## MAIN MESSAGES

- Slight decrease in activity YoY (-1.1%) as growth in consumer and commercial loans offset by deleverage in mortgages and public sector
- NII evolution in line with expectations (-3.6% YoY)
- Customer spread increased by +6 bps in 2017 thanks to continued focus on profitable growth and lower funding cost
- Cost and impairments reductions as the main P&L drivers:
  - Cost reduction accelerates (- 5.6 YoY) thanks to CX synergies and ongoing efficiency measures
  - Sound asset quality indicators, with CoR better than expected
- Significant reduction of the net exposure in the year, mainly thanks to wholesale transactions
- Net losses in 2017 decreased by 15.8%, even after the negative impact of the update of RE assets provision model parameters in 4Q17
- Cerberus deal (closing expected in 3Q18) will reduce almost entirely the exposure to REOs
- Profitable growth strategy, with a focus on the consumer portfolio
- Positive earnings momentum maintained
  - Strong revenue growth on the back of rate increases
  - Efficiency improvement vs 2016
  - Negative one-off from tax reform in 4Q17 (€-78 m). Pay back expected in 2018
  - CoR better than expected, despite the impact from hurricanes provisions

## MAIN MESSAGES

- +5.5% YoY loan growth, slowdown explained by FX impact on USD book and prepayments in the commercial portfolio in 4Q17
  - Sustained growth in all P&L lines, with outstanding growth of core revenues: NII + fees grow close to double digit
  - Continued positive operating jaws and best in class efficiency
  - Stability of risk indicators; better than expected CoR evolution
  - Double digit P&L bottom line growth
- 
- High growth in TRY loans, supported by the Credit Guarantee Fund
  - Strong core revenue growth (NII and fees). Higher contribution from CPI linkers in 4Q17 due to inflation rate revision (€+141m)
  - Cost growth below inflation; improving efficiency
  - 2017 CoR better than expected
  - Outstanding growth across the board in P&L
- 
- Double digit loan growth supported by Argentina and Colombia
  - Mid-teens growth in core revenues due to higher lending activity
  - Positive operating jaws and costs growing in line with inflation ex-Venezuela
  - Asset quality and CoR better than expected
  - Top line growth translated into the bottom-line

# FX Hedging policy

## Capital

**POLICY** BBVA hedges c.70% of the excess capital (what is not naturally hedged by the ratio)

**GOAL** Reduce Consolidated CET1 ratio volatility as a result of FX movements

### CET1 FL Ratio Sensitivity to a 10% Depreciation of EM Currencies (Dec.17)

APROX  
-1 b.p. For each currency  
(MXN , TRY and rest of EM currencies)

## P&L

**POLICY** BBVA hedges on average between 30%-50% of foreign subsidiaries expected net attributable income

**GOAL** Reduce Net Attributable Profit volatility as a result of FX movements

### 2017 Net Attributable Profit FX Hedging (Dec.17):

33% At a Group level

39% For EM Currencies  
(of which Mexico 48% and Turkey 41%)

P&L hedging costs booked in the Corporate Center's NTI

BBVA maintains a prudent FX hedging policy to ensure low volatility on the CET1 ratio and limited FX impact on the P&L account

MREL

# MREL framework: uncertainty remains but closer to the final outcome

## Key themes to manage

### Perimeter for quantification of MREL

### Calibration

### Treatment of intragroup investments for MREL calculation

### Eligibility of instruments

### Calendar / Transition period

## Hypothesis for BBVA

- BBVA follows a MPE resolution strategy
- MREL perimeter: BBVA Euro subconsolidated level
- BBVA is an O-SII entity: subject to MREL (not TLAC)
- Calibration following SRB policy 2017
- Subsidiaries are self-sufficient both in terms of capital and funding
- 2.5% RWA of senior unsecured probably eligible for MREL initially
- Transition period up to 4 years according to SRB Policy 2017

# BBVA's MREL Strategy: 2018 Plan

## Capital

- BBVA has already filled its AT1 and T2 buckets
- BBVA expects to maintain the 1.5% AT1 and 2% T2 regulatory buckets
- Successful \$1 bn SEC Registered AT1 PNC10 6.125% issue in Nov-17

## SNP

- BBVA's funding plans will be focused on rolling over non-capital wholesale funding maturities into MREL eligible instruments
- 2017:** Successful € 1.5 bn inaugural SNP public issue and € 290 m through private deals
  - 2018<sup>(1)</sup>:** BBVA expects to issue € 2.5-3.5 bn in SNP

(1) Subject to market conditions

## Maturity profile

- Wholesale debt maturity profile offers flexibility to refinance current instruments into new SNP, if required:

### 2018-20 BBVA, S.A. senior & covered bonds maturity profile (BBVA, S.A.; Dec. 17; € bn)

## SNP noteholders have significant buffer

- Significant capital buffer of € 44 bn of subordinated capital (CET1, AT1 and T2)

This plan would position BBVA's capital structure in a very solid stance, waiting for final MREL calibration

# BBVA Eur 1.5 bn 5-year FRN Senior Non-Preferred

## Rationale

- Following up with BBVA's **issuance plan of € 2.5-3.5 bn of SNP** for 2018, **in anticipation of upcoming MREL requirements**, that have yet to be communicated by the resolution authorities
- This issuance is the **first public transaction** in 2018 for BBVA SA, the second one in SNP format <sup>(1)</sup>

## Key Features

- Settlement Date: **9<sup>th</sup> March, 2018**
- Amount: **€ 1.5 bn**
- Maturity: **5 years**
- Coupon: **3mE +60 bps** (FRN-Floating Rate Notes)
- Re-offer Spread at **3mE+52 bps**, after a strong book of c3.2 bn (pre-rec), that allowed c15bps tightening from IPT <sup>(2)</sup> 3mE+high 60s bps. This means no issue concession
- Great book granularity and quality. **Real Money represented 86%** (Fund Managers 77%, Insurance and Pension Funds 9%). In terms of **geographical distribution**, demand was mainly led by **Germany/Austria (35%)**, followed by **Spain (24%)** and France **(14%)**

(1) During 2017 BBVA issued its inaugural SNP € 1.5 bn 0.75% Fixed 5Y and € 290 Mn through private deals (2) IPT= Initial Pricing Talk

BBVA successfully issued a Eur 1.5 bn 5Y FRN Senior Non-Preferred, paying the lowest coupon for a Spanish issuer in this instrument

# MREL framework: creation of SNP layer in Spain

## Insolvency Hierarchy

- Spanish legal framework creating the Senior Non Preferred layer (RDL 11/17) was approved in June
- Clear identification and prioritization of debt securities available to absorb losses:
  - In case of insolvency, ordinary claims will be classified into preferred and non-preferred ordinary claims, the latter having a lower ranking than the former
  - Non-preferred ordinary claims will rank ahead of subordinated claims
- An ordinary claim will only be considered as non-preferred if it meets the following conditions:
  - It has been issued or created with an effective tenor  $\geq 1$  year,
  - It is not a derivative and has no embedded derivative, and
  - The terms include a clause establishing that it has a lower ranking vis-à-vis the remaining ordinary claims
- The creation of this new layer, expressly acknowledges the possibility for Spanish entities to issue senior debt instruments that meet MREL's subordination requirement (similar to the French statutory approach)
