Cross-Jurisdictional claims	373.789
	Cross-Jurisdictional liabilities	379.645
Size	Total exposures as defined for use in the BIS Basel III leverage ratio ²	773.146
Interconectedness	Intra-financial system assets	72.161
	Intra-financial system liabilities	99.424
	Securities outstanding	132.801
Substitutability/financial institution infrastructure	Assets under custody	680.292
	Payments activity	6.568.272
	Underwritten transactions in debt and equity markets	27.501
Complexity	Notional amount of over-the-counter (OTC) derivatives	2.132.941
	Level 3 Assets	1.264
	Trading and available for sale securities ³	14.873

¹Document available at www.bis.org/publ/bcbs255.htm

² According to the instructions of GSIBs template requirements, this indicator match the definition of total exposures as defined in Basel III leverage ratio framework and disclosure requirements, January 2014, Basel Committee on Banking Supervision, available at www.bis.org/publ/bcbs270.htm. BBVA oficial COREP total exposure for the calculation of leverage ratio as of end-2016 on a fully-loaded basis is € 746.706 millions.

³ After offsetting of trading and available-for-sale securities that meet the definition of unemcumbered Level 1 and Level 2 (after haircuts) assets, as per BCBS definition
