Under this base prospectus (this "**Base Prospectus**"), each of BBVA Global Markets B.V. and BBVA Global Securities B.V. may from time to time issue securities ("**Securities**") denominated in any currency agreed with the relevant Dealer (as defined below). Securities may be in the form of Notes ("**Notes**") or certificates ("**Certificates**") as specified in the applicable Issue Terms (as defined below). As used herein, "**Issuer**" means BBVA Global Markets B.V. or BBVA Global Securities B.V., as the context requires. This Base Prospectus is part of the Issuers' Structured Medium Term Securities Programme (the "**Programme**").

This Base Prospectus constitutes a base prospectus in respect of all Securities other than Exempt Securities (as defined below) issued hereunder for the purposes of Article 8 of the Prospectus Regulation (as defined below). The terms and conditions of the Securities (the "**Conditions**") will comprise the General Conditions and each Annex specified as applicable in the completed Issue Terms (each as defined below). This Base Prospectus, any supplement to this Base Prospectus (a "**Supplement to this Base Prospectus**"), any applicable Annex and the Issue Terms for a Series will comprise the "**Offering Documents**".

Certain Notes issued by BBVA Global Securities B.V. and the guarantee thereof will be offered pursuant to an exemption from registration under the U.S. Securities Act of 1933, as amended (the "**Securities Act**"), provided by Section 3(a)(2) of the Securities Act (the "**3(a)(2) Notes**").

The satisfaction of the Issuer's economic obligations (in cash and in deliverable assets (if applicable)) in respect of the Securities will be unconditionally and irrevocably guaranteed pursuant to a guarantee governed by Spanish law entered into by Banco Bilbao Vizcaya Argentaria, S.A. ("**BBVA**" or the "**Guarantor**") (the "**Spanish Law Guarantee**"), except that the satisfaction of BBVA Global Securities B.V.'s economic obligations in respect of the 3(a)(2) Notes will be unconditionally and irrevocably guaranteed pursuant to a guarantee governed by New York law entered into by Banco Bilbao Vizcaya Argentaria, S.A., acting through its New York Branch (the "**New York Branch**") (the "**New York Law Guarantee**"). As used herein, "**Guarantee**" refers to the Spanish Law Guarantee or the New York Law Guarantee, or the Spanish Law Guarantee and the New York Law Guarantee collectively, as the context requires. The Guarantor and its consolidated subsidiaries are referred to herein as the "**Group**".

Securities may be issued in bearer or registered form (respectively "**Bearer Securities**" and "**Registered Securities**"); however, the 3(a)(2) Notes will be issued only as Registered Securities.

Securities may be issued whose return (whether in respect of any interest payable on such Securities and/or their redemption amount) is linked to one or more indices ("**Index Linked Securities**"), one or more shares or depositary receipts ("**Equity Linked Securities**"), one or more inflation indices ("**Inflation Linked Securities**"), one or more exchange traded fund shares ("**ETF Linked Securities**"), one or more fund shares or units ("**Fund Linked Securities**"), the credit of a specified entity or entities ("**Credit Linked Securities**"), one or more foreign exchange rates ("**Foreign Exchange (FX) Rate Linked Securities**"), one or more EUA contracts ("**EUA Contract Linked Securities**"), one bond ("**Bond Linked Securities**"), one or more custom indices ("**Custom Index Linked Securities**") or any combination thereof ("**Combination Securities**") as more fully described herein. Securities may provide that settlement will be by way of cash settlement ("**Cash Settled Securities**") or potentially physical delivery ("**Physically Settled Securities**") as provided in the Issue Terms.

Securities may be issued on a continuing basis to one or more dealers appointed from time to time by the Issuer (the "**Dealers**" and each a "**Dealer**"). References in this Base Prospectus to the "**relevant Dealer**" shall, in the case of an issue of Securities being (or intended to be) subscribed by more than one Dealer, be to all Dealers agreeing to subscribe for such Securities as designated in each specific issue of Securities.

Investors should ensure that they understand the nature of the relevant Securities and the extent of their exposure to risks and that they consider the suitability of the relevant Securities as an investment in the light of their own circumstances and financial condition. An investment in Securities may involve a high degree of risk and investors should be prepared to sustain a total loss of the purchase price of their Securities. For a discussion of these risks see the "Risk Factors" section on pages 17 to 87 below.

This Base Prospectus (as supplemented as at the relevant time, if applicable) is valid for 12 months from its date in relation to Securities which are to be admitted to trading on a regulated market in the European Economic Area (the "**EEA**") and/or offered to the public in the EEA other than in the circumstances where an exemption is available under Article 1(4) and/or 3(2) of the Prospectus Regulation (as defined below). The obligation to supplement this Base Prospectus in the event of a significant new factor, material mistake or material inaccuracy does not apply when this Base Prospectus is no longer valid. This Base Prospectus has been approved as a base prospectus by the Central Bank of Ireland, as competent authority under Regulation (EU) 2017/1129 (the "**Prospectus Regulation**"). The Central Bank of Ireland only approves this Base Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Such approval should not be considered as an endorsement of the Issuer or Guarantor or the quality of the Securities that are the subject of this Base Prospectus. Investors should make their own assessment as to the suitability of investing in the Securities. Such approval relates only to Securities that are to be admitted to trading on a regulated market for the purposes of the Prospectus Regulation (each

such regulated market being a "**Regulated Market**") and/or that are to be offered to the public in any member state of the EEA in circumstances that require the publication of a prospectus.

Application has been made by BBVA Global Markets B.V. to the Irish Stock Exchange plc trading as Euronext Dublin ("**Euronext Dublin**") for Securities issued under this Base Prospectus by BBVA Global Markets B.V. during the period of 12 months from the date of this Base Prospectus to be admitted to its official list (the "**Official List**") and trading on the Regulated Market of Euronext Dublin. The Regulated Market of Euronext Dublin is a regulated market for the purposes of Directive 2014/65/EU (as amended, "**MiFID II**"). ("**MOT**"), in compliance with the rules of the markets organised and managed by Borsa Italiana, as amended from time to time (*Regolamento dei Mercati organizzati e gestiti da Borsa Italiana S.p.A.*) and related instructions. Application may also be made for Securities issued under this Base Prospectus to be listed and/or admitted to trading on any other Regulated Market.

The requirement to publish a prospectus under the Prospectus Regulation only applies to Securities which are to be admitted to trading on a Regulated Market in the EEA and/or offered to the public in the EEA other than in circumstances where an exemption is available under Article 1(4) and/or 3(2) of the Prospectus Regulation and/or FinSA, as applicable. The requirement to publish a prospectus under FinSA only applies to Securities which are to be admitted to trading and/or publicly offered in Switzerland other than in circumstances where an exemption is available under Articles 36 et seq. FinSA. References in this Base Prospectus to "**Exempt Securities**" are to Securities for which no prospectus is required to be published under the Prospectus Regulation. The Central Bank of Ireland has neither approved nor reviewed information contained in this Base Prospectus in connection with Exempt Securities. 3(a)(2) Notes will be Exempt Securities (as defined below) and will not be listed on any securities exchange or quotation system in the United States. BBVA Global Securities B.V. will only issue Exempt Securities.

Application may be made to the Vienna Stock Exchange for Exempt Securities to be admitted to listing and trading on the Vienna Stock Exchange's multilateral trading facility (the "**Vienna MTF**") during the period of 12 months from the date of this Base Prospectus. The Vienna MTF is not a regulated market for the purposes of MiFID II. Application may also be made to the multilateral trading facility of securitised derivative financial instruments organised and managed by Borsa Italiana S.p.A., in compliance with SeDeX Market Rules as amended from time to time (*Regolamento del Mercato SeDeX*) ("**SeDeX**") for Certificates to be admitted to trading on SeDeX, and the multilateral trading facility EuroTLX organised and managed by Borsa Italiana S.p.A. in compliance with the EuroTLX Market Rules as amended from time to time (*Regolamento del Mercato EuroTLX*) ("**Euro TLX**"), for Certificates to be admitted to trading on Euro TLX and Securities to be admitted to trading on the Taipei Stock Exchange and/or any other stock exchange specified in the applicable Issue Terms. The applicable Issue Terms may provide that certain terms used in the Base Prospectus and in the terms and conditions (including where contained in defined terms) may be changed in the applicable Issue Terms. Any changed term shall be read as a reference to another term and/or definition as used in the terms and conditions and all other parts of the Base Prospectus. Details of such modification of terms and/or definitions will be specified in the applicable Issue Terms.

In particular, in case of Certificates intended to be offered in Italy and/or to be traded on SeDeX and/or EuroTLX, references in this Base Prospectus to (i) "redemption", "redeem" and "redeemed", respectively, shall be construed to be to "termination" and "terminate" and "terminated", (ii) "nominal" and "nominal amount", respectively, shall be construed to be to "invested amount", (iii) "settlement" and "settle" and "settled", respectively, shall be construed to be to "termination" and "terminate" and "terminated", (iv) "interest" shall be construed to be to "coupon", and (v) "maturity date" shall be construed to be to "final termination date", and all related expressions shall be construed accordingly.

Investors bear the credit risk of the Issuer and the Guarantor.

This Base Prospectus may be supplemented from time to time under the terms of the Prospectus Regulation. Any such supplement will, after its approval by the relevant competent authority, be deposited with the reviewing body in Switzerland and published in accordance with Article 64 FinSA.

This Base Prospectus is being provided in the United States to (i) a limited number of "qualified institutional buyers" (each a "**QIB**") as defined in Rule 144A under the Securities Act ("**Rule 144A**") who are also "qualified purchasers" (each a "**QP**") within the meaning of Section 2(a)(51)(A) of the U.S. Investment Company Act of 1940, as amended (the "**1940 Act**"), and the rules and regulations thereunder, and a limited number of Institutional Accredited Investors (as defined below) (each an "**IAI**") who are also QPs that are investors in Securities issued by BBVA Global Markets B.V., (ii) a limited number of QIBs and IAI's (none of which must be QPs) that are investors in Securities issued by BBVA Global Securities B.V. Its use for any other purpose in the United States is not authorised. The Securities (other than the 3(a)(2) Notes), the Spanish Law Guarantee and any Entitlement(s) (as defined below) have not been and will not be registered under the Securities Act or any U.S. state securities laws and may not be offered or sold in the United States or to, or for the account or benefit of, U.S. persons (as defined in Regulation S under the Securities Act ("**Regulation S**") unless an exemption from the registration requirements of the Securities Act is available and only in accordance with such exemption and all applicable securities laws of any state of the United States and any other jurisdiction. The 3(a)(2) Notes and the New York Law Guarantee will be offered pursuant to an exemption from registration provided by Section 3(a)(2) of the Securities Act. The 3(a)(2) Notes and the New York Law Guarantee are not required to be, and have not been, registered under the Securities Act or any U.S. state securities laws or with any governmental authority. See "*Form of Securities*" for a description of the manner and form in which Securities will be issued. The Securities are subject to certain restrictions on transfer, see "*Subscription and Sale and Transfer and Selling Restrictions*". Securities (other than 3(a)(2) Notes) offered in the United States subject to the foregoing restrictions may be offered by BBVA Securities Inc. (in such capacity, the "**Initial Purchaser**"). The Securities, the Guarantee and any Entitlement(s) do not constitute, and have not been marketed as, contracts of sale of a commodity for future delivery (or options thereon) subject to the United States Commodity Exchange Act, as amended (the "**CEA**"), and trading in the Securities has not been approved by the U.S. Commodity Futures Trading Commission pursuant to the CEA. The Securities are not deposits or savings accounts and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency of the United States or any other jurisdiction. ("**FINRA**") (or any successor rule thereto) ("**Rule 5121**"). Consequently, any such offering will be conducted in compliance with the provisions of Rule 5121. See "*Subscription and Sale and Transfer and Selling Restrictions—Conflicts of Interest*".

IMPORTANT - PROHIBITION OF SALES TO EEA RETAIL INVESTORS AND UK RETAIL INVESTORS. Unless otherwise specified in the Issue Terms relating to the Securities, the Securities issued under this Base Prospectus are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to (a) any EEA retail investor in the EEA or (b) any UK retail investor in the United Kingdom ("**UK**"). For these purposes, an "EEA retail investor" means a person who is one (or more) of: (i) a "retail client" as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended or superseded, the "**Insurance Distribution Directive**"); or (iii) not a qualified investor as defined in the Prospectus Regulation. In addition, a "UK retail investor" means a person who is one (or more) of: (i) a "retail client", as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (the "**EUWA**"); (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (as amended, the "**FSMA**") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to EEA retail investors has been prepared and therefore offering or selling the Securities or otherwise making them available to any EEA retail investor may be unlawful under the PRIIPs Regulation. In addition, no key

information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "**UK PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to UK retail investors has been prepared and therefore offering or selling the Securities or otherwise making them available to any UK retail investor may be unlawful under the UK PRIIPs Regulation.

MIFID II PRODUCT GOVERNANCE AND UK MIFIR PRODUCT GOVERNANCE / TARGET MARKET – The applicable Issue Terms in respect of any Securities may include a legend entitled (a) in the case of the EEA, "**MiFID II Product Governance**" and (b) in the case of the UK, "**UK MiFIR Product Governance**", which will outline the target market assessment in respect of the Securities and which channels for distribution of the Securities are appropriate. Any person subsequently offering, selling or recommending the Securities (for the purposes of this paragraph, a "**distributor**") should take into consideration the target market assessment; however, a distributor subject to (a) in the case of the EEA, MiFID II and (b) in the case of the UK, the FCA Handbook Product Intervention and Product Governance Sourcebook (the "**UK MiFIR Product Governance Rules**"), is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for (a) the purpose of the MiFID Product Governance rules under EU Delegated Directive 2017/593 (the "**MiFID Product Governance Rules**"), any Dealer subscribing for any Securities is a manufacturer in respect of such Securities, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules and (b) for the purpose of the UK MiFIR Product Governance Rules, any Dealer subscribing for any Securities is a manufacturer in respect of such Securities, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the UK MiFIR Product Governance Rules.

EU BENCHMARK REGULATION – Amounts payable under the Securities or assets deliverable under the Securities may be calculated or otherwise determined by reference to certain reference rates, indices or other variables, which may constitute a benchmark under the Benchmark Regulation (Regulation (EU) 2016/1011) (the "**BMR**"). If any such reference rate, index or variable does constitute such a benchmark, the applicable Issue Terms in respect of any Securities which are not Exempt Securities will indicate whether or not the administrator thereof is included in the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority ("**ESMA Register**") pursuant to Article 36 of the BMR. Not every reference rate, index or variable will fall within the scope of the BMR. Furthermore, transitional provisions in the BMR, which expire on 1 January 2026, may have the result that the administrator of a particular benchmark is not required to appear in the register of administrators and benchmarks at the date of the applicable Issue Terms. On 19 May 2025, Regulation (EU) 2025/914 of the European Parliament and of the Council amending the BMR (the "**BMR Amendment**") was published in the Official Journal of the EU and will begin to apply from 1 January 2026. According to the BMR Amendment, the scope of the BMR is reduced such that only critical benchmarks, significant benchmarks, certain commodity benchmarks, EU Climate Transition Benchmarks and EU Paris-aligned benchmarks will remain in mandatory scope of the core provisions in the revised regime, excluding non-significant benchmarks therefrom. The registration status of any administrator under the BMR is a matter of public record and, save where required by applicable law, the Issuer does not intend to update any Issue Terms to reflect any change in the registration status of any administrator.

IMPORTANT – SWISS RETAIL INVESTORS - If and to the extent the Securities will be offered, sold or advertised, directly or indirectly to retail clients (*Privatkundinnen und -kunden*) ("**Retail Clients**") pursuant to Article 4 para. 2 FinSA in Switzerland a key investor document (*Basisinformationsblatt*) within the meaning of Article 58 et seq. of FinSA relating to the Securities (a "**FinSA-KID**") would need to be prepared, unless the Retail Clients shall receive a key information document pursuant to the PRIIPs Regulation instead of a FinSA-KID.

Each of BBVA Global Markets B.V. and BBVA Global Securities B.V. is incorporated under Dutch law and has its seat in Amsterdam, the Netherlands but has its tax residency in Spain. The Guarantor is incorporated and has its tax residency in Spain. The guarantor in respect of the 3(a)(2) Notes is Banco Bilbao Vizcaya Argentaria, S.A., acting through its New York Branch. Investors should note the statements on pages 665 to 720 (inclusive) regarding the tax treatment in Spain of income obtained in respect of the Securities.

The Issuer and the Guarantor may agree with the relevant Dealer that Securities may be issued in a form not contemplated by the "*Terms and Conditions of the Securities*" set out herein, in which event a Supplement to this Base Prospectus, if appropriate, will be made available which will describe the effect of the agreement reached in relation to such Securities.

In connection with any offering of Securities under this Base Prospectus, the Dealers are not acting for anyone other than the Issuer and will not be responsible to anyone other than the Issuer for providing the protections afforded to their clients nor for providing advice in relation to the offering.

This Base Prospectus does not constitute an offer to sell or the solicitation of an offer to buy any Securities in any jurisdiction to any person to whom it is unlawful to make the offer or solicitation in such jurisdiction. The distribution of this Base Prospectus and the offer or sale of Securities may be restricted by law in certain jurisdictions. The Issuer, the Guarantor and the Dealer(s) do not represent that this Base Prospectus may be lawfully distributed, or that any Securities may be lawfully offered, in compliance with any applicable registration or other requirements in any such jurisdiction, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by the Issuer, the Guarantor or the Dealer(s) which is intended to permit a public offering of any Securities or distribution of this Base Prospectus in any jurisdiction where action for that purpose is required. The Securities may not be a suitable investment for all investors. Each investor in Securities should realise that investing in the Securities entails significant risks and may not be appropriate for investors lacking financial expertise. - (f) is able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

None of the Issuer, the Guarantor, the Dealer or any affiliate of BBVA has given, and will not give, to any investor in the Securities (either directly or indirectly) any assurance, advice, recommendation or guarantee as to the merits, performance or suitability of such Securities, and the investor should be aware that the Issuer is acting as an arm's-length contractual counterparty and not as an advisor or fiduciary.

The issuer or the financial institution in charge of the acquisition that should not make the reimbursement to the holder of the security according to the previous paragraph, must constitute a deposit for said amount at the disposal of the judicial authority

Any payments to be made on the Securities depend on the ability of the Issuer and the Guarantor to satisfy their obligations as they come due. Investors are subject to the credit risk, and to changes in the market's view of the creditworthiness of the Issuer and the Guarantor, and in the event the Issuer and the Guarantor were to default on its obligations, an investor may not receive any amounts owed to it under the terms of the Securities

For a description of certain risks involved in investing in the Securities, see "*Risk Factors*".

Meetings of Securityholders:

The Agency Agreement contains provisions for convening meetings of Securityholders to consider matters affecting their interests.

RISK FACTORS

RISK FACTORS

In purchasing Securities, investors expose themselves to the risk that the Issuer and the Guarantor may become insolvent, subject to early intervention or resolution measures, or otherwise be unable to make all payments due in respect of the Securities or under the Guarantee. Each of the Issuer and the Guarantor believes that the "Risk Factors relating to the Issuer" and the "Risk Factors relating to the Guarantor" sections below describe the principal risks that may affect their ability to fulfil their obligations under Securities issued under this Base Prospectus. Most of these factors are contingencies which may or may not occur and the inability of the Issuer or the Guarantor to perform its obligations in respect of any Securities may occur for other reasons which may not, based on information currently available to them, be considered significant risks by either the Issuer or the Guarantor or which they may not currently be able to anticipate.

The Securities are subject to risks generally associated with an investment in conventional debt securities, and are senior unsecured obligations of the Issuer. Any payments to be made on the Securities depend on the ability of the Issuer and the Guarantor to satisfy their obligations as they come due. Investors are subject to the credit risk, and to changes in the market's view of the creditworthiness of the Issuer and the Guarantor, and in the event the Issuer and the Guarantor were to default on its obligations, an investor may not receive any amounts owed to it under the terms of the Securities.

In addition, factors which are material for the purpose of assessing the market risks associated with the type of Securities issued under this Base Prospectus and the principal risks inherent in investing in Securities issued under this Base Prospectus are also described below. These are risks that are additional to the risks associated with an investment in conventional debt securities.

Investors in the Securities should consider carefully, among other things in the light of their financial circumstances and investment objectives, all of the information in this Base Prospectus and, in particular, the risk factors set forth below before making an investment decision. Investors may lose the value of their entire investment in certain circumstances.

References herein to "**BBVA**" or to the "**Bank**" shall be read and construed as references to the Guarantor.

The Risk Factors set out below appear under the following headings:

1. Risk Factors relating to the Issuer

- 1.1 The Issuer is dependent on the Guarantor to make payments on the Securities
- 1.2 Certain considerations in relation to the forum upon insolvency of the Issuer
- 1.3 The Issuer may become taxable in a jurisdiction other than Spain

2. Risk Factors relating to the Guarantor

- 2.2 Business Risks

3. Financial Risks

- 3.3 The trading market for securities issued by BBVA depends in part on the research reports of third-party securities analysts
- 3.4 The Group's earnings and financial condition have been, and its future earnings and financial condition may continue to be, materially affected by asset impairment

- 6.8 Additional Risk Factors relating to 3(a)(2) Notes

1. Risk Factors relating to the Issuer

1.1 The Issuer is dependent on the Guarantor to make payments on the Securities

The Issuer is a wholly-owned subsidiary of the Guarantor which was established for the purpose of, among others, issuing Securities and on-lending the proceeds within the Group. The Issuer is therefore dependent upon other members of the Group paying interest on and repaying their debts in a timely fashion. Should the Guarantor fail to pay interest on or repay any debt in a timely fashion, this will have a material adverse effect on the ability of the Issuer to fulfil its obligations under Securities issued under this Base Prospectus.

By virtue of its dependence on the Guarantor, each of the risks described below that affect the Guarantor will also indirectly affect the Issuer.

1.2 Certain considerations in relation to the forum upon insolvency of the Issuer

In the event of insolvency of the Issuer, the court having jurisdiction to open insolvency proceedings and the law applicable to those proceedings and their effects will be determined in accordance with the provisions of Council Regulation (EC) No 848/2015, of May 20, 2015, on insolvency proceedings ("**Regulation 848/2015**"), the Royal Legislative Decree 1/2020, of May 5, 2020, that approved the recast version of the Spanish Insolvency Act (*Real Decreto Legislativo 1/2020, de 5 de mayo, por el que se aprueba el texto refundido de la Ley Concursal*) (as amended, the "**Spanish Insolvency Law**") and the Dutch Insolvency Law (*faillissementswet*) of September 30, 1893 (as amended, the "**Dutch Insolvency Law**"). Pursuant to these provisions, the courts of the place where the Issuer has its centre of main interests shall have jurisdiction to open insolvency proceedings against it and the law applicable to the insolvency proceedings and their effects will be the law of the place where such proceedings are opened.

RISK FACTORS

Under Regulation 848/2015, the centre of main interests should correspond to the place where the debtor conducts the administration of its interests on a regular basis and is therefore ascertainable by third parties. In the case of a company or legal person, Regulation 848/2015 presumes, in the absence of proof to the contrary, that the place of its registered office is the centre of its main interests. Based on this presumption, a Dutch court may consider that it has jurisdiction to open insolvency proceedings against the Issuer. Notwithstanding this presumption, it is arguable that the centre of main interests of the Issuer should be considered to be located in Spain and that the Spanish courts should be the courts with jurisdiction to open insolvency proceedings against it. In addition, even if the centre of main interests of the Issuer were not in Spain, the Spanish court could still open insolvency proceedings (named territorial insolvency proceedings) if they consider that the Issuer has an establishment within the territory of Spain, the effects of which would be limited to the assets of the Issuer situated in Spain.

Securityholders should be aware that, in accordance with the above, in the case of an eventual insolvency of the Issuer, there is uncertainty as to whether the insolvency proceedings would be opened in the Netherlands or in Spain.

1.3 **The Issuer may become taxable in a jurisdiction other than Spain and this may increase the aggregate tax burden on the Issuer**

Since its incorporation, the Issuer has had, on a continuous basis, its place of "effective management" in Spain. For Spanish tax purposes, the Issuer will therefore qualify as a tax resident of Spain on the basis of Spanish domestic law and subject to Spanish taxes. For Dutch tax purposes, a company is considered a tax resident of the Netherlands, irrespective the company's place of "effective management", if it is incorporated under Dutch law (the so-called "**Incorporation Rule**") and will as such in principle be subject to Dutch taxes.

This would result in the Issuer being a tax resident in both Spain and the Netherlands. In such event, the so-called tie-breaker provision (the "**Tie-Breaker Provision**") included in Article 4(4) of the Convention between the Netherlands and Spain for the Avoidance of Double Taxation with respect to Taxes on Income and on Net Wealth (the "**Convention**"), determines that the Issuer should qualify solely as a tax resident in Spain for purposes of the Convention, provided that the Issuer's place of "effective management" is in Spain.

The test of "effective management" is largely a question of fact and degree based on all the circumstances, rather than a question of law. Nevertheless, the relevant case law and OECD guidance suggest that the Issuer is likely to be regarded as having become Spanish tax resident from incorporation and remaining so if, as the Issuer intends, (i) most meetings of its executive directors are prepared and held in Spain (and none will be held in presence in the Netherlands) with a majority of executive directors present in Spain for those meetings; (ii) at those meetings there are full discussions of, and decisions are made regarding, the key strategic issues affecting the Issuer and its subsidiaries; (iii) those meetings are properly minuted; (iv) a majority of its executive directors, together with supporting staff, are based in Spain; and (v) the Issuer has permanent staffed office premises in Spain. These facts and circumstances may change (for example, the directors or the place where board of directors meetings take place may change), and this may result in the Issuer becoming (also) a tax resident of the Netherlands or another jurisdiction.

Furthermore, the applicable tax laws or interpretations thereof, applicable tax treaties, including the Convention and the Tie-Breaker Provision, may change. In the event that the Convention would change, or if Spain and the Netherlands would designate the Convention as a so-called 'covered tax agreement' subject to the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (the "**MLI**"), the Issuer may become (also) a tax resident of the Netherlands (at least until the moment Spain and the Netherlands will reach an agreement on the Issuer's tax residency for purposes of the Convention).

Moreover, the Issuer may become subject to income taxes in other countries with regard to the income generated in the respective other country, for example, due to the existence of a permanent establishment or a permanent representative in such other country.

As a consequence, the Issuer's overall effective income tax rate and income tax expense could materially increase, which could have a material adverse effect the Issuer's financial condition.

2. **Risk Factors relating to the Guarantor**

The description of the risks inherent to the activity of BBVA, its businesses and its operations, as well as the quantitative information on the different risks, based on data referring to the 2024 and 2023 financial years, are

RISK FACTORS

described in this section and it complements what is included in the consolidated financial statements ("**Consolidated Financial Statements**") and the consolidated management report ("**Annual Accounts and Consolidated Management Report**") for the years ended December 31, 2024 and December 31, 2023.

In the Chapter of "**Risk Management**" of the Consolidated Management Report attached to the Consolidated Annual Accounts for the year ended December 31, 2024, the risk principles and policies of the Group are described, as well as the corporate governance scheme on risk management, the internal control model and the tools, circuits and relevant procedures.

Below are detailed the risk factors, arranged by categories according to their nature, which BBVA considers may affect the entity, its activity, the sector in which it develops such activity or the environment in which it operates, and which could adversely affect its business, its results, its financial, economic or equity situation, or its ability to fulfill its obligations.

Within each of the categories, the risks are listed according to the probability of their occurrence and the expected magnitude of their negative impact.

If any of the risks described materialise, the business, the results and the financial situation of BBVA, or of any of the Group's entities, could be adversely and significantly affected.

These are not the only risks that BBVA could face, and it may be the case that other risks materialise in the future, currently unknown or not considered relevant at the present time. For the purposes of the risk factors described below, all references made to BBVA should also be understood as made to all those companies that make up the Group.

2.1 Macroeconomic and Geopolitical Risks

April 2025 macroeconomic and geopolitical risks update

The Group is sensitive to the deterioration of economic conditions and the alteration of the institutional environment of the countries in which it operates, and the Group is exposed to sovereign debt especially in Spain, Mexico and Turkey.

The global economy is undergoing significant changes, driven primarily by the policies of the new U.S. administration. Uncertainty surrounding their consequences is exceptionally high, substantially increasing geopolitical, economic and financial risks.

The recent significant increase in either adopted or announced U.S. tariff on imports from its trade partners have triggered strong financial market volatility, reinforcing risks to the global economic outlook. High uncertainty about the final level and duration of these tariffs, together with the related financial instability, could negatively impact the world economy, worsening the prospects for the macroeconomic environment. As a result of adopted or announced tariffs, global growth could slow or decline. The impact on economic activity could be particularly pronounced in the United States and China, given China's response to the measures announced by the U.S. government and the recent escalation in trade tensions between the United States and China, which could also weigh on other economies.

While fiscal stimulus measures could partially offset the impact of trade protectionism, particularly in the Eurozone, where significant public spending increases have been announced, the impact of higher U.S. tariffs could be amplified by the adoption of retaliatory measures by other countries, sustained uncertainty, weakening confidence levels and evolving financial conditions, among other factors. Increased tariffs would also raise the risk of inflation in the United States, potentially limiting the Federal Reserve's room to cut interest rates in 2025. In contrast, weaker growth in the Eurozone could allow the European Central Bank to implement slightly larger-than-expected rate cuts, although this would also depend, among other factors, on the EU's response to U.S. tariffs, which could create additional inflationary pressures. Beyond higher import tariffs, tighter U.S. controls on migration flows could affect the labour market, add to inflationary pressures and weigh on economic growth. The new U.S. administration's fiscal, regulatory, industrial and foreign policies, among others, could likewise contribute to financial and macroeconomic volatility.

In addition, there is a high risk of sovereign debt tensions, given the high debt levels in both developed and emerging countries, relatively high interest rates, and weak economic growth prospects.

RISK FACTORS

Rising trade protectionism and the growing rivalry between the United States and China, among other factors, could intensify geopolitical tensions, against a backdrop of persistent conflicts in Ukraine and the Middle East. Similarly, recent negotiations aimed at ending the war between Ukraine and Russia could fuel global tensions in the long term, despite potentially having short-term benefits, including downward pressure on energy prices. In response to these risks and the changes in the foreign policy of the new U.S. administration, the European Union has adopted measures to increase military spending, which could support growth but, to some extent, add pressure on inflation and interest rates in the region.

Overall, rising global geopolitical tensions increase uncertainty around the outlook for the world economy and the likelihood of economic and financial disruptions, including an economic recession.

The Group is exposed, among others, to the following general risks related to the economic and institutional environment in the countries where it operates: a deterioration in economic activity, including potential recession scenarios; inflationary pressures that could lead to tightening of monetary conditions; stagflation triggered by intense or prolonged supply shocks, including as a result of a protectionist escalation or a sharp rise in oil and gas prices; exchange rate volatility; adverse developments in real estate markets; changes in the institutional environment of the countries where the Group operates, which could lead to sudden and pronounced GDP contractions and/or shifts in regulatory or government policy, including capital controls, dividend restrictions, or the imposition of new taxes or levies; high levels of public debt or external deficits, which could lead to sovereign credit rating downgrades or even defaults or debt restructurings; the impact of policies adopted by the new U.S. administration, about which significant uncertainty remains; and episodes of financial market volatility, such as those seen recently, that could result in significant losses for the Group.

In Spain, political, regulatory, and economic uncertainty may have a negative impact on economic activity. In Mexico, there is considerable uncertainty regarding the impact of recently approved constitutional reforms, as well as the policies of the new U.S. administration (especially if protectionist measures affect growth expectations). In Turkey, despite the gradual improvement in macroeconomic conditions, the situation remains relatively unstable, marked by pressure on the Turkish lira, high inflation, a significant trade deficit, relatively low central bank foreign exchange reserves, and high external financing costs. Recent political and social tensions could also trigger new episodes of financial volatility and macroeconomic risks. Moreover, uncertainty remains over the impact of the geopolitical situation in the Middle East—particularly in Syria—on Turkey. These factors could lead to a deterioration in the purchasing power and creditworthiness of the Group's customers, both households and corporates. In addition, official interest rates, regulatory and macroprudential policies affecting the banking sector, and currency depreciation in Turkey have impacted and may continue to impact the Group's results. In Argentina, the risk of economic and financial turmoil persists, as the government has substantially changed Argentina's policy framework and is pursuing a strong fiscal and monetary adjustment to curb inflation. Lastly, in Colombia and Peru, climate-related factors, political tensions, and a deterioration of public finances could weigh on economic performance. Furthermore, there is an increasing risk of sovereign debt tensions, given the high debt levels in developed and emerging countries, relatively high interest rates and weak economic growth prospects.

Any of these factors may have a significant adverse effect on the Group's business, financial condition and results of operations.

A deterioration in economic or political conditions in the countries where the Group operates could have a material adverse effect on the Group's business, financial condition and results of operations

The Group is sensitive to the deterioration of economic conditions or the alteration of the institutional environment of the countries in which it operates, especially Spain, Mexico and Turkey, which respectively represented 52.4 per cent., 21.1 per cent. and 11.1 per cent. of the Group's assets as of March 31, 2025 (53.3 per cent., 21.8 per cent. and 10.7 per cent. as of December 31, 2024, respectively, and 59.0 per cent., 22.4 per cent. and 8.8 per cent. as of December 31, 2023, respectively). Additionally, the Group is exposed to sovereign debt, especially sovereign debt in these geographical areas related to these countries.

The global economy is currently facing a number of extraordinary challenges. The war between Ukraine and Russia and armed conflicts and political instability in the Middle East have led to significant disruption, instability and volatility in global markets, particularly in energy markets. Uncertainty about the future development of these conflicts is high. One of the main risks is that they could generate new supply shocks, pushing growth downward and inflation upward (including by contributing to increases in the prices of oil, gas and other commodities and disrupting supply chains), and paving the way for macroeconomic and financial instability episodes.

RISK FACTORS

Geopolitical and economic risks have also increased in recent years as a result of trade tensions between the United States and China, Brexit, and the rise of populism, among other factors. Growing tensions and the rise of populism may lead, among other things, to a deglobalisation of the world economy, an increase in protectionism, a general reduction of international trade and a reduction in the integration of financial markets, any of which could materially and adversely affect the Group's business, financial condition and results of operations.

The countries where the Group operate are also vulnerable to certain country-specific challenges. In Spain, political, regulatory and economic uncertainty has increased since the 2023 general elections, and there is a risk that policies could be adopted that have an adverse impact on the economy or the Group. There is also a risk that political tensions in other European countries could affect Spain. In Mexico, there is high uncertainty on the impact of the recently approved constitutional reforms, as well as on the policies of the new local government and the new U.S. administration (in particular, if protective measures adopted by the United States become more aggressive or persist over time, which could adversely impact the country's economic growth). In Turkey, while there are signs of normalisation in economic policy in general, and monetary policy in particular, since the general elections held in May 2023, macroeconomic conditions remain relatively unstable, characterised by pressures on the Turkish lira, high inflation, a significant trade deficit, low central bank's foreign reserves and high external financing costs. In addition, regulatory and macroprudential policies affecting the banking sector, including measures adopted to increase the weight of Turkish lira-denominated assets and liabilities of the banking system, and economic conditions in Turkey, including changes in official interest rates (with Turkey's real interest rate still being negative given the high inflation) have affected and may continue to affect the Group's results. There is also uncertainty about the impact of the recent developments in the Middle East on Turkey. In particular, recent regime changes in Syria create opportunities, such as a potential increase in exports and lower migration pressures, but also risks, which could cause greater volatility of Turkish financial assets, among other possible consequences.

In Argentina, the risk of economic and financial turbulence persists in a context in which the new government has substantially modified the economic policy framework and has focused its efforts on implementing strong fiscal and monetary adjustments to reduce inflation. In Colombia and Peru, climate factors, political tensions and greater social conflict could have a negative impact on the economy.

Further, the policies to be adopted by the new U.S. government are an additional source of uncertainty for the Mexican and global economy. During February 2025, the U.S. government imposed certain tariffs (some of which were subsequently delayed) on imports from Canada, Mexico and China, which resulted in China adopting retaliatory tariffs. If the announced tariffs affecting Mexico are ultimately implemented, this may have a material adverse effect on Mexico's economy. These and other policies of the new administration—including fiscal, regulatory, industrial or foreign policies—could slow U.S. or global economic growth (especially, if they give rise to trade wars), increase inflation, affect interest rates or otherwise increase financial and macroeconomic instability, any of which could adversely affect the Group's business, financial condition and results of operations.

Moreover, official interest rates, the regulatory and macroprudential policies affecting the banking sector, and currency depreciation have affected and may continue to affect the Group's results. In recent years, the Group's results of operations have been particularly affected by the increases in interest rates adopted by central banks in an attempt to tame inflation, contributing to the rise in both interest revenue and interest expenses. The persistence of interest rates at relatively high levels or any increase in interest rates in the future could adversely affect the Group by reducing the demand for credit and leading to an increase in the default rate of its borrowers and other counterparties. Moreover, the Group's results of operations have been affected by inflation in all countries in which BBVA operates, especially Turkey and Argentina, and by the depreciation of certain currencies, especially the Turkish lira and the Argentine peso.

In the current context, one of the main risks is that inflation remains high, either due to new supply shocks, related for example to the geopolitical and political risks referred to above or climate events, or due to demand factors, caused by an excessively expansionary fiscal policy, the robustness of labour markets, or other factors. Significant inflationary pressures could lead to interest rates remaining higher than currently forecasted, which could negatively affect the macroeconomic environment and financial markets.

Another macroeconomic risk is the possibility of a sharp global growth slowdown. In a context marked by uncertainty and still elevated interest rates, labour markets and aggregate demand could weaken more significantly than expected. Moreover, despite increasing economic stimulus measures, growth in China could slow sharply, with a potentially negative impact on many geographical areas, due to tensions in real estate markets and economic sanctions imposed by the United States, among other factors. Furthermore, there is an increasing risk of sovereign

RISK FACTORS

debt tensions, given the high debt levels in developed and emerging countries, relatively high interest rates and weak economic growth prospects.

Further, the Group is exposed to, among other risks, the following general risks with respect to the economic and institutional environment in the countries in which it operates: a deterioration in economic activity, including recession scenarios; more persistent inflationary pressures, which could trigger a more severe tightening of monetary conditions; stagflation due to more intense or prolonged supply shocks such as, for example, an increase in oil and gas prices to very high levels, which would have a negative impact on disposable income levels in areas that are net energy importers, such as Spain or Turkey, to which the Group is particularly exposed; changes in exchange rates; an unfavorable evolution of the real estate market; changes in the institutional environment of the countries in which the Group operates, which could give rise to sudden and sharp drops in GDP and/or changes in regulatory or government policy, including in terms of exchange controls and restrictions on the distribution of dividends or the imposition of new taxes or charges; high public debt or external deficit, which could lead to a downward revision of the credit ratings of the sovereign debt and even a possible default or restructuring of such debt; and episodes of volatility in the financial markets, which could cause significant losses for the Group.

Any of these factors may have a material adverse effect on the Group's business, financial condition and results of operations.

Political, economic and social conditions in any of Spain, Mexico and Turkey may have a material adverse effect on our business, financial condition and results of operations

The Group has historically carried out its lending activity mainly in Spain, which continues to be its primary business area. In addition, the Group is significantly exposed to Mexico and, to a lesser extent, Turkey. As of December 31, 2024, total risk in financial assets in Spain, Mexico and Turkey (in each case calculated as set forth in Appendix IX (Additional information on risk concentration) of the 2024 Consolidated Financial Statements) amounted to €239,058 million, €143,924 million and €62,473 million, respectively, equivalent to 34 per cent., 21 per cent. and 9 per cent., respectively, of the Group's total risk in financial assets. The Group's gross exposure to loans and advances to customers in Spain, Mexico and Turkey totaled €232,185 million, €91,717 million and €50,083 million, respectively, as of December 31, 2024, representing 55 per cent., 22 per cent. and 12 per cent., respectively, of the Group's total amount of loans and advances to customers.

Given the significance of the Group's exposure to each of Spain, Mexico and Turkey, any adverse change affecting political, economic and social conditions in any such country could have a material adverse effect on the Group's business, financial condition and results of operations.

2.2 Business Risks

The Group's businesses are subject to inherent risks concerning counterparties' credit quality and the value of collateral, particularly in Spain, that strengthens its lending portfolio

The total maximum credit risk exposure of the Group (calculated as set forth in Note 7.2.2 to the 2024 Consolidated Financial Statements) as of March 31, 2024 was €1,003,062 million (€972,990 million and €904,889 million as of December 31, 2024 and 2023, respectively). The Group has exposures to many different products and counterparties, and the credit quality of its exposures can have a significant effect on the Group's earnings. Adverse changes in the credit quality of the Group's counterparties (including borrowers), or any adverse changes in the value of collateral they may have provided, may reduce the value of the Group's assets, and materially increase the Group's write-downs and loss allowances. Credit risk can be affected by a range of factors, including an adverse economic environment, a decrease in consumption or corporate or government spending, changes in the credit sovereign rating or in the rating of individual contractual counterparties, their debt levels and the environment in which they operate, increased unemployment, higher commodity prices (especially of energy commodities), reduced asset values (including as a result of natural disasters), increased retail or corporate insolvency levels, changes in interest rates (as well as the timing, magnitude and pace of these changes), litigation and legal and regulatory developments.

In recent years, the Group's non-performing loan ("NPL") ratio (as defined in the Alternative Performance Measures section of the Consolidated Management Report 2024 (as defined in "INFORMATION Incorporated by Reference" below)) which was 2.9 per cent., 3.0 per cent. and 3.4 per cent. as of March 31, 2025, December 31, 2024 and December 31, 2023, respectively) has remained relatively stable. Improvements in the Group's NPL ratio in 2024 were driven to a significant extent by (i) the increase in lending activity, in particular, loans to

RISK FACTORS

enterprises and, to a lesser extent, consumer and credit card loans (which are loans that generally entail greater profitability but also carry a greater default risk), (ii) the sale of portfolios of non-performing mortgage loans and certain unsecured retail portfolios and (iii) lower net entries of non-performing loans in the mortgage portfolio, particularly in Spain, and higher recoveries globally. While interest rates have begun to decrease in certain countries, they remain relatively high, and the persistence of high interest rates or any increase in interest rates in the future may lead to a deterioration of the Group's NPL ratio and an increase in the Group's risk-weighted assets ("RWAs"). The Group's coverage ratio (as defined in the Alternative Performance Measures section of the Consolidated Management Report 2024) stood at 82 per cent., 80 per cent. and 77 per cent. as of March, 31, 2025, December 31, 2024, December 31, 2023, respectively. See *"The Group's business is particularly vulnerable to interest rates"*.

Furthermore, a deterioration of economic conditions typically results in a decrease in the price of real estate assets. The Group remains significantly exposed to the real estate market, mainly in Spain and, to a lesser extent, Mexico, due to the fact that many of its loans are secured by real estate assets and due to the significant volume of real estate assets that it maintains on its balance sheet. A fall in the price of real estate assets in a particular region would reduce the value of any real estate securing loans granted by the Group in such region and, therefore, in the event of default, the amount of the expected losses related to such loans would increase. Further, a fall in real estate prices could have a material adverse effect on the default rates of the Group's residential mortgage and real estate developer credit portfolios. The balance of the Group's residential mortgage portfolio at a global level was €94,577 million as of December 31, 2024 (€93,358 million and €92,064 million as of December 31, 2023 and 2022, respectively), 71.9% of which related to Spain as of December 31, 2024. Further, the Group's corporate credit portfolios include real estate developers and constructors. As of December 31, 2024, the Group's exposure to the construction and real estate sectors (excluding the mortgage portfolio) in Spain was equivalent to €9,600 million, of which €2,207 million corresponded to loans for construction and development activities in Spain (representing 1.2% of the Group's loans and advances to customers in Spain (excluding the public sector) and 0.3% of the Group's consolidated assets as of December 31, 2024). The total real estate exposure (excluding the mortgage portfolio), including developer credit and foreclosed assets had a coverage ratio of 24% in Spain as of December 31, 2024. Further, the Group's corporate credit portfolios include real estate developers and constructors. As of December 31, 2024, and December 31, 2023, the Group's exposure to the construction and real estate sectors (excluding the mortgage portfolio) in Spain was equivalent to €9,600 million and €9,476 million, respectively, of which €2,207 million and €2,105 million, respectively, corresponded to loans for construction and development activities in Spain (representing 1.2 per cent., of the Group's loans and advances to customers in Spain (excluding the public sector) and 0.3 per cent. of the Group's consolidated assets as of December 31, 2024 and 2023). The total real estate exposure (excluding the mortgage portfolio), including developer credit and foreclosed assets had a coverage ratio of 24 per cent. and 28 per cent., respectively, in Spain as of December 31, 2024 and December 31, 2023, respectively.

The impact of an increase in default rates on the Group will depend on its magnitude, timing and pace, and could be significant. Furthermore, it is possible that the Group has incorrectly assessed the creditworthiness or willingness to pay of its counterparties, that it has underestimated the credit risks and potential losses inherent in its credit exposure, that it has made insufficient provisions for such risks in a timely manner and that it has overestimated the extent to which it may be able to recover certain debts, including aged non-performing loans. The processes involved in making such assessments, which have a crucial impact on the Group's results and financial condition, require difficult, subjective and complex calculations, including forecasts of the impact that macroeconomic conditions could have on these counterparties. In particular, the Group's estimates of losses derived from its exposure to credit risk may prove to be inadequate or insufficient in the current environment of economic uncertainty, which could affect the adequacy of the provisions for insolvencies provided by the Group. An increase in non-performing or low-quality loans could significantly and adversely affect the Group's business, financial condition and results of operations.

The Group's business is particularly vulnerable to interest rates

The Group's results of operations are substantially dependent upon the level of its net interest income, which is the difference between interest income from interest-earning assets and interest expense on interest-bearing liabilities. Changes in market interest rates often affect the Group's interest-earning assets differently from the Group's interest-bearing liabilities. This, in turn, may lead to a reduction in the Group's net interest margin, which could have a material adverse effect on its results. Moreover, changes in interest rates may affect the Group's credit risk exposure.

RISK FACTORS

Interest rates are highly sensitive to many factors beyond the Group's control, including fiscal and monetary policies of governments and central banks, regulation of the financial sector, domestic and international economic and political conditions and other factors. The Group's results of operations have been positively affected by the increases in interest rates adopted by central banks in recent years in an attempt to tame inflation, contributing to a rise in net interest income that exceeded the corresponding rise in funding costs. Interest rates have begun to decline in most of the regions in which BBVA is present (including the Eurozone and the United States) driven by the central banks' monetary policies in response to easing inflationary pressures. However, interest rates remain relatively high compared to prior years. The continued prevalence of high interest rates or any increase in interest rates in the future could adversely affect the Group by reducing the demand for credit, limiting its ability to generate credit for its clients and/or increasing the default rate of its counterparties (including borrowers). In particular, the repayment capacity of loans tied to variable interest rates is more sensitive to changes in interest rates. As of December 31, 2024, and December 31, 2023, 45.6 per cent. and 47.7 per cent., respectively, of the Group's gross exposure to loans and advances to customers with maturity greater than one year had floating-interest rates. Changes in interest rate policies may be implemented at a different pace across regions and it is possible that such policies could be accelerated or reversed based on various factors, such as inflation, economic growth or financial stability concerns among other considerations.

As a result of the foregoing, the evolution of interest rates could have a material adverse effect on the Group's business, financial condition and results of operations. The Group faces increasing competition and is exposed to a changing business model

The markets in which the Group operates are highly competitive and it is expected that this trend will continue in the coming years with the increasing entry of non-bank competitors (some of which have large client portfolios and strong brand recognition) and the emergence of new business models (for example, neobanks, a new generation of financial institutions that operate exclusively online, without physical branch networks). In recent years, the financial services sector has undergone a significant transformation driven by the development of mobile technologies, data-driven innovation, and the entry of new players into activities previously controlled by financial institutions. Although the Group is making efforts to adapt to these changes through its digital transformation, its competitive position is also affected by some regulatory asymmetries that benefit non-bank operators. For example, banking groups are subject to prudential regulations that have implications for most of their businesses, including those in which they compete with non-bank operators (such as FinTechs or BigTechs) that are subject only to regulations specific to the activity they develop or that benefit from loopholes in the regulatory environment. For instance, when banking groups such as the Group carry out financial activities through the use of new technologies, they are generally subject to additional internal governance rules that place such groups at a competitive disadvantage.

Moreover, the widespread adoption of new technologies, including artificial intelligence, cloud computing, big data analysis, crypto currencies and alternative payment systems that do not use the banking system, could erode the Group's business or require the Group to make substantial investments to modify or adapt existing products and services, including its mobile and internet banking capabilities. Likewise, the increasing use of these new technologies and mobile banking platforms could have an adverse impact on the Group's investments in facilities, equipment and employees of the branch network. A faster pace of transformation towards mobile and online banking models could require changes in the Group's commercial banking strategy, including the closure or sale of certain branches and the restructuring of others, and a significant reduction in headcount. These changes could result in sizeable expenses as the Group reconfigures and transforms its commercial network. In addition, the trend towards the consolidation in the banking industry has created larger banks with which the Group must compete. Any failure by the Group to adapt to its competitive environment or failure to implement any necessary changes to its business model efficiently or on a timely basis could have a material adverse impact on the Group's competitive position or otherwise have a material adverse effect on the Group's business, financial condition and results of operations.

The future success of the Group depends, in part, on its ability to use technology to provide suitable products and services for customers and adequately manage information technology obsolescence. While the Group has focused on developing its technological capabilities in recent years and is committed to digitisation, its ability to capture the benefits of emerging technologies and otherwise compete successfully is likely to be adversely affected by, on the one hand, the existing uneven playing field between banks and non-bank players, and on the other hand, the increasing relevance of access to digital data and interactions for customer relationship management, which places digital platforms at an advantage. Digital platforms (such as those maintained by large technology or social media companies, and FinTechs) increasingly dominate access to data and control over digital interactions, and are already eroding the Group's results in highly relevant markets such as payments. These platforms can leverage

RISK FACTORS

their advantage in access to data to compete with the Group in other markets and could reduce the Group's operations and margins in its core businesses such as lending or wealth management. Some of the Group's competitors have created alliances with BigTechs that may affect the Group's ability to compete successfully and could adversely affect the Group. In the event that the Group is not successful in addressing increasing competition, its business, financial condition and results of operations could be materially and adversely affected.

The Group faces risks derived from its international geographic diversification and its significant presence in emerging countries, which exposes it to heightened political risks

The Group is made up of commercial banks, insurance companies and other financial services companies in various countries and its performance as a global business depends on its ability to manage its different businesses under various economic, social and political conditions, as well as different legal and regulatory requirements (including, among others, different supervisory regimes and different tax and legal regimes related to the repatriation of funds or the nationalisation or expropriation of assets). In addition, the Group's international operations may be exposed to risks and challenges to which its local competitors may not be exposed, such as currency risk, the difficulty of managing or supervising a local entity from abroad, political risks (which could affect only foreign investors) or limitations on the distribution or repatriation of dividends, thus worsening its position compared to that of local competitors.

There can be no guarantee that the Group will be successful in developing and implementing policies and strategies in all of the countries in which it operates, some of which have experienced significant economic, political and social volatility in recent decades. In particular, the Group has a significant presence in several emerging countries, particularly in Mexico and in Turkey (see "*Political, economic and social conditions in any of Spain, Mexico and Turkey may have a material adverse effect on our business, financial condition and results of operations*"), and is therefore vulnerable to any deterioration in economic, social or political conditions in these countries. Further, the Group has significant operations in South America.

Generally, emerging economies face higher anti-money laundering and other compliance risks as a result of greater political instability, higher levels of corruption, weaker governance structures and fewer financial and technical resources dedicated to enforcement. Further, emerging markets are generally affected by the conditions of other related markets and by the evolution of global financial markets in general (they may be affected, for example, by the evolution of GDP and interest rates in the United States and the exchange rate of the U.S. dollar), as well as by fluctuations in the prices of commodities. The risks associated with investing in emerging economies, in general, or in emerging markets where the Group operates, in particular, could trigger capital outflows from those economies and adversely affect such economies and therefore the Group. Moreover, emerging countries are more prone experiencing significant changes in inflation and volatility in exchange rates, which may have a material impact on the Group's results of operations, assets (including RWAs) and liabilities. In Turkey, for example, inflation was 44.4 per cent. for the year ended December 2024 (according to the Turkish Statistical Institute, TUIK) and the Turkish lira depreciated 11.1 per cent. against the euro as of December 31, 2024 compared to December 31, 2023.

The Group's operations in emerging countries are also exposed to heightened political risks, such as changes in governmental policies, expropriation, nationalisation, interest rate limits, exchange controls, capital controls, government restrictions on dividends or bank fees and adverse tax policies. For example, the repatriation of dividends from BBVA's Venezuelan, Argentinian and Turkish subsidiaries is subject to certain restrictions and there is no assurance that these restrictions will be lifted in the future, or that further restrictions will not be imposed. Since BBVA's ability to pay dividends depends, in part, on the receipt of dividends from its subsidiaries, such restrictions may affect BBVA's ability to pay dividends.

ESG (as defined below) risks (see "*Environmental, social and governance risks may adversely impact the Group*") may also be higher in the emerging markets where the Group operates as a result of, among other things, more limited resources and capital for ESG investment, lack of comprehensive and reliable data on ESG practices, resource dependency that may lead to unsustainable practices at odds with ESG initiatives and underdeveloped or inconsistently enforced regulatory frameworks.

If the Group failed to adopt effective and timely policies and strategies in response to the risks and challenges it faces in each of the regions where it operates, particularly in emerging countries, the Group's business, financial condition and results of operations could be materially and adversely affected.

RISK FACTORS

Environmental, social and governance risks may adversely impact the Group

Environmental, social and governance ("ESG") factors present risks associated with (i) climate change, including physical risks and transition risks (linked, among others, to changes in regulations, technologies, and market preferences associated with the transition to a less carbon-dependent economy); (ii) other environmental factors, such as biodiversity loss, water stress and other nature-related factors; (iii) social factors, such as human rights, inclusion, diversity and workplace safety; and (iv) corporate governance matters, such as the governance of environmental and social risks.

ESG risks include short, medium and long-term risks that may adversely affect the Group and its customers or counterparties. Such risks are expected to increase and/or evolve over time.

Among others, they include the following:

- Physical risks: the activities of the Group or those of its customers or counterparties could be adversely affected by the physical risks (including acute and chronic) arising from climate change or other environmental challenges. For example, extreme weather events may damage or destroy properties and other assets of the Group or those of its customers or counterparties, make the insurance against certain risks more expensive or unfeasible, result in increased costs, or otherwise disrupt their respective operations (for example, if supply chains are disrupted as a result), diminishing –in the case of the Group’s customers or counterparties - their repayment capacity and, if applicable, the value of assets granted as collateral to the Group. The Group is also exposed to potential long-term physical risks arising from climate change and other environmental challenges, such as any ensuing deterioration in economic conditions that results in credit-related costs, or potential impacts on the Group’s assets and operations. The Group could also be required to change its business models in response to the foregoing.
- Legal and regulatory risks: legal and regulatory changes related to how banks are required to manage climate and other ESG risks or otherwise affecting banking practices or disclosure of information may result in higher compliance, operational and credit risks and costs. The Group’s customers and counterparties may be exposed to similar risks. Further, legal and regulatory changes may result in legal uncertainty and the existence of overlapping or conflicting regulatory or other requirements. They may also give rise to regulatory asymmetries whereby some persons, including the Group and its customers and counterparties, are more heavily regulated than others, placing such persons at a disadvantage. The Group or its customers or counterparties may be unable to meet any new requirements on a timely basis or at all, including new product and service specifications, governance frameworks and practices and disclosure requirements and standards. In addition, in the case of banks, new regulation could include requirements related to lending, investing, capital and liquidity adequacy and operational resilience. The incorporation of ESG risks in the existing prudential framework is still developing and may result in increased risk weighting of certain assets. Moreover, there are significant risks and uncertainties inherent in the development of adequate risk assessment and modelling capabilities with respect to ESG-related matters and the collection of customer, third party and other data, which may result in the Group’s systems or frameworks (or those of its customers and counterparties, where applicable) being inadequate, inaccurate or susceptible to incorrect customer, third party or other data, any of which could adversely affect the Group’s disclosure and financial reporting. Further, increased regulation arising from climate change and other ESG-related challenges could result in increased litigation by different stakeholders (including non-governmental organisations ("NGOs")) and regulatory investigations and actions.
- Technological risks: certain of the Group’s customers and counterparties may be adversely affected by the progressive transition to a low-carbon economy and/or risks and costs associated with new low-carbon technologies. If the Group’s customers and counterparties fail to adapt to the transition to a low-carbon economy, or if the costs of doing so adversely affect their creditworthiness, this could adversely affect the Group’s relevant loan portfolios.
- Market risks: the Group and certain of the Group’s customers and counterparties may be adversely affected by changes in market preferences due to, among others, increased ESG awareness. Further, the funding costs of businesses that are perceived to be more exposed to climate change or to other ESG-related risks could increase. Any of this could result in the reduced creditworthiness of such customers and counterparties, adversely affecting the Group’s relevant loan portfolios. The Group and its customers and counterparties could also be adversely affected by changes in prices resulting from shifts in demand or supply brought by

RISK FACTORS

climate change or other ESG-related factors, including prices of energy and raw materials, or by their inability to foresee or hedge any such changes.

- Reputational risks: the perception of climate change and other ESG-related challenges as a risk by society, shareholders, customers, governments and other stakeholders (including NGOs) continues to increase, including in relation to the financial sector's activities. This may result in increased scrutiny of the Group's activities, as well as its ESG-related policies, goals, disclosures or communications. The Group's reputation and ability to attract or retain customers may be harmed if its efforts to reduce ESG-related risks are deemed to be insufficient or if a perception is generated among the different stakeholders that the Group's statements, actions or disclosure do not fairly reflect the underlying sustainability profile of the Group, its products, services, goals and/or policies. At the same time, the Group may refrain from undertaking lending or investing activities or other services that would otherwise have been profitable in order to fulfill its obligations or avoid reputational harm. Further, divergent views on ESG policies may also have a negative impact on the Group's reputation. Increased scrutiny of the Group's activities, as well as its ESG-related policies, goals and disclosure may result in litigation and investigations and supervisory actions (including potential greenwashing claims). The Group has disclosed certain aspirational ESG-related goals and such goals, which are being pursued over the long-term, may prove to be considerably more costly or difficult than currently expected, or even impossible, to achieve, including as a result of changes in regulation and policy, the pace of technological change and innovation and the actions of governments and the Group's customers and competitors. Potential greenwashing claims arising from ESG-related statements, disclosure and/or actions of the Group may also give rise to reputational risks.

Any of these factors may have a material adverse effect on the Group's business, financial condition and results of operations.

The outbreak and spread of a pandemic and other large-scale public health events could have a material adverse effect on the Group's business, financial condition and results of operations

Economic conditions in the countries in which the Group operates may be adversely affected by an outbreak of a contagious disease, such as COVID-19 (coronavirus), which develops into a regional or global pandemic and other large scale public health events. The measures that may be taken by governments, regulators and businesses to respond to any such pandemic or event may lead to slower or negative economic growth, supply disruptions, inflationary pressures and significant increases in public debt, and may also adversely affect the Group's counterparties (including borrowers), which may lead to increased loan losses. Such measures could also impact the business and operations of third parties that provide critical services to the Group.

If there were an outbreak of a new pandemic or another large-scale public health event occurs in the future, the Group may experience an adverse impact, which may be material, on its business, financial condition and results of operations, including as a result of the exacerbation of any of the other risks described in this section.

The Group faces risks related to its acquisitions and divestitures activity, including the Exchange Offer

The Group has acquired and sold several companies and businesses over the past few years (For additional information on recent transactions, see "*Description of Banco Bilbao Vizcaya Argentaria, S.A. – Other Relevant Additional Information*" below).

On May 9, 2024, BBVA announced its decision to make a voluntary public takeover offer (the "**Offer**") to acquire all of the issued and outstanding shares of Banco de Sabadell, S.A. ("**Banco Sabadell**"), with the intention to pursue a merger by absorption of Banco Sabadell by BBVA (hereinafter, the "**Merger**"), following settlement of the Offer, subject to market conditions or other circumstances making it inadvisable to carry out such Merger on those terms or at that time.

The Offer is subject to the approval by the CNMV once the non-opposition from the European Central Bank ("**ECB**") has been obtained. Moreover, the Offer is also subject to certain conditions, including, among others, acceptance by a number of shares that would allow BBVA to acquire at least more than half of the voting rights of Banco Sabadell's outstanding shares at the end of the acceptance period (excluding, therefore, any treasury shares held at that time), as well as the authorisation by the Spanish antitrust authorities ("**CNMC**"). There is no assurance that all conditions will be met, or that they will be fulfilled in a timely manner. On April 30, 2025, the CNMC confirmed the approval of the economic concentration resulting from the Offer, subject to compliance with the commitments submitted by BBVA.

RISK FACTORS

On May 27, 2025, the Spanish Minister of Economy, Trade and Business decided to refer the CNMC's resolution to the Council of Ministers for its review on the basis of general public interest. The Council of Ministers has one-month period to issue a decision. As a consequence of the decision by the Spanish Minister of Economy, Trade and Business to refer the CNMC's resolution to the Council of Ministers, such resolution does not become final until a decision is issued by the Council of Ministers or the one month period elapses.

The Council of Ministers could (i) confirm the resolution issued by the CNMC; or (ii) agree to authorize the economic concentration, with or without conditions, and the decision must be based on reasons of general public interest other than the defense of competition. If the economic concentration resulting from completion of the Offer is approved by the Council of Ministers subject to conditions, BBVA may, at its own discretion, before the end of the acceptance period, waive the related offer condition or withdraw the Offer. BBVA will promptly evaluate the expected consequences of any such conditions to determine whether to waive the related offer condition or withdraw the Offer, and publicly announce its decision.

BBVA is unable to predict the cost, scope or impact of the actions that may be required by the Council of Ministers to obtain its authorisation with respect to the economic concentration resulting from completion of the Offer. Any such conditions on the authorisation could be material. Fulfilling the conditions imposed by the Council of Ministers may materially adversely affect BBVA's and Banco Sabadell's business, may delay or prevent completion of the intended merger or impose additional costs on or limit the revenues of the combined group following consummation of the merger. Furthermore, as a result of fulfilling any such conditions, BBVA may be unable to realize all or part of the expected synergies from the Offer, including expected cost savings. Any of the foregoing could adversely affect the price of the Banco Sabadell shares and BBVA shares.

If any of these conditions are not met and, where applicable, BBVA does not waive their fulfillment, BBVA will not be able to settle the Offer.

The Group may not complete the Offer or other ongoing or future transactions in a timely manner.

In the event the Offer is settled, BBVA cannot assure that some or all of the expected benefits of the transaction will be achieved, including cost reduction and financing synergies. BBVA has projected cost synergies of approximately €850 million per year before taxes for Spain and Mexico resulting from the combination, once they are fully realised.

Furthermore, the consummation of the intended merger will require the formulation by BBVA and Banco Sabadell's respective boards of directors of the joint plan of merger, the approval of such joint plan of merger by the respective shareholders of BBVA and Banco Sabadell, and the prior authorisation of the Minister of Economy, Trade and Business, and, accordingly, BBVA can provide no assurance that the intended merger will be consummated. If any of these corporate approvals or the authorisation from the Minister of Economy, Trade and Business, Trade and Enterprise is not obtained, the Merger will not take place.

BBVA may fail to successfully consolidate or otherwise coordinate BBVA's businesses with those of Banco Sabadell, rationalize duplicative administrative functions or benefit from anticipated lower funding costs. For example, if a merger is completed, the operational integration of Banco Sabadell into the BBVA Group could prove to be particularly difficult and complex, may substantially divert management's time, attention and resources and may be more expensive, time consuming and resource intensive than anticipated. The difficulties that could be encountered include integrating personnel, operations and systems, coordinating the geographically dispersed organisations, distraction of management and employees from operations and changes in corporate culture, retaining existing customers and attracting new customers, maintaining business relationships and inefficiencies associated with the integration of the operations of the companies.

Furthermore, if the Offer is settled but BBVA is unable to carry out the Merger, it may become more difficult to integrate the operations of BBVA and Banco Sabadell, and could result in a more complex integration process that requires more time and resources than initially anticipated. This, in turn, could also hinder the achievement of cost savings and other operational efficiencies. If the Merger is not consummated for any reason, it could lead to the inability to realize the expected benefits of the Offer, including cost savings and other operational efficiencies. However, BBVA believes that, even if the Merger is not consummated, it will be able to achieve the majority of the synergies, as it will still be able to centralize certain processes of Banco Sabadell in BBVA and to operate both banks from a joint IT platform with multi-bank functionality for all products, services and systems.

RISK FACTORS

Acquisitions are inherently risky due to the challenges involved in integrating personnel, activities, and technologies. There is no guarantee that the businesses acquired by the Group can be successfully integrated or that, once integrated, they will perform as expected.

Moreover, if such transactions are completed, the Group's operating results could be adversely affected by contingencies and expenses related to the divestitures or acquisitions.

The Group may also be subject to litigation in connection with, or as a result of, the Offer or other divestitures or acquisitions, or arising from them, including claims from terminated employees, customers, or third parties. In the case of an acquisition, the Group may be liable for potential or existing litigation and claims related to an acquired business, including the risk that the Group may not receive adequate compensation for such claims under the terms of the acquisition agreements, or that any compensation received may prove insufficient. Likewise, in the case of a divestment, the Group may be required to indemnify the buyer for similar or other matters, including claims against the divested entity or business.

In acquisition transactions, although the Group conducts analysis of the businesses it intends to acquire, such analyses are often unable to be fully comprehensive in all respects. There may be risks associated with unforeseen events or liabilities related to the acquired assets or businesses that were not disclosed or properly assessed during the due diligence process. As a result, the Group could assume unexpected liabilities or the acquisition may not yield the expected results. In the specific case of the analysis carried out on Banco Sabadell for the purposes of formulating the Offer, BBVA did not have access to non-public information and therefore relied exclusively on publicly available information on Banco Sabadell at the time. This limits BBVA's ability to accurately anticipate and evaluate the consequences of completing the Offer. To the extent that BBVA has not had access to non-public information regarding Banco Sabadell, BBVA's analysis of potential synergies, estimated losses and costs may not be complete in all respects. These estimates could be affected, thereby increasing the risk of unforeseen liabilities arising. Moreover, although BBVA has assumed the accuracy and completeness of the public information regarding Banco Sabadell, such information may contain errors or omissions. Since BBVA has not participated in its preparation, it cannot guarantee that the information is accurate and complete. Any error or omission in the publicly available information about Banco Sabadell could have affected BBVA's analysis and estimates regarding the risks and benefits of the Offer (including the assumptions made by BBVA concerning Banco Sabadell, as well as the expected synergies resulting from the Offer), its decision to launch the Offer, and the determination of its terms and conditions.

Acquisitions may also result in potential impairments or have consequences that adversely affect the Group's operating results. For example, uncertainty surrounding the impact of the Offer on BBVA's employees and clients could negatively affect BBVA's ability to retain and motivate key personnel, both before and after the settlement of the Offer. It could also lead clients, suppliers, partners, and other third parties with whom BBVA maintains relationships to, for instance, postpone entering into contracts with BBVA or take other actions that could negatively affect the Group, including terminating existing business relationships.

Furthermore, if the Offer is not settled, BBVA's share price could be affected or be subject to fluctuations if the current share price reflects expectations that the Offer will be settled. Furthermore, the failure to settle the Offer could negatively impact BBVA's reputation and trigger adverse reactions from investors and clients, as well as negatively affect BBVA's relationships with its employees and customers.

Following settlement of the Offer, the Group will be exposed to specific risk factors of Banco Sabadell, as well as any others that may arise as a result of the settlement of the Offer.

Any of the aforementioned circumstances could result in the Group incurring significant unforeseen expenses, diverting considerable resources and management attention away from other business matters, or otherwise having a materially adverse impact on the Group's business, financial condition and operating results.

The structure, capital, leverage, liquidity, MREL and resolution profile of the Group if the Exchange Offer is completed remains uncertain

Completion of the Exchange Offer may adversely affect the capital, leverage, liquidity, MREL (as defined below) or resolution profile of BBVA or the Group. The information regarding the expected capital impact on the CET1 (as defined below) ratio of the Group if the Exchange Offer is completed represents unaudited estimates prepared by BBVA relating to BBVA and the Target Company. These estimates were prepared by BBVA, based on a number of assumptions and estimates and the publicly available information of the Target Company. Actual

RISK FACTORS

capital ratios of the Group following any closing of the Exchange Offer may be significantly different from BBVA's estimates provided herein. In addition, the regulatory and contractual consequences of the Exchange Offer with respect to outstanding instruments issued by the Target Company have not been analysed by BBVA. Completion of the Exchange Offer and/or the intended Merger could give rise to computability or succession-related issues with respect to certain outstanding instruments of the Target Company or lead to other consequences affecting the obligations of the Target Company and/or BBVA with respect thereto.

Furthermore, the closing of the Exchange Offer may increase the actual or perceived systemic importance of BBVA within the Spanish financial system. If the relevant regulators were to impose additional capital, leverage, liquidity, MREL or resolution requirements or buffers or any other requirements or constraints on the structure or operations of the Group following any closing of the Exchange Offer, this could require the Group to issue additional capital instruments or MREL and/or result in BBVA incurring additional costs.

Any such effects, imposition of additional requirements or buffers or imposition of other requirements or constraints could have a material adverse effect on the Group's business, financial condition and results of operations.

3. Financial Risks

3.1 The Group has a continuous demand for liquidity to finance its activities and the withdrawal of deposits or other sources of liquidity could significantly affect it

Traditionally, one of the Group's main sources of financing has been savings accounts and demand deposits. As of March 31, 2025, December 31, 2024 and December 31, 2023 the balance of customer deposits represented 77 per cent., 77 per cent. and 74 per cent., respectively, of the Group's total financial liabilities at amortised cost. However, the volume of wholesale and retail deposits can fluctuate significantly, including as a result of factors beyond the Group's control, such as general economic conditions, changes in economic policy or administrative decisions that diminish their attractiveness as savings instruments (for example, as a consequence of changes in taxation, coverage by guarantee funds for deposits or expropriations) or competition from other savings or investment instruments (including deposits from other banks). Since 2022, competition for deposits has increased in various of the regions where the Group operates as interest rates have increased and competitors (including neobanks) have offered remuneration on customer deposits. The vast majority of the Group's deposits are demand deposits, which may be freely withdrawn by depositors at any time. The methods for withdrawing or transferring deposits, and the speed with which such transactions may be realised, continue to increase, which could affect the stickiness of the Group's deposit base.

Changes in interest rates and credit spreads may significantly affect the cost of the Group's short- and long-term wholesale financing. Changes in credit spreads are driven by market factors and are also influenced by the market's perception of the Group's solvency. As of March 31, 2025, December 31, 2024 and December 31, 2023, debt securities issued by the Group represented 12.1 per cent., 12.0 per cent., and 12.3 per cent., respectively, of the total financial liabilities at amortised cost of the Group.

In addition, while the Group's current use of public sources of liquidity is limited, the Group has historically made significant use of public sources of liquidity, such as the ECB's extraordinary measures taken in response to the financial crisis since 2008 or those taken in connection with the crisis caused by the COVID-19 pandemic.

In the event of a withdrawal of deposits or other sources of liquidity, especially if it is sudden or unexpected, the Group may not be able to finance its financial obligations or meet the minimum liquidity requirements that apply to it, and may be forced to incur higher financial costs, liquidate assets and take additional measures to reduce leverage. Furthermore, the Group could be subject to the adoption of early intervention measures or, ultimately, to the adoption of a resolution measure by the Relevant Spanish Resolution Authority (as defined below). Any of the above could have a material adverse effect on the Group's business, financial condition and results of operations.

3.2 The Group depends on its credit ratings and sovereign credit ratings, especially Spain's and Mexico's credit ratings

Rating agencies periodically review the Group's debt credit ratings. Any reduction, effective or anticipated, in any such ratings of the Group (including in connection with the completion of the Exchange Offer), whether below investment grade or otherwise, could limit or impair the Group's access to capital markets and other possible

RISK FACTORS

sources of liquidity and increase the Group's financing cost, and entail the breach or early termination of certain contracts or give rise to additional obligations under those contracts, such as the need to grant additional guarantees. Furthermore, if the Group were required to cancel its derivative contracts with some of its counterparties and were unable to replace them, its market risk would worsen. Likewise, a reduction in the credit rating could affect the Group's ability to sell or market some of its products or to participate in certain transactions, and could lead to the loss of customer deposits and make third parties less willing to carry out commercial transactions with the Group (especially those that require a minimum credit rating), having a material adverse effect on the Group's business, financial condition and results of operations.

Furthermore, the Group's credit ratings could be affected by variations in sovereign credit ratings, particularly the rating of Spanish and Mexican sovereign debt. The Group holds a significant portfolio of debt issued by Spain, Spanish autonomous communities, Mexico and other Spanish and Mexican issuers. As of December 31, 2024 and 2023, the Group's exposure (per European Banking Authority ("**EBA**") criteria) to Spain's public debt portfolio was €51,833 million and €46,978 million, respectively, representing 6.7 per cent. and 6.1 per cent. of the consolidated total assets of the Group, respectively. As of December 31, 2024 and 2023, the Group's exposure (per EBA criteria) to Mexico's public debt portfolio was €31,681 million and €38,583 million, respectively, representing 4.1 per cent. and 5.0 per cent. of the consolidated total assets of the Group, respectively. Any decrease in the credit rating of Spain or Mexico could adversely affect the valuation of the respective debt portfolios held by the Group and lead to a reduction in the Group's credit ratings. Additionally, counterparties to many of the credit agreements signed with the Group could also be affected by a decrease in the credit rating of these countries, which could limit their ability to attract additional resources or otherwise affect their ability to pay their outstanding obligations to the Group.

It is possible that current or future economic and geopolitical conditions or other factors could lead to ratings actions and changes to BBVA's credit ratings, any of which could have a material adverse effect on the Group's business, financial condition and results of operations.

3.3 The trading market for securities issued by the Group depends in part on the research reports of third-party securities analysts

The trading market for securities issued by the Group depends in part on the research reports that third-party securities analysts publish about the Group and the industry and the countries in which it operates. The publication by one or more of these analysts of a negative recommendation or unfavorable outlook with respect to the Group (including in connection with the completion of the Exchange Offer) or the industry and countries in which it operates could cause the trading price of any such securities to decline.]

3.4 The Group's earnings and financial condition have been, and its future earnings and financial condition may continue to be, materially affected by asset impairment

Regulatory, business, economic or political changes and other factors could lead to asset impairment. In recent years, severe market events such as the past sovereign debt crisis, rising risk premiums and falls in share market prices, have resulted in the Group recording large write-downs on its credit market exposures. Doubts regarding the asset quality of European banks has also affected their evolution in the market in recent years.

Several ongoing factors could depress the valuation of the Group's assets or otherwise lead to the impairment of such assets (including goodwill and deferred tax assets). These include a deteriorating macroeconomic environment, armed conflict and political instability in the Middle East, the war between Ukraine and Russia, the surge of populist trends in several countries, increased trade and geopolitical tensions and the consequences of Brexit, any of which could increase global financial volatility and lead to the reallocation of assets. In addition, there is risk of a sharp global growth slowdown. Any asset impairments resulting from these or other factors could have a material adverse effect on the Group's business, financial condition and results of operations.

3.5 The Group has a substantial amount of commitments with personnel considered wholly unfunded due to the absence of qualifying plan assets

The Group faces liquidity risk in connection with its ability to make payments on its unfunded commitments with personnel, which it seeks to mitigate, with respect to post-employment benefits, by maintaining insurance contracts which were contracted with insurance companies owned by the Group. The insurance companies have recorded in their balance sheets specific assets (fixed interest deposit and bonds) assigned to the funding of these commitments. The Group's Assets and Liabilities Committee ("**ALCO**") and the insurance companies also

RISK FACTORS

manage derivatives (primarily swaps) to mitigate the interest rate risk in connection with the payments of these commitments. The Group seeks to mitigate liquidity risk with respect to early retirements and post-employment welfare benefits through oversight by the ALCO of the Group. The Group's ALCO manages a specific asset portfolio to mitigate the liquidity risk resulting from the payments of these commitments. These assets are government and covered bonds which are issued at fixed interest rates with maturities matching the aforementioned commitments. Should BBVA fail to adequately manage liquidity risk and interest rate risk either as described above or otherwise, it could have a material adverse effect on the Group's business, financial condition and results of operations.

4. Legal, Regulatory, Tax and Compliance Risks

4.1 Legal Risks

The Group is party to a number of legal and regulatory actions and proceedings

The financial sector faces an environment of increasing regulatory and litigation pressure. The Group is party to government procedures and investigations, such as those carried out by the antitrust authorities which, among other things, have in the past and could in the future result in sanctions, as well as lead to claims by customers and others.

The various Group entities are also frequently party to individual or collective judicial proceedings (including class actions) resulting from their activity and operations, as well as arbitration proceedings. For example, in April 2017, the Mexican Federal Economic Competition Commission (*Comisión Federal de Competencia Económica*) launched an antitrust investigation relating to alleged monopolistic practices of certain financial institutions, including BBVA's subsidiary BBVA Mexico, in connection with transactions in Mexican government bonds. This investigation concluded with the Commission imposing fines on all financial institutions involved, including a fine insignificant in amount imposed on BBVA Mexico, which BBVA Mexico has challenged. In March 2018, BBVA Mexico and certain other affiliates of the Group were named as defendants in a putative class action lawsuit filed in the United States District Court for the Southern District of New York, alleging that the defendant banks and their named subsidiaries engaged in collusion with respect to the purchase and sale of Mexican government bonds. In December 2019, following a decision from the judge assigned to hear the proceedings, the plaintiffs withdrew their claims against BBVA Mexico's affiliates. In November 2020, the judge granted the remaining defendants' motion to dismiss for lack of personal jurisdiction. The plaintiffs filed a motion for reconsideration of that decision in May 2021, which the judge denied in March 2022. Final judgment dismissing the plaintiffs' claims was entered in August 2022. In September 2022 the plaintiffs appealed the district court's decisions to the United States Court of Appeals for the Second Circuit. On February 9, 2024, the United States Court of Appeals for the Second Circuit vacated the district court's decisions, and in June 2024, the plaintiffs filed a new complaint in the United States District Court for the Southern District of New York. In July 2024, the defendants moved to dismiss the new complaint. On January 15, 2025, the judge denied the defendants' motion to dismiss. The case is ongoing.

More generally, in recent years, regulators have increased their supervisory focus on consumer protection and corporate behaviour, which has resulted in an increased number of regulatory actions.

In Spain and in other jurisdictions where the Group operates, legal and regulatory actions and proceedings against financial institutions, prompted in part by certain national and supranational rulings in favour of consumers (with regards to matters such as credit cards and mortgage loans), have increased significantly in recent years and this trend could continue in the future. Legal and regulatory actions and proceedings faced by other financial institutions in relation to these and other matters, especially if such actions or proceedings result in favourable resolutions for the consumer, could also adversely affect the Group.

There are also claims before the Spanish courts challenging the validity of certain revolving credit card agreements. Rulings in these types of proceedings, whether against the Bank or other financial institutions, could negatively affect the Group.

All of the above may result in a significant increase in operating and compliance costs and/or a reduction in revenues, and it is possible that an adverse outcome in any proceedings (depending on the amount thereof, the penalties imposed or the resulting procedural or management costs for the Group) could materially and adversely affect the Group, including by damaging its reputation.

RISK FACTORS

It is difficult to predict the outcome of legal and regulatory actions and proceedings, both those to which the Group is currently exposed and those that may arise in the future, including actions and proceedings relating to former Group subsidiaries or in respect of which the Group may have indemnification obligations. Any of such outcomes could be adverse to the Group. In addition, a decision in any matter, whether against the Group or against another credit entity facing similar claims as those faced by the Group, could give rise to other claims against the Group. In addition, these actions and proceedings draw resources away from the Group and may require significant attention on the part of the Group's management and employees.

As of December 31, 2024, the Group had €791 million in provisions for the proceedings it is facing, of which €610 million correspond to legal contingencies and €181 million to tax related matters. However, the uncertainty arising from these proceedings (including those for which no provisions have been made, either because the probability of an unfavorable outcome for the Group is estimated to be remote, or because it is not possible to estimate them or for other reasons) makes it impossible to guarantee that the possible losses arising from the resolution of these proceedings will not exceed, where applicable, the amounts that the Group currently has provisioned and, therefore, could affect the Group's consolidated results in a given period.

As a result of the above, legal and regulatory actions and proceedings currently faced by the Group or to which it may become subject in the future or which may otherwise affect the Group, whether individually or in the aggregate, if resolved in whole or in part adversely to the Group's interests, could have a material adverse effect on the Group's business, financial condition and results of operations.

The Spanish judicial authorities are carrying out a criminal investigation relating to possible bribery and revelation of secrets by BBVA

The Spanish judicial authorities are investigating the activities of Centro Exclusivo de Negocios y Transacciones, S.L. ("Cenyt"). This investigation includes the provision of services to the Bank. In this regard, on July 29, 2019, BBVA was notified of the order issued by Central Investigative Court No. 6 of the National Court, which declared the Bank an investigated party in Preliminary Proceedings No. 96/2017 – Investigation Part No. 9 for alleged acts that could constitute the crimes of bribery, discovery and disclosure of business secrets, and corruption in business. Certain current and former Group executives and employees, as well as former directors, are also being investigated in connection with this case. Since the beginning of the investigation, the Bank has been proactively collaborating with judicial authorities, having shared with the courts the relevant documentation obtained in the internal investigation commissioned by the bank in 2019 to contribute to the clarification of the facts.

By order of the Criminal Division of the National Court, the investigation phase concluded on January 29, 2024. On June 20, 2024, the Judge issued an order ordering the continuation of the proceedings through the abbreviated procedure against the Bank and against certain current and previous Bank executives and employees, as well as certain former directors, for alleged acts that could constitute the crimes of bribery and discovery and disclosure of secrets.

It is not possible to predict at this time the possible outcomes or implications for the Group of this matter, including potential fines and damages or harm to the Group's reputation resulting from it.

4.2 Regulatory, Tax, Compliance and Regulatory Risks

The financial services sector is one of the most regulated sectors in the world. The Group is subject to a broad regulatory and supervisory framework, which has increased significantly in the last decade. Regulatory activity in recent years has affected multiple areas, including changes in accounting standards; strict regulation of capital, liquidity and remuneration; bank charges and taxes on financial transactions; regulations affecting mortgages, banking products and consumers and users; recovery and resolution measures; stress tests; prevention of money laundering and terrorist financing; market abuse; conduct in the financial markets; the protection of personal data anti-corruption; and requirements as to the periodic publication of information. Governments, regulatory authorities and other institutions continually make proposals to strengthen the resistance of financial institutions to future crises. Further, there is an increasing focus on the climate-related financial risk management capabilities of banks.

Furthermore, the international nature of the Group's operations means that the Group is subject to a wide and complex range of local and international regulations in these matters, sometimes with overlapping scopes and areas regulated. This complexity, which can be exacerbated by differences and changes in the interpretation or

RISK FACTORS

application of these standards by local authorities, makes compliance risk management difficult and costly, requiring highly sophisticated monitoring, qualified personnel and general training and awareness of employees.

Any change in the Group's business that is necessary to comply with any particular regulations at any given time, especially in Spain, Mexico or Turkey, could lead to a considerable loss of income, damage to the Group's reputation, limit the Group's ability to identify business opportunities, affect the valuation of its assets, force the Group to increase its prices and, therefore, reduce the demand for its products, impose additional costs on the Group or otherwise adversely affect its business, financial condition and results of operations.

The Group is subject to a comprehensive regulatory and supervisory framework, including resolution regulations, which could have a material adverse effect on its business, financial condition and results of operations

The Group is subject to a comprehensive regulatory and supervisory framework, the complexity and scope of which has increased significantly following the 2008 financial crisis and the crisis caused by the COVID-19 pandemic. In particular, the banking sector is subject to continuous scrutiny at the political level and by the supervisory bodies, and it is foreseeable that in the future there will continue to be political intervention in regulatory and supervisory processes, as well as in the governance of the main financial entities. For these reasons, the laws, regulations and policies to which the Group is subject, as well as their interpretation and application, may change at any time. In addition, supervisors and regulators have significant discretion in carrying out their duties, which gives rise to uncertainty regarding the interpretation and implementation of the regulatory framework. Moreover, regulatory fragmentation and the implementation by some countries of more flexible or stricter rules or regulations could also negatively affect the Group's ability to compete with financial institutions that may or may not have to comply with any such rules or regulations, as applicable.

Regulatory changes over the last decade, as well as those currently being proposed (including changes in the interpretation or application of existing regulations), have increased and may continue to substantially increase the Group's operating expenses and adversely affect its business model. For example, the imposition of prudential capital standards has limited and is expected to continue to limit the ability of subsidiaries to distribute capital to the Group, while liquidity standards may lead the Group to hold a higher proportion of financial instruments with higher liquidity and lower performance, which can adversely affect its net interest margin. The Group's regulatory and supervisory authorities may also require the Group to increase its loan loss allowances and record asset impairments, which could have an adverse effect on its financial condition. Any legislative or regulatory measure, any necessary change in the Group's business operations as a consequence of such measures, as well as any failure to comply with them, could result in a significant loss of income or reputation, represent a limitation on the ability of the Group to take advantage of business opportunities and offer certain products and services, affect the value of the Group's assets, force the Group to increase prices (which could reduce the demand for its products), impose additional compliance costs or result in other possible adverse effects for the Group.

One of the most significant regulatory changes resulting from the 2008 financial crisis was the introduction of resolution regulations (see "*Risks related to early intervention and resolution*"). In the event that the Relevant Spanish Resolution Authority (as defined below) considers that the Group is in a situation where conditions for early intervention or resolution are met, it may adopt the measures provided for in the applicable resolution regulations, including without prior notice. Such measures could include, among others, the write down and/or conversion into equity (or other securities or obligations) of the Group's unsecured debt. Likewise, the Relevant Spanish Resolution Authority may apply Non-Viability Loss Absorption (see "*Risks related to early intervention and resolution*") in the event that it determines that the entity meets the conditions for its resolution or that it will no longer be viable unless capital instruments are written down or converted into equity or extraordinary public support is provided. Any such determination, or the mere possibility that such determination could be made, could materially and adversely affect the Group's business, financial condition and results of operations, as well as the market price and behaviour of certain securities issued by the Group (or their terms, if amended following any exercise of the Spanish Bail-in Power (see "*Risks related to early intervention and resolution*"). In addition, on April 18, 2023, the European Commission adopted a legislative package proposal to adjust and strengthen the European Union's existing bank crisis management and deposit insurance framework (the "**CMDI Proposal**"), which had been under development for some time and was accelerated in light of recent failures. The proposal implies the review of the BRRD and SRM Regulation (each, as defined below) frameworks as well as a separate legislative proposal to amend Directive 2014/49/EU, of 16 April, on deposit guarantee schemes ("**Directive 2014/49**"), all with the aim of preserving financial stability, protecting taxpayers' money and providing better protection for depositors (including new rules that foresee that all deposits relative to ordinary unsecured claims are preferred).

RISK FACTORS

The CMDI Proposal enables authorities to organise an orderly market exit for a failing bank of any size and business model and consists of three pillars: (i) preserving financial stability and protecting taxpayers' money through facilitating the use of deposit guarantee schemes in crisis situations; (ii) shielding the real economy from the impact of bank failure by allowing authorities to fully use resolution as a key component of the crisis management toolbox; and (iii) better protecting depositors. The CMDI Proposal also includes a targeted amendment of the "daisy chains" proposal as a separate legal instrument to address specific issues on the treatment of internal MREL. In particular, the CMDI Proposal harmonises the standards of depositor protection across the European Union and further extends the new framework of depositor protection to public entities. Furthermore, the proposal harmonises the protection of temporary high balances on bank accounts in excess of €100,000 linked to specific life events. Additionally, the CMDI Proposal, includes, among other things, the amendment of the ranking of claims in insolvency to provide for a general depositor preference, pursuant to which the insolvency laws of Members States would be required by the BRRD to extend the legal preference of claims in respect of deposits relative to ordinary unsecured claims to all deposits (covered deposits and deposit guarantee schemes' claims, non-covered deposits of households and small and medium enterprises and other non-covered deposits).

On 20 March 2024, the Economic and Monetary Affairs Committee of the European Parliament voted in favour of a compromise on amendments to the CMDI Proposal. On 24 April 2024, the European Parliament voted in plenary to adopt three legislative texts on CMDI Proposal framework. On 19 June 2024, the European Council agreed on negotiating mandate on the review of the CMDI Proposal and once an agreement is reached, it would have to be formally adopted before becoming law. Following this agreement, the trilogue between the European Commission, the Council of the European Union, and the European Parliament began, with subsequent meetings held on 14 January 2025 and 4 February 2025. Further trilogues are expected for the final shape of the legislation

Increasingly onerous capital and liquidity requirements may have a material adverse effect on the Group's business, financial condition and results of operations

The Group is subject to various minimum capital, liquidity and funding requirements, among others. For example, in its capacity as a Spanish credit institution, the Group is subject to compliance with a "Pillar 1" solvency requirement, a "Pillar 2" solvency requirement and a "combined buffer requirement", at both the individual and consolidated levels.

While the Group believes it meets its current requirements (as applicable to BBVA and the Group as a whole, respectively), the capital requirements, the minimum requirement for own funds and eligible liabilities (the "MREL") and the calculation of the own funds and the eligible liabilities available for MREL purposes are subject to interpretation and change and, therefore, no assurance can be given that the Group's interpretation is the appropriate one or that BBVA and/or the Group will not be subject to more stringent requirements at any future time. Likewise, no assurance can be given that BBVA and/or the Group will be able to fulfil whatever future requirements may be imposed, even if such requirements were to be equal or lower than those currently in force, or that BBVA and/or the Group will be able to comply with any capital target that may have been announced to the market. Any such failure could be adversely perceived by investors and/or supervisors who could interpret that a lack of capital-generating capacity for BBVA and/or the Group exists or that the capital structure has deteriorated, either of which could adversely affect the market value or behaviour of securities issued by BBVA and/or the Group (any of its capital instruments and eligible liabilities). Further, BBVA and/or the Group may report amounts different from consensus estimates, which may also affect market perceptions of BBVA and the Group.

If BBVA or the Group failed to comply with its "combined buffer requirement", BBVA would have to calculate the Maximum Distributable Amount ("MDA") and, until such calculation has been undertaken and reported to the Bank of Spain, BBVA would not be able to make any (i) distributions relating to CET1 capital; (ii) payments related to variable remuneration or discretionary pension benefits; and (iii) distributions linked to additional tier 1 (AT1) instruments (collectively, "discretionary payments"). Once the MDA has been calculated and reported, such discretionary payments would be limited to the calculated MDA. Likewise, should BBVA or the Group not meet the applicable combined buffer requirement, it could result in the imposition of additional requirements of "Pillar 2". Regarding MREL, failure by BBVA to meet its respective "combined buffer requirement" for these purposes, taken together with its MREL requirements could result in the imposition of restrictions or prohibitions on discretionary payments (the "MREL-MDA"). Additionally, failure to comply with the capital requirements may result in the implementation of early intervention measures or, ultimately, resolution measures by the resolution authorities.

RISK FACTORS

Regulation (EU) 2019/876 of the European Parliament and of the Council, of May 20, 2019 (as amended, replaced or supplemented at any time, "**CRR II**") establishes a binding requirement for the leverage ratio effective from June 28, 2021 of 3 per cent. of Tier 1 capital (as of March 31, 2025 and December 31, 2024 the phased-in and the fully loaded leverage ratios of the Group were 6.94 per cent. and 6.81 per cent., respectively). Any failure to comply with this leverage ratio buffer may also result in the need to calculate and report the MDA, and restrictions on discretionary payments. Moreover, CRR II proposes new requirements that capital instruments must meet in order to be considered AT1 or Tier 2 instruments. Once the grandfathering period in CRR II has elapsed, AT1 and/or Tier 2 instruments which do not comply with the new requirements at such date will no longer be considered as capital instruments. This could give rise to shortfalls in BBVA's or the Group's regulatory capital and, ultimately, could result in failure to comply with the applicable minimum regulatory capital requirements, with the aforementioned consequences.

Additionally, the implementation of the ECB expectations regarding prudential provisions for NPLs (published on May 15, 2018) and the ECB's review of internal models being used by banks subject to its supervision for the calculation of their RWAs ("**TRIM**"), as well as complementary regulatory initiatives like the EBA's roadmap to repair internal models used to calculate own funds requirements for credit risk under the Internal Ratings Based (IRB) approach, could result in the need to increase provisions for future NPLs and increases in the Group's capital needs.

Furthermore, the implementation of the Basel III reforms (informally referred to as Basel IV) (including changes to the calculation of the Group's operational risk) could result in an increase of BBVA's and the Group's total RWAs and, therefore, could also result in a decrease of BBVA's and the Group's capital ratios. Likewise, the lack of uniformity in the implementation of the Basel III reforms across jurisdictions in terms of timing and applicable regulations could give rise to inequalities and competition distortions. Moreover, the lack of regulatory coordination, with some countries bringing forward the application of Basel III requirements or increasing such requirements, could adversely affect an entity with global operations such as the Group and could affect its profitability.

Additionally, should the Total Loss Absorbing Capacity (TLAC) requirements, currently only imposed upon financial institutions of global systemic importance ("**G-SIBs**"), be imposed on non-G-SIBs entities or should the Group once again be classified as a G-SIB, additional minimum requirements similar to MREL could in the future be imposed upon the Group.

There can be no assurance that the capital or MREL requirements will not adversely affect BBVA's or its subsidiaries' ability to make discretionary payments, or result in the cancellation of such payments (in whole or in part), or require BBVA or such subsidiaries to issue additional securities that qualify as eligible liabilities or regulatory capital, to liquidate assets, to curtail business or to take any other actions, any of which may have adverse effects on the Group's business, financial condition and results of operations. Furthermore, an increase in capital or MREL requirements could adversely affect the return on equity and other of the Group's financial results indicators. Moreover, BBVA's or the Group's failure to comply with their capital or MREL requirements could have a material adverse effect on the Group's business, financial condition and results of operations.

Lastly, the Group must also comply with liquidity and funding ratios. Several elements of the liquidity coverage ratio ("**LCR**") and net stable financing ratio ("**NSFR**"), as introduced by national banking regulators, have required implementing changes in some of the Group's commercial practices, which have exposed the Group to additional expenses (including an increase in compliance expenses) and affected the profitability of its activities and could result in a material adverse effect on the Group's business, financial condition and results of operations.

As of March 31, 2025 December 31, 2024 and December 31, 2023, the Group's LCR was 138 per cent., 134 per cent. and 149 per cent., respectively and its NSFR was 127 per cent., 127 per cent. and 131 per cent., respectively.

The Group is exposed to tax risks that may adversely affect it

The size, geographic diversity and complexity of the Group and its commercial and financial relationships with both third parties and related parties result in the need to consider, evaluate and interpret a considerable number of tax laws and regulations, as well as any relevant interpretative materials, which in turn involve the use of estimates, the interpretation of indeterminate legal concepts and the determination of appropriate valuations in order to comply with the tax obligations of the Group. In particular, the preparation of the Group's tax returns and the process for establishing tax provisions involve the use of estimates and interpretations of tax laws and regulations, which are complex and subject to review by the tax authorities. Any error or discrepancy with tax

RISK FACTORS

authorities in any of the jurisdictions in which the Group operates may give rise to prolonged administrative or judicial proceedings that may have a material adverse effect on the Group's results of operations.

In addition, governments in different jurisdictions, including Spain, have sought to identify new funding sources, and they have recently focused on the financial sector, including in response to the demands of various political forces. The Group's presence in various jurisdictions increases its exposure to regulatory and interpretative changes, which may include (i) increases in the tax rates to which the Group is subject, such as the introduction in Spain of a minimum effective tax rate (18 per cent. of the tax base for credit institutions) since 2022 or EU Council Directive 2022/2523 of December 14, 2022, which introduces a global minimum effective rate of corporate taxation (15 per cent.) for multinational enterprise and large-scale domestic groups in the EU ("**Pillar 2**") and that was transposed Spanish regulation on 21 December 2024, through Law 7/2024, of 20 December, approving a domestic top-up tax ("*Impuesto Complementario*"), (ii) changes in the calculation of tax bases, and exemptions therefrom, such as the introduction of a limitation in Spain since 2021 to the exemption for dividends and capital gains from domestic and foreign subsidiaries to 95 per cent., which means that 5 per cent. of the dividends and capital gains of Group companies will be subject in Spain to, and not exempt from, corporate tax or, (iii) the creation of new taxes and/or levies, like the common financial transaction tax ("**FTT**") in various jurisdictions or the creation of temporary taxes applicable to credit institutions operating in Spain, which initially was intended to apply to fiscal years 2023, with a disbursed amount of €215 million, and 2024, with an estimated amount of €285 million, however, in 2024, Law 7/2024, of 20 December, established a new tax on interests and commissions for fiscal years 2024, 2025 and 2026.

Increases in the tax burden of the Group could materially and adversely affect the Group's business, financial condition and results of operations.

The Group is exposed to compliance risks

The Group, due to its role in the economy and the nature of its activities, is singularly exposed to certain compliance risks. In particular, the Group must comply with regulations regarding customer conduct, antitrust, market conduct, the prevention of money laundering and the financing of terrorist activities, the protection of personal data, the restrictions established by national or international sanctions programs and anti-corruption laws (including the U.S. Foreign Corrupt Practices Act of 1977 and the UK Bribery Act of 2010), the violations of which could lead to very significant penalties. These anti-corruption laws generally prohibit providing anything of value to government officials for the purposes of obtaining or retaining business or securing any improper business advantage. As part of the Group's business, the Group directly or indirectly, through third parties, deals with entities whose employees are considered to be government officials. The Group's activities are also subject to complex customer protection and market integrity regulations.

Generally, these regulations require banking entities to, among other measures, use due diligence measures to manage compliance risk. Sometimes, banking entities must apply enhanced due diligence measures due to the very nature of their activities (among others, private banking, money transfer and foreign currency exchange operations), as they may present a higher risk of money laundering or terrorist financing.

Although the Group has adopted policies, procedures, systems and other measures to manage compliance risk, it is dependent on its employees and external suppliers for the implementation of these policies, procedures, systems and other measures, and it cannot guarantee that these are sufficient or that the employees (124,741, 125,916 and 121,486 as of March 31, 2025, December 31, 2024 and December 31, 2023) or other persons of the Group or its business partners, agents and/or other third parties with a business or professional relationship with the Group do not circumvent or violate regulations or the Group's ethics and compliance regulations, acts for which such persons or the Group could be held ultimately responsible and/or that could damage the Group's reputation. In particular, acts of misconduct by any employee, and particularly by senior management, could erode trust and confidence and damage the Group's reputation among existing and potential clients and other stakeholders. Actual or alleged misconduct by Group entities in any number of activities or circumstances, including operations, employment-related offenses such as sexual harassment and discrimination, regulatory compliance, the use and protection of data and systems, and the satisfaction of client expectations, and actions taken by regulators or others in response to such misconduct, could lead to, among other things, sanctions, fines and reputational damage, any of which could have a material adverse effect on the Group's business, financial condition and results of operations.

Furthermore, the Group may not be able to prevent third parties outside the Group from using the banking network in order to launder money or carry out illegal or inappropriate activities. Further, financial crimes continually

RISK FACTORS

evolve and emerging technologies, such as cryptocurrencies and blockchain, could limit the Group's ability to track the movement of funds. Additionally, in adverse economic conditions, it is possible that financial crime attempts will increase significantly.

If there is a breach of the applicable regulations or the Group's ethics and compliance regulations or if the competent authorities consider that the Group does not perform the necessary due diligence inherent to its activities, such authorities could impose limitations on the Group's activities, the revocation of its authorisations and licenses, and economic penalties, in addition to having significant consequences for the Group's reputation, which could have a material adverse effect on the Group's business, financial condition and results of operations. Furthermore, the Group from time to time conducts investigations related to alleged violations of such regulations and the Group's ethics and compliance regulations, and any such investigation or any related proceedings could be time consuming and costly, and its results difficult to predict.

BBVA's financial statements are based in part on assumptions and estimates which, if inaccurate, could cause material misstatement of the results of its operations and financial condition

The preparation of financial statements in compliance with IFRS-IASB requires the use of estimates. It also requires management to exercise judgment in applying relevant accounting policies. The key areas involving a higher degree of judgment or complexity, or areas where assumptions are significant to the consolidated and individual financial statements, include the classification, measurement and impairment of financial assets, particularly where such assets do not have a readily available market price, the assumptions used to quantify certain provisions and for the actuarial calculation of post-employment benefit liabilities and commitments, the useful life and impairment losses of tangible and intangible assets, the valuation of goodwill and purchase price allocation of business combinations, the fair value of certain unlisted financial assets and liabilities, the recoverability of deferred tax assets and the exchange and inflation rates of certain countries where the Group operates. There is a risk that if the judgment exercised or the estimates or assumptions used subsequently turn out to be incorrect then this could result in significant loss to the Group beyond that anticipated or provided for, which could have a material adverse effect on the Group's business, financial condition and results of operations.

Observable market prices are not available for many of the financial assets and liabilities that the Group holds at fair value and a variety of techniques to estimate the fair value are used. Should the valuation of such financial assets or liabilities become observable, for example as a result of sales or trading in comparable assets or liabilities by third parties, this could result in a materially different valuation to the current carrying value in the Group's financial statements.

The further development of standards and interpretations under IFRS-IASB could also significantly affect the results of operations, financial condition and prospects of the Group.

5. Operational Risks

Attacks, failures or deficiencies in the Group's procedures, systems and security or those of third parties to which the Group is exposed could have a material adverse effect on the Group's business, financial condition and results of operations, and could harm its reputation

The Group's activities depend to a large extent on its ability to process and report effectively and accurately on a high volume of highly complex transactions with numerous and diverse products and services (by their nature, generally ephemeral), in different currencies and subject to different regulatory regimes. Therefore, it relies on highly sophisticated information technology ("IT") systems for data transmission, processing and storage. However, IT systems are vulnerable to various problems, such as hardware and software malfunctions, computer viruses, hacking, and physical damage to IT centers. BBVA's exposure to these risks has increased significantly in recent years due to the Group's implementation of its ambitious digital strategy. Digital sales now amount to 66 per cent. of the total units sold. Digital services, as well as other alternatives that BBVA offers users to become BBVA customers, have become even more important after the COVID-19 outbreak and the ensuing restrictions on mobility in the countries in which the Group operates. Currently, approximately 66 per cent. of new clients choose digital channels to start their relationship with BBVA. The Group suffers cybersecurity incidents and system failures from time to time, and any such incident or failure could have a material adverse effect on the Group's business, financial condition and results of operations, and could harm its reputation.

Any attack, failure or deficiency in the Group's systems could, among other things, lead to the misappropriation of funds of the Group's clients or the Group itself and the unauthorised disclosure, destruction or use of

RISK FACTORS

confidential information or personal data, as well as prevent the normal operation of the Group, and impair its ability to provide services and carry out its internal management. In addition, any attack, failure or deficiency could result in the loss of customers and business opportunities, damage to computers and systems, violation of regulations regarding data protection and/or other regulations, exposure to litigation, fines, sanctions or interventions, loss of confidence in the Group's security measures, damage to its reputation, reimbursements and compensation, and additional regulatory compliance expenses and could have a material adverse effect on the Group's business, financial condition and results of operations. Furthermore, it is possible that such attacks, failures or deficiencies will not be detected on time or ever. The Group is likely to be forced to spend significant additional resources to improve its security measures in the future. As cyber-attacks are becoming increasingly sophisticated and difficult to prevent (including as a result of the use of artificial intelligence), the Group may not be able to anticipate or prevent all possible vulnerabilities, nor to implement preventive measures that are effective or sufficient.

Customers and other third parties to which the Group is significantly exposed, including the Group's service providers (such as providers of data processing or cloud computing services to which the Group has outsourced certain services), face similar risks. Any attack, failure or deficiency that may affect such third parties could, among other things, adversely affect the Group's ability to carry out operations or provide services to its clients or result in the unauthorised disclosure, destruction or use of confidential information or personal data. Furthermore, the Group may not be aware of such attack, failure or deficiency in time, which could limit its ability to react. Moreover, as a result of the increasing consolidation, interdependence and complexity of financial institutions and technological systems, an attack, failure or deficiency that significantly degrades, eliminates or compromises the systems or data of one or more financial institutions could have a significant impact on its counterparts or other market participants, including the Group.

The prolific use of artificial intelligence technologies has increased the risk of unauthorised access to the Group's IT systems and client accounts and of unauthorised disclosure, destruction or use of confidential information or personal data. While there is potential for these technologies to support BBVA's detection of and defense against unauthorised access attempts and accidental disclosures, malicious or negligent use of these technologies by employees or other third parties may increase these risks. For example, our employees or other third parties may input confidential information into a generative artificial intelligence system (in particular, a system that is managed, owned or controlled by a third party), thereby compromising our business operations or the integrity of the Group's proprietary information or client data. Any such incident of unauthorised access or disclosure could have a material adverse effect on the Group's business, financial condition and results of operations, and could harm its reputation.

5.1 Risks related to early intervention and resolution

The liabilities of the Guarantor including the Guarantee may be subject to loss absorption through their permanent write-down and/or conversion into equity

The Bank Recovery and Resolution Directive (the "**BRRD I**"), as amended by Directive (EU) 2019/879 of the European Parliament and of the Council of 20 May 2019 amending the BRRD as regards the loss-absorbing and recapitalisation capacity of credit institutions and investment firms and Directive 98/26/EC ("**BRRD II**" and together with BRRD I, the "**BRRD**") was implemented in Spain through Law 11/2015, as amended by Royal Decree-Law 11/2017, of 23 June, on urgent measures in financial matters (*Real Decreto-ley 11/2017, de 23 de junio, de medidas urgentes en materia financiera*) ("**RDL 11/2017**") and by Royal Decree-Law 7/2021, of 27 April ("**RDL 7/2021**") which has partially implemented BRRD II in Spain.

BRRD, as implemented in Spain through Law 11/2015 (as amended), together with Royal Decree 1012/2015, of 6 November, implementing Law 11/2015 (the "**RD 1012/2015**") and Regulation (EU) No. 806/2014 of the European Parliament and of the Council of 15 July 2014 establishing uniform rules and a uniform procedure for the resolution of credit institutions and certain investment firms in the framework of a Single Resolution Mechanism and a Single Resolution Fund (as amended, replaced or supplemented from time to time, including by Regulation (EU) 2019/877 of the European Parliament and the Council of 20 May 2019, the "**SRM Regulation**") and its developing regulations is designed to provide authorities with a credible set of tools to intervene sufficiently early and quickly in any relevant unsound or failing credit institution, investment firm, financial institution or holding company (each a "**relevant entity**") so as to ensure the continuity of the relevant entity critical financial and economic functions, while minimising the impact of a relevant entity's failure on the economy and financial system.

RISK FACTORS

The Guarantee is an unsecured and unsubordinated preferred senior obligation of the Guarantor (*crédito ordinario preferente*). Subject to statutory preferences, the Guarantee will rank equally with any of the Guarantor's other unsecured and unsubordinated senior preferred indebtedness (*créditos ordinarios preferentes*). However, the Guarantee will be effectively subordinated to all of the Guarantor's secured indebtedness, to the extent of the value of the assets securing such indebtedness, and other preferential obligations under Spanish law including the covered deposits and natural persons and micro, small and medium enterprises deposits referred to in Additional Provisions 14 of Law 11/2015. The Guarantee is also structurally subordinated to all indebtedness of subsidiaries of the Guarantor insofar as any right of the Guarantor to receive any assets of such companies upon their winding-up will be effectively subordinated to the claims of the creditors of those companies in the winding-up.

As provided in the BRRD, Law 11/2015 and its developing regulations contain four resolution tools and powers including bail-in which gives resolution authorities the power to write down and/or to convert certain claims of unsecured creditors (including the Securityholders (as beneficiaries of the Guarantee) and the Issuer) of a failing relevant entity (such as the Guarantor) (which write-down may result in the reduction of such claims to zero) and to convert certain unsecured debt claims to equity or other instruments of ownership (the "**Spanish Bail-in Power**"), which equity or other instruments could also be subject to any future write-down. Any application of the Spanish Bail-in Power under the BRRD shall be in accordance with the hierarchy of claims in normal insolvency proceedings. Accordingly, the impact of such application on the Securityholders (as beneficiaries of the Guarantee) or the Issuer will depend on their ranking in accordance with such hierarchy, including any priority given to other creditors such as depositors. In this respect, as indicated in "*The Group is subject to a comprehensive regulatory and supervisory framework, including resolution regulations, which could have a material adverse effect on its business, financial condition and results of operations*" above, the CMDI Proposal provides for a general depositor preference in insolvency. If the CMDI Proposal is implemented in its current form, this would mean that the senior preferred claims (such as those arising from the Guarantee) will rank junior to the claims of all depositors, including deposits of large corporates and other deposits that are currently excluded from such privileged claims. Any such general depositor preference would also impact upon any application of the Spanish Bail-in Power, as such application is to be carried out in the order of the hierarchy of claims in normal insolvency proceedings. Accordingly, this would mean that following any such amendment of the insolvency laws of Spain to establish a general depositor preference, any resulting write-down or conversion of the senior preferred claims (such as those arising from the Guarantee) by the Relevant Resolution Authority would be carried out before any write-down or conversion of the claims of depositors such as those of large corporates that, with the current bail-in regime, would have been written-down or converted alongside the senior preferred indebtedness. By removing the requirement for such deposits to be written-down or converted in this manner, one of the stated objectives of this proposed amendment is to reduce the likelihood of deposits generally needing to be included in any such write-down or conversion upon any application of the Spanish Bail-in Power and improve the process for the application of the Spanish Bail-in Power. However, this may have the corresponding impact of increasing the likelihood of any write-down or conversion of the senior preferred claims (including those arising from the Guarantee). Nevertheless, the exact impact of the CMDI Proposal is not known yet given it is still subject to the relevant legislative process and further amendments by the European Parliament and the Council, until the final text is approved and its provisions come into effect.

Additionally, the exercise of the Spanish Bail-in Power and the exercise of any such powers may result in such Securityholders losing some or all of their investment. Such application could involve, the determination that all or part of the Guarantee over the principal amount of any Securities or any liability of BBVA (such as those arising from the Hedging Agreements (as defined below)) towards the Issuer will be subject to loss absorption is likely to be inherently unpredictable and may depend on a number of factors which may also be outside of the institution's control. This determination will be made by the institution's regulators and there may be many factors, including factors not directly related to the institution, which could result in such a determination.

As a result, the exercise of any power under Law 11/2015 or any suggestion of such exercise could materially adversely affect the rights of Securityholders, the price or value of any Securities and/or the ability of the relevant Issuer and the Guarantor to satisfy their respective obligations under any Securities, the Guarantee and the Hedging Agreements.

To the extent any resulting treatment of Securityholders pursuant to the exercise of the Spanish Bail-in Power is less favourable than would have been the case under such hierarchy in normal insolvency proceedings, a Securityholder has a right to compensation under the BRRD based on an independent valuation of the relevant entity (which is referred to as the "*no creditor worse off safeguard*" under the BRRD). Any such compensation is unlikely to compensate that Securityholder for the losses it has actually incurred and there is likely to be a

RISK FACTORS

considerable delay in the recovery of such compensation. Compensation payments (if any) are also likely to be made considerably later than when amounts may otherwise have been due under the Securities.

Securityholders may not be able to exercise their rights on an event of default in the event of the adoption of any early intervention or resolution measure under Law 11/2015 and the SRM Regulation

The Guarantor and, indirectly, the Issuer, may be subject to a procedure of early intervention or resolution pursuant to the BRRD as implemented through Law 11/2015, RDL 7/2021 and RD 1012/2015, and the SRM Regulation, if the Guarantor or its group of consolidated credit entities is in breach (or due, among other things, to a rapidly deteriorating financial condition, it is likely in the near future to be in breach) of applicable regulatory requirements relating to solvency, liquidity, internal structure or internal controls or the conditions for resolution.

Pursuant to Law 11/2015, the adoption of any early intervention or resolution procedure shall not itself constitute an event of default or entitle any counterparty of the Issuer or Guarantor to exercise any rights it may otherwise have in respect thereof and any provision providing for such rights shall further be deemed not to apply. However, this does not limit the ability of a counterparty to declare any event of default and exercise its rights accordingly where an event of default arises either before or after the exercise of any such early intervention or resolution procedure and does not necessarily relate to the exercise of any relevant measure or power which has been applied pursuant to Law 11/2015.

Any enforcement by a Securityholder of its rights under the Securities upon the occurrence of an event of default following the adoption of any resolution procedure will be subject to the relevant provisions of the BRRD, as implemented through Law 11/2015, RDL 7/2021 and RD 1012/2015, and the SRM Regulation in relation to the exercise of the relevant measures and powers pursuant to such procedure, including the resolution tools and powers as referred below.

Any claims on the occurrence of an event of default will consequently be limited by the application of any measures pursuant to the provisions of Law 11/2015, RDL 7/2021 and RD 1012/2015, and the SRM Regulation. The taking of any such action could adversely affect the rights of Securityholders and the price or value of their investment in the Securities as well as the ability of the Issuer and/or the Guarantor to satisfy its obligations under the Securities or the Guarantee. The enforcement by a Securityholder of any rights it may otherwise have on the occurrence of any event of default may be limited in these circumstances.

Additional information on the BRRD and SRM Regulation

In accordance with Article 20 of Law 11/2015, a relevant entity will be considered as failing or likely to fail in any of the following circumstances: (i) it is, or is likely in the near future to be, in significant breach of its solvency or any other requirements necessary for maintaining its authorisation; (ii) its assets are, or are likely in the near future to be, less than its liabilities; (iii) it is, or is likely in the near future to be, unable to pay its debts as they fall due; or (iv) it requires extraordinary public financial support (except in limited circumstances). The determination that a relevant entity is no longer viable may depend on a number of factors which may be outside of that relevant entity's control.

As provided in the BRRD and the SRM Regulation, Law 11/2015 contains four resolution tools and powers, which may be used alone or in combination where the relevant resolution authority considers that (a) a relevant entity is failing or likely to fail, (b) there is no reasonable prospect that any alternative private sector measures would prevent the failure of such relevant entity within a reasonable timeframe, and (c) a resolution action is in the public interest, are: (i) sale of business – which enables resolution authorities to direct the sale of the relevant entity or the whole or part of its business on commercial terms; (ii) bridge institution – which enables resolution authorities to transfer all or part of the business of the relevant entity to a "bridge institution" (an entity created for this purpose that is wholly or partially in public control), which may limit the capacity of the relevant entity to meet its repayment obligations; (iii) asset separation – which enables resolution authorities to transfer certain categories of assets (including impaired or problem assets) to one or more publicly owned asset management vehicles to allow them to be managed with a view to maximising their value through eventual sale or orderly wind-down (this can be used together with another resolution tool only); and (iv) the general bail-in tool.

Pursuant to Law 11/2015 the adoption of any early intervention or resolution procedure shall not itself constitute an event of default or entitle any counterparty of the Issuer or Guarantor to exercise any rights it may otherwise have in respect thereof and any provision providing for such rights shall further be deemed not to apply. However, this does not limit the ability of a counterparty to declare any event of default and exercise its rights accordingly

RISK FACTORS

where an event of default arises either before or after the exercise of any such early intervention or resolution procedure and does not necessarily relate to the exercise of any relevant measure or power which has been applied pursuant to Law 11/2015.

Risks relating to the Spanish Insolvency Law affecting the Guarantor

The Spanish Insolvency Law governs general insolvency and pre-insolvency proceedings in Spain.

The Spanish Insolvency Law establishes a single insolvency proceeding applicable to Spanish debtors (whether incorporated or not) and various preinsolvency tools to try to restructure the debt. In this regard, the Kingdom of Spain implemented the European Directive 2019/1023 of the European Parliament and of the Council of 20 June 2019 on preventive restructuring frameworks, on discharge of debt and disqualifications and on measures to increase the efficiency of procedures concerning restructuring, insolvency and discharge of debt, and amending Directive (EU) 2017/1132, through Spanish Law 16/2022, of 5 September (the "**Insolvency Law Reform**").

The new pre-insolvency instruments established by the Insolvency Law Reform are set out in the Second Book of the Insolvency Law significantly the new restructuring plans. These pre-insolvency instruments replace the refinancing agreements and enable the amendment of the conditions or the structure of the debtor's assets and liabilities, or its equity (among other things). The restructuring plans may also involve the transfer of assets, transfer of business units or transfer of the whole company. However, such pre-insolvency instruments are not applicable to credit institutions such as BBVA.

Furthermore, the Spanish Insolvency Law provides, among other things, that: (i) any claim may become subordinated if it is not reported to the insolvency administrators (*administradores concursales*) within one month from the last official publication in the Official Gazette (*Boletín Oficial del Estado*) of the court order declaring the insolvency, (ii) provisions in a contract granting one party the right to terminate it by reason only of the other's insolvency may not be enforceable (despite this, the Insolvency Law Reform introduced the possibility for the restructuring plan to terminate agreements with bilateral/reciprocal obligations when such actions is deemed necessary for the good of the restructuring plan or to avoid the insolvency of the debtor), and (iii) interest (other than ordinary interest accruing under secured liabilities up to an amount equal to the value of the asset subject to the security and the maximum secured liabilities under the relevant security and provided that a contingent claim has been reported in due course to the insolvency administrator) shall cease to accrue as from the date of the declaration of insolvency and any amount of interest accrued up to such date (other than any interest accrued under secured liabilities up to an amount equal to the lower of the value of the asset subject to the security and the maximum secured liabilities under the relevant security) shall become subordinated.

In addition, as indicated in "*The Group is subject to a comprehensive regulatory and supervisory framework, including resolution regulations, which could have a material adverse effect on its business, financial condition and results of operations*" above, the CMDI Proposal provides for a general depositor preference in insolvency. Therefore, the implementation of the CMDI Proposal in its current form would mean that the senior preferred claims (such as those arising from the Guarantee) will rank junior to the claims of all depositors, including deposits of large corporates and other deposits that are currently excluded from the above privileged claims. Nevertheless, the exact impact of the CMDI Proposal is not known yet given it is still subject to the relevant legislative process and further amendments by the European Parliament and the Council, until the final text is approved and its provisions come into effect.

6. Risk Factors relating to the Securities

6.1 Risk Factors associated with Securities that are linked to specific types of Reference Items

There are certain factors which are material for the purpose of assessing the risks associated with an investment in Securities issued under this Base Prospectus. Such factors will vary depending on the type of Securities issued, in particular in relation to Securities in respect of which amounts payable under the Securities are linked to the value of one or more index, share, inflation index, unit, interest or share in a fund, the credit of one or more reference entity, foreign exchange rate, EUA contracts, bond, custom index or the combination of any of the foregoing.

RISK FACTORS

There are specific risks relating to Equity Linked Securities

The Issuer may issue Securities where the redemption amount or the value of the Entitlement (as defined in General Condition 5(b)(v)) and/or interest payable is dependent upon the price of or changes in the price of shares or a basket of shares (or depositary receipts) or, depending on the price of or change in the price of shares or the basket of shares (or depositary receipts), where the Issuer's obligation on redemption is to deliver a specified number of shares (or depositary receipts) ("**Equity Linked Securities**"). Accordingly, an investment in Equity Linked Securities may bear similar market risks to a direct equity investment and investors should take advice accordingly.

Investors in any such Securities should be aware that, depending on the terms of the Equity Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of the redemption amount and/or interest occur at a different time than expected and (iii) they may lose all or a substantial portion of their investment if the value of the share(s) and/or depositary receipt(s) does not move in the anticipated direction. In addition, the movements in the price(s) of the share(s) or depositary receipt(s) may rise or fall sharply due to factors specific to the share(s) and the issuer(s) of such share(s), such as share or commodity price volatility, earnings, financial conditions, corporate, industry and regulatory developments, management changes and decisions and other events, as well as general market factors, such as general share and commodity market volatility and levels, interest rates and economic, political and other conditions that may affect the actual yield to investors, even if the average price is consistent with their expectations. All these factors and the timing of changes in the relevant price(s) of the share(s) may affect the investments in the Securities and investors should conduct their own investigation into the issuer(s) of the share(s).

The market price of such Securities may be volatile and may be affected by the time remaining to the redemption date, the volatility of the share(s) and/or depositary receipt(s), the dividend rate (if any) and the financial results and prospects of the issuer or issuers of the relevant share(s) or depositary receipt(s) as well as economic, financial and political events in one or more jurisdictions, including factors affecting the stock exchange(s) or quotation system(s) on which any such shares or depositary receipts may be traded.

Upon determining that a Potential Adjustment Event, Extraordinary Event or Additional Disruption Event has occurred in relation to an underlying share or the issuer of such underlying share, the Calculation Agent has broad discretion to make certain determinations to account for such event including to (i) make adjustments to the terms of the Securities and/or (ii) (in the case of an Extraordinary Event or an Additional Disruption Event) cause early redemption of the Securities, any of which determinations may have an adverse effect on the value of the Securities. In addition, in the case of Securities linked to shares where "China Connect" is specified as applicable in the applicable Issue Terms, investors are exposed to additional risks related to the China Connect Service. The China Connect Service is subject to a number of restrictions including pre-trade checking requirements, daily quota restrictions and may also be affected by the intervention of the Chinese Government and/or regulatory bodies in the China market (which may be positive or negative). Such restrictions and uncertainties relating to China Connect may lead to the occurrence of additional adjustment events.

In respect of Securities linked to the performance of an underlying share of the securities market in mainland China for which "China Connect" is not specified as applicable, any hedging arrangement entered into by the Issuer or any of its Affiliates in connection with such Securities may be carried out by the Issuer and/or any of its Affiliates in compliance with and subject to the regime for a Qualified Foreign Investor ("**QFI**", which is a merged regime for the Qualified Foreign Institutional Investor ("**QFII**") scheme and the Renminbi Qualified Foreign Institutional Investor ("**RQFII**") scheme, effective from 1 November 2020). The legal and regulatory requirements under the QFI regime and the developments and changes thereof may affect the ability of the Issuer and/or any of its Affiliates to continue such hedging arrangements. In addition, the Issuer may be subject to other regulatory regimes in mainland China in connection with arrangements relating to such Securities, including those relating to any maximum size of holdings.

If the QFI regime or any other applicable regulatory regime in mainland China changes after the issue date of the relevant Securities, and it is determined that an Additional Disruption Event in the form of Hedging Disruption, Change in Law or Increased Cost of Hedging has occurred as a result, the Calculation Agent has broad discretion to make certain determinations to account for such event including to (i) make adjustments to the terms of the Securities and/or (ii) cause early redemption of the Securities, any of which determinations may have an adverse effect on the value of the Securities. See also risk factor "*The Calculation Agent, which will be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders*" below.

RISK FACTORS

In addition, investors should be aware that the requirements under the QFI regime may lead to the occurrence of adjustment events such as Additional Disruption Event even in the absence of any changes to the QFI regime. This means that the mere operation or application of the QFI regime could trigger adjustment events or early redemption with the consequences as further described above and in the risk factors section in general, regardless of whether there has been a formal update or amendment to the regime. There are important differences between the rights of holders of ADRs and the rights of holders of the non-U.S. stock

There are important differences between the rights of holders of ADRs and the non-U.S. stock represented by such ADRs. Each ADR is a security evidenced by an American Depositary Receipt that represents a specified number of Shares of the non-U.S. stock. Generally, an ADR is issued under a deposit agreement, which sets forth the rights and responsibilities of the depositary, the non-U.S. stock issuer and holders of the ADRs, which may be different from the rights of holders of the non-U.S. stock. For example, the non-U.S. stock issuer may make distributions in respect of the non-U.S. stock that are not passed on to the holders of its ADRs. Any such differences between the rights of holders of the ADRs and holders of the non-U.S. stock may be significant and may materially and adversely affect the value of the ADRs and, as a result, the value of the Securities.

There are specific risks relating to ETF Linked Securities

The Issuer may issue Securities where the redemption amount or the value of the Entitlement (as defined in General Condition 5(b)(v)) and/or interest payable is dependent upon the price of or changes in the price of an exchange traded fund share or a basket of exchange traded fund shares or, depending on the price of or change in the price of an exchange traded fund share or a basket of exchange traded fund shares, where the Issuer's obligation on redemption is to deliver a specified number of shares ("**ETF Linked Securities**"). Accordingly, an investment in ETF Linked Securities may bear similar market risks to a direct ETF investment and investors should take advice accordingly.

Investors in any such Securities should be aware that, depending on the terms of the ETF Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of the redemption amount and/or interest and (iii) they may lose all or a substantial portion of their investment if the value of the ETF share(s) does not move in the anticipated direction. In addition, the movements in the price of the ETF share or basket of ETF shares may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices and the timing of changes in the relevant price of the ETF share or ETF shares may affect the actual yield to investors, even if the average level is consistent with their expectations. All these factors may affect the investments in the Securities.

The market price of such Securities may be volatile and may be affected by the time remaining to the redemption date, the volatility of the ETF share(s), the dividend rate (if any) and the financial results and prospects of the issuer or issuers of the relevant ETF share(s) as well as economic, financial and political events in one or more jurisdictions, including factors affecting the stock exchange(s) or quotation system(s) on which any such ETF shares may be traded.

The market price of such Securities may be volatile and may be affected by the time remaining to the redemption date and the volatility of ETF share(s) as well as the economic, financial and political events in one or more jurisdictions, including the stock exchange(s) or quotation system(s) or pricing source(s) on which the ETF itself, any securities or other components comprising the ETF may be traded. The ETF may comprise equities, bonds or other securities, or it may be an ETF referencing certain price data which will be subject to market price fluctuations or may reference other underlying component types. An index may include valuations only and not actual transactions and the data sources used to compile the index may be subject to change, which may adversely affect the return on the Securities.

Where ETF Linked Securities are linked to an ETF and the investment objective of such ETF is to track the performance of one or more underlying assets or an index, the investors of such Securities are exposed to the performance of such ETF rather than the underlying asset(s) or index such ETF tracks. An ETF may not be able to accurately track the underlying asset(s) or the constituent securities of the underlying index which could give rise to a difference between the performance of the underlying asset(s) or index and such ETF. Accordingly, investor who purchase Securities that are linked to an ETF may receive a lower return than if such investors had invested directly in the asset(s) or the components of the index underlying such ETF.

RISK FACTORS

Upon determining that one or more Potential ETF Events (as defined in ETF Linked Condition 2) has occurred, the Calculation Agent may seek to make adjustments in accordance with the ETF Linked Conditions. Such adjustments may have an adverse effect on the value of the Securities.

Upon determining that one or more Extraordinary ETF Events or Additional Extraordinary ETF Events (as defined in ETF Linked Condition 2) has occurred the Issuer may seek to make adjustments, substitute the relevant ETF Share(s), as the case may be, with exchange traded fund share(s), as the case may be, with similar characteristics or, if no such ETF is selected, with a replacement index, or redeem the Securities at its discretion. Any adjustment or substitution may have an adverse effect on the value of the Securities.

See also risk factor *"The Calculation Agent, which will be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders"* below.

Failure of an ETF to track the level of the index it references

An ETF may be designed and intended to track the level of an index. If this is the case, various factors, including fees and other transaction costs, will prevent the ETF from correlating exactly with changes in the level of the index. Additionally, although the performance of such ETF seeks to replicate the performance of the index, the ETF may not invest in all the securities, futures contracts or commodities comprising the index but rather may invest in a representative sample of the assets comprising the index. The ETF is, therefore, subject to the risk that the investment strategy selected by its investment advisor does not successfully track the level of the index. Accordingly, the performance of the ETF will not be equal to the performance of the index during the term of the Securities.

An ETF may also utilize a passive indexing investment approach rather than being managed according to traditional methods of "active" investment management, which involve the buying and selling of securities based on economic, financial and market analysis and investment judgment. Instead, an ETF may utilize a "passive" or indexing investment approach, which attempts to approximate the investment performance of the index by investing in a portfolio of shares that generally replicate or provide a representative sample of such index. Therefore, unless a specific underlying constituent is removed from the index, the ETF generally would not sell a share because the issuer of such underlying constituent was in financial trouble. In addition, the ETF is subject to the risk that the investment strategy of its investment advisor may not produce the intended results.

There are specific risks relating to Index Linked Securities

The Issuer may issue Securities where the redemption amount and/or interest payable is dependent upon the level of, or changes in the level of, an index or a basket of indices ("**Index Linked Securities**"). Accordingly, an investment in Index Linked Securities may bear similar market risks to a direct investment in the components of the index and investors should take advice accordingly.

Investors in any such Securities should be aware that depending on the terms of the Index Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of the redemption amount and/or interest may occur at a different time than expected and (iii) they may lose all or a substantial portion of their investment if the value of the index/indices does not move in the anticipated direction. In addition, movements in the level of the index or indices may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices and the timing of changes in the relevant level of the index or indices may affect the actual yield to investors, even if the average level is consistent with their expectations. All these factors may affect the investments in the Securities

The market price of such Securities may be volatile and may be affected by the time remaining to the redemption date and the volatility of the level of the index or indices as well as the economic, financial and political events in one or more jurisdictions, including the stock exchange(s) or quotation system(s) or pricing source(s) on which any securities or other components comprising the index or indices may be traded. The index may reference equities, bonds or other securities, or it may be an index referencing certain price data which will be subject to market price fluctuations or may reference other underlying component types. An index may include valuations only and not actual transactions and the data sources used to compile the index may be subject to change, which may adversely affect the return on the Securities.

Upon determining that one or more Index Adjustment Events or Additional Disruption Events (as defined in "*Annex 2 – Additional Terms and Conditions for Index Linked Securities*") has occurred the Issuer may require the

RISK FACTORS

Calculation Agent to make such adjustments as it determines appropriate to the terms of the Securities or redeem the Securities. Such action may have an adverse effect on the value and liquidity of the affected Index Linked Securities.

There are specific risks relating to Custom Index Linked Securities

The Issuer may issue Securities where the redemption amount and/or interest payable is dependent upon the level of, or changes in the level of, a custom index or a basket of custom indices ("**Custom Index Linked Securities**").

Such Custom Index may be composed by BBVA, by any other entity within the Group or by any third party, as specified in the applicable Issue Terms as the Index Administrator (the "**Index Administrator**") and the Index Administrator may itself act as or may appoint one or more other entities to act as a calculation agent (the "**Index Calculation Agent**"). Further information in relation to each relevant Custom Index will be provided in Part B of the relevant Issue Terms, including details of how investors may obtain the index rules of the Custom Index. Investors should carefully consider the index rules of the Custom Index and any other disclosure on the Custom Index prior to making a decision to invest in any Custom Index Linked Securities.

Factors affecting the performance of Custom Indices

Custom Indices generally pursue a rules-based custom trading strategy (a "**strategy**") to achieve an investment objective as described in more detail in the relevant Custom Index rules. Any potential investor in Custom Index Linked Securities should be aware that such custom indices usually have only a limited operating history with no live track record in achieving the stated investment objective in the medium or long term. Therefore, no assurance can be given that any such strategy on which a Custom Index is based will be successful and that such custom index will perform in line with or better than any relevant market benchmark or any comparable alternative strategy. Where the strategy pursued by a Custom Index is not successful, this might affect the value of and return on Custom Index Linked Securities.

Investors should also note that the performance of the underlying components ("**components**") of Custom Indices will normally have a direct effect on the performance of the Custom Index due to the way in which the Custom Index level is calculated. Investors should consider carefully the components of the Custom Index, the nature of the underlying asset classes and the particular risks related to such assets and asset classes before they make a decision to invest in any Custom Index Linked Securities. In some cases asset class risks are described elsewhere in this category 6.1 (Risk Factors associated with Securities that are linked to specific types of Reference Items) of this Risk Factors section.

The components of a Custom Index may include "long" and "short" exposures to any asset. In the case of any such "long" exposure, any fall in component values may reduce the return on the Securities and in the case of any such "short" exposure, any rise in component values may reduce the return on the Securities.

Hedging activity may affect the level of a Custom Index

By issuing Securities linked to a Custom Index ("**Custom Index Linked Securities**"), BBVA and/or any other entity within the Group will have an exposure to such custom index and its related components. BBVA and/or other entity within the Group may take risk positions to hedge this exposure in its sole discretion and in a principal capacity. Investors in any Custom Index Linked Security will not have any rights in respect of any BBVA and/or other entity within the Group hedge positions, including any shares, futures, options, or other derivatives. BBVA and/or other entity within the Group may execute its hedging activity by trading in the components of a Custom Index on or before the related rebalancing day. Such trading may have an adverse impact on the level at which such components are rebalanced which will result in an adverse impact on the performance of such Custom Index. BBVA and/or other entity within the Group's hedging activity, and hence the size of such impact, will be linked to the amount of new and outstanding Custom Index Linked Securities at the relevant time and then-prevailing market conditions and may affect the market price of or liquidity in the relevant market of a Custom Index.

An investor in Securities linked to a Custom Index will have no rights in respect of any components

The investment exposure provided by a Custom Index is synthetic, and a notional investment in such a Custom Index does not constitute a purchase or other acquisition or assignment of any interest in any component (or any sub-components thereof).

RISK FACTORS

Investment in Securities linked to a Custom Index will therefore not make an investor a holder of, or give an investor a direct investment position in, any components (or any sub-components thereof). The return on your Securities may be less than if you held a direct position in a Custom Index or any component (or any sub-components thereof), or a different product linked thereto.

Risks relating to Custom Indices that employ a risk control mechanism and are regularly rebalanced

A Custom Index may have an in-built risk target mechanism, which regulates the exposure of a Custom Index to one or more relevant components, according to the volatility of such component(s) on a regular basis. For example, as volatility of a component rises, the Custom Index may reduce the exposure to such component(s) and conversely, as volatility falls, the Custom Index may increase the exposure to such component(s); in some cases the exposure of a Custom Index to one or more components may increase in a manner that the exposure of the Custom Index to one or more components increases above 100 per cent. and thereby creating a leveraged exposure of the Custom Index to such component(s).

Investors should note that such a Custom Index may fall disproportionately in case of such a leveraged exposure, and investors in Custom Index Linked Securities may suffer a corresponding loss of their investment, if the market price of one or more component(s) performs negatively at a time when the Index provides for such a high exposure to such component(s). This may be experienced, for example, if a period of relatively low volatility of the component(s) is followed by substantial negative performance of such component(s). Conversely, a Custom index may under certain circumstances also underperform the component(s) in periods of higher experienced volatility where the exposure of a Custom Index to such component(s) is reduced.

The risk control mechanism employed by the Custom Index often uses historical volatility of the relevant component(s) for determining the exposure of the index to such component(s). As a rule, the adjustment of exposures in the Custom Index can only occur subsequently and therefore with a certain time lag. As a consequence, the allocation mechanism may fail to capture all market trends, resulting in a higher allocation to a component that may underperform other components thereby negatively affecting the performance of the Custom Index. This could also mean that the Custom Index could potentially be exposed to a spike in volatility that is higher than the targeted volatility for the Custom Index, which may result in greater losses to investors investing in a Custom Index Linked Security.

Custom Indices which employ a risk control mechanism are often rebalanced frequently and, in some cases, as often as daily, to adjust the exposure of a Custom Index to the relevant components. Costs associated with rebalancing will reduce the levels of a Custom Index and may in turn reduce the return on Securities linked to such Custom Indices. Investors should be aware that rebalancing costs may have an adverse effect on the performance of a Custom Index and may reduce returns achieved by an investor with a Custom Index Linked Security. *The level of a Custom Index may be reduced by costs or fees*

Custom Indices are published net of hedging and transaction costs, and net of any calculation fee, each deducted on the basis provided for in the relevant Custom Index rules, which may be on a daily basis. Such costs or fees will act as a drag on the performance of Custom Indices, and will generally adversely affect the value of any Securities linked to them.

Additionally, investors should note that the notional costs or fees reflected in the calculation of a Custom Index may not necessarily reflect the actual or realised costs that would be incurred by a direct investor in the relevant Custom Index components, which could be larger or smaller from time to time. This is because such costs or fees are normally calculated by referring to pre-determined rates which may exceed actual costs of investing in the components. The Index Administrator (or its affiliates) may benefit if the notional fees or costs embedded in the Custom Index exceed the actual costs that may be incurred by the Index Administrator (or its affiliates) in hedging transactions that may be entered into in respect of the Custom Index.

Use of derivative instruments or techniques may be a significant risk in a Custom Index

Custom Indices may use derivative techniques or contain components which are derivative instruments, such as options or futures contracts. This can mean that the Custom Index is exposed to components or asset classes in an unexpected way with different results as compared to a Custom Index that offers a direct exposure to components or an asset class.

RISK FACTORS

It is also possible that a Custom Index uses derivative techniques or contains components which offer exposure to asset classes in other non-linear ways. For example the use of options may mean that the Custom Index only increases in value if certain conditions are met such as the price or level of a particular reference asset rising or falling in a particular way. If such conditions are not met then the Custom Index level may perform in a negative way due to such derivative techniques or components.

Risks associated with leverage may be significant in a Custom Index

A Custom Index or its components may provide for or allow leveraged investment positions. While such strategies and techniques may increase the opportunity to achieve higher returns on the Securities, they will generally also increase the risk of loss, as both returns and losses are magnified. Investors in Custom Index Linked Securities with leverage risk may suffer higher losses in falling or more volatile markets (all other things being equal) than if they had invested in Custom Index Linked Securities without leverage risk.

Risks associated with the occurrence of an Administrator/Benchmark Event

The occurrence of an Administrator/Benchmark Event (as defined in General Condition 6(l)) may lead to redemption or adjustment of the Custom Index Linked Securities. Any such adjustment or redemption of the Securities following the occurrence of an Administrator/Benchmark Event may have an adverse effect on the value and liquidity of such Securities and accordingly the amount Securityholders can expect to receive on their investment.

Index Adjustment Events and Additional Disruption Events

Upon determining that one or more Custom Index Adjustment Events or Additional Disruption Events (as defined in "Annex 11 –Additional Terms and Conditions for Custom Index Linked Securities") has occurred the Issuer may require the Calculation Agent to make such adjustments as it determines appropriate to the terms of the Securities or redeem the Securities. Such action may have an adverse effect on the value and liquidity of the affected Custom Index Linked Securities.

Custom Indices may rely on external data and data sources

Custom Indices may rely on data from external data providers and data sources which have been selected and pre-defined by the Index Administrator which may change the data providers and the data sources from time to time in accordance with its internal governance procedures provided that any new data provider or data source meets its requirements. There is a risk that this data may be inaccurate, inaccessible, delayed or not up to date. In addition, the Index Administrator or the Index Calculation Agent, as the case may be, make no warranty as to the correctness or completeness of that information and take no responsibility for the accuracy of such data or the impact of any inaccuracy of such data on the value of a relevant Custom Index, and are not under any obligation to independently verify such data (or to advise any investor in Securities linked to a Custom Index of any inaccuracy, omission, mistake or error of which it becomes aware). There is also a risk that while the data is accurate, the data feed to the Index Administrator is impaired. Such impairment to either the data or the data feed could affect the performance or continued operability of a Custom Index. There is also a risk to the continuity of Custom Indices in the event that the Index Administrator ceases to exist. If certain external data is not available, the Index Administrator or Index Calculation Agent may determine the necessary data in order to maintain the continuity of the Custom Index but this may not always be possible and the Custom Index may instead be terminated.

Custom Indices may rely on the Index Administrators' infrastructure and electronic systems

Custom Indices may rely on the Index Administrators' and/or Index Calculation Agent's infrastructure and electronic systems (including internal data feeds). Any breakdown or impairment to such infrastructure or electronic systems could affect the continued operability of a Custom Index.

Potential conflicts of interest may exist in relation to Custom Indices and Custom Index Linked Securities

Investors in Securities linked to a Custom Index should be aware that members of the Group will act in various capacities in relation to the Securities and may also have a number of roles in a Custom Index. These roles may involve making various determinations in relation to the Custom Index, whether as Index Administrator or as an Index Calculation Agent or in another capacity as a Custom Index service provider. These roles are in addition to roles Group entities have at the Securities level. Where a Group entity calculates the index level, investors should

RISK FACTORS

be aware that such index level may be calculated so as to include certain deductions or adjustments that synthetically reflect certain factors such as transaction and servicing costs and notional fees and these may be costs and fees of Group entities. Such deductions will act as a drag on the performance of the Custom Index such that the level of the Custom Index will be lower than it would otherwise be. These are in addition to any deductions at the level of the Securities.

Further, in the normal course of business, the Issuer and/or its affiliates may have, or may have had, interests or positions, or may buy, sell or otherwise trade positions in or relating to the relevant Custom Index and/or the components, or may have invested, or may engage in transactions with others relating to any of these items or engaged in trading, brokerage and financing activities, as well as providing investment banking and financial advisory services in respect of the Custom Index or the components. Accordingly, the Issuer or any of its affiliates may at any time hold long or short positions, and may trade or otherwise effect transactions, for its own account or the accounts of its customers in respect of the Custom Index or the components thereof. Such activity may adversely affect the level of the Custom Index and consequently the value of the Securities.

The Issuer and the Index Administrator of each Custom Index may be affiliated entities or the same entity and may face a conflict of interest between their obligations as Issuer and Index Administrator, respectively, and their interests in another capacity. No assurance can be given that the resolution of such potential conflicts of interest will not be prejudicial to the interests of investors.

Discretions of the Index Administrator or Index Calculation Agent, including in relation to adjustment and extraordinary event provisions, may be a significant risk in a Custom Index

The rules in relation to a Custom Index may provide the Index Administrator or Index Calculation Agent (which may all be part of the Group) the discretion to make certain calculations, determinations (including about their maintenance), and amendments to the relevant Custom Index, from time to time (for example, on the occurrence of a disruption event as described below) without regard to the interests of the Securityholders. This is separate from discretions which any Group entity may have at the level of the Securities. Where there is a corresponding applicable regulatory obligation, the Index Administrator or Index Calculation Agent shall take into account its applicable regulatory obligations in exercising these discretions but the discretions may be exercised without the consent of the investors and may have an adverse impact on the financial return of Custom Index Linked Securities.

A typical Custom Index provides that in order to address modification or disruption events the Index Administrator has the power to adjust a Custom Index or its components, to replace components, to suspend or delay the calculation of the Custom Index or in some cases to terminate the Custom Index. Following any termination of a Custom Index, no assurance can be given that the Index Administrator will replace the Custom Index with a successor index or if it does as to how any successor index will perform or whether it can be used in connection with the Securities.

Such action may be taken to address modifications or disruptions in components or for other disruption reasons including changes in law or market conditions. In some circumstances the Index Administrator may consult as to such actions, including with an index committee, the Index Calculation Agent or in some cases certain users of the Custom Index, but no assurance can be given that this will be the case. In particular investors in Securities may not be consulted and even if they are this may not change or prevent the proposed action the Index Administrator takes.

The impact on Custom Index Linked Securities may be significant and may lead to the Issuer making changes negatively affecting the value of the Securities or in some cases early terminating the Securities.

A change in the composition or discontinuance of an index could adversely affect the market value of the Securities

The administrator or sponsor of any index can add, delete or substitute the components of such index or make other methodological changes that could change the level of one or more components. The changing of components of any index may affect the level of such index as a newly added component may perform significantly worse or better than the component it replaces, which in turn may affect the payments made by the Issuer to the investors. The sponsor of any such index may also alter, discontinue or suspend calculation or dissemination of such index. The sponsor of an index will have no involvement in the offer and sale of the Securities and will have no obligation to any investor. The sponsor of an index may take any actions in respect of

RISK FACTORS

such index without regard to the interests of the investors, and any of these actions could adversely affect the market value of the Securities.

Risks associated with the occurrence of an Administrator/Benchmark Event

The occurrence of an Administrator/Benchmark Event (as defined in General Condition 6(l)) may lead to redemption or adjustment of the Securities. Any such adjustment or redemption of the Securities following the occurrence of an Administrator/Benchmark Event may have an adverse effect on the value and liquidity of such Securities and accordingly the amount Securityholders can expect to receive on their investment.

There are specific risks relating to Credit Linked Securities

The Issuer may issue Securities where the redemption amount and/or interest payable is dependent upon whether certain events ("**Credit Events**") have occurred in respect of one or more entities (together "**Reference Entities**" and each, a "**Reference Entity**") and, if so, on the value of certain specified debt obligations of such Reference Entity(ies) or, where, if such events have occurred, the Issuer's obligation is to deliver certain specified assets upon redemption of the Securities.

Investors in any such Securities should be aware that depending on the terms of the Credit Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of the redemption amount or interest or delivery of any specified assets may occur at a different time than expected and (iii) they may lose all or a substantial portion of their investment.

The market price of such Securities may be volatile and will be affected by, amongst other things, the time remaining to the redemption date and the creditworthiness of the reference entity which in turn may be affected by the economic, financial and political events in one or more jurisdictions, over which neither the Issuer nor Guarantor has control.

The Issuer's obligations in respect of Credit Linked Securities are irrespective of the existence or amount of the Issuer's and/or any affiliates' credit exposure to a reference entity and the Issuer and/or any affiliate need not suffer any loss nor provide evidence of any loss as a result of the occurrence of a Credit Event.

Reference Entity Credit Risk

The holders of Credit Linked Securities will be exposed to the credit of one or more Reference Entities, which exposure shall be, unless otherwise stated in the Issue Terms, to the full extent of their investment in such Securities. Upon the occurrence of any of the default events comprising a Credit Event with respect to any Reference Entity, the Securityholders may suffer significant losses at a time when losses may be suffered by a direct investor in obligations of such Reference Entity. However, the holding of a Security is unlikely to lead to outcomes which exactly reflect the impact of investing in an obligation of a Reference Entity, and losses could be considerably greater than would be suffered by a direct investor in the obligations of a Reference Entity and/or could arise for reasons unrelated to such Reference Entity. Securityholders should also note that a Credit Event may occur even if the obligations of a Reference Entity are unenforceable or their performance is prohibited by any applicable law or exchange controls. See also the risk factor "*There are risks associated with leveraged exposures*" below.

Investors in the Securities are accordingly exposed, as to (if Credit Linked Redemption is applicable) nominal and (if Credit Linked Interest is applicable) interest, to the credit risk of one or more Reference Entities. The maximum loss to an investor in the Securities is (if Credit Linked Redemption is applicable) 100 per cent. of the nominal amount, together with (if Credit Linked Interest is applicable) any accrued interest amounts.

For Index Credit Linked Securities and Long/Short Credit Linked Securities that reference an Index, the Reference Entities and the Reference Obligations as of the Issue Date of the Credit Linked Securities will be those set out in the Index Annex, being the list for the relevant Markit iTraxx® Europe Index (in the case of iTraxx Non-Tranched Index Credit Linked Securities or iTraxx Tranched Index Credit Linked Securities) or Markit CDXTM Index (in the case of CDX Non-Tranched Index Credit Linked Securities or CDX Tranched Index Credit Linked Securities) with the Annex Date specified in the Issue Terms, as published by the Index Publisher (being Markit Group Limited as of the date of this Base Prospectus). Any determinations by the Index Sponsor (being Markit Indices Limited in the case of iTraxx Non-Tranched Index Credit Linked Securities and iTraxx Tranched Index Credit Linked Securities and Markit North America, Inc. in the case of CDX Non-Tranched Index Credit Linked

RISK FACTORS

Securities and CDX Tranch Index Credit Linked Securities, in each case as of the date of this Base Prospectus) with respect to replacement Reference Obligations and/or Successors (subject, in relation to Successors, to the further determination provisions set out in the Credit Linked Conditions), will apply for the purposes of the Credit Linked Securities and any such determinations and resulting changes in Reference Obligations and/or Reference Entities may have an adverse effect on the value of such Securities.

Additionally, if ISDA publicly announces one or more replacement Reference Obligations and/or Successors prior to the Trade Date but following the "Roll Date" (in the case of iTraxx Non-Tranch Index Credit Linked Securities or iTraxx Tranch Index Credit Linked Securities) or the "Effective Date" (in the case of CDX Non-Tranch Index Credit Linked Securities or CDX Tranch Index Credit Linked Securities) specified in the Index Annex, such replacement Reference Obligations and/or Successors will apply for the purposes of the Credit Linked Securities, notwithstanding that such announcement occurred prior to the Trade Date, and any such announcements and resulting changes in Reference Obligations and/or Reference Entities may have an adverse effect on the value of such Securities.

If Credit Linked Redemption is applicable the occurrence of Credit Events may affect the redemption date of the Securities

Credit Linked Securities in respect of which Credit Linked Redemption is applicable may be redeemed prior to their scheduled maturity, save where: (i) Maturity Credit Redemption applies; or (ii) the Securities are Tranch Linear Basket Credit Linked Securities or Tranch Index Credit Linked Securities or Basket Tranch Credit Linked Securities; or (iii) the Securities are Non-Tranch Linear Basket Credit Linked Securities or Non-Tranch Index Credit Linked Securities where Credit Payment on Maturity applies. However, where the Credit Event Redemption Amount payable in respect of Securities described in paragraph (ii) or (iii) of the foregoing section is zero and Credit Linked Redemption is applicable, the Securities will be redeemed early. Where such Securities are redeemed early following a Credit Event, investors may lose some or all of the amount invested and will not receive the full amount of interest (if any) to the extent that interest on the Security is also Credit Linked.

If Credit Linked Redemption is applicable and a Credit Event occurs, for certain Securities investors may only receive the redemption amount (if any) a significant amount of time after the Credit Event

Where Maturity Credit Redemption applies or where the Securities are Non-Tranch Linear Basket Credit Linked Securities or Non-Tranch Index Credit Linked Securities where Credit Payment on Maturity Applies (as specified in the applicable Issue Terms) or where the Securities are Tranch Linear Basket Credit Linked Securities, Tranch Index Credit Linked Securities, Basket Tranch Index Credit Linked Securities, in each case in respect of which Credit Linked Redemption is applicable, maturity of the Credit Linked Securities may be delayed until scheduled maturity of the Credit Linked Securities. Investors may therefore be forced to wait a significant time following the occurrence of the relevant Credit Event before they receive the redemption amount (if any).

If Credit Linked Redemption is applicable, the occurrence of a Credit Event may affect the amount payable or deliverable on redemption of the Securities

Where Credit Linked Redemption is applicable and cash settlement or auction settlement applies, the occurrence of a Credit Event in relation to any Reference Entity from time to time may result in a redemption of the Securities in a reduced nominal amount or at zero meaning that investors may lose some or all of the amount invested.

Where Credit Linked Redemption is applicable and physical settlement applies, the occurrence of a Credit Event may result in the redemption of the Securities by delivery of certain direct or indirect obligations of the affected Reference Entity, which obligations are likely to have a market value which is substantially less than their par amount. Where the Securities provide for physical delivery, the Issuer may determine that the specified assets to be delivered are either (a) assets which, for any reason (including, without limitation, failure of the relevant clearance system or due to any law, regulation, court order or market conditions or the non-receipt of any requisite consents with respect to the delivery of assets which are loans), are impossible or illegal to deliver on the specified settlement date, or (b) assets which the Issuer, the Guarantor and/or any affiliate has not received under the terms of any transaction entered into by the Issuer, the Guarantor and/or such affiliate to hedge the Issuer's obligations in respect of the Securities. Any such determination may delay settlement in respect of the Securities and/or cause the obligation to deliver such specified assets to be replaced by an obligation to pay a cash amount which, in either case, may affect the value of the Securities and, in the case of payment of a cash amount, will affect the timing of the valuation of such Securities and as a result, the amount payable on redemption.

RISK FACTORS

Increased credit risk is associated with "First-to-Default" or "Nth-to-Default" Credit Linked Securities, Linear Basket Credit Linked Securities or Index Credit Linked Securities or Long/Short Credit Linked Securities

Where the Securities are Single Reference Entity Credit Linked Securities, First-to-Default or Nth-to-Default Credit Linked Securities, and Credit-Linked Redemption is applicable, the Securities may be subject to redemption in full as described above as a consequence of the occurrence of a Credit Event in relation to a single Credit Event the first or the nth Reference Entity in respect of which a Credit Event occurs either shortly after such credit event or, where Maturity Credit Redemption is applicable, at the scheduled maturity date.

Where the Securities are Non-Tranched Linear Basket Credit Linked Securities or Non-Tranched Index Credit Linked Securities, and Credit-Linked Redemption is applicable, where Credit Payment As You Go applies, the Securities may be subject to redemption in part upon the occurrence of a Credit Event in relation to each Reference Entity in respect of which a Credit Event occurs unless Maturity Credit Redemption is applicable in which case such Securities shall only be redeemed at the scheduled maturity date.

Where the Securities are Tranched Linear Basket Credit Linked Securities, the redemption amount of the Securities will only be reduced as described above upon the occurrence of a Credit Event in relation to a number greater than the L (being the lower tranche level) number of Reference Entities specified in the Issue Terms but will be subject to redemption in full as described above upon the occurrence of a Credit Event in relation to a number equal to or greater than the H (being the higher tranche level) number of Reference Entities specified in the Issue Terms. The credit risk to Securityholders may further be increased as a result of the concentration of Reference Entities in a particular industry sector or geographic area or the exposure of the Reference Entities to similar financial or other risks.

Where the Securities are Tranched Index Credit Linked Securities or Basket Tranched Index Credit Linked Securities, the redemption amount of the Securities will only be reduced as described above upon the occurrence of a Credit Event resulting in the Aggregate Loss Percentage exceeding the Attachment Point specified in the Issue Terms or the Aggregate Loss Percentage in respect of a Basket Tranched Index Component exceeding the Attachment Point for that Basket Tranched Index Component specified in the Issue Terms, as the case may be, but will be subject to redemption in full as described above upon the occurrence of a Credit Event resulting in the Aggregate Loss Percentage, being equal to or greater than the Exhaustion Point specified in the Issue Terms or the Aggregate Loss Percentage in respect of each Basket Tranched Index Component exceeding the Attachment Point for that Basket Tranched Index Component specified in the Issue Terms, as the case may be. The credit risk to Securityholders may further be increased as a result of the concentration of Reference Entities in a particular industry sector or geographic area or the exposure of the Reference Entities to similar financial or other risks.

Where the Securities are Long/Short Credit Linked Securities, the Securities will be redeemed at an amount that is equal to the sum of the Long Redemption Amount and the Short Redemption Amount. The occurrence of Credit Events may result in a reduction of the Long Redemption Amount but an increase in the Short Redemption Amount, depending on the Long Exposure or Short Exposure selected and the relevant Reference Entities. The credit risk to Securityholders may further be increased as a result of the concentration of Reference Entities in a particular industry sector or geographic area or the exposure of the Reference Entities to similar financial or other risks.

If Credit Linked Interest is applicable, the occurrence of Credit Events may reduce the interest payable on the Securities

In the case of Single Reference Entity Credit Linked Securities or First-to-Default Credit Linked Securities in respect of which Credit Linked Interest is applicable, following the occurrence of a Credit Event Determination Date no further interest will accrue on the Securities. In the case of Nth-to-Default Credit Linked Securities in respect of which Credit Linked Interest is applicable, following the occurrence of a Trigger no further interest will accrue on the Securities. In any such circumstances, interest may cease to accrue from the Credit Event Determination Date or from the Interest Payment Date immediately preceding the Credit Event Determination Date or Trigger, depending on the elections made in the Issue Terms.

In the case of Tranched Linear Basket Credit Linked Securities in respect of which Credit Linked Interest is applicable, following the occurrence of a Credit Event Determination Date with respect to a number of Reference Entities that is greater than the L (being the lower tranche) number of Reference Entities specified in the Issue Terms and each subsequent Credit Event Determination Date thereafter, interest that is subject to the Credit Linked

RISK FACTORS

provisions will accrue on a decreased nominal amount of the Securities until a Credit Event Determination Date has occurred with respect to a number of Reference Entities that is equal to or greater than the H (being the higher tranche) number of Reference Entities specified in the Issue Terms and at which point no further interest shall be due in respect of the Securities.

In the case of Tranche Index Credit Linked Securities or Basket Tranche Index Credit Linked Securities, following the occurrence of a Credit Event Determination Date with respect to which the Aggregate Loss Percentage in respect of which a Credit Event Determination Date has occurred, exceeds the Attachment Point, (being the lower tranche specified in the Issue Terms) or, in the case of Basket Tranche Index Credit Linked Securities, the Aggregate Loss Percentage in respect of a Basket Tranche Index Component exceeds the Exhaustion Point in respect of that Basket Tranche Index Component and each subsequent Credit Event Determination Date thereafter, if Credit Linked Interest is applicable interest will accrue on a decreased nominal amount of the Securities until the Scheduled Maturity Date or until a Credit Event Determination Date has occurred with respect to a number of Reference Entities such that Aggregate Loss Percentage is equal to or greater than the Exhaustion Point (being the upper tranche specified in the Issue Terms) or, in the case of Basket Tranche Index Credit Linked Securities, the Aggregate Loss Percentage in respect of each Basket Tranche Index Component is equal to or greater than the Exhaustion Point in respect of that Basket Tranche Index Component and at which point no further interest amounts shall be due in respect of the Securities.

In the case of interest bearing Non-Tranche Index Credit Linked Securities in respect of which Credit Linked Interest is applicable, following the occurrence of a Credit Event Determination Date, interest will accrue on a decreased nominal amount of the Securities until the Scheduled Maturity Date or until a Credit Event Determination Date has occurred with respect to all of the Reference Entities at which point no further interest amounts shall be due in respect of the Securities."

In the case of Long/Short Credit Linked Securities in respect of which Credit Linked Interest is applicable, following the occurrence of a Credit Event Determination Date in respect of a Reference Entity referenced in the Long Exposure, interest may accrue on a decreased nominal amount of the Securities and may cease to accrue entirely, depending on the nature of the Long Exposure specified in the Issue Terms.

Investors' exposure to the credit performance of the Reference Entities may not correspond to actual market recovery on such Reference Entities, including for Zero/Set Recovery Securities, Tranche Linear Basket Credit Linked Securities, Tranche Index Credit Linked Securities, Basket Tranche Index Credit Linked Securities and Long/Short Credit Linked Securities

Interest and redemption payments on the Securities may be calculated by reference to the outstanding nominal amount of the Securities. As at the Issue Date the outstanding nominal amount is an amount equal to the aggregate Nominal Amount. If a Credit Event occurs in respect of a Reference Entity, then the outstanding nominal amount may be reduced for the purposes of the determination of interest (if Credit Linked Interest is applicable) and/or the amount payable on redemption (if Credit Linked Redemption is applicable) by an amount equal to a predefined portion of the (aggregate) Nominal Amount (which may be one hundred percent of such predefined portion resulting in such portion of the outstanding nominal amount being reduced in full) irrespective of the actual market recovery in respect of such Reference Entity. Therefore, investors' exposure to each Reference Entity may exceed the exposure that they might incur in respect of having entered into a standard single name credit default swap as protection seller in respect of each Reference Entity and investors may lose the entire principal amount invested.

There is a risk that the Securities could be affected by a Credit Event or succession that took place prior to the Trade Date

In respect of a Credit Event relating to a Series of Credit Linked Securities, a Credit Event will not be determined by the Credit Derivatives Determinations Committee unless a request for the relevant Credit Derivatives Determinations Committee to consider whether the relevant event or circumstances constitutes a Credit Event is submitted to the DC Secretary within 60 calendar days of the occurrence of such event or circumstances unless a Credit Event Determination Date has already occurred with respect to such event. For the purposes of the succession provisions the look-back period is 90 calendar days and functions similarly. These provisions mean that there is a time limit on the ability to act on a Credit Event or succession and that it is possible that the Securities could be affected by a Credit Event or succession that took place prior to the Trade Date if Auction Settlement is specified as the applicable Settlement Method for a Series of Securities in the relevant applicable Issue Terms.

RISK FACTORS

Amendment of Credit Linked Conditions in accordance with market convention in accordance with Credit Linked Condition 18

The Calculation Agent is vested with the authority to revise any provision of the Credit Linked Conditions, in each case in accordance with Credit Linked Condition 18. These amendments may be enacted to

- (a) incorporate and/or reflect further or alternative documents or protocols published by ISDA with respect to the settlement of credit derivatives transactions and/or the operation or applications of determinations by the ISDA Credit Derivatives Determinations Committees;
- (b) reflect changes in market practice for credit derivatives transactions; and
- (c) reflect circumstances constituting a Hedge Disruption Event.

While reflective of market practice adjustments due to external protocols or events, any amendments made by the Calculation Agent in accordance with Credit Linked Condition 18 may not align with the Securityholders' interests. Furthermore, any such adjustment may have a negative impact on the value of the Securities.

ISDA Credit Derivatives Definitions

Whilst there are many similarities between the terms used in this Base Prospectus and the 2014 ISDA Definitions, there are also many substantial differences and an investor should understand that the complete terms and conditions of the Securities are as set out in this Base Prospectus and the applicable Issue Terms only and that the 2014 ISDA Definitions are not incorporated by reference to either. Unlike the 2014 ISDA Definitions, which are standardised and widely used for credit default swaps, the terms used in the Base Prospectus are specific and tailored to the features and risks of Credit Linked Securities. Consequently, investing in Credit Linked Securities is not necessarily equivalent to investing a credit default swap that incorporates the 2014 ISDA Definitions.

While ISDA has published and, where appropriate, supplemented the 2014 ISDA Definitions in order to facilitate transactions and promote uniformity in the credit derivatives market, the credit derivatives market has evolved over time and is expected to continue to change. Consequently, the 2014 ISDA Definitions and the terms applied to credit derivatives generally, including Credit Linked Securities are subject to further evolution. Past events have shown that the view of market participants may differ as to how the 2014 ISDA Definitions operates or should operate. As a result of the continued evolution of the market, the Credit Linked Securities may not conform to future market standards. Such a result may have a negative impact on the Credit Linked Securities and there can be no assurances that changes to the terms applicable to credit derivatives generally will be predictable or favourable to the Issuer or the Securityholders.

Risks relating to Auction Settlement of Credit Linked Securities

Where an Auction Final Price Determination Date occurs in respect of Credit Linked Securities, the Auction Final Price will be determined according to an auction procedure set out in the applicable Transaction Auction Settlement Terms, a form of which will be published by ISDA on its website at <https://www.isda.org/> (or any successor website thereto) from time to time and may be amended from time to time. The Auction Final Price determined pursuant to an auction may be less than the market value that would otherwise have been determined in respect of the relevant Reference Obligation.

The Issuer and the Securityholders may have little or no influence in the outcome of any such auction. However, there is a possibility that the Issuer or the Calculation Agent (or one of their Affiliates) would act as a participating bidder in any such auction. In such capacity, it may take certain actions which may influence the Auction Final Price including (without limitation): (a) providing rates of conversion to determine the applicable currency conversion rates to be used to convert any obligations which are not denominated in the auction currency into such currency for the purposes of the auction; and (b) submitting bids, offers and physical settlement requests with respect to the relevant Deliverable Obligations. In deciding whether to take any such action (or whether to act as a participating bidder in any auction), neither the Issuer nor the Calculation Agent (or any of their Affiliates) shall be under any obligation to consider the interests of any Securityholder and, as a result, may take action that is adverse to the interests of Securityholders.

RISK FACTORS

Cheapest to deliver risk

Where Physical Settlement is applicable, upon the occurrence of a Credit Event Determination Date, the Calculation Agent has the discretion to select Deliverable Obligations of the Reference Entity for delivery to the Securityholders. It is likely that the Deliverable Obligations selected by the Calculation Agent are obligations of the Reference Entity with the lowest market value that are permitted to be delivered in accordance with the terms of the Securities. In addition, the Deliverable Obligations may be illiquid and such illiquidity may be more pronounced following the occurrence of a Credit Event, thereby adversely affecting the value of the relevant Deliverable Obligation. The Calculation Agent has no liability to account to the Securityholders or any other person for any profit or other benefit to it or any of its affiliates which may result directly or indirectly from such selection.

Cheapest to value risk

Where Cash Settlement is applicable, upon the occurrence of an Event Determination Date, the Calculation Agent has the discretion to select Valuation Obligations of the Reference Entity for valuation in order to determine the Final Price. It is likely that the Valuation Obligations selected by the Calculation Agent are obligations of the Reference Entity with the lowest market value that are permitted to be valued in accordance with the terms of the Securities. This could result in a lower recovery value and hence greater losses for Securityholders. In addition, the Valuation Obligations may be illiquid and such illiquidity may be more pronounced following the occurrence of a Credit Event, thereby adversely affecting the value of the relevant Valuation Obligation which in turn would result in a lower recovery value for Securityholders.

Additional risks relating to Leveraged Single Reference Entity Credit Linked Securities

Leveraged Single Reference Entity Credit Linked Securities provide investors with a leveraged exposure to the credit of the relevant Reference Entity so that investors are exposed to a Reference Entity Notional Amount greater than the Nominal Amount of the Securities. In relation to such Securities the CDS Spread for the Reference Entity is observed by the Calculation Agent and if a Trigger Event occurs (which is the case where the spread (expressed in basis points per annum) quoted for a protection buyer under a credit default swap transaction referencing such Reference Entity, with a tenor as close as reasonably practicable to the Credit Observation End Date of the Credit Linked Securities as published on the CDS Price Source) is equal to or greater than the CDS Spread specified as Trigger Level in the applicable Issue Terms or, another means of determining the occurrence of Trigger Event, the Issuer shall redeem the Securities at an amount determined in accordance with General Condition 6(f)(i) as its Early Redemption Amount or, in the case of Exempt Securities, at the Trigger Event Redemption Amount specified in the applicable Issue Terms. In such circumstances the Early Redemption Amount or Trigger Event Redemption Amount may be significantly less than the Nominal Amount of such Securities and could be zero. A Trigger Event may occur notwithstanding that no Credit Event may have occurred. Accordingly investors in Leveraged Single Reference Entity Credit Linked Securities risk losing all or some of their investment as a result of movements in the credit spreads relating to the Reference Entity even if no Credit Event occurs. In case the Price Source does not publish or report the relevant Credit Spread, the Calculation Agent will determine the CDS spread by obtaining quotations from leading dealers in the credit derivatives market or, if no such quotations are available, by determining the CDS Spread in good faith and in a commercially reasonable manner.

There are specific risks relating to Fund Linked Securities

The Issuer may issue Securities where the redemption amount and/or interest payable are dependent upon the price or changes in the price of units or shares in a fund or funds or, depending on the price or changes in the price of units or shares in such fund or funds, where the Issuer's obligation on redemption is to deliver a specified amount of fund shares ("**Fund**"). Accordingly, an investment in Fund Linked Securities may bear similar market risks to a direct fund investment and investors should take advice accordingly.

Investors in any such Securities should be aware that, depending on the terms of the Fund Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of the redemption amount and/or interest and/or delivery of any specified Fund shares may occur at a different time than expected and (iii) they may lose all or a substantial portion of the investment. In addition, the movements in the price of units, shares or interests in the fund or funds may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices and the timing of changes in the relevant price of the units or shares in the fund or funds may affect the actual yield to investors, even if the average level is consistent with their expectations.

RISK FACTORS

The market price of such Securities may be volatile and may depend on the time remaining to the redemption date and the volatility of the price of units or shares in the fund(s). The price of units or shares in a fund may be affected by the economic, financial and political events in one or more jurisdictions, including factors affecting the exchange(s) or quotation system(s) on which any units or shares in the fund(s) may be traded. In addition, the price of units or shares in a fund may be affected by the performance of the fund service providers, and, in particular, the investment advisor. Investors should carefully review the prospectus, information memorandum and/or base prospectus (if any) issued by any relevant fund before purchasing any Securities linked to such funds. None of the Issuer, the Guarantor, any affiliate of the Issuer or Guarantor or the Calculation Agent make any representation as to the creditworthiness of any relevant fund or any such fund's administrative, custodian, investment manager or adviser. If such persons are not creditworthy or otherwise fail to perform, as the case may be, it may adversely affect value of the Securities.

In addition, when the Issuer issues Fund Linked Securities linked to one or more funds, including hedge funds the relevant fund(s) may trade and invest in a broad range of investments such as debt and equity securities, commodities or commodity indices and foreign exchange and may enter into derivative transactions, including, without limitation, futures and options. The relevant fund(s) may often be illiquid and may only be traded on a monthly, quarterly or even less frequent basis. The trading strategies of funds are often opaque. The relevant fund(s), as well as the markets and instruments in which they invest, are often not subject to review by governmental authorities, self-regulatory organisations or other supervisory authorities. If the underlying relevant fund(s) do not perform sufficiently well, the value of the Securities will fall, and may in certain circumstances be zero.

In the event of the occurrence of one or more Extraordinary Fund Events (as defined in Fund Linked Condition 1), as the case may be, the Issuer may seek to make adjustments, substitute the relevant Fund Shares with fund shares of a fund, with similar characteristics or, if no such fund is selected, with a replacement index, or redeem the Securities at its discretion. Any adjustment or substitution may have an adverse effect on the value of the Securities.

In the event that redemption proceeds in respect of the underlying Fund Shares, as the case may be, are not received by the hedge provider on or prior to the Scheduled Maturity Date or Termination Date, such date may be postponed for a period of up to two calendar years (or such other period as may be specified in the Issue Terms) and no additional amount shall be payable as a result of such delay and so in such circumstance investors may therefore miss the opportunity to invest the redemption proceeds that would have been otherwise received earlier in other assets or investments.

See also risk factors "*Investors may not receive any interest on Reference Item Linked Securities*" and "*The Calculation Agent, which will be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders*" below.

For all the above reasons, investing directly or indirectly in funds is generally considered to be risky. If the underlying fund does not perform sufficiently well, the value of the Securities will fall, and may in certain circumstances be zero.

There are specific risks relating to Foreign Exchange (FX) Rate Linked Securities

The Issuer may issue Securities where the redemption amount and/or interest payable are dependent upon movements in currency exchange rates or are payable in one or more currencies which may be different from the currency in which the Securities are denominated ("**Foreign Exchange (FX) Rate Linked Securities**"). Accordingly, an investment in Foreign Exchange (FX) Rate Linked Securities may bear similar market risks to a direct foreign exchange investment and investors should take advice accordingly.

Investors in any such Securities should be aware that, depending on the terms of the Foreign Exchange (FX) Rate Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of the redemption amount and/or interest may occur at a different time or in a different currency than expected and (iii) they may lose a substantial portion or all of their investment. In addition, movements in currency exchange rates may be subject to significant fluctuations that may not correlate with changes in interest rates or other indices and the timing of changes in the exchange rates may affect the actual yield to investors, even if the average level is consistent with their expectations. All these factors may affect the investments in the Securities.

RISK FACTORS

The foreign exchange rate(s) to which the Securities are linked will affect the nature and value of the investment return on the Securities. The performance of foreign exchange rates are dependent upon the supply and demand for currencies in the international foreign exchange markets, which are subject to economic factors, including inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, currency convertibility and safety of making financial investments in the currency concerned, speculation and measures taken by governments and central banks. Such measures include, without limitation, imposition of regulatory controls or taxes, issuance of a new currency to replace an existing currency, alteration of the exchange rate or exchange characteristics by devaluation or revaluation of a currency or imposition of exchange controls with respect to the exchange or transfer of a specified currency that would affect exchange rates and the availability of a specified currency. Where the Securities are linked to the currency of an emerging market jurisdiction, such risks may be magnified – see also risk factor *"There are specific risks in relation to Securities that are denominated in or linked to emerging market currencies"* below.

Payments of the redemption amount and interest or other obligations of the Issuer in respect of any Foreign Exchange (FX) Rate Linked Securities may be restricted or varied upon the occurrence of certain disruption events applicable to the Securities. A relevant disruption event for an exchange rate may relate to inability to obtain a price for the exchange rate from the applicable price source(s), illiquidity, the split of any relevant currency into a dual exchange rate, inconvertibility, non-transferability, a material change in circumstances in the jurisdiction of the Subject Currency that makes it impossible to fulfil certain hedging arrangements, a nationalisation or variations in the prices quoted for the exchange on different sources being greater than a specified percentage threshold (or not quoted for by members of a survey used to determine such source) if specified for that rate in the terms and conditions of the Securities and/or the Issue Terms.

Following a relevant Disruption Event, the applicable valuation date may be postponed so long as the relevant disruption event continues, the Calculation Agent may determine the applicable exchange rate, the related date for payment or delivery may be deferred so long as the relevant disruption event continues or a fallback reference price source or sources may be used to calculate the rate instead of the originally designated price source. Furthermore, following an Additional Disruption Event, the Securities may be redeemed early (or on the originally designated date) by payment of the applicable early redemption amount rather than any amount that would have otherwise been calculated in respect of and due on the relevant date. As a consequence, Investors in any Foreign Exchange (FX) Rate Linked Securities may be affected by an adverse effect on (i) the value of, and/or amounts due in respect of, the Securities due to the occurrence of any Disruption Event and application of the related disruption fallback(s); or (ii) an investor's investment schedule, timetable or plans if any due date for payment under the Securities is postponed as a consequence of an Additional Disruption Event.

See also risk factor *"The Calculation Agent, which will be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders"* below.

There are specific risks relating to Inflation Linked Securities

The Issuer may issue Securities where the redemption amount and/or interest payable is dependent upon the level of an inflation index or indices ("**Inflation Linked Securities**").

Investors in any such Securities should be aware that, depending on the terms of the Inflation Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of the redemption amount and/or interest may occur at a different time than expected and (iii) they may lose all or a substantial portion of their investment. In addition, the movements in the level of the inflation index or indices may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices and the timing of changes in the relevant level of the inflation index or indices may affect the actual yield to investors, even if the change in the level is consistent with their expectations.

An inflation index is only one measure for calculating inflation. The price inflation determined by an inflation index may differ from the price changes that the investor is exposed to. An inflation index can be subject to considerable fluctuations that are not related to the development of comparable other indices. An inflation index is regularly only calculated and published with a certain delay. This means that an inflation index can only reflect inflationary developments with a time lag and at the time of publication of the inflation index and also at the time on which payments linked to the inflation index or indices are made on the Securities, the price trend may already have changed. The realisation of these risks may have an adverse impact on the value of the Securities.

RISK FACTORS

In certain circumstances following cessation of publication of the inflation index, the Calculation Agent may determine a successor inflation index and make adjustments to the terms of the Securities and such adjustments may have an adverse effect on the value of the Securities. In certain circumstances following cessation of publication of the inflation index, the Calculation Agent may determine that there is no appropriate alternative inflation index, in which case the Issuer may redeem the Securities early and investors may receive less than their initial investment in the Securities. See also risk factor *"The Calculation Agent, which will be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders"* below.

The market price of such Securities may be volatile and may depend on the time remaining to the redemption date and the volatility of the level of the inflation index or indices. The level of the inflation index or indices may be affected by the economic, financial and political events in one or more jurisdictions. See also risk factor *"The regulation and reform of "benchmarks" may adversely affect the value of Securities linked to or referencing such "benchmarks"*.

There are specific risks relating to EUA Contract Linked Securities

The Issuer may issue Securities where the redemption amount and/or interest payable is dependent upon the level of the value of the underlying EUA Contracts or the future contracts relating to such EUA Contract ("**EUA Contract Linked Securities**").

The market for carbon emission allowances or credits has emerged as a consequence of the Kyoto Protocol and covers both industrial and developing countries. Industrial countries are allocated emissions allowances under the Kyoto Protocol. The EU introduced its own emission trading scheme in 2005 pursuant to Directive 2003/87/EC, as amended from time to time, which extends beyond the 2012 termination of the Kyoto Protocol.

An EU Allowance corresponds to the emission of one tonne of carbon dioxide (**CO₂**) equivalent during a specified period which is valid for meeting certain emissions related obligations. The EU's member states issue new EU Allowances annually to each company subject to the EU's emission trading scheme. These awards are made in accordance with an allocation plan approved by the European Commission which is based on the EU's application of the Kyoto Protocol's obligations to the industries covered by the EU's emission trading scheme. By April 30 in each year, companies are obliged to "surrender" a number of EU Allowances corresponding to their actual emissions in the preceding year. EU Allowances can also be rolled over from one year to the next if a company emits less carbon dioxide or carbon-equivalent greenhouse gas than the EU allowances it holds. EU Allowances have a limited or no value outside the EU's emissions trading scheme.

Trading in carbon emissions is a developing market and is highly speculative and volatile. The carbon emissions trading market has been and may again be subject to temporary distortions or other disruptions due to various factors, including the lack of liquidity in the market, the participation of speculators and government regulation and intervention. In addition, in respect of the emissions trading market in Europe, EU allowances have allegedly been stolen or "phished" from the national registries of several European countries and from the carbon trading accounts of market participants. This has caused severe market disruption in the European carbon trading market with delivery of EU allowances suspended for significant periods. Any such disruption in the future would have a detrimental impact on the value or settlement of EUA Contract Linked Securities referencing EUA Contracts.

If a Market Disruption Event (as defined in EUA Contract Linked Condition 2 (*Market Disruption*)) occurs or is continuing on a date for valuation in respect of EUA Contract Linked Securities, then the Issuer may take no action, require the Calculation Agent, in its sole and absolute discretion, to determine the adjustments (if any) to be made to the terms of the EUA Contract Linked Securities to reflect such event, or redeem the EUA Contract Linked Securities. Any such adjustment or early redemption of the Securities may have an adverse effect on the value and liquidity of such Securities and accordingly the amount Securityholders can expect to receive on their investment.

If the applicable Issue Terms specify that "EUA Contract Early Redemption Amount" is applicable in respect of EUA Contract Linked Securities, investors should be aware that where the Securities are subject to early redemption following a Market Disruption Event as described above then, in such circumstances, the amount payable on an early redemption of such Securities will be determined by the Calculation Agent as the amount specified in the applicable Issue Terms or otherwise by reference, inter alia, to certain costs in relation to the early redemption and the value of two EUA Contracts specified in the applicable Issue Terms. Such Early Redemption Amount may be significantly less than the principal amount of the Securities or in some cases may be zero. The

RISK FACTORS

relevant prices of any such EUA Contracts may fluctuate due to various factors and as such affect the return on an investor's investment in the Securities.

If the applicable Issue Terms specify that the EUA Contract Linked Securities are "*Rolling Futures Contract Securities*", the reference price of the EUA Contract will be valued by reference to futures contracts with delivery months that do not match the Redemption Date of the EUA Contract Linked Securities. The Calculation Agent will select a new futures contract on each Futures Rollover Date specified in the applicable Issue Terms. If it is impossible or materially impracticable to select a new futures contract and/or hedge the Issuer's obligations in respect of the EUA Contract Linked Securities, the consequences of a Market Disruption Event described above will apply.

There are specific risks relating to Bond Linked Securities

The Issuer may issue Securities where the redemption amount or the value of the Entitlement (as defined in General Condition 5(b)(v) and/or interest payable is dependent upon the price of or changes in the price of a bond ("**Bond Linked Securities**"). Accordingly, an investment in Bond Linked Securities may bear similar market risks to a direct investment in such bond and investors should take advice accordingly.

Investors in any such Securities should be aware that, depending on the terms of the Bond Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of the redemption amount and/or interest may occur at a different time than expected and (iii) they may lose all or a substantial portion of their investment if the value of the bond does not move in the anticipated direction. In addition, the movements in the price of the bond may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices and the timing of changes in the relevant price of the bond may affect the actual yield to investors, even if the average price is consistent with their expectations. All these factors may affect the investments in the Securities.

The market price of such Securities may be volatile and may be affected by the time remaining to the redemption date, the volatility of the bond, the distribution policy, the financial results, prospects and credit rating of the issuer or issuers of the relevant bonds as well as economic, financial and political events in one or more jurisdictions, including factors affecting the exchange(s) or quotation system(s) on which any such bond may be traded.

Upon determining that a Bond Adjustment Event, Bond Event or Additional Disruption Event has occurred in relation to an underlying bond or the issuer of such underlying bond, the Calculation Agent has broad discretion to make certain determinations to account for such event including to (i) make adjustments to the terms of the Securities and/or (ii) (in the case of a Bond Event or an Additional Disruption Event) cause early redemption of the Securities, any of which determinations may have an adverse effect on the value of the Securities.

See also risk factor "*The Calculation Agent, which will be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders*" below.

6.2 Risk Factors associated with Reference Item linked Securities

Investors may lose some or all of their investment

Reference Item Linked Securities are securities which do not provide for predetermined redemption amounts and/or interest payments, but amounts payable (whether in respect of redemption amount and/or interest) or entitlement amounts deliverable will be dependent upon the performance of the Reference Item, or a combination of Reference Items. Each type of Reference Item has its own risk profile and depends on various factors that can change its value and performance. These factors include credit, interest rate, foreign exchange, correlation, time value, political and/or other risks. All the factors associated with an impact on the value of the Reference Item will also affect the Securities that are linked to Reference Item(s). Therefore Securityholders holding Reference Item Linked Securities are in addition to the risks related to the Securities in general also exposed to the risks of the relevant Reference Item(s).

An investment in Reference Item Linked Securities therefore entails significant risks that are not associated with similar investments in a conventional fixed or floating rate debt security. These risks include the possibility that the holder of a Reference Item Linked Security could lose all or a substantial portion of the nominal amount of such Security (whether payable at maturity or upon early redemption or repayment), and that the resulting return on investment (if any) will be lower than on conventional debt securities issued by the Issuer around the same

RISK FACTORS

time or no return of investment will be achieved at all. To achieve a return on investment on a Reference Item Linked Security upon redemption an investor must generally be correct about the direction, timing and magnitude of an anticipated change in the value of the relevant Reference Item(s).

Fluctuations in the value of the relevant Reference Item will affect the value of Reference Item Linked Securities

The potential return on investment of Reference Item Linked Securities is directly dependent upon the value of the relevant Reference Item. Therefore, each change of the value of a Reference Item may directly affect the value of the Reference Item Linked Securities. If the Reference Item(s) perform unfavourably, the value of the Reference Item Linked Securities will be negatively affected.

Investors may not receive any interest on Reference Item Linked Securities

Investors should be aware that depending on the applicable conditions of Reference Item Linked Securities, no interest may be payable or the Securities may only pay interest if the value or performance of the Reference Item(s), as determined in accordance with the applicable conditions, being (i) greater than, (ii) greater than or equal to, (iii) less than or (iv) less than or equal to, as specified in the applicable Issue Terms, a specified barrier value. If such condition is not satisfied, then (a) (in the case of a coupon payment) no payment may be due, or (b) the relevant amount payable may be determined by reference to the performance of the relevant Underlying Asset(s) and may be less than the amount originally invested and lower than the amount an investor would have received had no such event occurred. This means that there is generally a greater risk of loss of the original invested amount.

The investors may be subject to small-capitalisation reference item risks

The Securities may be subject to risks associated with Reference Item(s) which are, or are comprised of, small-capitalisation companies. These companies often have greater share price volatility, lower trading volumes and less liquidity than large-capitalisation companies and therefore such Reference Item(s) may be more volatile than Reference Item(s) which are large-capitalisation companies, or are composed of, a greater percentage of its constituents issued by large-capitalisation companies. Share prices of small-capitalisation companies are also more vulnerable than those of large-capitalisation companies to adverse business and economic developments, and the shares of small-capitalisation companies may be thinly traded. In addition, small-capitalisation companies are typically less financially stable than large-capitalisation companies and may depend on a small number of key personnel, making them more vulnerable to loss of personnel. Small-capitalisation companies are often given less analyst coverage and may be in early, and less predictable, stages of their corporate existence. Such companies tend to have smaller revenues, less diverse product lines, smaller shares of their product or service markets, fewer financial resources and less competitive strengths than large-capitalisation companies and are more susceptible to adverse developments related to their products.

A Securityholder does not have rights of ownership in the Reference Item(s)

Investors should be aware that neither the Issuer nor the Guarantor is under no obligation to hold a position in any Reference Item(s) and should note that the relevant Reference Item(s) that may be held by the Issuer or the Guarantor will not be held by them for the benefit of the investors and, as such, Securityholders will not obtain any rights of ownership, including, without limitation, any voting rights, any rights to receive dividends or other distributions or any other rights with respect to any Reference Item referenced by such Securities. As a result, Securityholders will not be able to exercise rights they would have as owner or have any recourse to any issuer of a Reference Item.

With respect to Equity Linked Securities, unless otherwise specified in the Issue Terms, the Interest Amount and/or Final Redemption Amount will not reflect the payment of any dividends on the underlying share(s). Accordingly, the return on the Equity Linked Securities will not reflect the return an investor would realise if it actually owned share(s) and received dividends, if any, paid on those securities. Therefore, the yield to maturity based on the methodology for calculating the Final Redemption Amount will not be the same yield as would be produced if the share(s) were purchased directly and held for a similar period.

With respect to the Index Linked Securities or the Custom Index Linked Securities, if the components of the indices are shares, Securityholders will not receive any dividends paid on those share(s) and will not participate in the return on those dividends unless the relevant index takes such dividends into account for purposes of

RISK FACTORS

calculating the relevant level. Accordingly, investors in Index Linked Securities or Custom Index Linked Securities may receive a lower payment upon redemption of such Securities than such investor would have received if the investor had invested in the components of the index directly.

With respect to Fund / ETF Linked Securities, unless otherwise specified in the Issue Terms, the Interest Amount and/or Final Redemption Amount will not reflect the payment of any dividends on the underlying fund shares or exchange traded fund shares, as the case may be. Accordingly, the return on the Fund / ETF Linked Securities will not reflect the return an investor would realise if it actually owned the underlying fund shares or exchange traded fund shares, as the case may be, and received dividends, if any, paid on those underlying fund shares or exchange traded fund shares, as the case may be. Therefore, the yield to maturity based on the methodology for calculating the Final Redemption Amount will not be the same yield as would be produced if the underlying fund shares or exchange traded fund shares, as the case may be, were purchased directly and held for a similar period.

As a result, investors in Index Linked Securities, Custom Index Linked Securities, Equity Linked Securities or Fund / ETF Linked Securities may receive less return than expected. See also risk factors "*There are specific risks relating to Index Linked Securities*", "*There are specific risks relating to Custom Index Linked Securities*", "*There are specific risks relating to Equity Linked Securities*", "*There are specific risks relating to Fund Linked Securities*" and "*Risks associated with non-U.S. securities markets for investors in 3(a)2 Notes*" above.

It may not be possible to use the Securities as a perfect hedge against the market risk associated with investing in a Reference Item

Investors intending to purchase Securities to hedge against the market risk associated with investing in a Reference Item should recognise the complexities of utilising Securities in this manner. For example, the value of the Securities may not exactly match the value of the Reference Item. Due to fluctuating supply and demand for the Securities, there is no assurance that their value will match movements in the value of the Reference Item.

There are specific risks with regard to Securities linked to a combination of Reference Items

An investment in Securities that are linked to a combination of Reference Items will entail significant risks not associated with an investment in a conventional debt security. A combination of the risks associated to the Reference Items may be significantly higher than the risks of each Reference Item considered on its own. On redemption of this type of Securities, the Securityholders will receive an amount (if any) or Entitlement (if any) determined by reference to the value of a combination of a number of different Reference Items. These Securities may pay interest calculated by reference to the value of the combination of a number of Reference Items.

The Issuer, the Guarantor and their respective affiliates may take positions in or deal with the Reference Item(s)

The Issuer and/or the Guarantor and their respective affiliates may engage in activities or arrangements in a range of capacities that may result in conflicts of interest between their own financial interests and those of Securityholders.

The Issuer, the Guarantor and their respective affiliates may for example:

- (i) in the ordinary course of business, effect transactions for their own account or for the account of their customers (which may include the issuers of Reference Items) and hold positions where they benefit from an increase or decrease of the value of the Reference Item(s) or related derivatives;
- (ii) in connection with an offering of Securities, enter into one or more transactions with respect to the Reference Item(s) or related derivatives for example in connection with hedging or market-making activities;
- (iii) acting in a number of different capacities in relation to any Reference Item (including but not limited to an underlying Index (including a Custom Index), including, but not limited to, as issuer of the constituents of the Index (or Custom Index, as the case may be), index sponsor, index administrator or calculation agent);
- (iv) act as financial advisers to certain issuers of Reference Items or reference entities;

RISK FACTORS

Each of activities could have an adverse affect on the value of the Reference Item(s) and therefore affect the price, liquidity or value of the relevant Securities and which could therefore be adverse to the interests of the relevant Securityholders. The Issuer, the Guarantor and their respective affiliates may from time to time possess or have access to information relating to Securities, the Reference Item(s), reference entities or any derivatives referencing them. None of the Issuer, the Gurantor and their respective affiliates is obliged (i) to disclose such information or (ii) to take into account the interest of Securityholders when engaging in such activities.

Government Regulatory Action, Including Legislative Acts and Executive Orders, Could Result in Material Changes to the Composition of Reference Items and Could Negatively Affect Your Return on the Securities

Government regulatory action, including legislative acts and executive orders, could cause material changes to the composition of the Reference Items depending on the nature of such government regulatory action and the Reference Items that are affected. For instance, pursuant to recent executive orders, U.S. persons are prohibited from engaging in transactions in publicly traded securities of certain companies that are determined to be linked to the People's Republic of China (the "PRC") military, intelligence and security apparatus, or securities that are derivative of, or are designed to provide investment exposure to such securities. If government regulatory action results in the removal of stocks which are Reference Items and that have (or historically have had) significant weight in the Reference Items, such removal could have a material and negative effect on the levels of the Reference Items and, therefore, your return on the Securities.

6.3 Risk Factors relating to Securities with certain features

There are particular risks associated with an investment in certain types of Securities and an investor may lose some or all of the amount invested by it.

There are risks associated with leveraged exposures

Leverage involves the use of a number of financial techniques to increase the exposure to a Reference Item, and can therefore magnify both returns and losses. While the use of leverage allows for potential multiples of a return (assuming a return is achieved) when the Reference Item moves in the anticipated direction, it will conversely magnify losses when the Reference Item moves against expectations. If the relevant Securities (including Floating Rate Securities or Fixed Rate Securities) include leverage, potential holders of such Securities should note that these Securities will involve a higher level of risk, and that whenever there are losses such losses will be higher (other things being equal) than those of a similar Security which is not leveraged.

There are specific risks relating to Floating Rate Securities

A key difference between Floating Rate Securities and Fixed Rate Securities is that interest income on Floating Rate Securities cannot be anticipated. Due to varying interest income, investors are not able to determine a definite yield of Floating Rate Securities at the time they purchase them, so that their return on investment cannot be compared with that of investments having longer fixed interest periods. In addition, the Issuer's ability to issue Fixed Rate Securities may affect the market value and secondary market (if any) of the Floating Rate Securities (and vice versa). See also risk factors "*There are risks associated with leveraged exposures*" and "*The regulation and reform of "benchmarks" may adversely affect the value of Securities linked to or referencing such "benchmarks"*".

There are specific risks relating to Fixed Rate Securities

The market value of Fixed Rate Securities may fluctuate significantly in response to changes in interest rates and inflation expectations, and other factors that affect the demand and supply of fixed income securities. Investors may suffer losses if they sell Fixed Rate Securities at a lower price than they purchased them or if they hold them until maturity and receive less than the initial investment value in real terms, which means after accounting for inflation.

There are specific risks with regard to Securities linked to the Worst Performing Reference Item

Investors in Securities linked to the performance of the worst performing Reference Item are subject to the risk associated with the worst-performing Reference Item. This means, that irrespective of how the other Reference Items perform, if the Reference Item having the worst performance fails to meet specified thresholds, Securityholders may not receive one or more contingent payments and could lose some or all of their initial

RISK FACTORS

investment. Securities linked to a greater number of Reference Item(s) will tend to have a higher risk, compared with Securities linked to fewer Reference Item(s). In addition, the less correlated the Reference Item(s) are to each other, the relatively higher these risks are. With more Reference Item(s), it is more likely that the worst performing Reference Item will fail to meet specified thresholds than if the Securities were linked to a single Reference Item or fewer Reference Item(s). In addition, the lower the correlation between a pair or group of Reference Item(s) is, the greater the likelihood that one of the Reference Items will fail to meet specified thresholds. Although the correlation of the Reference Item(s)' performance may change over the term of the Securities, the economic terms of the Securities, including specified thresholds and contingent payments are determined, in part, based on the correlation of the Reference Item(s)' performance as of the Issue Date. All things being equal, higher contingent payments and lower specified thresholds are generally associated with lower correlation of the Reference Item(s). Therefore, if the performance of a pair or group of Reference Item(s) is not correlated to each other or is negatively correlated, the risk that a Securityholder will not receive any contingent payment or that a Securityholder will lose a significant portion or all of the initial investment is even greater despite lower specified thresholds. "Correlation" is a statistical measure that describes the degree to which the Reference Item(s)' move in relation to each other.

There are specific risks with regard to Securities linked to a Reference Item which is a single share

The return on Securities linked to a single share, which may be negative, is directly linked to the performance of the Share. The level of the Share can rise or fall sharply due to factors specific to the Share and its issuer, such as stock or commodity price volatility, earnings, financial conditions, corporate, industry and regulatory developments, management changes and decisions and other events, as well as general market factors, such as general stock and commodity market volatility and levels, interest rates and economic, political and other conditions. Investors should conduct their own investigation into the issuer of the Share and the Share for their Notes. For additional information regarding the Share, investors should consult the applicable Issue Terms.

There are specific risks with regard to Securities linked to Reference Items from one specific industry sector and/or indices or funds comprising such Reference Item(s) from one specific sector

Securities that are linked to Reference Items from one specific industry sector and/or indices or funds comprising such Reference Item(s) from one specific sector are subject to risks associated with such industry sector. All or substantially all of the Reference Items included in certain baskets of shares and/or indices or funds comprising such Reference Items from one specific sector are issued by companies whose primary line of business is directly associated with such industry sector. In the case of events impacting companies active in such sector, the value of the Reference Items from one specific sector may move in the same direction at substantially the same time and/or experience a substantially similar level of volatility, i.e. the value of the Reference Items correlates with each other. The same applies for market or economic factors impacting companies active in such sector in general. In those cases, such coordinated movement and/or volatility may have a more substantial impact on the value of the Securities linked thereto than if such Securities were linked to multiple Reference Items with a low level of correlation. Consequently investors in Securities that are linked to multiple Reference Items with a high degree of correlation may be exposed to greater risks of loss in case adverse events or developments occur with regard to one or more of the Reference Item than in case of Securities that are linked to multiple Reference Items with a low degree of correlation.

There are risks associated with Securities with barrier feature(s)

In the case of Securities with a barrier feature, amounts payable in respect of the Securities will be conditional on the value or performance of the Reference Item(s), as determined in accordance with the applicable conditions, being (i) greater than, (ii) greater than or equal to, (iii) less than or (iv) less than or equal to, as specified in the applicable Issue Terms, a specified barrier value. If such condition is not satisfied, then (a) (in the case of a coupon payment) no payment may be due, or (b) the relevant amount payable on redemption may be less than the amount originally invested and lower than the amount an investor would have received had no such event occurred.

There are specific risks relating to Dual Currency Securities

The Issuer may issue Foreign Exchange (FX) Rate Linked Dual Currency Securities which are Securities where the redemption amount and/or interest payable are dependent upon movements in foreign exchange rates or are payable in one or more currencies which may be different from the currency in which the Securities are denominated. Accordingly, an investment in Dual Currency Securities may bear similar market risks to a direct foreign exchange investment and investors should take advice accordingly.

RISK FACTORS

Investors in any such Securities should be aware that, depending on the terms of the Dual Currency Securities which are Foreign Exchange (FX) Rate Linked Securities (i) they may receive no or a limited amount of interest, (ii) payment of the redemption amount and/or interest may occur at a different time or in a different currency than expected and (iii) they may lose a substantial portion or all of their investment. In addition, movements in currency exchange rates may be subject to significant fluctuations that may not correlate with changes in interest rates or other indices and the timing of changes in the exchange rates may affect the actual yield to investors, even if the average level is consistent with their expectations. All these factors may affect the investments in the Securities.

The foreign exchange rates between currencies are determined by factors of supply and demand in the international currency markets, which are influenced by economic factors, speculation and interventions taken by governments and central banks. Such measures include imposition of currency controls and restrictions which could result in the receipt of reduced payment and/or otherwise make it impossible or impracticable for the relevant Issuer to meet its repayment obligations in the currency in which the Securities are denominated. In recent years, rates of exchange between some currencies have been volatile. This volatility may be expected in the future.

The terms of the Dual Currency Securities provide that if a Disruption Event occurs or continues on a date on which the relevant currency exchange rate is to be observed, the Calculation Agent will, if the Disruption Event is a Price Source Disruption or a Price Materiality, postpone such date to the next Scheduled Trading Day that is not a Disrupted Day, subject to a maximum number of consecutive disrupted days. If the maximum number of consecutive disrupted days is reached, the Calculation Agent may determine the foreign exchange rate using commercially reasonable efforts based on all available relevant information, even if market prices are not available.

Upon the occurrence of other Disruption Events, such as an illiquidity event where it becomes impossible for the Calculation Agent to obtain a firm quote for the relevant currency, the split of any relevant currency into a dual exchange rate, inconvertibility where it become impossible to convert the relevant currency into another currency, non-transferability where it becomes impossible to transfer the relevant currency, a material change in circumstances in the jurisdiction of the relevant currency that makes it impossible to fulfil certain hedging arrangements or a nationalisation which deprives a party to a hedging arrangement of substantially all of its asset in a relevant jurisdiction for the relevant currency, the Calculation Agent will determine the foreign exchange rate based on all information it deems relevant. If the Calculation Agent determines that it is not possible to determine the relevant foreign exchange rate, the Issuer may elect to redeem all (but not some only) of the Securities early.

Furthermore, following an Additional Disruption Event, the Securities may be redeemed early (or on the originally designated date) by payment of the applicable early redemption amount rather than any amount that would have otherwise been calculated in respect of and due on the relevant date.

As a result, investors in Dual Currency Securities may be exposed to the risk that the Calculation Agent determines the relevant foreign exchange rate in the absence of available market prices, relying instead on alternative information sources at the time. Additionally, the Calculation Agent may make such determinations or calculations at times that differ from investors' expectations, and payments of principal or interest may be made at times or in currencies that are different from those originally anticipated. Early redemption of the Securities may also occur, potentially resulting in investors receiving less than the amount they expected or at a time that does not align with their investment plans. .

Given that investors in Foreign Exchange (FX) Rate Linked Dual Currency Securities are investing in Securities for which the applicable Issue Terms specify that Settlement Exchange Rate Provisions are applicable and that are Foreign Exchange (FX) Rate Linked Dual Currency Securities, they should also carefully consider the risks that are described below under "*Securities may be denominated in one currency and settled in another currency*" and above under "*There are specific risks relating to Foreign Exchange (FX) Rate Linked Securities*".

Higher contingent payments or lower specified thresholds may reflect greater expected volatility of the Reference Item(s) and greater expected volatility generally indicates an increased risk that Securityholders may lose some or all of their initial investment

The economic terms of the Reference Item Linked Securities may include contingent payments and specified thresholds that are based, in part, on the expected volatility of the Reference Item(s). The greater the expected volatility of the Reference Item(s) as of the Issue Date, the greater the expectation is, as of that date, that the performance of the Reference Item(s) could fail to meet specified thresholds and, as a consequence, indicates an increased risk of not receiving any contingent payments and an increased risk that Securityholders may lose some

RISK FACTORS

or all of their investment. Typically, the higher the contingent payments compared to the yield payable by the Issuer or the Guarantor on conventional debt securities with a similar maturity, the higher the expected volatility may be for the Reference Item(s). Also, lower specified thresholds relative to otherwise comparable Reference Item Linked Securities may indicate a higher expected volatility for the relevant Reference Item(s). Therefore, relatively higher contingent payments may indicate an increased risk of loss. Further, relatively lower specified thresholds may not necessarily indicate that the Securities have a greater likelihood that Securityholders will receive a positive return on their initial investment. "Volatility" refers to the frequency and magnitude of changes in the performances of the Reference Item(s).

Switchable Securities may result in materially lower investment returns

In the case of Securities that are Switchable Securities, the Issuer has the right to switch the Interest Basis from a Fixed Rate to a Floating Rate or from a Floating Rate to a Fixed Rate on a date specified in the applicable Issue Terms. The Issuer may exercise this right in its sole and absolute discretion. If the Issuer exercises the right, the way in which the interest payable on the Securities (if any) is determined will change. These changes may be detrimental to investors and could result in materially lower investment returns.

There are specific risks with regard to Securities providing for an Automatic Early Redemption

In the case of Securities that provide for an automatic early redemption, the timing of redemption of such Securities is uncertain since the occurrence of an Automatic Early Redemption Event will be dependent upon the performance of the Reference Item(s). The term of their investment in the Securities may be limited to as early as the first Automatic Early Redemption Date. In the case of an unfavourable development of the value of the Reference Item(s), the redemption of such Securities may not occur until the scheduled maturity and the amount payable on redemption may be determined based on the unfavourable performance of the Reference Item(s) and may be less than the amount originally invested and lower than the amount an investor would have received had an Automatic Early Redemption Event occurred.

Upon early redemption of the Securities as the result of an Automatic Early Redemption Event, investors will not participate in the future performance of the Reference Item(s) after the date of such early redemption. Investors in such Securities may incur additional transaction costs as a consequence of reinvesting proceeds received upon any early redemption and the conditions for such reinvestment may be less favourable than the relevant investor's initial investment in the Securities. This means that there is no guarantee that the investors would be able to reinvest the proceeds from an early redemption of the Securities at a comparable rate of return for a similar level of risk. In addition, if an Automatic Early Redemption Event occurs, no amounts payable under the Securities that would otherwise have been due after the Automatic Early Redemption Date will be paid. Generally, the longer the Securities remain outstanding, the less likely the Securities will be automatic early redeemed due to the performance of the Reference Item(s) and the shorter time remaining for the performance of the Reference Item(s) to trigger an automatic early redemption.

There are specific risks with regard to Securities providing for limited potential return

In the case of Securities that provide for a limited potential return (e.g. Securities where the amounts payable are subject to a cap), investors will not participate in any performance of the Reference Item(s) that would result in amounts exceeding those limits. The potential return of the Securities will be limited regardless of the performance of the Reference Item(s) and may vary depending on the number of valuation dates. Therefore, an investment in such Securities may lead to a lower return than if the investor had made a direct investment in the Reference Item(s).

There are risks associated with Physically Settled Securities

Holders may receive physical delivery of shares, fund shares, ETF shares or bonds in lieu of payment of cash amounts

Where the Securities include the right of the Issuer to redeem, subject to the fulfilment of a particular condition, the Securities at their maturity by delivering shares, fund shares, ETF shares or bonds to the investor, the investor will receive such shares, fund shares, ETF shares or bonds rather than a monetary amount upon maturity. Holders will, therefore, be exposed to the issuer of such shares, fund shares, ETF shares or bonds and the risks associated with such shares, fund shares, ETF shares or bonds. Securityholders should not assume that they will be able to sell such shares, fund shares or ETF shares for a specific price after the redemption of the Securities, and in

RISK FACTORS

particular not for the purchase price of the Securities. The Securityholders will be exposed to any decline in the value of such shares, fund shares, ETF shares or bonds between the Redemption Valuation Date and the Maturity Date. Under certain circumstances the shares, fund shares, ETF shares or bonds may only have a very low value or may, in fact, be worthless. Holders may also be subject to certain documentary or stamp taxes in relation to the delivery and/or disposal of such shares.

There are certain requirements to be fulfilled and payments to be made by the Holder in order to receive Entitlement(s) in connection with Physically Settled Securities and the Issuer may decide to settle by way of cash payment instead in certain circumstances

In order to receive the Entitlement in respect of a Security settled by way of Physical Delivery, the holder of such Security must deliver or send to the relevant Clearing System or Principal Paying Agent (as applicable) a duly completed Asset Transfer Notice on or prior to the relevant time on the Cut-off Date and pay the relevant Expenses. If a Securityholder fails to deliver as required the certification of non-U.S. beneficial ownership or certification that it is an eligible investor for U.S. securities law purposes, the Issuer may deliver what the Calculation Agent determines to be the fair market value of the Entitlement instead of the relevant assets.

Securityholders may be required to pay certain expenses in relation to Physically Settled Securities

Holders of Securities subject to Physical Delivery must pay all taxes and expenses relating to delivery of such Securities. As defined in the Terms and Conditions of the Securities, "Expenses" includes all costs, taxes, duties and/or expenses including stamp duty, stamp duty reserve tax, transfer tax and/or other costs, duties or taxes arising from the delivery of the Entitlement.

Settlement disruption

In the case of Securities which are redeemable by delivery of assets (other than Credit Linked Securities), if a Settlement Disruption Event occurs or exists on the due date for redemption of the Securities, settlement will be postponed until the next Settlement Business Day in respect of which there is no Settlement Disruption Event. The Issuer in these circumstances also has the right to pay the Disruption Cash Redemption Amount in lieu of delivering the Entitlement (as defined in the Terms and Conditions).

If a Failure to Deliver due to Illiquidity occurs, the Issuer has the right, in lieu of delivery of the assets affected by such event, to pay the Failure to Deliver Redemption Amount to the Securityholders. The Disruption Cash Redemption Amount and/or the Failure to Deliver Redemption Amount may be less than the fair market value of the Entitlement.

The regulation and reform of "benchmarks" may adversely affect the value of Securities linked to or referencing such "benchmarks"

Interest rates and indices which are deemed to be "benchmarks", (including the historic London interbank offered rate ("**LIBOR**") and the Euro Interbank Offered Rate ("**EURIBOR**") and other types of indices such as indices comprised of interest rates, equities, funds and foreign exchange rates and combinations thereof) have been the subject of national and international regulatory guidance and reform aimed at supporting the transition to robust benchmarks. Most reforms have now reached their planned conclusion (including the transition away from LIBOR) and "benchmarks" remain subject to ongoing monitoring. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on the value of and return on Securities referencing such a benchmark.

Regulation (EU) 2016/1011, as amended (the "**EU Benchmarks Regulation**") applies to the provision of in-scope benchmarks, the contribution of input data to an in-scope benchmark and the use of an in-scope benchmark within the EU. Among other things, it (i) requires administrators of an in-scope benchmark to be authorised or registered (or, if non-EU-based, to be subject to an equivalent regime or otherwise recognised or endorsed) and (ii) prevents certain uses by EU supervised entities (such as the Guarantor) of in-scope benchmarks where the administrator/benchmark is not appropriately authorised or registered (or, if non-EU based, not deemed equivalent or recognised or endorsed), subject to certain transitional provisions. From 1 January 2026, the scope of the EU Benchmark Regulation is expected to be reduced that only critical benchmarks, significant benchmarks, certain commodity benchmarks, EU Climate Transition Benchmarks and EU Paris-aligned benchmarks will remain in mandatory scope of the core provisions in the revised regime. Regulation (EU) 2016/1011 as it forms part of

RISK FACTORS

domestic law by virtue of the European Union (Withdrawal) Act 2018 (the "**UK Benchmarks Regulation**") among other things, applies to the provision of benchmarks and the use of a benchmark in the UK. Similarly, it prohibits the use in the UK by UK supervised entities of benchmarks where the administrator/benchmark is not appropriately of administrators that are not authorised by the FCA or registered on the FCA register (or, if non-UK based, not deemed equivalent or recognised or endorsed).

Under the UK Benchmarks Regulation, the transitional provisions for third country benchmark administrators continue until 31 December 2030. However, under the EU Benchmarks Regulation the transitional provisions for third country benchmark administrators expire on 31 December 2025, although (in summary) if ESMA has received an application for recognition or endorsement by such date, the benchmark concerned can be used in existing and new financial instruments and financial contracts, unless and until the administrator's application is refused. There is also a transitional provision applicable to certain spot FX benchmarks until the date of entry into force of the implementing act giving clarity on the scope of the spot FX exemption. This means that third country administrators of benchmarks remaining in-scope of the EU Benchmarks Regulation on 1 January 2026 will need to apply for recognition or endorsement imminently (to the extent they have not already) or benefit from equivalence for supervised entities to add new references to such benchmarks to in-scope instruments and, in relation to significant benchmarks subject to a public notice for non-compliance with the EU Benchmarks Regulation, to avoid the application of certain restrictions on use of such benchmarks in existing instruments.

The EU Benchmarks Regulation and the UK Benchmarks Regulation also give regulators additional powers to intervene in relation to critical benchmarks (such as EURIBOR under the EU Benchmarks Regulation or WMR London 4PM Closing Spot Rate under the UK Benchmarks Regulation), including to support the orderly wind-down of a critical benchmark. Any such interventions could have a negative impact on the value or liquidity of, and return on, certain Securities linked to or referencing such a critical benchmark.

The EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable, could have a material impact on any Securities linked to or referencing a benchmark in scope of one/both of these regulations, in particular, if the methodology or other terms of the benchmark are changed in order to comply with the requirements of the EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable. Such changes could, among other things, have the effect of reducing, increasing or otherwise affecting the volatility of the published rate or level of the relevant benchmark.

More broadly, any of the international or national reforms, or the general increased regulatory scrutiny of benchmarks, may have (without limitation) the following effects on certain benchmarks: (i) increasing the costs and risks of administering or otherwise participating in the setting of a benchmark and complying with any such regulations or requirements; (ii) discouraging market participants from continuing to administer or contribute to a benchmark; (iii) triggering changes in the rules or methodologies used in the benchmark and/or (iv) leading to the disappearance of the benchmark.

In addition to so-called "critical benchmark" indices, such as EURIBOR, other interest rates, foreign exchange rates, and indices, including equity, commodity and "proprietary" indices or strategies, may be in scope of the EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable, as "benchmarks" where they are used to determine the amount payable under, or the value of, certain financial instruments (including securities listed on an EU or UK regulated market, EU or UK multilateral trading facility, EU or UK organised trading facility or via a systematic internaliser).

Amongst other developments, relevant authorities are strongly encouraging the transition away from Interbank Offered Rates ("**IBORs**"), such as EURIBOR, and have identified "risk free rates" to take the place of such IBORs as primary benchmarks. This includes (i) for sterling LIBOR (now ceased), a reformed Sterling Overnight Index Average ("**SONIA**"), as the primary sterling interest rate benchmark, (ii) for EONIA (now ceased) and EURIBOR, a Euro Short-Term Rate ("**€STR**") as the primary euro risk free rate, and (iii) for USD LIBOR (now ceased), the Secured Overnight Financing Rate ("**SOFR**") as the primary U.S. dollar interest rate benchmark. The risk free rates have a different methodology and other important differences from IBORs and have limited historical track record and may be subject to changes in their methodology. The market or a significant part thereof may also adopt an application of a risk free rate that differs significantly from that set out in the terms and conditions of the Securities, or the adoption of the risk free rate used in the Eurobond markets may differ materially from that used in other markets, such as the derivatives and loan markets. Any of these developments could result in reduced liquidity or increased volatility or could otherwise have a material adverse effect on the value of and return on Securities linked to any such rates.

RISK FACTORS

In addition, Regulation 2025/914 amending the EU Benchmarks Regulation was published in the Official Journal of the EU on 19 May 2025, it will enter into force 20 days thereafter and will apply from 1 January 2026. With a view to reducing the disproportionate regulatory burden placed on administrators of smaller benchmarks, one of the key changes to the regime is that only benchmarks perceived to have the greatest economic relevance for the EU market will be in mandatory scope of the core provisions of the new regime. Such "benchmarks" will be those defined as "critical or significant" (determined based on quantitative or qualitative criteria), EU Paris-aligned benchmarks, EU Climate Transition benchmarks, and certain commodity benchmarks which will remain in scope of the mandatory application of the core provisions of the EU Benchmarks Regulation. An exemption will apply for certain FX benchmarks.

Other benchmarks will fall out of mandatory EU Benchmarks Regulation scope (other than certain limited provisions including in relation to statutory replacement of a benchmark, connected with cessation and/or non-representativeness). For benchmarks that are in scope of the revised regime, similar risks will apply to those which apply to benchmarks in scope of the current regime. Investors should note however that benchmarks that fall out of scope of the revised regime (which have not been opted-in) will no longer be regulated in the same way from 1 January 2026. This means that previously mandatory requirements, for example, regulating governance, conflicts of interest, oversight functions, input data requirements, methodology and transparency of the methodology, requirements for contributors and in relation to input data, will fall away. Among other things, there is a risk that this could mean that the methodology of such benchmarks may be less robust, resilient or transparent (potentially being capable of being materially amended without consultation). This may reduce or increase or affect the volatility of the level of such benchmarks, or if the methodology is materially amended, trigger an Index Adjustment Event or an Administrator/Benchmark Event (as defined in General Condition 6(l)).

The UK Benchmarks Regulation is also expected to be repealed and reformed in the near future. It remains to be seen what, if any, changes will be proposed and consequently what, if any, impact any such changes may have on the Securities.

Risks associated with the occurrence of an Administrator/Benchmark Event

The Terms and Conditions of the Securities provide for certain fallback arrangements in the event that a Administrator/Benchmark Event (as defined in General Condition 6(l)) occurs in respect of Benchmark or other relevant reference rate (which could include, without limitation, a mid-swap rate) and/or any page on which such benchmark may be published (or any other successor service) becomes unavailable. Any of these fallback arrangements may result in lower interest and/or coupon and/or redemption amounts (including the possibility that the Rate of Interest could be set by reference to a successor benchmark, with the application of an adjustment spread (which could be positive, negative or zero)), and may include amendments to the Terms and Conditions of the Securities to ensure the proper operation of the new benchmark, all as determined by the Calculation Agent and as more fully described in General Condition 6(l). It is possible that the adoption of a successor benchmark, including any adjustment spread, may result in any Securities linked to or referencing a Benchmark performing differently (which may include lower interest and/or coupon and/or redemption amounts and/or lower Rate of Interest) than they would if the original Benchmark were to continue to apply in its current form. There is also a risk that the relevant fallback provisions may not operate as expected or intended at the relevant time.

In addition, the occurrence of an Administrator/Benchmark Event (as defined in General Condition 6(l)) may lead to an early redemption of the Securities. Any redemption or expected redemption of the Securities following the occurrence of an (expected) Administrator/Benchmark Event may have an adverse effect on the value and liquidity of such Securities and accordingly the return on investment Securityholders can achieve on their investment. There is no guarantee that the investors would be able to reinvest the proceeds from an Automatic Early Redemption of the Securities at a comparable rate of return for a similar level of risk

Investors should consult their own independent advisers and make their own assessment about the potential risks imposed by the EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable, or any of the international or national reforms and the possible application of the benchmark replacement provisions of Securities in making any investment decision with respect to any Securities referencing a benchmark.

The implementation of SOFR Replacement Conforming Changes could adversely affect Securityholders

Under the fallback provisions applicable to Securities that pay a floating rate of interest by reference to the Secured Overnight Financing Rate ("SOFR") (whether a compounded rate or the SOFR Index), if a particular SOFR Replacement or SOFR Replacement Adjustment (each as defined in General Condition 4(b)(iv)(4)) cannot be

RISK FACTORS

determined, then the next-available SOFR Replacement or SOFR Replacement Adjustment will apply. These replacement rates and adjustments may be selected or formulated by (i) the Relevant Governmental Body (as defined in General Condition 4(b)(iv)(4)), (ii) ISDA or (iii) in certain circumstances, the Calculation Agent and/or the Replacement Rate Determination Agent.

In addition, the fallback provisions permit the Replacement Rate Determination Agent to make certain changes (which are defined in General Condition 4(b)(iv)(4) as "**SOFR Replacement Conforming Changes**") with respect to, among other things, the timing and frequency of determining rates and making payments of interest. The application of a SOFR Replacement and SOFR Replacement Adjustment and any implementation of SOFR Replacement Conforming Changes could reduce the amount of interest payable in respect of an interest period, which could adversely affect the return on, value of and market for, the Securities. Further, there is no assurance that the characteristics of any SOFR Replacement will be similar to the then-current SOFR benchmark that it is replacing or that any SOFR Replacement will produce the economic equivalent of the then-current SOFR benchmark that it is replacing.

The market continues to develop in relation to SONIA, SOFR, and €STR as reference rates for Securities that pay a floating rate of interest

Where the applicable Issue Terms specify that the Rate of Interest or Rate, as applicable, in respect of the Securities will be determined by reference to SONIA, SOFR, or €STR, the Rate of Interest or Rate, as applicable, will be determined by reference to the Compounded Daily SONIA, Weighted Average SONIA, Compounded Daily SOFR (including on the basis of the SOFR Index published on the NY Federal Reserve Website), SOFR Arithmetic Mean, the USD-SOFR ICE Swap Rate, or Compounded Daily €STR, as specified in the applicable Issue Terms. In each case, such rate will differ from the relevant EURIBOR rate in a number of material respects, including (without limitation) that compounded daily rates or weighted average rates are backwards-looking, risk-free overnight rates and, in the case of SOFR, secured, and single daily rates are risk-free overnight non-term rates, whereas EURIBOR is expressed on the basis of a forward-looking term, are unsecured and include a risk-element based on inter-bank lending. As such, investors should be aware that EURIBOR, SONIA, SOFR, and €STR may behave materially differently as floating rates of interest in respect of the Securities.

Risk-free rates offered as alternatives to interbank offered rates also have a limited history. For that reason, future performance of such rates may be difficult to predict based on their limited historical performance. Certain administrators of risk-free rates have published hypothetical and actual historical performance data. Hypothetical data inherently includes assumptions, estimates and approximations and actual historical performance data may be limited in the case of certain risk-free rates.

The level of such rates during the term of the Securities may bear little or no relation to historical levels. Prior observed patterns, if any, in the behaviour of market variables and their relation to such rates such as correlations, may change in the future. Investors should not rely on historical performance data as an indicator of the future performance of such risk-free rates nor should they rely on any hypothetical data.

The ongoing development of compounded daily SONIA, SOFR, and €STR as reference rates in the capital markets, as well as continued development of SONIA-, SOFR-, and €STR-based rates for such markets and the market infrastructure for adopting such rates, could result in reduced liquidity or increased volatility or could otherwise affect the market price of any Securities that reference a SONIA, SOFR, or €STR rate, as applicable.

The market or a significant part thereof may adopt an application of SONIA, SOFR, or €STR that differs significantly from that set out in the Conditions and used in relation to Securities referencing SONIA, SOFR, or €STR that are issued under this Base Prospectus. In contrast to Securities that pay a floating rate of interest referencing EURIBOR, if Securities referencing compounded daily or single daily SONIA, SOFR, or €STR are redeemed early and accrued interest is payable on such redemption in respect of a period which is not an Interest Period, the final Rate of Interest or Rate in respect of such Securities will only be determined at the due date for redemption.

In addition, the manner of adoption or application of SONIA, SOFR, or €STR reference rates in the Eurobond markets may differ materially compared with the application and adoption of SONIA, SOFR, or €STR in other markets, such as the derivatives and loan markets. Any such mismatch between the adoption of SONIA, SOFR, or €STR reference rates across these markets may adversely impact any hedging or other financial arrangements which a Securityholder has in connection with any acquisition, holding or disposal of any Securities referencing a SONIA, SOFR, or €STR rate and could have a material adverse impact on such Securityholders' investments.

RISK FACTORS

To the extent the SONIA, SOFR, or €STR rate is not published, the applicable rate to be used to calculate the Rate of Interest or Rate will be determined using the fall-back provisions set out in the Conditions. Any of these fall-back provisions may result in interest payments that are lower than, or do not otherwise correlate over time with, the payments that would have been made on the Securities if the SONIA, SOFR, or €STR rate had been so published as expected as of the Issue Date of the Securities. In addition, application of the fall-back provisions may result in the effective application of a fixed rate of interest to the Securities.

Investors will not know in advance the interest amount payable on Securities which is calculated by reference to SOFR, SONIA or €STR

The Rate of Interest or Rate in respect of the Securities may be calculated by reference to SOFR, SONIA or €STR. Because each of SOFR, SONIA and €STR is an overnight funding rate, interest on Securities that reference SOFR, SONIA and €STR with Interest Periods longer than overnight will be calculated on the basis of (a) the arithmetic mean of the relevant Rate, over the relevant Interest Period, where the relevant Rate is fixed for a certain number of days prior to the end of such Interest Period or (b) a compounded relevant Rate (i) in respect of the Interest Period, provided that the relevant Rate used as the basis for calculation is that which was observed a specified number of days prior or (ii) in respect of a period that starts a specified number of days prior to the relevant Interest Period and ends the same specified number of days prior to the end of such Interest Period or (c) calculated by reference to the relevant index, as applicable. As a consequence of these calculation methods, the amount of interest payable on each interest payment date will only be known a short period of time prior to the relevant interest payment date. Investors therefore will not know in advance the interest amount which will be payable on such Securities and there is a possibility that such amount could be lower than expected and some investors may be unable or unwilling to trade such Securities without changes to their IT systems, both of which could adversely impact the liquidity of such Securities.

There are specific risks in relation to Securities that are denominated in or linked to emerging market currencies

Where the Securities are denominated in an emerging market currency or linked to one or more emerging market currencies, amounts determined to be due or deliverable in respect of such Securities may be significantly more volatile and subject to less certainty as to future rates than if the Securities were linked to currencies of more developed markets, for example emerging markets' currencies are highly exposed to the risk of a currency crisis happening in the future.

In particular, policies or actions of any relevant governments of the jurisdictions of such emerging markets currencies to which the Securities may be linked (the "**Currency Jurisdictions**") could adversely affect the relevant exchange rate(s) (such as through market interventions of their central banks or equivalent bodies; governmental action which changes or interferes with currency valuations or currency fluctuations that would otherwise occur in response to economic forces; and restrictions on foreign investment and currency convertibility or movement across borders). Non-governmental action may also directly or indirectly adversely affect the relevant exchange rates (such as through weak overall growth and performance of each applicable Currency Jurisdiction's economy and stock exchanges; political, economic and social uncertainty, including risks of nationalisation and expropriation of assets and natural disasters; or wars which affect any Currency Jurisdiction directly or indirectly).

Investors should note that the risk of occurrence and the severity of consequence of the matters described above may be greater with respect to any emerging market jurisdiction than they otherwise would be in relation to more developed countries. Economies in emerging markets are generally more heavily dependent upon international trade, and accordingly, may be affected adversely by trade barriers, foreign exchange controls (including taxes), managed adjustments in relative currency values and other protectionist measures imposed or negotiated with countries with which they trade.

The occurrence of any of the above circumstances may have an adverse effect on the value of the Securities and amounts due (if any), or the date for payment thereunder.

There are specific risks relating to Securities linked to Emerging Markets

The Issuer may issue Securities where the amount payable on redemption or the interest payable is linked to Reference Items which consist of (i) securities, funds, ETFs or indices comprising securities of issuers that are located in, or subject to regulation in, emerging or developing countries, or (ii) securities which are denominated in the currency of, or are traded in, emerging or developing countries or (iii) currencies of emerging or developing

RISK FACTORS

countries. Investors should note that additional risks may be associated with investment in such Securities, including risks associated with political and economic uncertainty, adverse governmental policies, restrictions on foreign investment and currency convertibility, currency exchange rate fluctuations, possible lower levels of disclosure and regulation, and uncertainties as to the status, interpretation and application of laws including, but not limited to, those relating to expropriation, nationalisation and confiscation. Securities traded in emerging or developing countries tend to be less liquid and the prices of such securities more volatile. In addition, settlement of trades in some such markets may be slower and more subject to failure than in markets in developed countries.

The probability of the occurrence of a disruption event and consequently loss of investment or profit by an investor may be higher for certain developing or emerging markets.

Securities may be denominated in one currency and settled in another currency

If the Issue Terms specify that the Settlement Exchange Rate Provisions are applicable, then such Securities are denominated in one currency (the "**SER Subject Currency**") but all or certain amounts due thereunder, as the case may be, are (or may be, if certain conditions such as a relevant exchange rate is at above or below a certain level(s)) are settled in another currency (the "**Settlement Currency**"). As such, the applicable amounts are converted by converting such amounts by reference to the applicable Settlement Exchange Rate specified in the applicable Issue Terms or, if not so specified, determined by the Calculation Agent in accordance with the terms and conditions of the Securities.

If the Issue Terms specify that the SER Intermediate Currency Requirements are applicable, then such Securities are denominated in one currency but all or certain amounts due thereunder, as the case may be, if any, are converted into an intermediate currency (the "**SER Intermediate Currency**") and then settled in the Settlement Currency. As such, the applicable amounts are converted by converting such amounts by reference to the applicable Second Settlement Exchange Rate and then the second Settlement Exchange Rate, each as specified in the applicable Issue Terms or, if not so specified, determined by the Calculation Agent in accordance with the terms and conditions of the Securities.

Securities are not principal protected in the SER Intermediate Currency or Settlement Currency even if the Securities are principal protected in the SER Subject Currency. If the denomination currency depreciates against the Settlement Currency or the SER Intermediate Currency, this will reduce the Settlement Currency amounts received (if any) under the Securities and an investor may receive less than their initial investment in the Securities.

Where a fixed Settlement Exchange Rate or Second Settlement Exchange Rate is not specified in the Issue Terms, neither the Issuer nor the Guarantor have control over the Settlement Exchange Rate or the Second Settlement Exchange Rate and will not make any adjustment or change in the terms of the Securities in the event that exchange rates should become fixed, or in the event of any devaluation or revaluation or imposition of exchange or other regulatory controls or taxes, or in the event of other developments affecting the settlement currency, the denomination currency or any foreign currency. Investors will bear those risks. In addition, if an Unscheduled Holiday or a Price Source Disruption occurs in respect of the applicable Settlement Exchange Rate, the applicable disruption fallbacks may provide that the scheduled settlement exchange rate valuation date for such rate will be postponed, then this may result in deferral of the corresponding payment date under the Securities. If a date for payment is so postponed, this could adversely affect an investor's investment schedule, timetable or plans as they will receive amounts in respect of the Securities later than the originally scheduled date for payment. No interest will accrue or other amount will be payable by the Issuer in the event of any such delay.

In addition, investments in UVR Inflation-Adjusted Securities may be adversely impacted due to the fact that the payments in respect of the UVR Inflation-Adjusted Securities are adjusted by reference to the UVR rate in effect on the applicable payment date and so investors are exposed to fluctuations in that rate. Where there is a UVR Event (as defined in *Annex 1 – Additional Terms and Conditions for Payouts*), the Calculation Agent may determine that the UVR Inflation-Adjusted Securities are redeemed early at the Early Redemption Amount and interest will cease to accrue and no further interest will be payable from the Interest Payment Date (or, if none, the Issue Date) immediately preceding such UVR Event.

RISK FACTORS

Where Securities are issued on a partly paid basis, an investor who fails to pay any subsequent instalment of the issue price could lose all of its investment

The relevant Issuer may issue Securities where the issue price is payable in more than one instalment. Any failure by an investor to pay any subsequent instalment of the issue price in respect of its Securities will result in the Securities redeeming early and could result in such investor losing all of its investment.

There are risks associated with Securities to which Variation of Settlement applies

If Variation of Settlement applies, the Issuer has the right to elect to deliver Relevant Assets in lieu of the Final Redemption Amount. Securityholders should be aware that in this regard they are exposed to the credit risk and performance of the Relevant Assets as to the extent that the value of such Relevant Assets falls below the value of the Final Redemption Amount, the Issuer is financially incentivised to exercise its option to deliver the Relevant Assets to the Securityholders. If the Relevant Assets are bonds, Securityholders should also take note of the fact that if such bond redeems prior to the Maturity Date for any reason, and the Issuer elects to vary settlement, the Issuer may deliver the redemption proceeds of such bond, which might be substantially less than the nominal amount of the bond.

There are risks associated with Securities where denominations involve integral multiples

In relation to any issue of Securities which have denominations consisting of a minimum Specified Denomination (as set out in the applicable Issue Terms) plus one or more higher integral multiples of another smaller amount, it is possible that such Securities may be traded in amounts that are not integral multiples of such minimum Specified Denomination. In such a case a Securityholder who, as a result of trading such amounts, holds an amount which is less than the minimum Specified Denomination in his account with the relevant clearing system at the relevant time (i) may not be able to transfer such Securities and (ii) may not receive a definitive Security in respect of such holding (should definitive Securities be printed) and in each case would need to purchase a nominal amount of Securities such that its holding amounts to an integral multiple of the minimum Specified Denomination.

If definitive Securities are issued, Securityholders should be aware that definitive Securities which have a denomination that is not an integral multiple of the minimum Specified Denomination may be illiquid and difficult to trade.

There are risks associated with Securities that are 3(a)2 Notes.

6.4 Risk Factors regarding the purchase, holding and selling of Securities generally

The Notes bear the credit risk of the Issuer and the Guarantor

Holders of Notes bear the credit risk of the Issuer and the Guarantor. That is the risk that the Issuer or the Guarantor is not able to meet its obligations under such Notes, irrespective of how any principal, interest or other payments and/or assets deliverable under such Notes are to be calculated. In such circumstances Securityholders may lose some or all of their investment.

Investors may lose the original invested amount

Investors may lose all or some of their investment in the Securities, as the case may be, as a result of the occurrence of any one or more of the following events:

- (i) pursuant to Condition 3 of the Terms and Conditions, the Issuer and the Guarantor of the Securities are subject to insolvency proceedings or some other event impairing the ability of each to perform some or all of its payment obligations under the Securities (such as the early intervention measures or resolution as described in Risk Factor "Risks related to early intervention and resolution");
- (ii) pursuant to Condition 6 of the Terms and Conditions, the terms of the relevant Securities do not provide for full repayment of the initial purchase price upon final maturity and/or mandatory early redemption of such Securities and the relevant Reference Item(s) perform in such a manner that the final redemption amount and/or mandatory early redemption amount is less than the initial purchase price;

RISK FACTORS

- (iii) the investor seeks to sell the relevant Securities prior to their scheduled maturity, and the sale price of the Securities in the secondary market is less than the investor's initial investment; and
- (iv) the Securities are subject to certain adjustments in accordance with the terms and conditions of such Securities that may result in the scheduled amount to be paid or asset(s) to be delivered upon redemption being reduced to or being valued at an amount less than an investor's initial investment.

The relevant market value of the Securities at any time is dependent on other matters in addition to the credit risk of the Issuer and Guarantor and the performance of the relevant Reference Item(s)

The market value of the Securities at any time will be affected by a number of factors independent of the creditworthiness of the Issuer and the Guarantor (if any) and the performance of the relevant Reference Item(s), including:

- (i) changes in market parameters such price level of the underlying(s), interest rates, volatility and credit spreads;
- (ii) the time remaining to any redemption date or the Maturity Date;
- (iii) where the Reference Item(s) is/are equity securities, the dividend rate on reference item(s) and the financial results and prospects of the issuer of each Reference Item.

The amount payable and/or deliverable in respect of Securities at any time prior to redemption is typically expected to be less than the trading price of such Securities at that time. The difference between the trading price and such amount will reflect, among other things, a "time value" for the Securities. The "time value" of the Securities will depend partly upon the length of the period remaining to final redemption and expectations concerning the value of the relevant Reference Item(s). Certain market circumstances may adversely affect the liquidity of the Securities and holders may not be able to sell their Securities easily or may have to sell them at a price that significantly affect the amount they receive.

A Security's purchase price may not reflect its inherent value

Investors in the Securities should be aware that the price at which they purchase the Securities does not necessarily reflect its inherent value. Any difference between a Security's purchase price and its inherent or estimated value may be due to a number of different factors including, without limitation, prevailing market conditions and fees, discounts, commissions paid or accorded to the various parties involved in structuring and/or distributing the Security or the expenses incurred in creating, documenting and marketing the Securities and the cost of hedging the Issuer's or its Affiliates' risk (which may include a projected profit for the Issuer, the Guarantor, or their Affiliates). Any such difference between the purchase price and the inherent or estimated value could negatively affect the return an investor may receive. For further information investors should refer to the party from whom they are purchasing the Securities. Investors may also wish to seek an independent valuation of Securities prior to their purchase.

Securities which are issued at a substantial discount or premium may experience price volatility in response to changes in market interest rates

The market values of Securities issued at a substantial discount (such as Zero Coupon Securities) or premium from their nominal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities. The Issuer Price or the Offer Price may be more than the market value and more than the price, if any, at which any other person is willing to purchase Securities in secondary market transactions.

An active secondary market in respect of the Securities may never be established or may be illiquid and this would adversely affect the value at which an investor could sell his Securities

Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold their Securities until maturity. If a market does develop, it may not be very liquid. Therefore, investors may not be able to sell their Securities easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. This is particularly the case for Securities that are

RISK FACTORS

especially sensitive to interest rate, currency or market risks, are designed for specific investment objectives or strategies or have been structured to meet the investment requirements of limited categories of investors. These types of Securities generally would have a more limited secondary market and more price volatility than conventional debt securities. Illiquidity may have a severely adverse effect on the market value of Securities.

Potential conflicts of interest relating to distributors or other entities involved in the offer or listing of the Securities

Investors should be aware that potential conflicts of interest may arise in connection with the Securities, as any distributors or other entities involved in the offer and/or the listing of the Securities as indicated in the Issue Terms, may act pursuant to a mandate granted by the Issuer and/or the Guarantor and for the Dealer and can receive commissions and/or fees on the basis of the services performed in relation to such offer and/or listing.

In addition, the Issuer or one of its affiliates may act market maker, liquidity provider or specialist or perform other similar roles in connection with the Securities, including inter alia acting as intermediary performing the investment service of execution of orders; in such cases, the Issuer or one of its affiliates can purchase the Securities issued by itself. In light of the above circumstances potential conflicts of interest may exist between the Issuer and/or its affiliates acting in such capacity of owners/holders of the Securities and/or market maker, liquidity provider or specialist or intermediary on the one hand and investors in the Securities on the other.

The Securities are not insured by the Federal Deposit Insurance Corporation.

The Securities are not deposits or savings accounts and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency of the United States or any other jurisdiction. In the event that the Issuer or the Guarantor is unable to pay or settle the Issuer's obligations under the Securities, investors risk losing their entire investment.

Credit ratings assigned to the Issuer, the Guarantor or any Securities may not reflect all the risks associated with an investment in those Securities

One or more independent credit rating agencies may assign credit ratings to the Securities (including on an unsolicited basis). The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above and do not address the price, if any, at which the Securities may be resold prior to maturity (which may be substantially less than the original offering prices of the Securities), and other factors that may affect the value of the Securities. However, real or anticipated changes in the Issuer's credit ratings or the credit ratings of the Securities will generally affect the market value of the Securities. Such change may, among other factors, be due to a change in the methodology applied by a rating agency to rating securities with similar structures to the Securities, as opposed to any revaluation of the Issuer's or the Guarantor's financial strength or other factors such as conditions affecting the financial services industry generally. A credit rating is not a recommendation to buy, sell or hold securities and may be revised, suspended or withdrawn by the rating agency at any time. Should the credit ratings of the Issuer, the Guarantor or any Securities be revised, suspended or withdrawn this could result in increased interest and other expenses on the Issuer's and the Guarantor's future borrowings and, therefore, have a material adverse effect on the Guarantor's business, results of operations, and financial condition.

In general, European regulated investors are restricted under Regulation (EC) No. 1060/2009 (as amended) (the "**CRA Regulation**") from using credit ratings for regulatory purposes in the EU unless such ratings are issued by a credit rating agency established in the UE and registered under the CRA Regulation (and such registration has not been withdrawn or suspended), subject to transitional provisions that apply in certain circumstances. Such general restriction will also apply in the case of credit ratings issued by third country non-EU credit rating agencies, unless the relevant credit ratings are endorsed by an EU-registered credit rating agency or the relevant third country rating agency is certified in accordance with the CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). The list of registered and certified rating agencies published by ESMA on its website in accordance with the CRA Regulation is not conclusive evidence of the status of the relevant rating agency included in such list, as there may be delays between certain supervisory measures being taken against a relevant rating agency and the publication of the updated ESMA list.

Investors regulated in the UK are subject to similar restrictions under the CRA Regulation as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (EUWA) (the "**UK CRA Regulation**").

RISK FACTORS

As such, UK regulated investors are required to use for UK regulatory purposes ratings issued by a credit rating agency established in the UK and registered under the UK CRA Regulation. In the case of ratings issued by third country non-UK credit rating agencies, third country credit ratings can either be: (a) endorsed by a UK registered credit rating agency; or (b) issued by a third country credit rating agency that is certified in accordance with the UK CRA Regulation. Note this is subject, in each case, to (a) the relevant UK registration, certification or endorsement, as the case may be, not having been withdrawn or suspended, and (b) transitional provisions that apply in certain circumstances. In the case of third country ratings, for a certain limited period of time, transitional relief accommodates continued use for regulatory purposes in the UK, of existing pre- 2021 ratings, provided the relevant conditions are satisfied.

If the status of the rating agency rating the Securities changes for the purposes of the CRA Regulation or the UK CRA Regulation, relevant regulated investors may no longer be able to use the rating for regulatory purposes in the UE or the UK, as applicable, and the Securities may have a different regulatory treatment. This may result in relevant regulated investors selling the Securities which may impact the value of the Securities and any secondary market.

Although the Issuer is not subject to the general Spanish Bail-in Power or analogous bail-in tool, its creditworthiness may be affected by actions taken in respect of the Guarantee Pursuant to BRRD and Law 11/2015, the Issuer and/or the Securities are not be subject to the general Spanish Bail-in Power or analogous bail-in tool. The Securities constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer and will at all times rank *pari passu* and rateably among themselves and at least *pari passu* with all other unsecured and unsubordinated outstanding obligations of the Issuer, save for such obligations as may be preferred by provisions of law that are both mandatory and of general application.

Notwithstanding the foregoing, the Guarantee in respect of the Securities and the agreements entered into between the Guarantor and the Issuer upon which the Issuer depends to pay interest and repay the nominal of the Securities to the Securityholders (the "**Hedging Agreements**"), according to the BRRD and Law 11/2015 (as defined in "*Risks related to early intervention and resolution*"), are liabilities of BBVA that are potentially subject to the Spanish Bail-in Power.

Exchange rate risks in connection with the Securities

If an investor holds Securities which are not denominated in the investor's home currency, that investor will be exposed to movements in exchange rates adversely affecting the value of its holding. In addition, the imposition of exchange controls in relation to any Securities could result in an investor not receiving payments on those Securities

The Issuer will pay redemption amount and interest on the Securities and the Guarantor will make any payments under the Guarantee in the Specified Currency. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "**Investor's Currency**") other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Specified Currency would decrease (1) the Investor's Currency equivalent yield on the Securities, (2) the Investor's Currency equivalent value of the redemption amount payable on the Securities and (3) the Investor's Currency equivalent market value of the Securities.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate or the ability of the Issuer or Guarantor to make payments in respect of the Securities. As a result, investors may receive less interest or redemption amount than expected, or no interest or redemption amount.

RISK FACTORS

The Securities may be subject to withholding taxes in circumstances where the Issuer is not obliged to make gross up payments and this would result in holders receiving less interest than expected and could significantly adversely affect their return on the Securities.

Spanish Tax Rules may impose withholding tax in certain circumstances (subject to certain exceptions) and neither the Issuer nor the Guarantor is obliged to pay additional amounts in such event.

Securities originally registered with the entities that manage clearing systems located outside of Spain

According to the literal wording of Article 44.5 of RD 1065/2007, income derived from securities originally registered with the entities that manage clearing systems located outside Spain, and are recognised by Spanish law or by the law of another OECD country (such as the Depository Trust Company ("**DTC**"), Euroclear or Clearstream), will be paid free of Spanish withholding tax provided that the Paying Agent appointed by the Issuer submits a statement to the Issuer, the form of which is included in the Agency Agreement, with the following information:

- (i) identification of the securities; and
- (ii) total amount of the income corresponding to each clearing system located outside Spain.

These obligations refer to the total amount paid to investors through each foreign clearing house. For these purposes, "income means interest and the difference, if any, between the aggregate amount payable on the redemption of the Securities and the issue price of the Securities".

In accordance with Article 44 of RD 1065/2007 as amended by RD 1145/2011, the relevant Paying Agent should provide the relevant Issuer with the statement on the business day immediately prior to each interest payment date. The statement must reflect the situation at the close of business of that same day. In the event that on such date, the entity(ies) obliged to provide the declaration fail to do so, the Issuer or the Paying Agent on its behalf will make a withholding at the general rate (currently 19 per cent.) on the total amount of the return on the relevant Securities otherwise payable to such entity.

As described in "Tax reporting related to Article 100.3 of the Spanish Personal Income Tax Law" in "Spanish Taxation", the redemption of Implicit Yield Securities held by a Spanish Individual (should such Securities be subject to Spanish withholding tax), are subject to the duly accreditation of the acquisition and acquisition price in order for the securities to be redeemed, otherwise a deposit for said amount will be made at the disposal of the judicial authority in lieu of payment to the holder

Notwithstanding the foregoing, the Issuer has agreed that in the event withholding tax should be required by law, the Issuer shall pay such additional amounts as would have been received had no such withholding or deduction been required, except as provided in Condition 7 and as otherwise described in this Base Prospectus.

Potential U.S. Withholding Tax under FATCA

1471 through 1474 of the U.S. Internal Revenue Code of 1986, as amended (the "**Code**") and any regulations thereunder or official guidance in connection therewith, an agreement entered into with the U.S. Internal Revenue Service (the "**IRS**") pursuant to such sections of the Code, or an intergovernmental agreement (an "**IGA**") between the United States and another jurisdiction in furtherance of such sections of the Code, or any non-U.S. laws or rules implementing an IGA (collectively referred to as "**FATCA**") may impose a withholding tax of 30 per cent. on payments made on the Securities (including payments made by financial intermediaries), unless various U.S. information reporting and due diligence requirements have been satisfied. If withholding is so required, under FATCA, the relevant Issuer will not be required to pay any additional amounts with respect to the amounts so withheld. The rules described in the foregoing may therefore affect the amounts paid to an investor on the Securities.

See also "Taxation—United States Federal Taxation".

Potential U.S. Withholding Tax on U.S. Dividend Equivalent Amounts

Section 871(m) of the Code and the regulations thereunder require withholding (up to 30 per cent. depending on whether an income tax treaty applies) on payments or deemed payments made to non-U.S. persons on certain

RISK FACTORS

financial instruments to the extent that such payments are treated, for U.S federal income tax purposes, as being U.S.-source dividend equivalent amounts, which may be the case for Securities linked to U.S. equities or indices that include U.S. equities.

If withholding is so required Section 871(m), the relevant Issuer will not be required to pay any additional amounts with respect to the amounts so withheld. Either of the foregoing rules may affect the amounts paid to an investor on the Securities.

See also "*Taxation—United States Federal Taxation*".

The U.S. federal income tax consequences of an investment in the Securities are complex and may be uncertain

The U.S. federal income tax consequences of an investment in the Securities are complex. Additionally, for certain Securities, there are no direct legal authorities as to the proper treatment of the Securities for U.S. federal income tax purposes, and, therefore, significant aspects of the U.S. federal income tax treatment of such Securities are uncertain. Please read the discussion under "*Taxation—United States Federal Taxation*".

Investors should consult their tax advisers on the U.S. federal income tax consequences of an investment in the Securities.

The Issuer of the Securities may be substituted without the consent of the Securityholders

The conditions of the Securities provide that the Issuer of the Securities may be replaced as obligor under such Securities with the Guarantor or any company from BBVA's group. Whilst the new issuer will provide an indemnity in favour of the Securityholders in relation to any additional tax or duties that become payable solely as a result of such substitution, Securityholders will not have the right to object to such substitution. See General Condition 16 of the "*Terms and Conditions of the Securities*". Any such substitution may have an adverse effect on the value of the Securities.

The value of the Securities could be adversely affected by a change in English law, New York law or administrative practice

The General Conditions (except for General Condition 18 of the "*Terms and Conditions of the Securities*") of the Securities are based on English law in effect as at the date of this Base Prospectus. The New York Law Guarantee and 3(a)(2) Notes in which New York law is specified as the governing law in the relevant Pricing Supplement, will be governed by New York law in effect at the time of issuance. No assurance can be given as to the impact of any possible judicial decision or change to English and New York law or administrative practice after the date of this Base Prospectus and any such change could materially adversely impact the value of any Securities affected by it.

CREST Depository Interests

Investors who hold interests in the Securities through Euroclear UK & International Limited ("**CREST**") through dematerialised depository interests ("**CREST Depository Interests**") will not be the legal owners of the Securities (the "**Underlying Securities**") to which such CREST Depository Interests relate. CREST Depository Interests are separate legal instruments from the Underlying Securities and represent indirect interests in the interests of the CREST Nominee in such Underlying Securities. The "**CREST Manual**" consists of a number of documents which set out the legal relationship of CREST with its users and participants.

The Underlying Securities (as distinct from the CREST Depository Interests representing indirect interests in such Underlying Securities) will be held in an account with a custodian. The custodian will hold the Underlying Securities through the relevant Clearance System. The legal title to the Underlying Securities or to interests in the Underlying Securities will depend on the rules of the relevant Clearance System in or through which the Underlying Securities are held.

CREST International Nominees Limited or another entity appointed to act as nominee (the "**CREST Nominee**") in accordance with the CREST Global Deed Poll (in the form from time to time contained in Chapter 8 of the CREST International Manual (which forms part of the CREST Manual) (the "**CREST Deed Poll**")) will hold the legal title to the Underlying Securities and the direct enforcement right in respect of the Underlying Securities. Rights in respect of the Underlying Securities cannot be enforced by holders of CREST Depository Interests

RISK FACTORS

except indirectly through CREST Depository Limited or any successor thereto (the "**CREST Depository**") and the CREST Nominee who in turn can enforce rights indirectly through the intermediary depositaries and custodians described above. The enforcement of rights in respect of the Underlying Securities will therefore be subject to the local law of the relevant intermediary.

These arrangements could result in an elimination or reduction in the payments that otherwise would have been made in respect of the Underlying Securities in the event of any insolvency or liquidation of the relevant intermediary, in particular where the Underlying Securities held in clearing systems are not held in special purpose accounts and are fungible with other securities held in the same accounts on behalf of other customers of the relevant intermediaries.

Holders of CREST Depository Interests will be bound by all provisions of the CREST Deed Poll and by all provisions of or prescribed pursuant to the CREST International Manual and the CREST Rules applicable to the CREST International Settlement Links Service (in each case as contained in the CREST Manual). Investors in CREST Depository Interests should note that the provisions of the CREST Deed Poll and the CREST Manual (including, for the avoidance of doubt, the provisions of the CREST International Manual and the CREST Rules) contain indemnities, warranties, representations and undertakings to be given by holders of CREST Depository Interests and limitations on the liability of the CREST Depository as issuer of the CREST Depository Interests. Holders of CREST Depository Interests may incur liabilities pursuant to or resulting from a breach of any such indemnities, warranties, representations and undertakings in excess of the money invested by them and the rights of and returns received by holders of CREST Depository Interests may differ from those of holders of Securities which are not represented by CREST Depository Interests.

Investors in CREST Depository Interests should note that holders of CREST Depository Interests may be required to pay fees, charges, costs and expenses to the CREST Depository in connection with the use of the CREST International Settlement Links Service.

6.5 Risk Factors relating to termination and adjustment rights of the Issuer, the Guarantor and/or the Calculation Agent

The Securities may be redeemed by the Issuer prior to maturity at the option of the Issuer

The Issue Terms for a particular issue of Securities may provide for early redemption at the option of the Issuer. An optional redemption feature is likely to limit the market value of the Securities. During any period when the Issuer may elect to redeem Securities, the market value of those Securities generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.

The Issuer may, at its discretion, elect to redeem the Securities prior to the Maturity Date, commencing on the first Optional Redemption Date. In the event that the Issuer exercises its optional termination right, investors will no longer have the opportunity to receive any contingent coupons after the applicable Optional Redemption Date. If the Issuer elects to call the Securities early, investors may not be able to reinvest the proceeds at a comparable rate of return and/or with a comparable contingent coupon rate for a similar level of risk and may incur additional transaction costs, such as dealer discounts and hedging costs. The yields received upon redemption may be lower than expected, and the redeemed face amount of the Securities may be lower than the purchase price for the Securities paid by the Securityholder. Furthermore, investors may be exposed to reinvestment risk, as the effective reinvestment rate may be lower than the interest rate applicable to the redeemed Securities. In addition, the Issuer's right to call the Securities may also adversely impact investors' ability to sell their Securities in the secondary market.

The likelihood that the Issuer will elect to redeem the Securities increases when (i) the market interest rates have decreased in relation to the interest that is payable under the Securities (meaning that the cost of borrowing is generally lower than the interest rate that is payable under the Securities), or (ii) the expected contingent coupons payable on the Securities are greater than the yields available on comparable instruments issued by the Issuer or other entities. The Issuer is less likely to call the Securities prior to the maturity date when the expected contingent coupons are lower than the interest payable on other comparable instruments, or when the level or price of any of the Reference Item(s) is less than its coupon barrier. Therefore, the Securities are more likely to remain outstanding when the expected amount payable on the Securities is less than what would be payable on other comparable instruments and when investors' risk of not receiving a contingent coupon is relatively higher. Such periods generally coincide with a period of greater risk of principal loss on the Securities.

RISK FACTORS

The Securities may be redeemed by the Issuer prior to maturity for taxation or illegality reasons

In the event that the Issuer would be required to pay additional amounts in respect of any Securities due to any withholding as provided in General Condition 7 of the "Terms and Conditions of the Securities" or the performance of the Issuer's obligations under the Securities or any arrangements made to hedge its obligations under the Securities has or will become unlawful, illegal or otherwise prohibited in whole or in part, the Issuer may or be required to redeem all of the Securities then outstanding in accordance with the Terms and Conditions of the Securities.

As a consequence, the yields received upon redemption may be lower than expected, and the redeemed face amount of the Securities may be lower than the purchase price for the Securities paid by the Securityholder. As a consequence, the Securityholder may not receive the total amount of the capital invested. In addition, investors that choose to reinvest monies they receive through an early redemption may be able to do so only in securities with a lower yield than the redeemed Securities.

The Calculation Agent, which will be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Securityholders

As the Calculation Agent will be the Guarantor or an affiliate of the Guarantor, potential conflicts of interest may exist between the Calculation Agent and the Securityholders, including with respect to the exercise of the very broad discretionary powers of the Calculation Agent. For example, the Calculation Agent has the authority (i) to determine whether certain specified events and/or matters so specified in the conditions relating to a Tranche of Securities have occurred and (ii) to determine any resulting adjustments and calculations or substitutions as described in such conditions. Investors should be aware that any determination made by the Calculation Agent may have an impact on the value and financial return of the Securities or result in the occurrence of an early repayment at an amount less than an investor's initial investment. Any such discretion exercised by, or any calculation made by, the Calculation Agent (in the absence of manifest or proven error) shall be binding on the relevant Issuer and all Securityholders.

If a Reference Item Linked Security includes Market Disruption Events or Failure to Open of an Exchange and the Calculation Agent determines such an event has occurred, any consequential postponement of the Scheduled Valuation Date may have an adverse effect on the Securities

If an issue of Reference Item Linked Securities includes provisions dealing with the occurrence of a Market Disruption Event or failure to open of an exchange on a Scheduled Valuation Date, and the Calculation Agent determines that a Market Disruption Event or failure to open of an exchange has occurred or exists on such date, any consequential postponement of the Valuation Date or any alternative provisions for valuation provided in any such Securities may have an adverse effect on the value and liquidity of such Securities. The timing of such dates (as scheduled or as so postponed or adjusted) may affect the value of the relevant Securities such that the Securityholder may receive a lower redemption amount and/or interest amount or other payment under the relevant Securities than otherwise would have been the case. The occurrence of such a Market Disruption Event or failure to open of an exchange in relation to any Reference Item comprising a basket may also have such an adverse effect on Securities related to such basket. In addition, any such consequential postponement may result in the postponement of the date of redemption of the Securities.

Risks relating to payment disruption events

Where the applicable Issue Terms states that Payment Disruption Event applies or the payment of any amount in respect of the Securities is to be made in a currency other than Australian Dollar, Canadian Dollar, Euro, Japanese yen, New Zealand Dollar, Norwegian Krone, Pound Sterling, Swedish krona, Swiss franc or United States dollar, if a disruption event occurs which prohibits or prevents the Issuer from making a payment in respect of the Securities, such payment will be postponed to the earlier of: (i) the date falling 2 business days after the date on which such disruption event is no longer occurring or (ii) a date falling 30 calendar days following the scheduled due date for payment of the relevant amount, which, for the avoidance of doubt, may be later than the scheduled Maturity Date. No interest shall accrue and no event of default will result on account of such postponement. In the event the payment is postponed in accordance with (ii) above, the Issuer shall make payment of the relevant amount in U.S. Dollars, using an exchange rate to be determined by the Calculation Agent. As such, investors should note that they may be paid in a currency that is different from their investment and which may negatively impact the return on their investment.

RISK FACTORS

Risk in connection with the process of public offerings of Securities

The applicable Issue Terms of Securities may provide that, the Issuer and/or the other entities specified in the applicable Issue Terms, have the right to withdraw or revoke the offer. Upon such withdrawal or revocation the offer the relevant Securities will not take place. Where the Issuer cancels a public offer or issuance of Securities and investors have already paid the issue price for such Securities, the issue price will be repaid to them.

In such case, investors will not receive any interest or other compensation payment in respect of the time period between the date of cancellation of the public offer or issuance of the Securities and the date of repayment of the issue price and investors may only be able to re-invest the repaid issue price on less favourable terms.

The applicable Issue Terms of Securities may also provide that the Issuer and/or the other entities specified in the applicable Issue Terms have the right to terminate the offer early by (i) immediately suspending the acceptance of additional subscriptions or subscription requests and (ii) publishing a notice in accordance with the applicable Issue Terms. Any such termination may occur, even if the maximum amount for subscription in relation to that offer (as specified in the applicable Issue Terms), has not been reached and, in such circumstances, the early termination of the offer may have an impact on the aggregate number of Securities issued and, therefore, an adverse effect on the liquidity of the Securities. Due to a lack of liquidity, the investors may not be able to sell the Securities at all or only while incurring losses of invested capital.

In addition, under certain circumstances, the subscription period for a Security specified in the applicable Issue Terms may be extended, in which case the original Issue Date specified in the applicable Issue Terms may be postponed. With respect to such a scenario, potential investors should be aware that the postponement of the Issue Date would ultimately result in a later investment of the investment amount of an investor who already subscribed for the Security. In case of Securities that provide for interest payments, in such case, the Interest Commencement Date is also postponed, with the effect that the investment amount only accrues interest at a later date.

Furthermore, investors should note that where Securities are offered by the Issuer to the public directly on the secondary market by way of a direct listing, the yield of the Securities may be reduced because the purchase price of the Securities on the secondary market may be higher than the Issue Price.

The relevant Issue Terms may also provide that the effectiveness of the offer of Securities is conditional upon admission to listing or to trading on the relevant regulated market and/or multilateral trading facility indicated in the relevant Issue Terms, occurring by the Issue Date. In such case, in the event that admission to listing or trading of the Securities does not take place by the Issue Date for whatever reason, the Issuer may withdraw the offer, the offer will be deemed to be null and void and the relevant Securities will not be issued. As a consequence, the potential investor will not receive any Security, any subscription rights the potential investor has for the Securities will be cancelled and he/she will not be entitled to any compensation therefor.

The issue price and/or offer price of the Securities may include subscription fees, placement fees, direction fees, structuring fees and/or other additional costs. Any such fees and/or costs may not be taken into account for the purposes of determining the price of such Securities on the secondary market and could result in a difference between the original issue price and/or offer price, the theoretical value of the Securities, and/or the actual bid/offer price quoted by any intermediary in the secondary market. Any such difference may have an adverse effect on the value of the Securities, particularly immediately following the offer and the issue date relating to such Securities, where any such fees and/or costs may be deducted from the price at which such Securities can be sold by the initial investor in the secondary market.

Where Securities are offered to the public, as the relevant Dealer(s) and any distributors act pursuant to a mandate granted by the Issuer and they receive fees on the basis of the services performed and the outcome of the placement of such Securities, potential conflicts of interest could arise.

In addition, in case of Securities to be listed on MOT, if it is indicated in the Issue Terms that the Issuer will adopt the distribution process on the MOT described in article 2.4.3, paragraph 7 of the rules of the markets organised and managed by Borsa Italiana, the circumstance that, pursuant to this distribution process, potential investors can monitor (via market operators) the progress of the proposed purchases of the Securities during the offer period, may have an impact on the progress and results of the offer. Investors should also note that, pursuant to distribution process on the MOT indicated above, the proposed acquisition of the Securities during the offer period does not constitute conclusion of the contract, which remains subject to confirmation of the correct execution of the order and the issuance of the Securities.

RISK FACTORS

6.6 Risk Factor relating to Sustainable Securities

The application of an amount equal to the net proceeds of Sustainable Securities as described in "Use of Proceeds" may not meet investor expectations or be suitable for an investor's investment criteria.

Investors in any Securities where the applicable Issue Terms are stated to be for "Green Projects", "Social Projects" or a combination of "Green Projects" and "Social Projects", as described in "Use of Proceeds" below ("**Green Securities**", "**Social Securities**" or "**Sustainability Securities**", respectively, and, together, "**Sustainable Securities**"), should have regard to the information in "Use of Proceeds" regarding the use of the net proceeds of those Sustainable Securities and must determine for themselves the relevance of such information for the purpose of any investment in such Sustainable Securities together with any other investigation such investor deems necessary. In particular, no assurance is given by the Issuer, the Guarantor or the Dealers that the use of such proceeds for any Eligible Projects (as defined in the "Use of Proceeds" section below) will satisfy, whether in whole or in part, any present or future investor expectations or requirements as regards any investment criteria or guidelines with which such investor or its investments are required to comply (including, amongst others, the Sustainable Finance Taxonomy Regulation and the EU Sustainable Finance Taxonomy (as both terms are defined below), or any further regulations, guidance or standards that may be approved or created or by its own by-laws or governing rules or investment portfolio mandates, in particular with regard to any direct or indirect environmental or sustainability impact of any project or uses, the subject of or related to, the Guarantor's Sustainable Debt Financing Framework.

Furthermore, it should be noted that there is currently no market consensus as to what constitutes, a "green", "social" or "sustainable" or an equivalently-labelled project or as to what precise attributes are required for a particular project to be defined as "green", "social" or "sustainable" or such other equivalent label nor can any assurance be given that such a clear consensus will develop over time or that any prevailing market consensus will not significantly change.

A basis for the determination of such "green" project definition has been established in the EU with the publication in the Official Journal of the EU on June 22, 2020 of Regulation (EU) 2020/852 of the European Parliament and of the Council of June 18, 2020 (the "**Sustainable Finance Taxonomy Regulation**") on the establishment of a framework to facilitate sustainable investment (the "**EU Sustainable Finance Taxonomy**"). The EU Sustainable Finance Taxonomy is subject to further development by way of the implementation by the European Commission through delegated regulations of technical screening criteria for the environmental objectives set out in the Sustainable Finance Taxonomy Regulation (including for example, through Commission Delegated Regulation (EU) 2021/2139).

In addition, the European Green Bond Regulation entered into force on 20 December 2023 and is applicable from 21 December 2024. This regulation includes a set of requirements that securities shall comply with in order to be labelled as "European Green Bonds" or "EuGB", in particular the full allocation (before the maturity of any European Green Bond) of the proceeds of such bonds to economic activities aligned with the Sustainable Finance Taxonomy Regulation in accordance with the categories set forth in Article 4 of the European Green Bond Regulation. Additionally, the European Green Bond Regulation establishes specific transparency requirements, with which issuers shall comply with prior and post an issuance of bonds labelled as "European Green Bonds" or "EuGB". However, as of the date of this Base Prospectus further guidelines are to be developed by the European Commission in relation to the European Green Bond Regulation.

Therefore, the requirements of any such label may evolve from time to time. Any Green Securities issued under this Base Prospectus will not be compliant with the European Green Bond Regulation and are only intended to comply with the requirements and processes in the Guarantor's Sustainable Debt Financing Framework. It is not clear at this stage if the establishment of the "EuGB" label and the optional disclosures regime for bonds issues as "environmentally sustainable" will have an impact on investor demand for, and pricing of, green bonds that do not comply with the requirements of the European Green Bond Regulation, such as the Green Securities issued under this Base Prospectus. This could result in reduced liquidity or lower demand or could otherwise affect the market price of any Green Securities issued under this Base Prospectus that do not comply with the EU Green Bond Regulation.

While the Guarantor's Sustainable Debt Financing Framework (November 2022) published on its website (<https://shareholdersandinvestors.bbva.com/wp-content/uploads/2022/12/202212-BBVA-Sustainable-Debt-Financing-Framework.pdf>) (including as amended, supplemented, restated or otherwise updated on such website from time to time where so specified, the "**Sustainable Debt Financing Framework**") is in alignment with the

RISK FACTORS

relevant objectives for the EU Sustainable Finance Taxonomy, until the technical screening criteria for such objectives have been developed it is not known whether the Sustainable Debt Financing Framework will satisfy those criteria. Accordingly, alignment with the EU Sustainable Finance Taxonomy, once the technical screening criteria are established, is not certain and no assurance is or can be given to investors that any projects or uses the subject of, or related to, any Eligible Projects will meet any or all investor expectations regarding such "green", "social" or "sustainable" or other equivalently-labelled performance objectives or that any adverse environmental, social and/or other impacts will not occur during the implementation of any projects or uses the subject of, or related to, any Eligible Projects.

No assurance or representation is given as to the suitability or reliability for any purpose whatsoever of any report, assessment, opinion or certification of any third party (whether or not solicited by the Guarantor and including any post-issuance reports) which may or may not be made available in connection with the issue of any Sustainable Securities and in particular with any Eligible Projects to fulfil any environmental, social, sustainability and/or other criteria. Any such report, assessment, opinion or certification would provide an opinion on certain environmental and related considerations and is not intended to address any credit, market or other aspects of an investment in any Notes, including without limitation market price, marketability, investor preference or suitability of any security. Any such report, assessment, opinion or certification would only be a statement of opinion, not a statement of fact. As at the date of this Base Prospectus, the providers of such opinions, reviews, certifications and post-issuance reports are not subject to any specific regulatory or other regime or oversight. The EU Green Bond Regulation will introduce a supervisory regime of external reviewers of European Green Bonds but this is not due to take full effect until 21 June 2026. Any such report, assessment, opinion or certification is not, nor shall be deemed to be, incorporated in and/or form part of this Base Prospectus. Any such report, assessment, opinion or certification is not, nor should be deemed to be, a recommendation by the Issuer, the Guarantor or the Dealers or any other person to buy, sell or hold any such Sustainable Securities. Any such report, assessment, opinion or certification is only current as of the date it was issued. Investors must determine for themselves the relevance of any such report, assessment, opinion or certification and/or the information contained therein and/or the provider of such report, assessment, opinion or certification for the purpose of any investment in such Sustainable Securities. Currently, the providers of such reports, assessments, opinions and certifications are not subject to any specific oversight or regulatory or other regime.

In the event that any Sustainable Securities are listed or admitted to trading on any dedicated "green", "environmental", "social" or "sustainable" or other equivalently-labelled segment of any stock exchange or securities market (whether or not regulated), no representation or assurance is given by the Issuer, the Guarantor or the Dealers or any other person that such listing or admission satisfies, whether in whole or in part, any present or future investor expectations or requirements as regards any investment criteria or guidelines with which such investor or its investments are required to comply. Furthermore, the criteria for any such listings or admission to trading may vary from one stock exchange or securities market to another. Nor is any representation or assurance given or made by the Issuer, the Guarantor or the Dealers or any other person that any such listing or admission to trading will be obtained in respect of any such Sustainable Securities or, if obtained, that any such listing or admission to trading will be maintained during the life of the Sustainable Securities.

While it is the intention of the Guarantor, to apply an amount equal to the net proceeds of any Sustainable Securities and obtain and publish the relevant reports, assessments, opinions and certifications in, or substantially in, the manner described in "*Use of Proceeds*", there can be no assurance that the Guarantor will be able to do this. Nor can there be any assurance that any Eligible Projects will be completed within any specified period or at all or with the results or outcome (whether or not related to the environment) as originally expected or anticipated by the Guarantor.

Additionally, their labelling as Sustainable Securities will not have any impact on the status of such Securities or the Guarantee as indicated in Condition 6 of the Terms and Conditions of the Securities.

Any such event or failure by the Guarantor to apply the net proceeds of any issue of Sustainable Securities for any Eligible Projects, or to obtain and publish any such reports, assessments, opinions and certifications, as well as the existence of any potential mismatch between the duration of the Eligible Projects and the term of any Sustainable Securities will not (i) constitute an event of default under the relevant Sustainable Securities, or (ii) give rise to any other claim or right (including any right to accelerate the Securities) of a holder of such Sustainable Securities against the Issuer, or (iii) lead to an obligation of the Issuer to redeem such Securities or be a relevant factor for the Issuer in determining whether or not to exercise any optional redemption rights in respect of any Securities, as the case may be.

RISK FACTORS

Each prospective investor should have regard to the factors described in the Guarantor's Sustainable Debt Financing Framework and the relevant information contained in this Base Prospectus and seek advice from their independent financial adviser or other professional adviser regarding its purchase of any Green, Social or Sustainability Securities before deciding to invest. The Guarantor's Sustainable Debt Financing Framework may be subject to review and change and may be amended, updated, supplemented, replaced and/or withdrawn from time to time and any subsequent version(s) may differ from any description given in this Base Prospectus. The Guarantor's Sustainable Debt Financing Framework does not form part of, nor is incorporated by reference, in this Base Prospectus.

The Sustainable Securities are issued subject to their applicable terms and conditions including, without limitation, in relation to their interest payments (if any), redemption and events of default as described in the *"Terms and Conditions of the Securities"* and the applicable Issue Terms, regardless of the issue of such Securities as Sustainable Securities.

Further, the performance of the Sustainable Securities will in no circumstances be linked to the performance of any Eligible Projects that may be identified by the Guarantor and no segregation of assets and liabilities regarding any Sustainable Securities or Eligible Projects will occur at any time. Payments on any Sustainable Securities shall not depend on the performance of any Eligible Project nor will holders of any Sustainable Securities have any preferred right against the assets of any Eligible Project.

The withdrawal of any report, assessment, opinion or certification as described above, or any such report, assessment, opinion or certification attesting that the Guarantor is not complying in whole or in part with any matters for which such report, assessment, opinion or certification is reporting, assessing, opining or certifying on, and/or any such Sustainable Securities no longer being listed or admitted to trading on any stock exchange or securities market, as aforesaid, may have a material adverse effect on the value of such Sustainable Securities and/or result in adverse consequences for certain investors with portfolio mandates to invest in securities to be used for a particular purpose.

6.7 Risk Factors relating to Renminbi Securities

Securities settled in Renminbi, which may be settled in Renminbi or pay interest or coupon in Renminbi ("**Renminbi Securities**") may be issued under this Base Prospectus. Renminbi Securities contain particular risks for potential investors that are set out below.

Renminbi is not completely freely convertible; there are significant restrictions on remittance of Renminbi into and outside the PRC which may adversely affect the liquidity of Renminbi Securities.

Renminbi is not completely freely convertible at present. The government of the PRC (the "**PRC Government**") continues to regulate conversion between Renminbi and foreign currencies, including the Hong Kong dollar. However, there has been significant reduction over the years by the PRC government of control, particularly over trade transactions involving import and export of goods and services as well as other frequent routine foreign exchange transactions. These transactions are known as current account items.

Currently, participating banks in Hong Kong and a number other jurisdictions have been permitted to engage in the settlement of Renminbi current account trade transactions. However, remittance of Renminbi by foreign investors into and out of the PRC for the purposes of capital account items, such as capital contributions, is generally only permitted upon obtaining specific approvals from, or completing specific registrations or filings with, the relevant authorities on a case-by-case basis and is subject to a strict monitoring system. Regulations in the PRC on the remittance of Renminbi into the PRC for settlement of capital account items are developing gradually.

Although starting from 1 October 2016, Renminbi has been added to the Special Drawing Rights (the international reserve assets created by the International Monetary Fund to supplement its member countries' official reserves) basket created by the International Monetary Fund and policies further improving accessibility to Renminbi to settle cross-border transactions in foreign currencies were implemented by the People's Bank of China, the central bank of the PRC (the "**PBOC**") in 2018, there is no assurance that the PRC Government will continue to gradually liberalise control over cross border remittance of Renminbi in the future or that new regulations in the PRC will not be promulgated in the future which have the effect of restricting or eliminating the remittance of Renminbi into or outside the PRC. Further, if any new PRC regulations are promulgated in the future which have the effect of permitting or restricting (as the case may be) the remittance of Renminbi for payment of transactions

RISK FACTORS

categorised as capital account items, then such remittances will need to be made subject to the specific requirements or restrictions set out in such rules. In the event that funds cannot be repatriated outside the PRC in Renminbi, this may affect the overall availability of Renminbi outside the PRC and the ability of the Issuer to source Renminbi to finance its obligations under Renminbi Securities.

There is only limited availability of Renminbi outside the PRC, which may affect the liquidity of Renminbi Securities and the Issuer's ability to source Renminbi outside the PRC to service such Renminbi Securities.

As a result of the restrictions imposed by the PRC Government on cross-border Renminbi fund flows, the availability of Renminbi outside the PRC is limited. While the PBOC has entered into agreements on the clearing of Renminbi business with financial institutions (each a "**RMB Clearing Bank**"), including, but not limited to, Hong Kong and are in the process of establishing Renminbi clearing and settlement mechanisms in a number of other jurisdictions (the "**Settlement Arrangements**"), the current size of Renminbi denominated financial assets outside the PRC is limited.

There are restrictions imposed by the PBOC on Renminbi business participating banks in respect of cross-border Renminbi settlement, such as those relating to direct transactions with PRC enterprises. Furthermore, Renminbi business participating banks do not have direct Renminbi liquidity support from the PBOC. The relevant RMB Clearing Bank only has access to onshore liquidity support from the PBOC for the purpose of squaring open positions of participating banks for limited types of transactions. The relevant RMB Clearing Bank is not obliged to square for participating banks any open positions resulting from other foreign exchange transactions or conversion services and the participating banks will need to source Renminbi from outside the PRC to square such open positions.

Although it is expected that the offshore Renminbi market will continue to grow in depth and size, its growth is subject to many constraints as a result of PRC laws and regulations on foreign exchange. There is no assurance that new PRC regulations will not be promulgated or the Settlement Arrangements will not be terminated or amended in the future which will have the effect of restricting availability of Renminbi outside the PRC. The limited availability of Renminbi outside the PRC may affect the liquidity of the Renminbi Securities. To the extent the Issuer is required to source Renminbi outside the PRC to service the Renminbi Securities, there is no assurance that the Issuer will be able to source such Renminbi on satisfactory terms, if at all. If Renminbi is not available in certain circumstances as described in the General Conditions applicable to Renminbi Securities, the Issuer can make payments in U.S. dollars or other specified currencies as set out in the applicable Issue Terms.

Investment in Renminbi Securities is subject to exchange rate risks.

The value of Renminbi against the U.S. dollar and other foreign currencies fluctuates from time to time and is affected by changes in the PRC and international political and economic conditions and by many other factors. In August 2015, the PBOC implemented changes to the way it calculates the Renminbi's daily midpoint against the U.S. dollar to take into account market maker quotes before announcing the daily midpoint. This change, among others that may be implemented, may increase the volatility in the value of the Renminbi against other currencies. All payments with respect to Renminbi Securities will be made in Renminbi unless otherwise specified. As a result, the value of these Renminbi payments in other foreign currency terms may vary with the prevailing exchange rates in the marketplace. If the value of Renminbi depreciates against other foreign currencies, the value of investment in other applicable foreign currency terms will decline.

In the event that access to Renminbi becomes restricted to the extent that, by reason of Renminbi Inconvertibility, Renminbi Non Transferability or Renminbi Illiquidity (as defined in the General Conditions), it is impossible, impractical, illegal or impracticable for the Issuer (or, any of its Affiliate), to pay or deliver any amounts or assets due in Renminbi, the General Conditions allow the Issuer or, as the case may be, the Guarantor, to delay such payment in Renminbi until ten Business Days after such time the relevant Renminbi Currency Event ceases to exist; to make payment in U.S. dollars or other specified foreign currency at the prevailing spot rate of exchange; and/or to redeem the Securities by payment of the Early Redemption Amount in respect of each Calculation Amount, all as provided in more detail in the General Conditions. As a result, the value of these Renminbi payments or deliveries may vary with the prevailing exchange rates in the marketplace. If the value of Renminbi depreciates against the U.S. dollar or other foreign currencies, the value of a holder's investment in U.S. dollar or other foreign currency terms will decline.

RISK FACTORS

Payments in respect of Renminbi Securities will only be made to investors in the manner specified in the terms and conditions of the relevant Securities.

Investors may be required to provide certification and other information (including Renminbi account information) in order to be allowed to receive payments in Renminbi in accordance with the Renminbi clearing and settlement system for participating banks in the Renminbi Settlement Centre(s). All Renminbi payments to investors in respect of the Renminbi Securities will be made solely (i) for so long as the Renminbi Securities are represented by a Global Security held in Euroclear and Clearstream, Luxembourg or any alternative clearing system, by transfer to a Renminbi bank account maintained in the Renminbi Settlement Centre(s) in accordance with prevailing Euroclear and/or Clearstream, Luxembourg rules and procedures, or (ii) for so long as Renminbi Securities are in definitive form, by transfer to a Renminbi bank account maintained in the Renminbi Settlement Centre(s) in accordance with prevailing rules and regulations. Other than as described in the General Conditions, neither the Issuer nor the Guarantor can be required to make payment by any other means (including in any other currency or in bank notes or by transfer to a bank account in the PRC).

An investment in Renminbi Securities is subject to risk of change in the regulatory regime governing the issuance of Renminbi Securities.

Renminbi Securities issuance is subject to laws and regulations of the relevant Renminbi Settlement Centre(s). The PRC Government currently views Hong Kong as one of the key offshore Renminbi settled instrument centres and has established a cooperative relationship with Hong Kong's local government to develop the Renminbi settled instrument market. There can be no assurance that the PRC Government will continue to encourage issuance of Renminbi settled instruments outside of mainland China and any change in the Chinese government's policy or the regulatory regime governing the issuance of Renminbi settled instruments may adversely affect the Renminbi Securities.

An investment in fixed rate Renminbi Securities is subject to interest rate risks

The PRC Government has gradually liberalised its regulation of interest rates in recent years. Further liberalisation may increase interest rate volatility. In addition, the interest rate for Renminbi in markets outside the PRC may significantly deviate from the interest rate for Renminbi in the PRC as a result of foreign exchange controls imposed by PRC law and regulations and prevailing market conditions.

If a Renminbi Security carries a fixed interest rate, then the trading price of such Renminbi Securities will vary with the fluctuations in Renminbi interest rates. If an investor in Renminbi Securities tries to sell such Renminbi Securities, then it may receive an offer that is less than the amount invested.

There may be PRC tax consequences with respect to investment in the Renminbi Securities

In considering whether to invest in the Renminbi Securities, investors should consult their individual tax advisers with regard to the application of PRC tax laws to their particular situations as well as any tax consequences arising under the laws of any other tax jurisdictions. The value of the Securityholder's investment in the Renminbi Securities may be materially and adversely affected if the Securityholder is required to pay PRC tax with respect to acquiring, holding or disposing of and receiving payments under those Renminbi Securities.

6.8 Additional Risk Factors relating to 3(a)(2) Notes

Risks associated with non U.S. securities markets

Investors investing in 3(a)(2) Notes which are Reference Item Linked Securities must be aware that they might be subject to risks associated with non-U.S. securities markets because the Share or the Index or ETF used as underlying might be traded in, or comprised of stocks that are traded in one or more non-U.S. securities markets. Investments linked to the value of non-U.S. equity securities involve particular risks. Any non-U.S. securities market may be less liquid, more volatile and affected by global or domestic market developments in a different way than are the U.S. securities market or other non-U.S. securities markets. Both government intervention in a non-U.S. securities market, either directly or indirectly, and cross-shareholdings in non-U.S. companies, may affect trading prices and volumes in that market. Also, there is generally less publicly available information about non-U.S. companies than about U.S. companies that are subject to the reporting requirements of the SEC. Further, non-U.S. companies are likely subject to accounting, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies. The prices of securities in a non-U.S. country are

RISK FACTORS

subject to political, economic, financial and social factors that are unique to such non-U.S. country's geographical region. These factors include: recent changes, or the possibility of future changes, in the applicable non-U.S. government's economic and fiscal policies; the possible implementation of, or changes in, currency exchange laws or other laws or restrictions applicable to non-U.S. companies or investments in non-U.S. equity securities; fluctuations, or the possibility of fluctuations, in currency exchange rates; and the possibility of outbreaks of hostility, political instability, natural disaster or adverse public health developments. Any one of these factors, or the combination of more than one of these or other factors, could negatively affect such non-U.S. securities market and the prices of securities therein. Further, geographical regions may react to global factors in different ways, which may cause the prices of securities in a non-U.S. securities market to fluctuate in a way that differs from those of securities in the U.S. securities market or other non-U.S. securities markets. Non-U.S. economies may also differ from the U.S. economy in important respects, including growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency, which may have a positive or negative effect on non-U.S. securities prices.

Risks associated with non-U.S. companies

An Index or ETF may be comprised, in part, of non-U.S. companies. Market developments may affect non-U.S. markets differently from U.S. securities markets and direct or indirect government intervention to stabilize these non-U.S. markets, as well as cross shareholdings in non-U.S. companies, may affect trading prices and volumes in those markets. Securities issued by non-U.S. companies are subject to political, economic, financial and social factors that may be unique to the particular country. These factors, which could negatively affect the applicable underlying constituents include the possibility of recent or future changes in the non-U.S. government's economic and fiscal policies, the possible imposition of, or changes in, currency exchange laws or other non-U.S. laws or restrictions applicable to non-U.S. companies or investments in securities of non-U.S. companies and the possibility of fluctuations in the rate of exchange between currencies. Moreover, certain aspects of a particular non-U.S. economy may differ favorably or unfavorably from the U.S. economy in important respects, such as growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency.

Accordingly, any such purported transferee or other holder will not be entitled to any rights as a Securityholder and the Issuer shall have the right, in accordance with the conditions of the Securities, to force the transfer of, transfer on behalf of the Securityholder or redeem, any such Securities.

3. Status of the Securities and the Guarantee

(a) Status of the Securities

The Securities and any related Coupons and Receipts constitute direct, unconditional and unsecured and unsubordinated obligations of the Issuer and rank *pari passu*, without any preference or priority among themselves and with all other outstanding unsecured and unsubordinated obligations of the Issuer present and future, but, in the event of insolvency, only to the extent permitted by applicable laws relating to creditor's right.

In the event of insolvency of the Issuer, the court having jurisdiction to open an insolvency proceeding and the law applicable to those proceedings and their effects will be determined in accordance with the provisions of Regulation (EU) No 2015/848, of May 20, 2015, on insolvency proceedings (**"Regulation 2015/848"**), Royal Legislative Decree 1/2020, of May 5, approving the reinstated text of the Spanish Insolvency Law 22/2003 of July 9, 2003, as amended (the **"Spanish Insolvency Law"**) and the Dutch Insolvency Law (*faillissementswet*) of September 30, 1893, as amended (the **"Dutch Insolvency Law"**). Pursuant to these provisions, the courts of the place where the Issuer has its centre of main interests shall have jurisdiction to open insolvency proceedings against it and the law applicable to the insolvency proceedings and their effects will be the law of the place where such proceedings are opened.

Under Regulation 2015/848 the centre of main interests should correspond to the place where the debtor conducts the administration of its interests on a regular basis and is therefore ascertainable by third parties. In the case of a company or legal person, Regulation 2015/848 presumes, in the absence of proof to the contrary, that the place of its registered office is the centre of main interests. Based on this presumption a Dutch court may consider that it has jurisdiction to open insolvency proceedings against the Issuer. Notwithstanding this presumption, it is arguable that the centre of main interests of the Issuer should be considered to be located in Spain and that the Spanish courts should be the courts with jurisdiction to open insolvency proceedings against it. In addition, even if the centre of main interests of the Issuer were not in Spain, the Spanish court could still open insolvency proceedings (named territorial insolvency proceedings) if they consider that the Issuer has an establishment within the territory of Spain, the effects of which would be limited to the assets of the Issuer situated in Spain.

TERMS AND CONDITIONS OF THE SECURITIES

In the event of insolvency (*faillissement*) of the Issuer declared by a Dutch court (either principal or territorial proceedings), claims relating to Securities will be *pari passu* claims (*concurrente vorderingen*) as defined in the Dutch Insolvency Law. Ordinary credits rank below credits against the insolvency estate (*boedelschuld*) and credits with a privilege (*voorrecht*). Ordinary credits rank above subordinated credits and the rights of shareholders.

In the event of insolvency (*concurso*) of the Issuer declared by a Spanish court (either principal or territorial insolvency proceedings) claims relating to Securities (which are not subordinated pursuant to article 309 of the Spanish Insolvency Law) will be ordinary credits (*créditos ordinarios*) as defined in the Spanish Insolvency Law. Ordinary credits rank below credits against the insolvency estate (*créditos contra la masa*) and privileged credits (*créditos privilegiados*) which shall be paid in full before ordinary credits. The claims of all creditors against the Issuer considered as "ordinary credits": will be satisfied pro rata in insolvency. Ordinary credits rank above subordinated credits and the rights of shareholders.

Pursuant to article 59 of the Spanish Insolvency Law, the further accrual of interest shall be suspended from the date of declaration of the insolvency of any Issuer. Claims in respect of interest on the Securities accrued but unpaid as of the commencement of any insolvency procedure in respect of the Issuer shall constitute subordinated claims against the Issuer ranking in accordance with the provisions of article 309 of the Spanish Insolvency Law (including, without limitation, after claims on account of principal in respect of contractually subordinated obligations of the Issuer).

(b) Status of the Guarantee

The payment of principal and interest in respect of the Securities and any related Coupons and Receipts and all amounts due under the Deed of Covenant in respect of the Securities and any related Coupons and Receipts has been unconditionally and irrevocably guaranteed by the Guarantor pursuant to the Guarantee.

The obligations of the Guarantor under the Guarantee constitute direct, unconditional, unsubordinated and unsecured obligations of the Guarantor and rank *pari passu* with all other outstanding unsecured and unsubordinated obligations of the Guarantor, present and future, but, in the event of insolvency, only to the extent permitted by applicable laws relating to creditors' rights.

In the event of insolvency (*concurso*) of the Guarantor, under the Spanish Insolvency Law, claims of Securityholders (which are not subordinated pursuant to article 309 of the Insolvency law) will be ordinary credits (*créditos ordinarios*) as defined in the Spanish Insolvency Law. Ordinary credits rank below credits against the insolvency estate (*créditos contra la masa*) and privileged credits (*créditos privilegiados*) (including, without limitation, any deposits for the purposes of Additional Provision 14.1 of Law 11/2015) which shall be paid in full before ordinary credits. The claims of all creditors against the Guarantor considered as "ordinary credits" will be satisfied pro rata in insolvency. Ordinary credits rank above subordinated credits and the rights of shareholders.

Pursuant to article 59 of the Spanish Insolvency Law, the further accrual of interest shall be suspended from the date of declaration of the insolvency of the Guarantor. Claims of Securityholders in respect of interest accrued but unpaid as of the commencement of any insolvency procedure in respect of the Guarantor shall constitute subordinated claims against the Guarantor ranking in accordance with the provisions of article 309 of the Spanish Insolvency Law (including, without limitation, after claims on account of principal in respect of contractually subordinated obligations of the Guarantor).

The Guarantee provided by Banco Bilbao Vizcaya Argentaria, S.A., acting through its New York Branch, in respect of the 3(a)(2) Notes is governed by New York law. Under New York law, (a) the Guarantor, as a New York state-licensed branch of BBVA, a Spanish bank, is required to maintain certain liquid assets, (b) the Superintendent may take possession of such assets and the rest of the property and business of the Guarantor located in New York for the benefit of the Guarantor's creditors, including the beneficiaries of the Guarantee, if, among other things, BBVA is in liquidation in Spain or elsewhere, or if there is reason to doubt BBVA's ability to pay its creditors in full and (c) the Superintendent is authorised to turn over any such assets or other property of the Guarantor to the principal office of BBVA or any Spanish liquidator or receiver only after all of the claims of the creditors of the Guarantor, including the beneficiaries of the Guarantee, have been satisfied and discharged and, to the extent requested by a liquidator of any other BBVA office in the United States, the claims of the creditors of that office accepted by the liquidator and the expenses incurred by that liquidator in liquidating the other office, have been satisfied and discharged.

TERMS AND CONDITIONS OF THE SECURITIES

The obligations of the Guarantor under the Guarantee and the obligations of BBVA under the Hedging Agreements entered into between BBVA and the Issuer in respect of any Securities are also subject to the application of the general bail-in tool by the Fondo de Reestructuración Ordenada Bancaria (the "FROB") or any other Relevant Spanish Resolution Authority pursuant to Law 11/2015.

By its acquisition of any Securities, each holder acknowledges and accepts that he may be adversely affected by the exercise of the Spanish Bail-in Power by the Relevant Spanish Resolution Authority and the effects thereof, as further described in the Risk Factors, which may be imposed with or without any prior notice with respect to the Guarantee and/or the Hedging Agreements, in relation to Securities of any series.

"**Relevant Spanish Resolution Authority**" means any of the Spanish Fund for the Orderly Restructuring of Banks (Fondo de Reestructuración Ordenada Bancaria), the European Single Resolution Mechanism, the Bank of Spain and the Spanish Securities Market Commission ("**CNMV**") or any other entity with the authority to exercise the Spanish Bail-in Power from time to time, according to Law 11/2015, of June 18, as amended from time to time, including amongst others, as amended by Royal Decree-Law 7/2021 ("**Law 11/2015**"), RD 1012/2015 and the SRM Regulation.

4. Interest

(a) Interest on Fixed Rate Securities

Each Fixed Rate Security bears interest from (and including) the Interest Commencement Date (which, if not specified otherwise in the applicable Issue Terms, will be the Issue Date) at the rate(s) per annum equal to the Rate(s) of Interest. Interest will accrue in respect of each period from (and including) an Interest Period End Date (or if none the Interest Commencement Date) to (but excluding) the next (or first) Interest Period End Date (each an "**Interest Period**" and each such latter date the "**Interest Period End Final Date**"). Interest will be payable in arrears on the Interest Payment Date(s) up to (and including) the Maturity Date. If an Interest Payment Date falls after the Interest Period End Final Date in respect of the relevant Interest Period, no additional interest or other amount shall be payable as a result of such interest being payable on such later date. If a Business Day Convention (as defined in General Condition 4(k) below) is specified in the Issue Terms as applying to an Interest Period End Date or an Interest Payment Date and (i) if there is no numerically corresponding day on the calendar month in which an Interest Period End Date or Interest Payment Date, as the case may be, should occur or (ii) if any Interest Period End Date or Interest Payment Date, as the case may be, would otherwise fall on a day which is not a Business Day (as defined in General Condition 4(k)), then, the relevant Business Day Convention shall apply. For the purposes of this General Condition 4(a), "**Interest Period End Date**" shall mean each date so specified in the Issue Terms. If no such date(s) is so specified, then the Interest Period End Date for an Interest Period shall be the corresponding Interest Payment Date (unadjusted for any Business Day Convention unless a Business Day Convention is specified in the Issue Terms as applying to an Interest Period End Date). If no Business Day Convention is specified in the applicable Issue Terms as applying to an Interest Payment Date, then the Modified Following Business Day Convention shall apply.

If no Business Day Convention is specified as applicable to an Interest Period End Final Date in the Issue Terms, and

- (i) If a Fixed Coupon Amount is specified in the Issue Terms, the amount of interest payable on each Interest Payment Date so specified shall be the Fixed Coupon Amount per Calculation Amount so specified; and
- (ii) If a Broken Amount is specified in the Issue Terms, the amount of interest payable in respect of the Interest Payment Date so specified shall be the Broken Amount per Calculation Amount so specified.

Subject to the Payout Conditions, Interest shall be calculated by applying the Rate of Interest to:

- (x) in the case of Fixed Rate Securities which are represented by a Global Security, the aggregate outstanding nominal amount of the Fixed Rate Securities represented by such Global Security (or, if they are Partly Paid Securities, the aggregate amount paid up (subject to General Condition 4(g))); or
- (y) in the case of each Fixed Rate Security in definitive form, the Calculation Amount (subject to General Condition 4(g)),

TERMS AND CONDITIONS OF THE SECURITIES

and, in each case, multiplying such sum by (i) the applicable Day Count Fraction (as defined in General Condition 4(k) below) specified in the Issue Terms and (ii) where an Interest Leverage Multiplier is specified as "Applicable" in the Issue Terms, the Interest Leverage Multiplier specified in the Issue Terms, and rounding the resultant figure to the nearest sub-unit of the relevant Specified Currency, half of any such sub-unit (as defined below) being rounded upwards or otherwise in accordance with applicable market convention.

Where the Specified Denomination of a Fixed Rate Security in definitive form comprises more than one Calculation Amount, the amount of Interest payable in respect of such Fixed Rate Security shall be the aggregate of the amounts (determined in the manner provided above) for each Calculation Amount (subject to General Condition 4(g)) comprising the Specified Denomination without any further rounding.

"sub-unit" means, with respect to any currency other than euro, the lowest amount of such currency that is available as legal tender in the country of such currency and, with respect to euro, means one cent.

(b) Interest on Floating Rate Securities and Reference Item Linked Interest Securities

(i) Interest Period End Dates and Interest Payment Dates

Each Floating Rate Security and, subject to the provisions of General Condition 4(f) below and unless otherwise specified in the Issue Terms, each Reference Item Linked Interest Security bears interest on its outstanding nominal amount (or, if it is a Partly Paid Security, in accordance with General Condition 4(g)) in respect of each Interest Period (as defined in General Condition 4(a)). For the purposes of this General Condition 4(b), "**Interest Period End Date**" shall mean either:

- (A) the specified Interest Period End Date(s) specified in the Issue Terms; or
- (B) if no Interest Period End Date(s) is/are specified in the Issue Terms, (x) in the case of Floating Rate Securities, each date which falls on the number of months or other period specified as the Specified Period in the Issue Terms after the preceding Interest Period End Date or, in the case of the first Interest Period End Date, after the Interest Commencement Date and (y) in the case of Reference Item Linked Interest Securities, the corresponding Interest Payment Date (unadjusted for any Business Day Convention).

Interest will be payable in arrears on the Interest Payment Date(s) up to (and including) the Maturity Date. If an Interest Payment Date falls after an Interest Period End Final Date in respect of the relevant Interest Period, no additional interest or other amount shall be payable as a result of such interest being payable on such later date.

If a Business Day Convention is specified in the Issue Terms as applying to an Interest Period End Date or an Interest Payment Date and (i) if there is no numerically corresponding day on the calendar month in which an Interest Period End Date or Interest Payment Date, as the case may be, should occur or (ii) if any Interest Period End Date or Interest Payment Date, as the case may be, would otherwise fall on a day which is not a Business Day (as defined in General Condition 4(k) below), then the relevant Business Day Convention (as defined in General Condition 4(k) below) shall apply. Provided that, in any case, where Specified Periods are specified in accordance with General Conditions 4(b)(i)(A) and (B) above, the Floating Rate Convention shall apply. If no Business Day Convention is specified in the applicable Issue Terms as applying to an Interest Payment Date, then the Modified Following Business Day Convention shall apply.

(ii) Rate of Interest

The Rate of Interest payable from time to time in respect of Floating Rate Securities and Reference Item Linked Interest Securities will be determined in the manner specified in the Issue Terms.

(iii) ISDA Determination

Where ISDA Determination is specified in the Issue Terms as the manner in which the Rate of Interest is to be determined, the Rate of Interest for each Interest Period will be the relevant ISDA Rate plus or minus (as indicated in the Issue Terms) the Margin (if any). For the purposes of this paragraph (iii), "**ISDA Rate**" for an Interest Period means a rate equal to the Floating Rate that would be determined by

 - (2) the other rate shall be determined as if the Designated Maturity were the period of time for which rates are available next longer than the length of the relevant Interest Period;

provided, however, that if there is no rate available for a period of time next shorter than the length of the relevant Interest Period or, as the case may be, next longer than the length of the relevant Interest Period, then the Calculation Agent shall determine such rate at such time and by reference to such sources as it determines appropriate;

- (iv) Screen Rate Determination
- (1) Screen Rate Determination for Floating Rate Securities not referencing SONIA, SOFR or €STR

- (A) the offered quotation; or
- (B) the arithmetic mean (rounded, if necessary, to the fifth decimal place, with 0.000005 being rounded upwards) of the offered quotations, (expressed as a percentage rate per annum) for the Reference Rate(s) which appears or appear, as the case may be, on the Relevant Screen Page (or any successor to such page or service) as at the Specified Time indicated in the Issue Terms (which will be 11.00 a.m. Brussels time, in the case of EURIBOR) on the Interest Determination Date (as defined below) in question plus or minus (as indicated in the Issue Terms) the Margin (if any), all as determined by the Principal Paying Agent. If five or more of such offered quotations are available on the Relevant Screen Page, the highest (or, if there is more than one such highest quotation, one only of such quotations) and the lowest (or, if there is more than one such lowest quotation, one only of such quotations) shall be disregarded by the Principal Paying Agent for the purpose of determining the arithmetic mean (rounded, as provided above) of such offered quotations; or
- (C) in the case of a CMS Rate, the rate for swap transactions in the currency to which the CMS Rate relates with a maturity of the Designated Maturity, expressed as a percentage, which appears on the Relevant Screen Page (or any successor to such page or service) as of the Specified Time on the relevant Interest Determination Date plus or minus (as indicated in the Issue Terms) the Margin (if any) all as determined by the Calculation Agent or, in the event that the Principal Paying Agent determines it is not reasonably practicable to determine the Rate of Interest in such manner, the Rate of Interest will be determined by the Calculation Agent as such rate that it determines would have prevailed but for such impracticability by reference to such source(s) as it may select; or
- (D) in the case of a rate that is based on the yield of a government bond (a "**Government Bond Yield Rate**"), the rate for a generic government bond, expressed as a percentage per annum, with a maturity of the Designated Maturity, which appears on the Relevant Screen Page (or any successor to such page or service) as of the Specified Time on the relevant Interest

TERMS AND CONDITIONS OF THE SECURITIES

Determination Date plus or minus (as indicated in the Issue Terms) the Margin (if any) (all as specified in the Issue Terms), as determined by the Calculation Agent; or

- (E) if the Calculation Agent determines that it is not reasonably practicable to obtain the rate in such manner, the rate will be determined as such rate that the Calculation Agent determines would have prevailed but for such impracticability by reference to such source(s) as it may select.

In case the rate specified in the Issue Terms is a TEC Rate (*Taux de l'Echéance Constante*), the offered quotation, expressed as a percentage rate per annum, with a maturity of the Designated Maturity calculated by the *Comité de Normalisation Obligataire* (or successor thereto), which appears on the Relevant Screen Page (or any successor to such page or service) as of the Specified Time on the relevant Interest Determination Date plus or minus (as indicated in the Issue Terms) the Margin (if any) (all as specified in the Issue Terms), as determined by the Calculation Agent.

If the Calculation Agent determines it is not reasonably practicable to determine the rate in such manner, the rate shall be determined by the Calculation Agent on the basis of the linear interpolation of the mid-market prices for each of the two reference French treasury bonds (*Obligation Assimilable du Trésor*), which would have been used by the *Comité de Normalisation Obligataire* (or successor thereto) for the calculation of the relevant rate.

In order to determine such mid-market prices, the Calculation Agent shall request five active dealers each to provide a quotation of its price at approximately the Specified Time on the Interest Determination Date in question and shall determine the mid-market prices as the arithmetic mean of such quotations after discarding the highest and lowest of such quotations.

In the case of paragraphs (A) and (B), the Agency Agreement contains provisions for determining the Rate of Interest in the event that the Relevant Screen Page is not available or if, in the case of paragraph (A) above, no such offered quotation appears or, in the case of paragraph (B) above, fewer than three such offered quotations appear, in each case as at the Specified Time indicated above or in the Issue Terms. The Issue Terms may, if agreed by the relevant Dealer, set out such provisions in full.

- (B) If the Securities become due and payable in accordance with General Condition 9, the final Interest Determination Date shall, notwithstanding any Interest Determination Date specified in the applicable Issue Terms, be deemed to be the date on which the Securities became due and payable and the Rate of Interest applicable to the Securities shall, for so long as any such Security remains outstanding, be that determined on such date and as if (solely for the purpose of such interest determination) the relevant Interest Period had been shortened accordingly.
- (C) If "Payment Delay" is specified as the Observation Method in the applicable Issue Terms, all references in these Conditions to interest on the Securities being payable on an Interest Payment Date shall be read as reference to interest on the Securities being payable on an Effective Interest Payment Date instead.

No €STR Transition Event has occurred and the €STR Benchmark is unavailable

If, by the relevant €STR Reference Time on a relevant determination date, the €STR Benchmark is unavailable in respect of such determination date and a €STR Transition Event has not occurred, then the rate for such determination date will be the €STR Benchmark, where applicable, of the Corresponding Tenor, as provided by the administrator of the €STR Benchmark and published by an alternative authorised distributor or by or on behalf of the administrator of the €STR Benchmark itself. If no such rate has been published by 5.00 p.m. (Frankfurt time), then the rate for such determination date will be the rate determined by the Calculation Agent to be a commercially reasonable alternative for the €STR Benchmark by applying one of the following rates:

- (1) a rate formally recommended for use by the administrator of the €STR Benchmark; or
- (2) a rate formally recommended for use by the Relevant Governmental Body or any other supervisor which is responsible for supervising the €STR Benchmark or the administrator of the €STR Benchmark,

in each case, during the period of non-publication of the €STR Benchmark and for so long as a €STR Transition Event has not occurred. If a rate described in paragraph (1) is available, the Calculation Agent shall apply that rate. If no such rate is available but a rate described in paragraph (2) is available, the Calculation Agent shall apply that rate. If neither a rate described in paragraph (1) nor a rate described in paragraph (2) is available, then the Calculation Agent shall determine a commercially reasonable alternative for the €STR Benchmark taking into account where available any rate implemented by central counterparties and/or futures exchanges, in each case with trading volumes in derivatives or futures referencing the €STR Benchmark that the Calculation Agent considers sufficient for that rate to be a representative alternative rate.

TERMS AND CONDITIONS OF THE SECURITIES

Notwithstanding any other definitions to the contrary in these General Conditions, the following definitions shall apply with respect to this General Condition 4(b)(iv)(5):

"Corresponding Tenor" with respect to a €STR Replacement means a tenor (including overnight) having approximately the same length (disregarding business day adjustment) as the applicable tenor for the then-current €STR Benchmark.

"€STR Benchmark" means, initially, the Relevant Rate (as defined in General Condition 4(b)(iv)(2)(D) above) of the appropriate tenor (if applicable); provided that if a €STR Transition Event and its related €STR Replacement Date have occurred with respect to Compounded Daily €STR, or the then-current €STR Benchmark, then "€STR Benchmark" means the applicable €STR Replacement.

"€STR Reference Time" with respect to any determination of the €STR Benchmark means 11:00 am (Brussels time) on the TARGET Business Day immediately following the date of such determination.

"€STR Replacement" means the first alternative set forth in the order below that can be determined by the Replacement Rate Determination Agent as of the €STR Replacement Date:

- (1) the ISDA Fallback Rate;
- (2) the alternative rate of interest that has been selected or recommended by the Relevant Governmental Body as the replacement for the then-current €STR Benchmark, where applicable for the applicable Corresponding Tenor; or
- (3) the alternative rate of interest that has been selected by the Replacement Rate Determination Agent as the replacement for the then-current €STR Benchmark, where applicable for the applicable Corresponding Tenor, giving due consideration to any industry-accepted rate of interest as a replacement for the then-current €STR Benchmark for floating rate Securities denominated in the currency of the €STR Benchmark (the **"Relevant Benchmark Currency"**) calculated at such time.

"€STR Replacement Conforming Changes" means, with respect to any €STR Replacement, any technical, administrative or operational changes (including, but not limited to, timing and frequency of determining rates with respect to each interest period and making payments of interest, rounding of amounts or tenors, day count fractions, business day convention, amendments to any other Condition and other administrative matters) that the Replacement Rate Determination Agent decides may be appropriate to reflect the adoption of such €STR Replacement in a manner substantially consistent with market practice (or, if the Replacement Rate Determination Agent determines that adoption of any portion of such market practice is not administratively feasible or if the Replacement Rate Determination Agent determines that no market practice for use of the €STR Replacement exists, in such other manner as the Replacement Rate Determination Agent or the Calculation Agent, as the case may be, determines is reasonably necessary, acting in good faith and in a commercially reasonable manner).

"€STR Replacement Date" means the earliest to occur of the following events with respect to the then-current €STR Benchmark:

- (1) in the case of paragraph (1) or (2) of the definition of "€STR Transition Event", the later of (a) the date of the public statement or publication of information referenced therein and (b) the date on which the administrator of the €STR Benchmark permanently or indefinitely ceases to provide such €STR Benchmark; or
- (2) in the case of paragraph (3) of the definition of "€STR Transition Event", the date of the public statement or publication of information referenced therein,

for the avoidance of doubt, if the event giving rise to the €STR Replacement Date occurs on the same day as, but earlier than, the €STR Reference Time in respect of any determination, the €STR Replacement Date will be deemed to have occurred prior to the €STR Reference Time for such determination.

"€STR Transition Event" means the occurrence of one or more of the following events with respect to the then-current €STR Benchmark:

TERMS AND CONDITIONS OF THE SECURITIES

- (1) a public statement or publication of information by or on behalf of the administrator of the €STR Benchmark announcing that the administrator has ceased or will cease to provide the €STR Benchmark permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the €STR Benchmark;
- (2) a public statement or publication of information by the regulatory supervisor for the administrator of the €STR Benchmark, the central bank for the currency of the €STR Benchmark, an insolvency official with jurisdiction over the administrator for the €STR Benchmark, a resolution authority with jurisdiction over the administrator for the €STR Benchmark or a court or an entity with similar insolvency or resolution authority over the administrator for the €STR Benchmark, which states that the administrator of the €STR Benchmark has ceased or will cease to provide the €STR Benchmark permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the €STR Benchmark; or
- (3) a public statement or publication of information by the regulatory supervisor for the administrator of the €STR Benchmark announcing that the €STR Benchmark is no longer, or as of a specified future date will no longer be, representative of the underlying market and economic reality that such benchmark is intended to measure and that representativeness will not be restored, the €STR Benchmark has been or will be prohibited from being used or that its use has been or will be subject to restrictions or adverse consequences, either generally or in respect of the Securities.

"ISDA Definitions" means, unless otherwise specified in the applicable Issue Terms, the 2006 ISDA Definitions published by the international Swaps and Derivatives Association, Inc. ("**ISDA**") or any successor thereto as amended or supplemented from time to time up to the Issue Date of the first Tranche of such Securities (the "**2006 ISDA Definitions**"); provided that if "2021 ISDA Definitions" is specified in the applicable Issue Terms, ISDA Definitions means the 2021 ISDA Definitions published by ISDA or any successor thereto as amended or supplemented from time to time up to the Issue Date of the first Tranche of such Securities (the "**2021 ISDA Definitions**");

"ISDA Fallback Adjustment" means the spread adjustment (which may be a positive or negative value or zero) that would apply for derivatives transactions referencing the ISDA Definitions to be determined upon the occurrence of a €STR Transition Event with respect to the €STR Benchmark for the applicable tenor.

"ISDA Fallback Rate" means the rate that would apply for derivatives transactions referencing the ISDA Definitions to be effective upon the occurrence of a €STR Transition Event with respect to the €STR Benchmark for the applicable tenor excluding the applicable ISDA Fallback Adjustment.

"Relevant Governmental Body" means the European Central Bank (including any board thereof) or any committee officially endorsed and/or convened thereby.

- (v) Determination of Rate of Interest and Calculation of Interest Amount

The Calculation Agent will, on or as soon as practicable after each date on which the Rate of Interest is to be determined (the "**Interest Determination Date**"), determine the Rate of Interest (subject to any Minimum Interest Rate or Maximum Interest Rate specified in the Issue Terms) for the relevant Interest Period.

Subject to the Payout Conditions, the Calculation Agent will calculate the amount of interest (the "**Interest Amount**") payable on the Securities for the relevant Interest Period by applying the Rate of Interest to:

- (A) in the case of Floating Rate Securities and Reference Item Linked Interest Securities which are represented by a Global Security, the aggregate outstanding nominal amount of the Securities represented by such Global Security (or, if they are Partly Paid Securities, the aggregate amount paid up); or

TERMS AND CONDITIONS OF THE SECURITIES

- (B) in the case of each Floating Rate Security, Reference Item Linked Interest Security and Combination Interest Security in definitive form, the Calculation Amount (subject to General Condition 4(g)),

and, in each case, multiplying such sum by (i) the Day Count Fraction (as defined in General Condition 4(k) below) specified in the Issue Terms and (ii) where an Interest Leverage Multiplier is specified as "Applicable" in the Issue Terms, the Interest Leverage Multiplier specified in the Issue Terms, and rounding the resultant figure to the nearest sub-unit (defined above) of the relevant Specified Currency, one half of such a sub-unit being rounded upwards or otherwise in accordance with applicable market convention.

Where the Specified Denomination of a Floating Rate Security and Reference Item Linked Interest Security in definitive form comprises more than one Calculation Amount, the Interest Amount payable in respect of such Security shall be the aggregate of the amounts (determined in the manner provided above) for each Calculation Amount (subject to General Condition 4(g)) comprising the Specified Denomination without any further rounding.

- (vi) Minimum and/or Maximum Interest Rate

If the Issue Terms specifies a Minimum Interest Rate for any Interest Period, then in the event that the Rate of Interest in respect of such Interest Period determined in accordance with the provisions of paragraph (ii), (iii), (iv) or (v) above or (d) below (as appropriate) is less than such Minimum Interest Rate, the Rate of Interest for such Interest Period shall be such Minimum Interest Rate. If the Issue Terms do not specify a Minimum Interest Rate for any Interest Period, then the Rate of Interest for such Interest Period shall not be less than zero.

If the Issue Terms specifies a Maximum Interest Rate for any Interest Period, then in the event that the Rate of Interest in respect of such Interest Period determined in accordance with the provisions of paragraph (ii), (iii), (iv) or (v) above or (d) below (as appropriate) is greater than such Maximum Interest Rate, the Rate of Interest for such Interest Period shall be such Maximum Interest Rate.

- (vii) Linear Interpolation

Where Linear Interpolation and Screen Rate Determination is specified as applicable in respect of an Interest Period in the applicable Issue Terms, the Rate of Interest for such Interest Period shall be calculated by the Principal Paying Agent by straight line linear interpolation by reference to two rates based on the relevant Reference Rate in the applicable Issue Terms, one of which shall be determined as if the Designated Maturity were the period of time for which rates are available next shorter than the length of the relevant Interest Period and the other of which shall be determined as if the Designated Maturity were the period of time for which rates are available next longer than the length of the relevant Interest Period provided however that if there is no rate available for a period of time next shorter or, as the case may be, next longer, then the Principal Paying Agent shall determine such rate at such time and by reference to such sources as the Issuer determines appropriate.

"Designated Maturity" means, in relation to Screen Rate Determination, the period of time designated in the Reference Rate.

- (viii) Notification of Rate of Interest and Interest Amount

The Principal Paying Agent will cause the Rate of Interest and each Interest Amount for each Interest Period and the relevant Interest Payment Date to be notified to the Issuer, the Guarantor (if applicable), and, if applicable, to the stock exchange on which the relevant Securities are for the time being listed. In addition, the Principal Paying Agent shall publish or cause to be published such Rate of Interest, Interest Amount and Interest Payment Date in accordance with General Condition 13 as soon as possible after their determination but in no event later than the fourth Business Day thereafter. Each Rate of Interest, Interest Amount and Interest Payment Date so notified may subsequently be amended (or appropriate alternative arrangements made by way of adjustment) in the event of an extension or shortening of the Interest Period. Any such amendment will be promptly notified to each stock exchange on which the relevant Securities are for the time being listed and to the Securityholders in accordance with General Condition 13.

TERMS AND CONDITIONS OF THE SECURITIES

For Notes listed on the regulated market of Borsa Italiana MOT, the Issuer (or the Calculation Agent on its behalf) will cause the Rate of Interest and each Interest Amount for each Interest Period and the relevant Interest Payment Date to be notified to Borsa Italiana no later than (i) two Milan Business Days prior to the first day of each Interest Period in the case of Securities to be traded on an ex coupon basis (*corso secco*); or (ii) three Milan Business Days prior to the relevant Interest Period End Date in the case of Securities to be traded on a cum-coupon basis (*tel quel*). Notice of the foregoing will be published in accordance with General Condition 13 as soon as possible after the determination and in no event later than four Milan Business Days thereafter. Each Interest Amount and Interest Payment Date so notified may subsequently be amended (or appropriate alternative arrangements made by way of adjustment) without prior notice in the event of an extension or shortening of the Interest Period. Any such amendment will be promptly notified to Borsa Italiana. The Issuer will cause the early redemption of the Securities to be notified to Borsa Italiana three Milan Business Days in advance at the latest.

For the purposes of this Condition, the expression ("**Milan Business Day**") means a day (other than a Saturday or a Sunday) on which banks and foreign exchange markets are open for general business in Milan.

(ix) Certificates to be Final

All certificates, communications, determinations, calculations and decisions made for the purposes of the provisions of this paragraph (b), by the Principal Paying Agent, shall (in the absence of wilful default, bad faith or manifest error) be binding on the Issuer, the Guarantor (if applicable), the Principal Paying Agent, the other Paying Agents and all Securityholders, and (in the absence as aforesaid) no liability to the Securityholders shall attach to the Principal Paying Agent, in connection with the exercise or non-exercise by it of its powers, duties and discretions pursuant to such provisions.

(c) Interest on Specified Interest Amount Securities

Each Specified Interest Amount Security shall bear interest at an amount per Calculation Amount equal to the Specified Interest Amount, or as determined in the applicable Issue Terms, as further specified in the Specified Interest Amount provisions of the Issue Terms which shall be payable on the relevant Specified Interest Payment Date(s) also specified thereon, adjusted, where applicable for any Business Day Convention. For the avoidance of doubt, different Specified Interest Amounts may be payable in respect of Specified Interest Payment Dates. In respect of Credit Linked Securities only, the Specified Interest Amount shall be multiplied by the Specified Interest Amount Multiplier as so specified or determined in the Specified Interest Amount provisions of the Issue Terms. If no Specified Interest Amount Multiplier is specified or the Specified Interest Amount Multiplier is specified in the Issue Terms as "Not applicable", the Specified Interest Amount Multiplier shall be deemed to be equal to 1.

(d) Zero Coupon Securities

Where a Zero Coupon Security becomes due and repayable prior to the Maturity Date and is not paid when due, the amount due and repayable shall be the amount determined in accordance with General Condition 6(f)(i) as its Early Redemption Amount. As from the Maturity Date, any overdue principal of such Security shall bear interest at a rate per annum equal to the Accrual Yield specified in the Issue Terms. Such interest shall continue to accrue (as well after as before any judgment) until the day on which all sums due in respect of such Security up to that day are received by or on behalf of the holder of such Security. Such interest will be calculated on the basis of a 360 day year consisting of 12 months of 30 days each and in the case of an incomplete month the actual number of days elapsed in such incomplete month or on such other basis as may be specified in the Issue Terms.

(e) Switchable Securities

In the case of Switchable Securities, the Issuer may switch the Interest Basis on the date(s) specified in the applicable Issue Terms (the "**Optional Switch Date(s)**") from a Fixed Rate to a Floating Rate or from a Floating Rate to a Fixed Rate (the "**Issuer Switch Option**"). The switch of the interest basis is effective after a notice (the "**Switch Notice**") has been delivered within the minimum notice period required for such notice as specified in the applicable Issue Terms (the "**Minimum Notice Period**") before the relevant Optional Switch Date to the Securityholders in accordance with General Condition 13 specifying that the Interest Basis will be switched and with respect of which Optional Switch Date.

TERMS AND CONDITIONS OF THE SECURITIES

(f) Interest on Reference Item Linked Interest Securities

In the case of Reference Item Linked Interest Securities, where the Rate of Interest and/or the Interest Amount (whether on any Interest Payment Date, early redemption, maturity or otherwise) is to be determined by reference to one or more Reference Items, the Rate of Interest and/or the Interest Amount shall be determined where applicable as provided in the Payout Annex.

(g) Interest on Partly Paid Securities

In the case of Partly Paid Securities (other than Partly Paid Securities which are Zero Coupon Securities) interest will accrue as aforesaid on the paid-up nominal amount of such Securities.

(h) Interest Payments and Accrual of Interest

Interest will be paid subject to and in accordance with the provisions of General Condition 4. Interest will cease to accrue on each Security (or, in the case of the redemption of part only of a Security, that part only of such Security) on the due date for redemption thereof unless otherwise provided in these General Conditions or any Annex and otherwise unless, upon due presentation thereof, payment of principal or the payment, and/or delivery of the Entitlement as set out in the Issue Terms (if applicable), is improperly withheld or refused, in which event interest will continue to accrue (as well after as before any judgment) at the Fixed Rate or, as the case may be, the Rate of Interest at such day count fraction as the Principal Paying Agent determines appropriate or as otherwise provided in the Issue Terms until whichever is the earlier of (i) the day on which all sums due and/or assets comprised in the Entitlement in respect of such Security up to that day are received by or on behalf of the holder of such Security and (ii) the day on which the Principal Paying Agent or any agent appointed by the Issuer to deliver such assets to Securityholders has notified the holder thereof (either in accordance with General Condition 13 or individually) of receipt of all sums due and/or assets comprised in the Entitlement in respect thereof up to that date (subject, in the case of Credit Linked Securities to which Credit Linked Interest is applicable, to the provisions of Credit Linked Condition 5).

- (i) Any determination specified in General Conditions 4(a) to (h) (inclusive) is to be made by the Calculation Agent (unless specified otherwise in the applicable Issue Terms).

(j) Benchmark

TERMS AND CONDITIONS OF THE SECURITIES

5. Payments, Physical Delivery and Exchange of Talons

For the purposes of this General Condition 5, references to payment or repayment (as the case may be) of principal and/or interest and other similar expressions shall, where the context so admits, be deemed also to refer to delivery of any Entitlement(s).

(a) Method of Payment

Payments of principal (other than instalments of principal prior to the final instalment) in respect of each Registered Security (whether or not in global form) will be made against presentation and surrender (or, in the case of part payment of any sum due, endorsement) of the Registered Security at the specified office of the Registrar or any of the Paying Agents. Such payments will be made by transfer to the Designated Account (as defined below) of the holder (or the first named of joint holders) of the Registered Security appearing in the Register (i) where in a global form, at the close of the business day (being for this purpose a day on which Euroclear, Clearstream, Luxembourg and/or any other relevant Clearing System are open for business) before the relevant due date, and (ii) where in definitive form, at the close of business on the third business day (being for this purpose a day on which banks are open for business in the city where the specified office of the Registrar is located) before the relevant due date (the "**Record Date**"). Notwithstanding the previous sentence, if (i) a holder does not have a Designated Account or (ii) the nominal amount of the Securities held by a holder is less than US\$250,000 (or integral multiples of US\$1,000 in excess thereof) (or its approximate equivalent in any other currency), payment will instead be made by a cheque in the relevant currency of payment drawn on a Designated Bank (as defined below). For these purposes, "**Designated Account**" means the account (which, in the case of a payment in Japanese yen to a non-resident of Japan, shall be a non-resident account and if the currency is Renminbi, an account denominated in Renminbi and maintained by the payee with a bank in the relevant Renminbi Settlement Centre(s) in accordance with applicable laws, rules and regulations and guidelines issued from time to time (including all applicable laws and regulations with respect to settlement in Renminbi in the relevant Renminbi Settlement Centre(s)) maintained by a holder with a Designated Bank and identified as such in the Register and "**Designated Bank**" means (in the case of payment in a currency other than euro) a bank in the principal financial centre of the country of such currency (which, if such currency is Australian dollars or New Zealand dollars, shall be Sydney and Auckland, respectively) and (in the case of a payment in euro) any bank which processes payments in euro.

Any amount so deducted will be paid in the manner mentioned above against surrender of the relevant missing Coupon within a period of 10 years from the Relevant Date (as defined in General Condition 7) for the payment of such sum due for payment, whether or not such Coupon has become void pursuant to General Condition 10 or, if later, five years from the due date for payment of such Coupon. The provisions of this General Condition 5(b)(i)(D) apply to Securities other than Credit Linked Securities to which Credit Linked Redemption is applicable.

If, in the opinion of the Calculation Agent, delivery of the Entitlement in such commercially reasonable manner as the Calculation Agent has determined is not practicable by reason of a Settlement Disruption Event other than a Relevant Asset Redemption Event (each as defined below) having occurred and continuing on the Delivery Date, then the Delivery Date shall be postponed to the first following Settlement Business Day (or, if no Settlement Business Day is specified in the applicable Issue Terms, the first following business day for the Relevant Asset) in respect of which there is no such Settlement Disruption Event, provided that, the Issuer may elect in its sole discretion to satisfy its obligations in respect of the relevant Security by delivering the Entitlement using such other commercially reasonable manner as it may select and in such event the Delivery Date shall be such day as the Issuer deems appropriate in connection with delivery of the Entitlement in such other commercially reasonable manner. Following the occurrence of a Relevant Asset Redemption Event, the Entitlement Amount shall be deemed to be a cash amount equal to the proceeds of redemption of the Entitlement specified in the Issue Terms less (where 'Unwind Costs' are specified as being applicable in the Issue Terms), an amount equal to all Unwind Costs (as defined below), as determined by the Calculation Agent and notified to the Securityholders in accordance with General Condition 13. For the avoidance of doubt, where a Settlement Disruption Event affects some but not all of the Relevant Assets comprising the Entitlement, the Delivery Date for the Relevant Assets not affected by the Settlement Disruption Event will be the originally designated Delivery Date.

For so long as delivery of the Entitlement is not practicable by reason of a Settlement Disruption Event other than a Relevant Asset Redemption Event, then in lieu of physical settlement and notwithstanding any other provision hereof the Issuer may elect in its sole discretion to satisfy its obligations in respect of the relevant Security by payment to the relevant Securityholder of the Disruption Cash Redemption Amount (as defined below) on the fifth Business Day following the date that notice of such election is given to the Securityholders in accordance with General Condition 13. Payment of the Disruption Cash Redemption Amount will be made in such manner as shall be notified to the Securityholders in accordance with General Condition 13. The Calculation Agent shall give notice as soon as practicable to the Securityholders in accordance with General Condition 13 that a Settlement Disruption Event has occurred.

No Securityholder shall be entitled to any payment in respect of the relevant Security in the event of any delay in the delivery of the Entitlement due to the occurrence of a Settlement Disruption Event and no liability in respect thereof shall attach to the Issuer.

For the purposes hereof:

"Affiliate" means in relation to any entity (the **"First Entity"**), any entity controlled, directly or indirectly, by the First Entity, any entity that controls, directly or indirectly, the First Entity or any entity directly or indirectly under common control with the First Entity. For these purposes, control means ownership of a majority of the voting power of an entity;

"Disruption Cash Redemption Amount" means, in respect of any relevant Security, the fair market value of such Security (taking into account, where the Settlement Disruption Event affected some but not all of the Relevant Assets comprising the Entitlement and such non affected Relevant Assets have been duly delivered as provided above, the value of such Relevant Assets) less the cost to the Issuer and/or its affiliates of unwinding any underlying related hedging arrangements, all as determined by the Issuer in its sole and absolute discretion;

TERMS AND CONDITIONS OF THE SECURITIES

"Hedging Arrangements" means any transaction(s), asset(s) or trading position(s) the Issuer and/or any of its Affiliates or agents may enter into or hold from time to time (including, if applicable, on a portfolio basis) to hedge directly or indirectly and whether in whole or in part the credit or other price risk of the Issuer issuing and performing its obligations with respect to the Securities.

"Relevant Asset Redemption Event" means, in respect of a Relevant Asset which is specified in the Issue Terms to be a debt obligation in the form of a bond, that the Relevant Asset has been redeemed for any reason, on or prior to the Maturity Date of the Securities;

"Settlement Business Day" has the meaning specified in the Issue Terms;

"Settlement Disruption Event" means, in the opinion of the Calculation Agent, an event beyond the control of the Issuer or the Guarantor, as the case may be, as a result of which the Issuer or the Guarantor, as the case may be, cannot make delivery of the Relevant Asset(s) using the method specified in the Conditions and/or the Issue Terms; and

"Unwind Costs" means the amount specified in the Issue Terms (if any) or if "Standard Unwind Costs" are specified in the Issue Terms, an amount determined by the Calculation Agent equal to the aggregate sum of (without duplication) all costs (including loss of funding), fees, charges, expenses, tax and duties incurred by the Issuer and/or any of its Affiliates in connection with the redemption of the Relevant Assets and the Securities and the related termination, settlement or re-establishment of any Hedging Arrangements.

(E) Failure to Deliver due to Illiquidity

The provisions of this General Condition 5(b)(i)(E) apply to the Securities other than Credit Linked Securities to which Credit Linked Redemption is applicable.

If "Failure to Deliver due to Illiquidity" is specified as applying in the Issue Terms and, in the opinion of the Calculation Agent, it is impossible or impracticable to deliver, when due, some or all of the Relevant Assets (the "**Affected Relevant Assets**") comprising the Entitlement, where such failure to deliver is due to illiquidity in the market for the Relevant Assets (a "**Failure to Deliver due to Illiquidity**"), then:

- (1) subject as provided elsewhere in the Conditions, any Relevant Assets which are not Affected Relevant Assets, will be delivered on the originally designated date of redemption in accordance with this General Condition 5(b); and
- (2) in respect of any Affected Relevant Assets, in lieu of physical settlement and notwithstanding any other provision hereof the Issuer may elect in its sole discretion to satisfy its obligations in respect of the relevant Security by payment to the relevant Securityholder of the Failure to Deliver Redemption Amount (as defined below) on the fifth Business Day following the date that notice of such election is given to the Securityholders in accordance with General Condition 13. Payment of the Failure to Deliver Redemption Amount will be made in such manner as shall be notified to the Securityholders in accordance with General Condition 13. The Calculation Agent shall give notice as soon as practicable to the Securityholders in accordance with General Condition 13 that the provisions of this General Condition 5(b)(i)(E) apply.

For the purposes hereof, "**Failure to Deliver Redemption Amount**" means, in respect of any relevant Security, the fair market value of such Security (taking into account, the Relevant Assets comprising the Entitlement which have been duly delivered as provided above, the value of such Relevant Assets), less the cost to the Issuer and/or any of its Affiliates of unwinding any underlying related hedging arrangements, all as determined by the Issuer in its sole and absolute discretion.

(ii) Variation of Settlement

TERMS AND CONDITIONS OF THE SECURITIES

If the Issue Terms indicate that the Issuer has an option to vary settlement in respect of the Securities, the Issuer may at its sole and unfettered discretion in respect of each such Security, elect not to pay the relevant Securityholders the Final Redemption Amount or to deliver or procure delivery of the Entitlement to the relevant Securityholders, as the case may be, but, in lieu thereof to deliver or procure delivery of the Entitlement or make payment of the Final Redemption Amount on the Maturity Date to the relevant Securityholders, as the case may be. Notification of such election will be given to Securityholders in accordance with General Condition 13 and the provisions of this General Condition 5(b) shall apply accordingly. Where so specified in the Issue Terms, the Issuer shall give not less than the minimum period of notice and/or not more than the maximum period of notice.

(iii) Issuer's Option to Substitute Assets or to pay the Alternate Cash Redemption Amount

Notwithstanding any provision of these General Conditions to the contrary, the Issuer may, in its sole and absolute discretion in respect of Securities to which this General Condition 5(b) applies, if the Calculation Agent determines (in its sole and absolute discretion) that the Relevant Asset or Relevant Assets, as the case may be, comprises assets which are not freely tradable, elect either (i) to substitute for the Relevant Asset or the Relevant Assets, as the case may be, an equivalent value (as determined by the Calculation Agent in its sole and absolute discretion) of such other assets which the Calculation Agent determines, in its sole and absolute discretion, are freely tradable (the "**Substitute Asset**" or the "**Substitute Assets**", as the case may be) or (ii) not to deliver or procure the delivery of the Entitlement or the Substitute Asset or Substitute Assets, to the relevant Securityholders, but in lieu thereof to make payment to the relevant Securityholder on the Delivery Date of an amount equal to the fair market value of the Entitlement on or about the time of so electing as determined by the Calculation Agent in its sole and absolute discretion by reference to such sources as it considers appropriate (the "**Alternate Cash Redemption Amount**"). Notification of any such election will be given to Securityholders in accordance with General Condition 13 and in the event that the Issuer elects to pay the Alternate Cash Redemption Amount such notice shall give details of the manner in which such amount shall be paid.

For purposes hereof, a "**freely tradable**" security shall mean (i) with respect to the United States, a security which is registered under the Securities Act or not restricted under the Securities Act and which is not purchased from the issuer of such security and not purchased from an affiliate of the issuer of such security or which otherwise meets the requirements of a freely tradable security for purposes of the Securities Act, in each case, as determined by the Calculation Agent in its sole and absolute discretion or (ii) with respect to any other jurisdiction, a security not subject to any legal restrictions on transfer in such jurisdiction.

(iv) Rights of Securityholders and Calculations

None of the Issuer, the Guarantor (if applicable), the Calculation Agent, any Delivery Agent and the Agents shall have any responsibility for any errors or omissions in any calculation or determination in respect of the Securities.

The purchase of Securities does not confer on any holder of such Securities any rights (whether in respect of voting, distributions or otherwise) attaching to any Relevant Asset.

(v) For the purposes of the General Conditions:

"**Affiliate**" means in relation to any entity (the "**First Entity**"), any entity controlled, directly or indirectly, by the First Entity, any entity that controls, directly or indirectly, the First Entity or any entity directly or indirectly under common control with the First Entity. For these purposes, control means ownership of a majority of the voting power of an entity; and

"**Assessed Value Payment Amount**" means, in respect of a Security, an amount determined by the Calculation Agent to be the fair market value of the assets comprised in the Entitlement in respect of such Security less the cost to the Issuer and/or its Affiliates of unwinding any underlying relating hedging arrangements, all as determined by the Issuer.

"**Entitlement**", in respect of each Calculation Amount, shall be a quantity of the Relevant Asset(s) (and any cash amount to be delivered as a result of rounding down) specified in the Issue Terms equal to the Entitlement Amount specified in the Issue Terms or, in the case of Credit Linked Securities to which

TERMS AND CONDITIONS OF THE SECURITIES

Credit Linked Redemption is applicable, the Deliverable Obligations to be delivered pursuant to the Credit Linked Conditions. If the Relevant Asset is specified in the Issue Terms to be a debt obligation in the form of a bond (a "**Bond Asset**") and the relevant Securities are not Bond Linked Securities, the Entitlement in respect of each Calculation Amount, shall be a nominal amount of such Bond Asset (and any cash amount to be delivered as a result of rounding down) specified in the Issue Terms having a face value equal to the Entitlement Amount specified in the Issue Terms. In respect of any Bond Asset (i) the Calculation Agent shall make such adjustments as it, in its sole and absolute discretion determines to be necessary, to the Entitlement to be so delivered, in order to take account of any redenomination, subdivision, consolidation, reclassification or any event having a dilutive or concentrative effect on the value of the Bond Asset; or (ii) if such Bond Asset is converted into or exchanged for other securities in accordance with the terms of any voluntary or involuntary exchange or restructuring programme, the Entitlement shall be a nominal amount of the such converted securities or securities for which the Bond Asset has been exchanged, having a face value equal to the Entitlement Amount. If the Calculation Agent determines in its sole and absolute discretion that such securities are not freely tradable, the provisions of General Condition 5(b)(iii) shall apply.

"**Relevant Asset(s)**" means the relevant asset(s) so specified in the Issue Terms.

6. Redemption and Purchase

(a) Final Redemption

Unless previously redeemed or purchased and cancelled as provided below, each Security will be redeemed by the Issuer at its relevant Final Redemption Amount in the Specified Currency on the Maturity Date specified in the Issue Terms. This does not apply for (i) Credit Linked Securities and/or (ii) if Physical Settlement is specified as applicable in the Issue Terms and the conditions for Physical Settlement are satisfied. Securities may not be redeemed other than in accordance with these General Conditions and any applicable Annex.

For Securities that are intended to be traded on Borsa Italiana S.p.A., notwithstanding any other provision of the Conditions, such Securities shall be deemed to be automatically exercised on the Expiry Date (*Data di Scadenza*) specified in the applicable Issue Terms (the "**Expiry Date**"). The minimum number of Securities that may be exercised in respect of a Securityholder shall be no less than the Minimum Tradable Amount.

"**Final Redemption Amount**" shall be, unless specified otherwise in the applicable Issue Terms, an amount in respect of each Calculation Amount, equal to the Calculation Amount multiplied by: (i) the percentage, or (ii) the Final Payout specified in the Issue Terms. For the avoidance of doubt, if the Final Payout is zero or negative, no amount shall be payable on the final redemption of the Security.

(b) Redemption for tax reasons

The Securities may be redeemed at the option of the Issuer in whole, but not in part, at any time (if the Security is not a Floating Rate Security) or on any Interest Payment Date (if the Security is a Floating Rate Security), on giving not less than 30 or more than 60 days' notice to the Principal Paying Agent and, in accordance with General Condition 13, the Securityholders (which notice shall be irrevocable), if:

- (i) (A) on the occasion of the next payment due under the Securities, the Issuer has or will become obliged to pay additional amounts as provided or referred to in General Condition 7 or the Guarantor would be unable for reasons outside its control to procure payment by the Issuer and in making payment itself would be required to pay such additional amounts (as defined in General Condition 7); or (B) there is any change after the Issue Date of the Securities in the application or binding official interpretation of the applicable laws or regulations as a result of which withholding tax is applicable to the Securities, which change or amendment becomes effective on or after the issue date of the Securities; and
- (ii) in the case of General Condition 6(b)(i)(A) above, such obligation to pay additional amounts cannot be avoided by the Issuer or, as the case may be, the Guarantor taking reasonable measures available to it,

provided that no such notice of redemption shall be given earlier than 90 days prior to the earliest date on which the Issuer or, as the case may be, the Guarantor would be obliged to pay such additional amounts were a payment in respect of the Securities then due.

TERMS AND CONDITIONS OF THE SECURITIES

Prior to the publication of any notice of redemption pursuant to this General Condition 6, the Issuer or, as the case may be, the Guarantor shall deliver to the Principal Paying Agent a certificate signed by two Directors of the Issuer (or if at the time that such certification is to be given the Issuer has only one Director, such certificate may be signed by such Director) or, as the case may be, by a duly authorised signatory of the Guarantor stating that the Issuer is entitled to effect such redemption and setting forth a statement of facts showing that the conditions precedent to the right of the Issuer so to redeem have occurred, an opinion of independent legal advisers of recognised standing to the effect that the Issuer or, as the case may be, the Guarantor has or will become obliged to pay such additional amounts.

Each Security redeemed pursuant to this General Condition 6(b) will be redeemed at its Early Redemption Amount referred to in General Condition 6(f) below and no further interest will be payable since the immediately preceding Interest Payment Date or, if none, the Issue Date.

(c) Redemption for Illegality

In the event that the Issuer determines in good faith that the performance of its obligations under the Securities or that any arrangements made to hedge its obligations under the Securities has or will become unlawful, illegal or otherwise prohibited in whole or in part as a result of compliance with any applicable present or future law, rule, regulation, judgment, order or directive of any governmental, administrative, legislative or judicial authority or power, or in the interpretation thereof, the Issuer having given not less than 10 nor more than 30 days' notice to the Securityholders in accordance with General Condition 13 (which notice shall be irrevocable), may, on expiry of such notice redeem all, but not some only, of the Securities, each Security being redeemed at its Early Redemption Amount referred to in General Condition 6(f) below and no further interest will be payable since the immediately preceding Interest Payment Date or, if none, the Issue Date.

(d) Redemption at the Option of the Issuer (Issuer Call)

If "**Issuer Call Option**" is specified as being applicable in the Issue Terms, the Issuer may, having given:

- (i) not less than 5 Business Days' (or such other notice period specified in the Issue Terms) notice to the Securityholders in accordance with General Condition 13; and
- (ii) not less than 4 days before the giving of the notice referred to in (i), notice to the Principal Paying Agent,

(which notices shall be irrevocable and shall specify the date fixed for redemption), redeem all or some only of the Securities then outstanding on any Optional Redemption Date at the Optional Redemption Amount(s) specified in, or determined on the Optional Redemption Valuation Date in the manner specified in, the Issue Terms together, if appropriate, with interest accrued to (but excluding) the relevant Optional Redemption Date. Any partial redemption must be of a nominal amount equal to the Minimum Redemption Amount or, if applicable, a Higher Redemption Amount as specified in the Issue Terms. In the case of a partial redemption of Securities, the Securities to be redeemed ("**Redeemed Securities**") will be selected individually by lot, in the case of Redeemed Securities represented by definitive Securities, and in accordance with the rules of Euroclear and/or Clearstream, Luxembourg (to be reflected in the records of Euroclear and Clearstream, Luxembourg as either a pool factor or a reduction in nominal amount, at their discretion) and/or DTC, in the case of Redeemed Securities represented by a Global Security, not more than 30 days prior to the date fixed for redemption (such date of selection being hereinafter called the "**Selection Date**"). In the case of Redeemed Securities represented by definitive Securities, a list of the serial numbers of such Redeemed Securities will be published in accordance with General Condition 13 not less than 15 days prior to the date fixed for redemption. The aggregate nominal amount of Redeemed Securities represented by definitive Securities shall bear the same proportion to the aggregate nominal amount of all Redeemed Securities as the aggregate nominal amount of definitive Securities outstanding bears to the Nominal Amount of the Securities outstanding, in each case on the Selection Date, provided that the aggregate nominal amount of Redeemed Securities represented by definitive Securities shall, if necessary, be rounded downwards to the nearest integral multiple of the Specified Denomination, and the aggregate nominal amount of Redeemed Securities represented by a Global Security shall be equal to the balance of the Redeemed Securities. No exchange of the relevant Global Security will be permitted during the period from (and including) the Selection Date to (and including) the date fixed for redemption pursuant to this General Condition 6(d) and notice to that effect shall be given by the Issuer to the Securityholders in accordance with General Condition 13 at least five days prior to the Selection Date.

(e) Redemption at the Option of the Securityholders (Securityholder Put)

TERMS AND CONDITIONS OF THE SECURITIES

If "**Securityholder Put Option**" is specified as being applicable in the Issue Terms, upon the holder of any Security giving to the Issuer in accordance with General Condition 13 not less than 15 or more than 30 days' notice (or such other minimum and/or maximum notice period specified in the Issue Terms) (which notice shall be irrevocable) the Issuer will, upon the expiry of such notice, redeem in whole or in part, subject to and in accordance with the terms specified in the Issue Terms, such Securities on the Optional Redemption Date and at the Optional Redemption Amount specified in, or determined on the Optional Redemption Valuation Date specified in the Issue Terms, together, if appropriate, with interest accrued to (but excluding) the Optional Redemption Date.

To exercise the right to require redemption of any Security the holder of such Security must, if such Security is in definitive form and held outside Euroclear and Clearstream, Luxembourg and/or DTC, deliver at the specified office of any Paying Agent (in the case of Bearer Securities) or the Registrar (in the case of Registered Securities) at any time during normal business hours of such Paying Agent or, as the case may be, the Registrar falling within the notice period, a duly completed and signed notice of exercise in the form (for the time being current) obtainable from any specified office of any Paying Agent or, as the case may be, the Registrar (a "**Put Notice**") and in which the holder must specify a bank account (or, if payment is required to be made by cheque, an address) to which payment is to be made under this General Condition 6(e) and, in the case of Registered Securities, the nominal amount thereof to be redeemed. If a Security is in definitive bearer form, the Put Notice must be accompanied by the Security or evidence satisfactory to the Paying Agent concerned that the Security will, following delivery of the Put Notice, be held to its order or under its control.

If a Security is represented by a global Security or is in definitive form and held through Euroclear or Clearstream, Luxembourg and/or DTC, to exercise the right to require redemption of such Security the holder of such Security must, within the notice period, give notice to the Principal Paying Agent of such exercise in accordance with the standard procedures of Euroclear and Clearstream, Luxembourg and/or DTC (which may include notice being given on his instruction by Euroclear or Clearstream, Luxembourg and/or DTC or any common depositary for them to the Principal Paying Agent by electronic means) in a form acceptable to Euroclear and Clearstream, Luxembourg and/or DTC from time to time, and, if such Security is a Bearer Security represented by a global Security, the terms of which requires presentation for recording changes to its nominal amount, at the same time present or procure the presentation of the relevant global Security to the Principal Paying Agent for notation accordingly. Any Put Notice or other notice given in accordance with the standard procedures of Euroclear, and/or Clearstream Luxembourg and/or DTC given by a holder of any Security pursuant to this General Condition 6(e) shall be irrevocable except where prior to the due date of redemption an Event of Default has occurred and is continuing in which event such holder, at its option, may elect by notice to the Issuer to withdraw the notice given pursuant to this General Condition 6(e).

(f) Early Redemption

For the purposes of General Condition 6(b), (c), and (k), General Condition 9 and any circumstances where the Securities are to be redeemed prior to their Maturity Date at their Early Redemption Amount (as defined below), each Security will be redeemed at an amount (the "**Early Redemption Amount**") calculated as follows, unless specified otherwise in the Issue Terms, and no further interest will be payable since the immediately preceding Interest Payment Date or, if none, the Issue Date:

- (i) in the case of any Security at an amount determined by the Calculation Agent on the second Business Day immediately preceding the due date for the early redemption of the Securities, representing such Security's *pro rata* share of (a) the fair market value of such Securities taking into account all factors which the Calculation Agent determines relevant (including, if applicable, any interest provision of the Security, the event which resulted in such redemption and, if they are Partly paid Securities, the aggregate amount paid up) less (b) all costs incurred by the Issuer, the Guarantor or any of its Affiliates in connection with such early redemption, including, without limitation, any costs associated with unwinding any related hedging arrangements, and all other expenses related thereto, as determined by the Calculation Agent in good faith and in a commercially reasonable manner.
- (ii) For the purposes of General Condition 6(f)(i)(a) above where the relevant Securities provide for any minimum amount(s) of cash or assets to be payable or deliverable this shall be taken into account in determining the fair market value. However, the Calculation Agent shall reduce (i.e. discount) the value of such amounts in determining the fair market value to take into account the length of time remaining to the first possible date on which such amount(s) would otherwise have been payable or deliverable. Such discounting may be determined by reference to such information as the Calculation Agent may select which may include risk free rate(s).

TERMS AND CONDITIONS OF THE SECURITIES

The Calculation Agent shall also take into account appropriate values for any other amount which would or could otherwise have been payable or deliverable under the relevant Securities. This may include the element of the return on the Securities determined by reference to the relevant assets or reference basis(es) to which the Securities relate (i.e. a derivative element). The relevant value for this element of the Securities may be determined by reference to the cost at the relevant time of entering into a transaction to provide similar amounts.

(g) Purchases

The Issuer, the Guarantor or any of their respective subsidiaries may at any time purchase Securities (provided that, in the case of Definitive Bearer Securities, all unmatured Receipts, Coupons and Talons appertaining thereto are purchased therewith) at any price in the open market or otherwise. Securities purchased as aforesaid may, at the option of the Issuer, the Guarantor or their respective subsidiaries, as the case may be, be held, reissued, resold or surrendered to any Paying Agent and/or the Registrar for cancellation except that all Securities in definitive form purchased by the Issuer must be surrendered for cancellation.

(h) Cancellation

All Securities which are redeemed will forthwith be cancelled (together with all unmatured Receipts, Coupons and Talons attached thereto or surrendered therewith at the time of redemption). All Securities so cancelled and any Securities purchased and cancelled pursuant to General Condition 6(g) above (together with all unmatured Receipts, Coupons and Talons cancelled therewith) shall be forwarded to the Principal Paying Agent and cannot be reissued or resold.

(i) Instalments

Unless previously redeemed or purchased and cancelled on or prior to an Instalment Date, Instalment Securities will be redeemed in the Instalment Amounts and on the Instalment Dates specified in the Issue Terms. The Instalment Amount payable on an Instalment Date shall be, unless specified otherwise in the applicable Issue Terms, an amount in respect of each Calculation Amount, which may be an amount per Calculation Amount equal to (i) Calculation Amount multiplied by an Instalment Factor (if so specified in the applicable Issue Terms) and multiplied by a Final Payout (for such purposes an "**Instalment Payout**") or (ii) in case of the last Instalment Date, the Final Redemption Amount if so specified in the applicable Issue Terms. In the case of Securities in definitive form, all instalments (other than the final instalment) will be paid by surrender of, in the case of a Definitive Bearer Security, the relevant Receipt (which must be presented with the Security to which it appertains) and, in the case of a definitive Registered Security, the relevant Security and issue of a new Security in the nominal amount remaining outstanding, all as more fully described in General Condition 5. In the case of early redemption, the Early Redemption Amount will be determined pursuant to General Condition 6(f) above.

Where the Securities are Credit Linked Securities in respect of which Instalment Amounts are payable and the Issue Terms specify that the Credit Linked Conditions shall not apply to the Instalment Amounts, such Instalment Amounts shall be paid in full on each Instalment Date specified in the Issue Terms notwithstanding the occurrence of any Credit Event Determination Date.

(j) Late payment on Zero Coupon Securities

If the amount payable in respect of any Zero Coupon Security upon redemption of such Zero Coupon Security pursuant to General Condition 6(b), (d) or (e) above is improperly withheld or refused, the amount due and repayable in respect of such Zero Coupon Security shall be the amount calculated as provided in General Condition 6(f)(ii) above as though the references therein to the date fixed for redemption or the date upon which the Zero Coupon Security becomes due and repayable were replaced by references to the date which is the earlier of:

- (i) the date on which all amounts due in respect of the Zero Coupon Security have been paid; and
- (ii) the date on which the full amount of the moneys payable has been received by the Principal Paying Agent and notice to that effect has been given to the Securityholders in accordance with General Condition 13.

(k) Partly Paid Securities

TERMS AND CONDITIONS OF THE SECURITIES

In the event that any Securityholder fails to pay a Part Payment Amount with respect to Partly Paid Securities on the due date (a "**Part Payment Default Date**"), such Partly Paid Securities held by such Securityholder shall automatically be redeemed, unless specified otherwise in the Issue Terms, on the seventh Business Day following a Part Payment Default Date, each at its Early Redemption Amount referred to in General Condition 6(f) above and no further interest will be payable from the Interest Payment Date immediately preceding such Part Payment Default Date or, if none, the Issue Date. Following the occurrence of a Part Payment Default Date with respect to Partly Paid Securities, the Issuer will, as soon as reasonably practicable, give notice of the occurrence of such Part Payment Default Date and resulting automatic redemption, to the relevant Securityholder in accordance with General Condition 13, provided that (i) failure to give such notice or (ii) payment of the Part Payment Amount following the occurrence of a Part Payment Default Date, will not void the automatic redemption of such Securities.

Partly Paid Securities will be redeemed, whether at maturity, early redemption or otherwise in accordance with the provisions of this General Condition 6.

- (l) Redemption for the occurrence of an Administrator/Benchmark Event
- (i) Following the occurrence of an Administrator/Benchmark Event, the Issuer, having given not less than 10 nor more than 30 days' notice to the Securityholders in accordance with General Condition 13 (which notice shall be irrevocable), may, on expiry of such notice redeem all, but not some only, of the Securities, each Security being redeemed at its Early Redemption Amount referred to in General Condition 6(f) above. Interest will cease to accrue and no further interest will be payable from the Interest Payment Date or (if none, the Issue Date) immediately preceding such Administrator/Benchmark Event.
 - (ii) Notwithstanding General Condition 6(l)(i) above, in the event that the Calculation Agent determines that an Administrator/Benchmark Event has occurred, the Calculation Agent, shall give notice to the Issuer and the Securityholders as soon as reasonably practicable of the occurrence of such Administrator/Benchmark Event. The Calculation Agent shall then use reasonable endeavours to determine what amendments (if any) may be made to the terms and conditions of the Securities as the Calculation Agent determines necessary or appropriate to account for the effect of the relevant event or circumstance. Without limitation, such adjustments may: (a) consist of one or more amendments and/or be made on one or more dates; (b) be determined by reference to any adjustment(s) in respect of the relevant event or circumstance made in relation to any hedging arrangements in respect of the Securities; and (c) include selecting a successor benchmark(s) and making related adjustments to the terms of the Securities, including where applicable to reflect any increased costs of the Issuer providing exposure to the successor benchmark(s), and, in the case of more than one successor benchmark, making provision for allocation of exposure as between the successor benchmarks. In the event that the Calculation Agent proposes amendments to the terms and conditions of the Securities in accordance with this General Condition 6(l)(ii), the Issuer shall make such amendments to the terms and conditions of the Securities and there shall be no redemption of the Securities. However, if the Calculation Agent determines, within 20 calendar days of the Issuer receiving notice of an Administrator/Benchmark Event, that no amendments may be made to the terms and conditions of the Securities to account for the effect of the relevant event or circumstance, (A) the Calculation Agent shall notify the Issuer of the same and (B) upon, the Issuer having given not less than 10 nor more than 30 days' notice to the Securityholders in accordance with General Condition 13 (which notice shall be irrevocable), the Securities shall be redeemed in accordance with General Condition 6(l)(i).

For the purposes of this General Condition 6(l):

"Administrator/Benchmark Event" means, in relation to any Benchmark, the occurrence of a Benchmark Modification or Cessation Event, a Non-Approval Event, a Pre-Cessation Event a Rejection Event or a Suspension/Withdrawal Event.

"Benchmark" means any figure or rate and where any amount payable under the Securities, or the value of the Securities, is determined by reference to such figure or rate, all as determined by the Calculation Agent.

"Benchmark Modification or Cessation Event" means, in respect of the Benchmark, any of the following has occurred or will occur:

- (A) any material change in such Benchmark;

TERMS AND CONDITIONS OF THE SECURITIES

- (B) any public statement by the relevant competent authority as a consequence of which the Benchmark will be prohibited from being used either generally, or in respect of the Securities;
- (C) the permanent cancellation or cessation in the provision of such Benchmark;
- (D) the making of a public statement by (i) the administrator of the Benchmark that it has ceased publishing the Benchmark permanently or indefinitely (in circumstances where no successor administrator has been appointed that will continue publication of the Benchmark); or (ii) by the supervisor of the administrator of the Benchmark that the Benchmark has been permanently or indefinitely discontinued; or
- (E) it is not commercially reasonable to continue the use of the relevant Benchmark in connection with the Securities as a result of any applicable licensing restrictions or changes in the cost of obtaining or maintaining any relevant licence (including, without limitation, where the Issuer, the Calculation Agent or any other entity is required to hold a valid licence in order to issue or perform its obligations in respect of the Securities and for any reason such licence is either not obtained, not renewed or is revoked or there is a material change in the cost of obtaining or renewing such licence).

"BMR" means the EU Benchmarks Regulation (Regulation (EU) 2016/1011).

"Non-Approval Event" means, in respect of the Benchmark:

- (A) any authorisation, registration, recognition, endorsement, equivalence decision or approval in respect of the Benchmark or the administrator of the Benchmark is not obtained or will not be obtained;
- (B) the Benchmark or the administrator of the Benchmark is not or will not be included in an official register; or
- (C) the Benchmark or the administrator of the Benchmark does not or will not fulfil any legal or regulatory requirement applicable to the Issuer, the Calculation Agent or the Benchmark,

in each case, as required under any applicable law or regulation in order for any of the Issuer, the Calculation Agent or any other entity to perform its obligations in respect of the Securities. For the avoidance of doubt, a Non-Approval Event shall not occur if the Benchmark or the administrator of the Benchmark is not included in an official register because its authorisation, registration, recognition, endorsement, equivalence or approval is suspended if, at the time of such suspension, the continued provision and use of the Benchmark is permitted in respect of the Securities under the applicable law or regulation during the period of such suspension.

"Pre-Cessation Event": a public statement by the supervisor of the administrator of the Benchmark (as applicable) that, in the view of such supervisor, (A) the Benchmark is (or will be deemed by such supervisor to be) no longer representative of an underlying market and such representativeness shall not be restored or (B) the methodology to calculate the Benchmark has materially changed.

"Rejection Event" means, in respect of the Benchmark, the relevant competent authority or other relevant official body rejects or refuses, or will reject or refuse any application for authorisation, registration, recognition, endorsement, equivalence, approval or inclusion in any official register which, in each case, is required in relation to the Benchmark or the administrator of the Benchmark under any applicable law or regulation for any of the Issuer, the Calculation Agent or any other entity to perform its obligations in respect of the Securities.

"Suspension/Withdrawal Event" means, in respect of the Benchmark:

- (A) the relevant competent authority or other relevant official body suspends or withdraws, or will suspend or withdraw any authorisation, registration, recognition, endorsement, equivalence decision or approval in relation to the Benchmark or the administrator of the Benchmark which is required under any applicable law or regulation in order for any of the Issuer, the Calculation Agent or any other entity to perform its obligations in respect of the Securities; or
- (B) the Benchmark or the administrator of the Benchmark is or will be removed from any official register where inclusion in such register is required under any applicable law in order for any of the Issuer, the Calculation Agent or any other entity to perform its obligations in respect of the Securities.

TERMS AND CONDITIONS OF THE SECURITIES

For the avoidance of doubt, a Suspension/Withdrawal Event shall not occur if such authorisation, registration, recognition, endorsement, equivalence decision or approval is suspended or where inclusion in any official register is withdrawn if, at the time of such suspension or withdrawal, the continued provision and use of the Benchmark is permitted in respect of the Securities under the applicable law or regulation.

For the further avoidance of doubt, the above is additional, and without prejudice, to any other terms of the Securities. In the event that under any such terms (i) any other consequences could apply in relation to an event or occurrence the subject of an Administrator/Benchmark Event or (ii) any such terms contradict the terms in this Condition 6(l), the Calculation Agent shall determine which terms shall apply in its sole and absolute discretion.

(m) Securities listed on the MOT

Notwithstanding any other provision in these Conditions, in case of Securities listed and admitted to trading on the regulated market of Borsa Italiana S.p.A. MOT, the Final Redemption Amount, the Optional Redemption Amount, the Early Redemption Amount, the Automatic Early Redemption Amount as well as any other redemption amount for the Securities provided for in these Conditions shall be at least equal to the Specified Denomination in respect of the Securities.

7. Taxation

All payments of principal and interest in respect of the Securities, Receipts and Coupons by or on behalf of the Issuer or the Guarantor will be made without withholding or deduction for or on account of any present or future taxes or duties of whatever nature imposed or levied by or on behalf of any jurisdiction having the power to tax unless such withholding or deduction is required by law. In such event, the Issuer or the Guarantor, as applicable (or, as the case may be, the relevant Paying Agent) will account to the relevant authorities for the amount required to be withheld or deducted and, in the case of any taxes or duties imposed or levied by or on behalf of the Kingdom of Spain ("**Spain**") or any political subdivision or authority thereof or therein having the power to tax, will pay such additional amounts as shall be necessary in order that the net amounts received by the holders of the Securities, Receipts or Coupons after such withholding or deduction shall equal the respective amounts of principal and interest which would otherwise have been receivable in respect of the Securities, Receipts or Coupons, as the case may be, in the absence of such withholding or deduction; except that no such additional amounts shall be payable with respect to any Security, Receipt or Coupon:

- (a) presented for payment by or on behalf of a beneficial owner or a holder who is liable for such taxes or duties in respect of such Security, Receipt or Coupon by reason of his having some connection with Spain other than the mere holding of such Security, Receipt or Coupon; or
- (b) presented for payment more than 30 days after the Relevant Date (as defined below) except to the extent that the holder thereof would have been entitled to an additional amount on presenting the same for payment on such thirtieth day assuming that day to have been a Payment Day (as defined in General Condition 5(a)); or
- (c) to, or to a third party on behalf of, a holder if such taxes or duties may be avoided by complying with any relevant requirement of Spanish law or by making a declaration of non-residence or other similar claim for exemption to any authority of or in Spain, unless such holder proved that he is not entitled so to comply or to make such declaration or claim.

In addition, no additional amounts should be payable by the Issuer, the Guarantor or any Paying Agent or any other person on account of any withholding or deduction in respect of the Securities, Receipts and Coupons where such withholding or deduction is required pursuant to:

- (i) an agreement described in Section 1471(b) of the U.S. Internal Revenue Code of 1986, as amended (the "**Code**") or otherwise imposed pursuant to Sections 1471 through 1474 of the Code, any regulations thereunder, any official interpretations thereof, any governmental agreement with respect thereto or any law implementing, or relating to, an intergovernmental agreement ("**FATCA**");
- (ii) the Dutch Withholding Tax Act 2021 (*Wet bronbelasting 2021*); or
- (iii) any payment being treated as a dividend or "dividend equivalent" for purposes of the Code or any regulations thereunder.

TERMS AND CONDITIONS OF THE SECURITIES

In these General Conditions, the "**Relevant Date**" means the date on which such payment first becomes due, except that, if the full amount of the moneys payable has not been duly received by the Principal Paying Agent or the Registrar, as the case may be, on or prior to such due date, it means the date on which, the full amount of such moneys having been so received, notice to that effect is duly given to the Securityholders in accordance with General Condition 13.

8. Redenomination

(a) Redenomination

If Securities are issued in the currency of a country that adopts the euro as its single currency after the Issue Date, the Issuer may, without the consent of the Securityholders, the Receiptholders and the Couponholders, on giving prior notice to the Principal Paying Agent, Euroclear and Clearstream, Luxembourg and at least 30 days' prior notice to the Securityholders in accordance with General Condition 13, elect that, with effect from the Redenomination Date specified in the notice, the Securities shall be redenominated in euro.

The election will have effect as follows:

- (i) the Securities and the Receipts shall be deemed to be redenominated into euro in the denomination of euro 0.01 with a nominal amount for each Security and Receipt equal to the nominal amount of that Security or Receipt in the Specified Currency, converted into euro at the Established Rate, provided that, if the Issuer determines, with the agreement of the Principal Paying Agent, that the then market practice in respect of the redenomination into euro of internationally offered securities is different from the provisions specified above, such provisions shall be deemed to be amended so as to comply with such market practice and the Issuer shall promptly notify the Securityholders, the stock exchange (if any) on which the Securities may be listed and the Paying Agents of such deemed amendments;
- (ii) save to the extent that an Exchange Notice has been given in accordance with General Condition 8(a)(iv) below, the amount of interest due in respect of the Securities will be calculated by reference to the aggregate nominal amount of Securities presented (or, as the case may be, in respect of which Coupons are presented) for payment by the relevant Securityholder and the amount of such payment shall be rounded down to the nearest euro 0.01;
- (iii) if definitive Securities are required to be issued after the Redenomination Date, they shall be issued at the expense of the Issuer in the denominations agreed at the time by the Issuer and the Principal Paying Agent;
- (iv) if issued prior to the Redenomination Date, all unmatured Coupons denominated in the Specified Currency (whether or not attached to the Securities) will become void with effect from the date on which the Issuer gives notice (the "**Exchange Notice**") that replacement euro-denominated Securities, Receipts and Coupons are available for exchange (provided that such securities are so available) and no payments will be made in respect of them. The payment obligations contained in any Securities and Receipts so issued will also become void on that date although those Securities and Receipts will continue to constitute valid exchange obligations of the Issuer. New euro-denominated Securities, Receipts and Coupons will be issued in exchange for Securities, Receipts and Coupons denominated in the Specified Currency in such manner as the Principal Paying Agent may specify and as shall be notified to the Securityholders in the Exchange Notice. No Exchange Notice may be given less than 15 days prior to any date for payment of principal or interest on the Securities;
- (v) after the Redenomination Date, all payments in respect of the Securities, the Receipts and the Coupons, other than payments of interest in respect of periods commencing before the Redenomination Date, will be made solely in euro as though references in the Securities to the Specified Currency were to euro. Payments will be made in euro by credit or transfer to a euro account (or any other account to which euro may be credited or transferred) specified by the payee or, at the option of the payee, by a euro cheque;
- (vi) if the Securities are Fixed Rate Securities and interest for any period ending on or after the Redenomination Date is required to be calculated for a period ending other than on a Fixed Interest Date, it will be calculated by applying the Rate of Interest to each Calculation Amount (subject to General Condition 4(g)), multiplying such sum by the applicable Day Count Fraction, and rounding the resultant

TERMS AND CONDITIONS OF THE SECURITIES

figure to the nearest sub-unit (defined above) of the relevant Specified Currency, half of any such sub-unit being rounded upwards or otherwise in accordance with applicable market convention;

- (vii) if the Securities are Floating Rate Securities, the Issue Terms will specify any relevant changes to the provisions relating to interest; and
- (viii) such other changes shall be made to these General Conditions as the Issuer may decide, after consultation with the Principal Paying Agent, and as may be specified in the notice, to conform them to conventions then applicable to instruments denominated in euro.

(b) Definitions

In these General Conditions, the following expressions have the following meanings:

Any variation, termination, appointment or change shall only take effect (other than in the case of insolvency, when it shall be of immediate effect) after not less than 30 or more than 45 days' prior notice thereof shall have been given to the Securityholders in accordance with General Condition 13, provided that no such variation, termination, appointment or changes shall take effect (except in the case of insolvency) within 7 days before any due date for the payment of any Security or any related

TERMS AND CONDITIONS OF THE SECURITIES

Receipt or Coupon. Notice of all changes in the identities or specified offices of any Agent will be given promptly by the Issuer to Securityholders in accordance with General Condition 13.

In acting under the Agency Agreement, the Agents will act solely as agents of each of the Issuer and Guarantor (if applicable) and do not assume any obligations or relationship of agency or trust to or with the Securityholders, Receiptholders or Couponholders, except that (without affecting the obligations of the Issuer and the Guarantor (if applicable) to the Securityholders, Receiptholders and Couponholders, to repay Securities and pay interest thereon) funds received by the Principal Paying Agent for the payment of the principal of or interest on the Securities shall be held by it in trust for the Securityholders and/or Receiptholders or Couponholders until the expiration of the relevant period of prescription under General Condition 10. The Issuer will agree to perform and observe the obligations imposed upon it under the Agency Agreement. The Agency Agreement contains provisions for the indemnification of the Paying Agents and for relief from responsibility in certain circumstances, and entitles any of them to enter into business transactions with the Issuer and any of its subsidiaries without being liable to account to the Securityholders, Receiptholders or the Couponholders for any resulting profit.

All calculations, determinations, decisions, selections, elections and opinions made by the Calculation Agent shall be made in its discretion in accordance with the Conditions of the Securities, having regard in each case to any criteria stipulated therein, and shall (save in the case of manifest error) be final, conclusive and binding on the Issuer, the other Agents and the Securityholders.

In relation to the Securities listed on MOT, the Calculation Agent in exercising its discretion under the relevant Conditions, shall act in good faith and in a commercially reasonable manner, and use generally accepted methodologies in making adjustments in the event of disruption to the underlying assets. Notwithstanding any other provision of the Conditions, the Calculation Agent may make any adjustment that it determines appropriate to any terms of such Securities, in accordance with the relevant Conditions, to preserve the economic equivalent of the obligations of the Issuer under the Securities, save as otherwise specified in the applicable Issue Terms.

In exercising its discretion as described above, the Calculation Agent may take into account such factors as it determines appropriate in each case, which may include, in particular, any circumstances or events which have or may have a material impact on the hedging arrangements (as described below) entered into by the Issuer and/or any of its Affiliates and/or any other relevant party (each a "**Relevant Party**") in respect of the Securities. The exercise of the Calculation Agent's discretion in respect of the Securities as provided herein is necessary because certain circumstances or events (for example a material modification or disruption to a relevant asset(s) to which the Securities are linked) may occur subsequent to the issuance of the Securities which may materially affect the costs to the Relevant Party of maintaining the Securities or any relevant hedging arrangements. Such circumstances or events may not have been reflected in the pricing of the Securities. In addition, as a result of certain circumstances or events (e.g. unavailability or disruption to any reference source) it may no longer be reasonably practicable or otherwise appropriate for certain valuations in respect of any relevant asset(s) to which the Securities are linked or otherwise in connection with the Securities to be made, thus making it necessary for the Calculation Agent to exercise its discretion in such a case.

16. Substitution

(a) Substitution of the Issuer

(i) The Issuer may, without the consent of the Securityholders (and by subscribing any Securities, each Securityholder expressly consents to it), be replaced and substituted by the Guarantor or any other company of which 100 per cent. of the shares or other equity interests (as the case may be) carrying the right to vote are directly or indirectly owned by the Guarantor as principal debtor (in such capacity, the "**Substituted Debtor**") in respect of the Securities provided that:

The Documents shall also contain a covenant by the Substituted Debtor and (if the Substituted Debtor is not the Guarantor) the Guarantor to indemnify and hold harmless each Securityholder against all taxes or duties which arise by reason of a law or regulation having legal effect or being in reasonable contemplation thereof on the date such substitution becomes effective, which may be incurred or levied against such holder as a result of any substitution pursuant to this General Condition 16(a) and which would not have been so incurred or levied had such substitution not been made (and, without limiting the foregoing, any and all taxes or duties which are imposed on any such Securityholder by any political sub-division or taxing authority of any country in which such Securityholder resides or is subject to any such tax or duty and which would not have been so imposed had such substitution not been made);
- (C) the Documents shall contain a warranty and representation by the Substituted Debtor and (if the Substituted Debtor is not the Guarantor) the Guarantor that the Substituted Debtor and (if the Substituted Debtor is not the Guarantor) the Guarantor have obtained all necessary governmental and regulatory approvals and consents for such substitution and (if the Substituted Debtor is not the Guarantor) for the giving by the Guarantor of the New Guarantee in respect of the obligations of the Substituted Debtor on the same terms *mutatis mutandis* as the Guarantee, that each of the Substituted Debtor and the Guarantor (if the Substituted Debtor is not the Guarantor) has obtained all necessary governmental and regulatory approvals and consents for the performance by each of the Substituted Debtor and the Guarantor (if the Substituted Debtor is not the Guarantor) of its obligations under the Documents and that all such approvals and consents are in full force and effect;
- (D) each stock exchange which has the Securities listed thereon shall have confirmed that following the proposed substitution of the Substituted Debtor the Securities would continue to be listed on such stock exchange;
- (E) the Issuer shall have delivered or procured the delivery to the Principal Paying Agent and the Registrar a copy of a legal opinion addressed to the Issuer, the Substituted Debtor and the Guarantor from a leading firm of lawyers in the country of incorporation of the Substituted Debtor, to the effect that the Documents constitute legal, valid and binding obligations of the Substituted Debtor, such opinion(s) to be dated not more than seven days prior to the date of substitution of the Substituted Debtor for the Issuer and to be available for inspection by Securityholders at the specified offices of the Principal Paying Agent and the Registrar;
- (F) the Guarantor shall have delivered or procured the delivery to the Principal Paying Agent and the Registrar a copy of a legal opinion addressed to the Issuer, the Substituted Debtor and the Guarantor from a leading firm of Spanish lawyers acting for the Guarantor to the effect that in the case where the Substituted Debtor is not the Guarantor, the Documents (including the New Guarantee given by the Guarantor in respect of the Substituted Debtor) constitute legal, valid and binding obligations of the Guarantor, such opinion to be dated not more than seven days prior to the date of substitution of the Substituted Debtor for the Issuer and to be available for inspection by Securityholders at the specified offices of the Principal Paying Agent and the Registrar;
- (G) the Guarantor shall have delivered or procured the delivery to the Principal Paying Agent and the Registrar a copy of a legal opinion addressed to the Issuer, the Substituted Debtor and the Guarantor from a leading firm of English lawyers to the effect that the Documents (including

the New Guarantee given by the Guarantor in respect of the Substituted Debtor) constitute legal, valid and binding obligations of the parties thereto under English law, such opinion to be dated not more than seven days prior to the date of substitution of the Substituted Debtor for the Issuer and to be available for inspection by Securityholders at the specified offices of the Principal Paying Agent and the Registrar;

- (H) the Substituted Debtor shall have appointed a process agent in England to receive service of process on its behalf in relation to any legal action or proceedings arising out of or in connection with the Securities or the Documents;
 - (I) there is no outstanding Event of Default in respect of the Securities;
 - (J) any credit rating assigned to the Securities will remain the same or be improved when the Substituted Debtor replaces and substitutes the Issuer in respect of the Securities; and

- (ii) Upon the execution of the Documents as referred to in General Condition 16(a)(i)(A) above, the Substituted Debtor shall be deemed to be named in the Securities as the principal debtor in place of the Issuer (or of any previous substitute under these provisions) and the Securities shall thereupon be deemed to be amended to give effect to the substitution. The execution of the Documents shall operate to release the Issuer (or such previous substitute as aforesaid) from all of its obligations in respect of the Securities.
 - (iii) The Documents shall be deposited with and held by the Principal Paying Agent and the Registrar for so long as any Security remains outstanding and for so long as any claim made against the Substituted Debtor or (if the Substituted Debtor is not the Guarantor) the Guarantor by any Securityholder in relation to the Securities or the Documents shall not have been finally adjudicated, settled or discharged. The Substituted Debtor and (if the Substituted Debtor is not the Guarantor) the Guarantor shall acknowledge in the Documents the right of every Securityholder to the production of the Documents for the enforcement of any of the Securities or the Documents.
 - (iv) Not later than 15 London Business Days after the execution of the Documents, the Substituted Debtor shall give notice thereof to the Securityholders in accordance with General Condition 13.
 - (v) In the case of Securities admitted to trading on MOT, SeDeX or EuroTLX, if requested by Borsa, the Guarantor shall continue to be unconditionally and irrevocably liable for the obligations of any substitute as principal obligor in respect of such Securities together with and to the same extent as the substitute.

"London Business Day" means a day on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealing in foreign exchange and foreign currency deposits) in London.

17. Contracts (Rights of Third Parties) Act 1999; Benefits of New York Law 3(a)(2) Notes and Agency Agreement

The Securities shall not confer any rights under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of the Securities, but, subject to the succeeding sentence, this does not affect any right or remedy of a third party which exists or is available apart from that Act. Solely with respect to New York Law 3(a)(2) Notes and the provisions of the Agency Agreement solely relating to such New York Law 3(a)(2) Notes, nothing in the Agency Agreement or the New York Law 3(a)(2) Notes, express or implied, shall give to any person, other than the parties to the Agency Agreement and their successors and the Securityholders of such New York Law 3(a)(2) Notes, any benefit or any legal or equitable right, remedy or claim under the Agency Agreement or the New York Law 3(a)(2) Notes.

ADDITIONAL TERMS AND CONDITIONS FOR PAYOUTS

ANNEX 1

ADDITIONAL TERMS AND CONDITIONS FOR PAYOUTS

*If specified as applicable in the Issue Terms, the terms and conditions applicable to payouts shall comprise the General Conditions and the additional terms and conditions for payouts set out below (the "**Payout Conditions**"), together with the terms and conditions as set out in each other Annex which is specified as applicable in the Issue Terms and subject to completion in the Issue Terms. In the event of any inconsistency between (i) the General Conditions and/or any other Annex and (ii) the Payout Conditions, the Payout Conditions shall prevail.*

1. Reference Item Linked Securities

(a) Use of Payout Conditions

These Payout Conditions set out the methodology for determining various payouts and product features in respect of the Securities. The applicable text shown in Payout Conditions 2, 3, 4 and 5 below will be extracted, included and completed indicated in the Issue Terms on the basis that (i) applicable text (including, where appropriate, section headings and terms defined in Payout Condition 5 which are required to be completed) from the relevant Payout Condition will be set out in the Issue Terms and (ii) inapplicable text (and any terms defined in Payout Condition 5 which are not required to be completed) need not be included. For Exempt Securities, the applicable text that may be extracted, included and completed in the Pricing Supplement may be shortened, condensed and simplified to make it more concise and clear and to avoid repeating text. Where the Issue Terms specify that a table may be inserted, such table may set out amounts, entities, reference entities, dates, items, rates, value levels, triggers, figures and other information which completes the definitions that appear in the relevant subparagraphs of the Issue Terms, the Terms and Conditions of the Securities and the applicable Annex(es) to the Terms and Conditions of the Securities. Notwithstanding the above, a table may be inserted in any section of the Issue Terms whether or not is so specified that a table may be inserted in such section of the Issue Terms.

(b) Use of Terms

Terms in these Payout Conditions or in the Issue Terms may be attributed a numerical or letter suffix value when included in the Issue Terms. Such suffixes are not limited to any specific set and may include letters such as "j", "k", "m", "q", "n", "t", "i", "A", "B", "C" or numbers such as "1", "2", "3" etc. as chosen at the time of an issue of Securities. The suffix assigned to a term serves to distinguish multiple instances or variations of that term, as determined at the time the Securities are issued. Suffixes may also be placed in series as necessary, such as "A(1)", "B(1)", "C(1)" etc. To enhance clarity and readability of any formula(e) or provision in the Issue Terms, the relation between a term and its suffix may be fully explained and may be presented in table format in the Issue Terms. A term in Payout Condition 5 may be included multiple times in the applicable Issue Terms, particularly if there is more than one number or letter represented by the term. Conjunctions (e.g. or, and, but) and punctuation may also be included where appropriate. Suffixes may denote that a relevant term relates to a specific asset, item, term or date associated with that suffix. Suffixes may also be applied to payouts to denote that multiple payouts or rate of interest may apply concurrently, whether on the same dates or otherwise, in respect of any Security.

The constituent parts of any formula(e) or term(s) used in these Payout Conditions, which are to be specified in the Issue Terms, may be replaced in the Issue Terms by the prescribed amount, level, or percentage, or other value or term (the "**Variable Data**"). If a Variable Data has a value of 0 (zero), 1 (one), or is otherwise not applicable to the relevant formula(e), the formula(e) may be simplified in the Issue Terms. This simplification involves removing such Variable Data to improve clarity and readability of the formula(e).

(c) Security Types

The applicable Issue Terms will specify the Interest Basis applicable in respect of a Security. Such Securities are, where the Interest Basis is: Index Linked Interest, an "**Index Linked Interest Security**"; Equity Linked Interest, an "**Equity Linked Interest Security**"; Inflation Linked Interest, an "**Inflation Linked Interest Security**"; Reference Item Rate Linked Interest, a "**Reference Item Rate Linked Interest Security**"; ETF Linked Interest, a "**ETF Linked Interest Security**"; Fund Linked Interest, a "**Fund Linked Interest Security**"; Credit Linked Interest, a "**Credit Linked Interest Security**" or "**Credit Linked Security**"; Foreign Exchange (FX) Rate Linked Interest, a "**Foreign Exchange (FX) Rate Linked Interest Security**"; EUA Contract Linked Interest, an "**EUA Contract Linked Interest Security**"; Bond Linked Interest, a "**Bond Linked Interest Security**"; Custom Index

(d) **Alternative Interest Basis**

Other than in respect of Zero Coupon Securities, Partly Paid Securities or Credit Linked Securities if it is specified in Paragraph 9 (*Interest Basis*) of the Issue Terms that 'Calculation Amount Basis will apply' to the Securities then for the purposes of any calculations of interest with respect to Securities which are represented by a Global Security pursuant to General Condition 4, the Principal Paying Agent, or if a Calculation Agent is specified in the Issuer Terms, the Calculation Agent will calculate Interest Amount payable on the Securities for the relevant Interest Period by applying the Rate of Interest to the Calculation Amount, and, in each case, multiplying such sum by the Day Count Fraction (as defined in General Condition 4(k)) or specified in the Issue Terms and rounding the resultant figure to the nearest sub-unit (defined above) of the relevant Specified Currency, one half of such a sub-unit being rounded upwards or otherwise in accordance with applicable market convention. For the avoidance of doubt, the Calculation Amount may be an amount that is different from the Specified Denomination, however, when this Calculation Amount Basis is applied, only one Calculation Amount per Specified Denomination may be specified.

"Listing Change" means, in respect of any relevant Shares, that such Shares cease (or will cease) to be listed, traded or publicly quoted on the listing compartment or the relevant market of the Exchange on which such Shares were listed, traded or publicly quoted on the Issue Date, for any reason (other than a Merger Event or Tender Offer or where this is a De-Listing).

- (i) require the Calculation Agent to determine in its sole and absolute discretion the appropriate adjustment, if any, to be made to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms to account for the relevant Extraordinary Event, and determine the effective date of that adjustment. The relevant adjustments may include, without limitation, adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Shares or to the Securities. The Calculation Agent may (but need not) determine the appropriate adjustment by reference to the adjustment in respect of the relevant Extraordinary Event made by any options exchange to options on the Shares traded on that options exchange. In addition, in relation to a Basket of Shares, the Calculation Agent may adjust the Basket of Shares in accordance with the provisions of paragraph (v) below;

ADDITIONAL TERMS AND CONDITIONS FOR EQUITY LINKED SECURITIES

- (ii) following such adjustment to the settlement terms of options on the Shares traded on such exchange(s) or quotation system(s) as the Issuer in its sole discretion shall select (the "**Options Exchange**"), require the Calculation Agent to make a corresponding adjustment to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms, which adjustment will be effective as of the date determined by the Calculation Agent to be the effective date of the corresponding adjustment made by the Options Exchange. If options on the Shares are not traded on the Options Exchange, the Calculation Agent will make such adjustment, if any, to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms as the Calculation Agent in its sole and absolute discretion determines appropriate, with reference to the rules and precedents (if any) set by the Options Exchange to account for the relevant Extraordinary Event, that in the determination of the Calculation Agent would have given rise to an adjustment by the Options Exchange if such options were so traded and if "China Connect" is specified as applicable in the relevant Issue Terms in respect of a Reference Item, in its determination of any adjustments to the terms of the Securities to account for the economic effect on the Securities of the relevant Merger Event or Tender Offer, as applicable, the Calculation Agent shall take into account any requirement, adjustment and/or limitation that may be imposed by the China Connect Service or any action or inaction by any one or more of the Exchange, SEHK, CSDCC and HKSCC in relation to such Merger Event or Tender Offer in respect of Shares held through the China Connect Service; or
- (iii) where the Calculation Agent determines that no adjustment has been proposed by the Options Exchange and that no other action will produce a commercially reasonable result, the Issuer, in its sole and absolute discretion may, on giving notice to Securityholders in accordance with General Condition 13,
 - (A) redeem all but not some only of the Securities, each Security being redeemed by payment of an amount equal to the fair market value of a Security taking into account the relevant Extraordinary Event (the "**Calculated Extraordinary Event Amount**"), less the cost to the Issuer and/or its Affiliates of unwinding any underlying related hedging arrangements (the "**Modified Calculated Extraordinary Event Amount**"), all as determined by the Calculation Agent in its sole and absolute discretion as soon as practicable following the occurrence of the relevant Extraordinary Event (the "**Calculated Extraordinary Event Amount Determination Date**"), or
 - (B) require the Calculation Agent to determine the Calculated Extraordinary Event Amount on the Calculated Extraordinary Event Amount Determination Date, and redeem each Security on the scheduled Maturity Date by payment of the Calculated Extraordinary Event Amount. For avoidance of any doubt, the Calculated Extraordinary Event Amount shall not accrue any interest from the date of its calculation to the Maturity Date.

In relation to paragraphs (A) and (B) above, notwithstanding General Condition 4(h), each Security shall cease to bear interest from and including the Calculated Index Adjustment Amount Determination Date and no interest amounts scheduled for payment thereafter (including, for the avoidance of doubt, including any Specified Interest Amounts) shall be payable.
- (iv) in the case of Equity Linked Securities relating to a Basket of Shares, redeem the Securities in part by giving notice to Securityholders in accordance with General Condition 13. If the Securities are so redeemed in part, the portion (the "**Redeemed Amount**") of each Security representing the affected Share(s) shall be redeemed and the Issuer will:
 - (A) pay to each Securityholder in respect of each Security held by him an amount equal to the fair market value of the Redeemed Amount, taking into account the relevant Extraordinary Event, less the cost to the Issuer and/or its Affiliates of unwinding any underlying related hedging arrangements, all as determined by the Calculation Agent in its sole and absolute discretion; and
 - (B) require the Calculation Agent to determine in its sole and absolute discretion the appropriate adjustment, if any, to be made to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the

ADDITIONAL TERMS AND CONDITIONS FOR EQUITY LINKED SECURITIES

Issue Terms to account for such redemption in part. For the avoidance of doubt the remaining part of each Security after such cancellation and adjustment shall remain outstanding with full force and effect. Payments will be made in such manner as shall be notified to the Securityholders in accordance with General Condition 13;

- (v) in the case of Equity Linked Securities relating to a Basket of Shares, on or after the relevant Extraordinary Event Effective Date, require the Calculation Agent to adjust the Basket of Shares to include a Share selected by it in accordance with the criteria for Share selection set out below (each, a "**Substitute Share**") for each Share (each, an "**Affected Share**") of each Basket Company (each, an "**Affected Basket Company**") which is affected by such Extraordinary Event and the Substitute Share will be deemed to be a "**Share**", and the issuer of such shares a "**Basket Company**", for the purposes of the Securities, and the Calculation Agent will make such adjustment, if any, to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these Equity Linked Conditions and/or the Issue Terms as the Calculation Agent in its sole and absolute discretion determines appropriate, provided that in the event that any amount payable under the Securities was to be determined by reference to an initial price (the "**Initial Price**") of the Affected Share, the relevant Initial Price of each Substitute Share will be determined by the Calculation Agent in accordance with the following formula:

$$\text{Initial Price} = A \times (B/C)$$

where:

"**A**" is the official closing price of the relevant Substitute Share on the relevant Exchange on the Substitution Date;

"**B**" is the Initial Price of the relevant Affected Share; and

"**C**" is the fair market value of the relevant Affected Share on the Substitution Date (which may, where available, be determined by reference to the official closing price of the Affected Share on the relevant Exchange and/or such other source(s) as the Calculation Agent determines appropriate).

Such substitution and the relevant adjustment to the Basket of Shares will be deemed to be effective as of the date selected by the Calculation Agent (the "**Substitution Date**") in its sole and absolute discretion and specified in the notice referred to below which may, but need not, be the relevant Extraordinary Event Effective Date.

The Weighting of each Substitute Share in the Basket of Shares will be equal to the Weighting of the relevant Affected Share.

In order to be selected as a Substitute Share, the relevant share must satisfy the following criteria, in the sole and absolute discretion of the Calculation Agent:

- (A) where the relevant Extraordinary Event is a Merger Event or a Tender Offer and the relevant share is not already included in the Basket of Shares, the relevant share shall be an ordinary share of the entity or person (other than the Affected Basket Company) involved in the Merger Event or the making of the Tender Offer, that is, or that as of the relevant Extraordinary Event Effective Date (i) is promptly scheduled to be, publicly quoted, traded or listed on an exchange or quotation system located in the same country as the relevant Exchange (or, where the relevant Exchange is within the European Union, in any member state of the European Union) and (ii) is not subject to any currency exchange controls, trading restrictions or other trading limitations; or
- (B) where paragraph (A) above does not apply, including in the case of an Extraordinary Event other than a Merger Event or a Tender Offer:
- (1) the issuer of the share shall, to the extent possible, belong to the same economic sector as the Affected Basket Company and shall not already be included in the Basket of Shares; and

ADDITIONAL TERMS AND CONDITIONS FOR EQUITY LINKED SECURITIES

(i) Adjustment

If the Issuer determines that the action taken in respect of the Extraordinary ETF Event is to be "**Adjustment**" then it may:

- (A) require the Calculation Agent to determine, in its sole and absolute discretion, the appropriate adjustment(s), if any, to be made to any one or more of any Relevant Asset and/or the Entitlement (in the case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these ETF Linked Conditions and/or the applicable Issue Terms to account for the relevant the Extraordinary ETF Event and determine the effective date of that adjustment. The relevant adjustments may include, without limitation, adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the ETF Shares or to the Securities. The Calculation Agent may (but need not) determine the appropriate adjustment by reference to the adjustment in respect of the relevant Extraordinary ETF Event made by any options exchange to options on the ETF Shares traded on that options exchange; or

If the Issuer determines that the action to be taken in respect of the Extraordinary ETF Event is to be "**Substitution**", the Calculation shall on or after the occurrence of any Extraordinary ETF Event, substitute each ETF Share (each an "**Affected ETF Share**") of each ETF (each, an "**Affected ETF**") which is affected by such Extraordinary ETF Event with an ETF Share selected by it in accordance with the criteria for ETF Share selection set out below (each a "**Substitute ETF Share**") and the Substitute ETF Share will be deemed to be an "**ETF Share**" and the relevant issuer of such Substitute ETF Share, an "**ETF**" for the purposes of the Securities, and the Calculation Agent will make such adjustment, if any, to any one or more of any Relevant Asset and/or the Entitlement (in each case where the Securities are Physical Delivery Securities) and/or the Weighting and/or any of the other terms of the General Conditions, these ETF Linked Conditions and/or the Issue Terms as the Calculation Agent in its sole and absolute discretion determines appropriate, provided that in the event that any amount payable under the Securities was to be determined by reference to an initial price (the "**Initial Price**") of the Affected ETF Share, the relevant Initial Price of each Substitute ETF Share will be determined by the Calculation Agent in accordance with the following formula:

 - (C) if no alternative traded instrument can be determined pursuant to the preceding sub-paragraph (B) above, use reasonable endeavours to substitute the relevant ETF with an index (or a fund tracking an index) selected by the Calculation Agent in its sole and absolute discretion; and

1. Delay in Publication

If the Calculation Agent determines that any Relevant Level for a Reference Month which is relevant to the calculation of any payment under the Securities and/or any other determination in respect of the Securities has not been published or announced by the relevant Determination Date, the Calculation Agent shall determine an alternative level in place of such Relevant Level (a **Substitute Inflation Index Level**), as follows:

- (a) if Related Bond is specified as applicable in the applicable Issue Terms, the Calculation Agent shall take the same action to determine the Substitute Inflation Index Level for the affected Reference Month or date for determination, as applicable, as that taken by the relevant calculation agent pursuant to the terms and conditions of the Related Bond; or
- (b) if (i) Related Bond is specified as not applicable in the applicable Issue Terms, or (ii) the Calculation Agent is not able to determine a Substitute Inflation Index Level for the relevant Reference Month under paragraph (a) above for any reason, then the Calculation Agent shall determine the Substitute Inflation Index Level in accordance with the following formula:

$$\text{Substitute Inflation Index Level} = \text{Base Level} \times (\text{Latest Level}/\text{Reference Level}),$$

where:

"Base Level" means the level of the Index (excluding any "flash" or other estimates) published or announced by the Index Sponsor in respect of the month which is 12 calendar months prior to the Reference Month for which the Substitute Inflation Index Level is being determined.

2. Cessation of Publication

If the Calculation Agent determines that either (i) a level of an Index has not been published or announced by the Index Sponsor for two consecutive months and/or (ii) the Index Sponsor announces that it will no longer continue to publish or announce the Index and/or (iii) the Index Sponsor cancels the Index, then the Calculation Agent may replace such Index with a successor index (a "**Successor Index**") (in lieu of any previously applicable Index) for the purposes of the Securities by using the following methodology:

- (a) If "Related Bond" is specified as applicable in the Issue Terms and if a successor index has been designated at any time by the calculation agent under the related Related Bond pursuant to the terms and conditions of such Related Bond, the Calculation Agent may designate such successor index to be a "Successor Index" for all subsequent Determination Dates notwithstanding that any other Successor Index may previously have been determined under sub-paragraph (b) or (c) below ;
- (b) If (x) "Related Bond" is specified as not applicable in the Issue Terms or if (y) there is no Related Bond at such time, and in each case and a notice has been given or an announcement has been made by the Index Sponsor specifying that such Index will be superseded by a replacement inflation index specified by the relevant Index Sponsor, and the Calculation Agent determines that such replacement index is calculated using the same or a substantially similar formula or method of calculation as used in the calculation of the previously applicable Index, such replacement index shall be deemed the Successor Index for the purposes of the Securities from the date that such replacement Index comes into effect;
- (c) If no Successor Index has been determined pursuant to paragraph (a) or (b), by such Determination Date, the Calculation Agent will determine an appropriate alternative index for such Determination Date and such index will be deemed a Successor Index for the purposes of the Securities.

If a Successor Index is determined in accordance with the provisions set out above, the Calculation Agent may make such adjustment(s) to the Conditions as the Calculation Agent determines necessary or appropriate to account for the effect of such replacement in order to preserve the original economic rationale and objectives of the Securities and determine the effective date(s) of the adjustment(s) to the Securities. The Calculation Agent shall determine the date on which the Successor Index shall be deemed to replace the Index for the purposes of the Securities. Notice of the determination of a Successor Index, the effective date of the Successor Index and any other adjustment(s) to the Conditions as the Calculation Agent determines necessary or appropriate will be given to Securityholders by the Issuer in accordance with General Condition 13.

If the Calculation Agent cannot determine an appropriate alternative index pursuant to the above, the Calculation Agent may make any adjustments to any relevant level and/or any other relevant term of the Securities (including, without limitation, any amount payable under the Securities to account therefore) or may alternatively redeem each Security on the date notified by the Issuer to Securityholders in accordance with General Condition 13 at its fair market value (as determined by the Calculation Agent) as at the date of redemption, taking into account the cessation of publication of the index and the prevailing market circumstances at such time, less the cost to the Issuer and/or any Affiliates of unwinding or amending any related underlying hedging arrangements. Notice of any redemption of the Securities pursuant to this paragraph 2 shall be given to Securityholders in accordance with General Condition 13.

3. Rebasing

If the Calculation Agent determines that the Index has been or will be rebased at any time, then the Index as so rebased (the "**Rebased Index**") will be used for the purposes of determining the Relevant Level from the date of such rebasing, provided, however, that (i) the Calculation Agent may make such adjustments as are made by the calculation agent pursuant to the terms and conditions of the Related Bond (if "Related Bond" is specified as applicable in the applicable Issuer Terms and there is a "Related Bond" at such time), to the levels of the Rebased Index so that the levels of the Rebased Index reflect the same rate of inflation as before it was rebased or (ii) if "Related Bond" is not specified as applicable in the applicable Issue Terms or there is no Related Bond at such time, the Calculation Agent may make adjustments to the levels of the Rebased Index so that the levels of the Rebased Index reflect the same rate of inflation as the Index before it was rebased and in each case the Calculation Agent may make any adjustment(s) to any amount payable under the Securities and/or any other term of the Securities as the Calculation Agent may deem necessary. Any such rebasing shall not affect any prior payments under the Securities.

ADDITIONAL TERMS AND CONDITIONS FOR INFLATION LINKED SECURITIES

If the Calculation Agent determines that rebasing in accordance with the above would not produce a commercially reasonable result, the Issuer may redeem each Security on a date notified to Securityholders in accordance with General Condition 13 at its fair market value, as determined by the Calculation Agent as at the date of redemption taking into account the rebasing less the cost to the Issuer and/or its Affiliates of unwinding or amending any related underlying hedging arrangements. Notice of any adjustment, redemption of the Securities or determination pursuant to this paragraph 3 shall be given to Securityholders in accordance with General Condition 13.

4. Material Modification

The Issuer shall give notice to the Securityholders of any such adjustment in accordance with General Condition 13.

5. Revision

If "Revision" is specified as applicable for an Index in the applicable Issue Terms, then the first publication and announcement of the Relevant Level of such Index (disregarding "flash" or any other estimates), or any revision to such Relevant Level made no later than the relevant Determination Date, shall be final and conclusive. If "No Revision" is specified as applicable for an Index in the applicable Issue Terms, then the first publication and announcement of a Relevant Level of such Index (disregarding "flash" or any other estimates) shall be final and conclusive, and any later revision to such Relevant Level will not be used in any calculation.

If neither "Revision" nor "No Revision" is elected in the applicable Issue Terms, then "No Revision" shall be deemed to apply.

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

1. Redemption of Credit Linked Securities

- (a) Unless previously redeemed or purchased and cancelled and provided that a Credit Event Determination Date has not occurred in respect of any Reference Entity and, in the case of Leveraged Single Reference Entity Credit Linked Securities, no Trigger Event Notice has been delivered, the Issuer shall redeem each Credit Linked Security on the Maturity Date by payment of the Final Redemption Amount. If a Credit Event Determination Date has occurred in respect of any Reference Entity, provided, in the case of Leveraged Single Reference Entity Credit Linked Securities, that no Trigger Event Notice has been delivered, the Issuer shall redeem each Credit Linked Security as described below. If a Trigger Event Notice has been delivered in the case of Leveraged Single Reference Entity Credit Linked Securities, the Issuer shall redeem each Credit Linked Security as described in Credit Linked Condition 12 below. References in these Credit Linked Conditions to a Credit Linked Security or a Security are, unless the context otherwise requires, to a nominal amount of Credit Linked Securities equal to the Calculation Amount. Any payment of a "pro rata" amount in respect of a Security will be determined by reference to its nominal amount relative to the then Nominal Amount of the Securities.
- (b) Where the Securities are Single Reference Entity Credit Linked Securities, if a Credit Event Determination Date has occurred in relation to the Reference Entity, then the Securities will be settled in accordance with Credit Linked Condition 2, Credit Linked Condition 3 or Credit Linked Condition 4, as applicable or, if the Securities are Zero/Set Recovery Securities, the provisions of paragraph (h) below will apply.
- (c) Where the Securities are First-to-Default Credit Linked Securities, if a Credit Event Determination Date has occurred in relation to any of the specified Reference Entities, then the Securities will be settled in accordance with Credit Linked Condition 2, Credit Linked Condition 3 or Credit Linked Condition 4, as applicable, in relation only to the First Reference Entity (as defined in the definition of Credit Event Determination Date) or, if the Securities are Zero/Set Recovery Securities, the provisions of paragraph (h) below will apply.
- (d) Where the Securities are Nth-to-Default Credit Linked Securities, if a Credit Event Determination Date has occurred in relation to one or more of the specified Reference Entities, notwithstanding any provision to the contrary in these Credit Linked Conditions, no settlement in accordance with Credit Linked Condition 2, Credit Linked Condition 3 or Credit Linked Condition 4, as applicable, will occur until such time as a Credit Event Determination Date has occurred in respect of the Relevant Number of Reference Entities (a "**Trigger**"). The Reference Entity in respect of which a Credit Event Determination Date has occurred which causes the Trigger to occur is referred to as the "**Triggering Reference Entity**" and the Relevant Number is the number specified as such in the Issue Terms. As of the day on which the Calculation Agent determines that a Credit Event Determination Date has occurred in respect of the Relevant Number of References Entities then (i) Credit Linked Condition 2, Credit Linked Condition 3 or Credit Linked Condition 4, as applicable, shall apply in relation only to the Triggering Reference Entity or (ii) if the Securities are Zero/Set Recovery Securities, the provisions of paragraph (h) below will apply.
- (e) Where the Securities are Non-Tranched Linear Basket Credit Linked Securities or Non-Tranched Index Credit Linked Securities to which Credit Payment on Maturity applies, Tranched Linear Basket Credit Linked Securities, Tranched Index Credit Linked Securities, Basket Tranched Index Credit Linked Securities or Long/Short Credit Linked Securities, if a Credit Event Determination Date has occurred in respect of any specified Reference Entity, then, each Credit Linked Security, shall be redeemed at the Credit Event Redemption Amount on the Credit Event Redemption Date, subject as provided in paragraph (i) below.

For the avoidance of doubt, this paragraph (e) will apply in relation to each Reference Entity in respect of which a Credit Event Determination Date has occurred.

In respect of Basket Tranched Index Credit Linked Securities and where the relevant Attachment Point is not exceeded by the relevant Aggregate Loss Percentage following the occurrence of any Credit Event Determination

Date in respect of each of the Basket Trunched Index Components, then the Credit Event Redemption Amount will be par.

Prior to each date on which a payment is due on the Credit Linked Securities, the Issuer shall procure that Securityholders are notified in accordance with General Condition 13 of each Credit Event that has occurred since the previous payment date, provided that any delay or failure in the delivery of a such notice shall not affect the validity of any Credit Event Determination Date.

- (f) Where the Securities are Non-Trunched Linear Basket Credit Linked Securities or Non-Trunched Index Credit Linked Securities to which Credit Payment As You Go applies, if a Credit Event Determination Date has occurred in respect of any specified Reference Entity: (i) the Issuer shall give notice in each case that a Credit Event Determination Date has occurred (such notice a "**Settlement Notice**") to the Securityholders in accordance with General Condition 13 and (ii) in respect of each Credit Linked Security:

For the avoidance of doubt part (i) of this provision will apply and part (ii) of this provision will apply in relation to each Reference Entity in respect of which a Credit Event Determination Date has occurred.

Any delay in the delivery of a Settlement Notice or failure by the Issuer to deliver a Settlement Notice shall not affect the validity of the Credit Event Determination Date in respect of the affected Reference Entity.

- (g) Where only a part of an issuance of Securities is credit linked (which will be the case where the Credit Multiplier is less than 1), references in these Credit Linked Conditions to the "Scheduled Maturity Date" shall be references to the Scheduled Maturity Date of the credit linked part of the Securities only and notwithstanding any other provision of the Conditions, the Maturity Date of the Securities shall be the later of the Maturity Date determined in accordance with these Credit Linked Conditions, and the final Instalment Date specified in the Issue Terms.
- (h) Where the Securities are Zero/Set Recovery Securities then if a Credit Event Determination Date has occurred in respect of any Reference Entity (in the case of Single Reference Entity Credit Linked Securities, Linear Basket Credit Linked Securities, Index Credit Linked Securities, First-to-Default Credit Linked Securities or Long/Short Credit Linked Securities) or in respect of the Triggering Reference Entity (in the case of Nth-to-Default Credit Linked Securities) then following a Credit Event Determination Date in respect of any such Reference Entity the provisions of Credit Linked Conditions 2, 3 or 4 will not apply but (i) each Single Reference Entity Credit Linked Security, First-to-Default Credit Linked Security and Nth-to-Default Credit Linked Security will be redeemed by payment of the Credit Event Redemption Amount, if any, on the Credit Event Redemption Date together with accrued interest, if any, and (ii) each Linear Basket Credit Linked Security, Index Credit Linked Security or Long/Short Credit Linked Security may be redeemed (or otherwise) as provided in paragraph (e) or (f) above, as applicable and/or paragraph (i) below, if applicable.
- (i) Where any Credit Event Redemption Amount is zero (whether the Securities are Zero/Set Recovery Securities or otherwise) then, other than for the payment of any accrued interest or any other due but unpaid amounts or any interest amount not subject to the Credit Linked Conditions, the Securities will be cancelled as of the Credit Event Redemption Date or, if earlier, the day on which it is determined that the Credit Event Redemption Amount is or would be, were it to be so calculated in respect of such day, zero with no payment being due other than any final amount of accrued interest or any other due but unpaid amounts. The Issuer will have no further obligations in respect of the Credit Linked Securities.
- (j) For the avoidance of doubt, the aggregate outstanding nominal amount in respect of Zero Coupon Securities is equal to 100 per cent. of their face amount.

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

- (k) For the avoidance of doubt the provisions of Credit Linked Conditions 6, 7, 8, 9 and 10 may each apply to First-to-Default Credit Linked Securities and Nth-to-Default Credit Linked Securities meaning that subject to paragraph (g) above, the Maturity Date may be delayed beyond the Scheduled Maturity Date in certain circumstances.
- (l) If any purchase and cancellation of Securities occurs under General Condition 6(g) or any further issue under General Condition 12, the Calculation Agent will make such adjustments to the applicable Issue Terms and/or these Credit Linked Conditions as it determines appropriate (including Reference Entity Notional Amounts) to ensure the Securities continue to reflect economic intentions.
- (m) Where the Securities are Leveraged Single Reference Entity Credit Linked Securities, if a Trigger Event Notice is delivered then the Securities will be settled in accordance with Credit Linked Condition 13.
- (n) Where the Securities are Combination Credit Linked Securities and "Credit Linked Redemption" is applicable with respect to a specified Credit Component, this Credit Linked Condition 1 shall apply and amounts payable by way of redemption shall be calculated by reference to such specified Credit Component only based on the type of Credit Linked Note or Certificate and the terms set out in respect of such Credit Component in the applicable Issue Terms and all provisions of this Credit Linked Condition and the other Credit Linked Conditions shall apply to the extent relevant for Credit Linked Redemption.

2. Auction Settlement

- (a) Where Auction Settlement is specified as the applicable Settlement Method in the Issue Terms and a Credit Event Determination Date occurs on or prior to the Auction Final Price Determination Date, the Issuer shall give notice (such notice an "**Auction Settlement Notice**") to the Securityholders in accordance with General Condition 13, and redeem all but not some only of the Credit Linked Securities, each Credit Linked Security being redeemed by the Issuer at the Credit Event Redemption Amount in the relevant Credit Linked Specified Currency on the Credit Event Redemption Date.
- (b) Unless settlement has occurred in accordance with paragraph (a) above, if:
 - (i) an Auction Cancellation Date occurs;
 - (ii) a No Auction Announcement Date occurs (and in circumstances where such No Auction Announcement Date occurs pursuant to paragraph (b) or (c)(ii) of the definition of No Auction Announcement Date, the Issuer has not exercised the Movement Option);
 - (iii) a DC Credit Event Question Dismissal occurs; or
 - (iv) a Credit Event Determination Date was determined pursuant to paragraph (a)(i) of the definition of Credit Event Determination Date or paragraph (a) of the definition of Non-Standard Credit Event Determination Date and no Credit Event Resolution Request Date has occurred in respect of the relevant Credit Event on or prior to the date falling three Business Days after such Credit Event Determination Date,then:
 - (x) if Fallback Settlement Method – Cash Settlement is specified as applicable in the Issue Terms, the Issuer shall redeem the Credit Linked Securities in accordance with Credit Linked Condition 3 below; or
 - (y) if Fallback Settlement Method – Physical Delivery is specified as applicable in the Issue Terms, the Issuer shall redeem the Credit Linked Securities in accordance with Credit Linked Condition 4 below.

If a Credit Event Determination Date has occurred and the Securities become redeemable in accordance with this Credit Linked Condition 2, upon payment of the Credit Event Redemption Amounts in respect of the Securities, the Issuer shall have discharged its obligations in respect of the Securities and shall have no other liability or obligation whatsoever in respect thereof. The Credit Event Redemption Amount may be less than the nominal amount of a Credit Linked Security. Any shortfall shall be borne by the Securityholders and no liability shall attach to the Issuer or the Guarantor. For the avoidance of doubt, following redemption of a

portion of the Securities in accordance with the foregoing, the Issuer may still have payment obligations in respect of any outstanding portion of the Securities.

3. Cash Settlement

If a Credit Event Determination Date has occurred, then where Cash Settlement is specified as the applicable Settlement Method in the Issue Terms or if Credit Linked Condition 2(b)(iv)(x) above applies, the Issuer shall give notice (such notice a "**Cash Settlement Notice**") to the Securityholders in accordance with General Condition 13, and redeem all but not some only of the Credit Linked Securities, each Credit Linked Security being redeemed by the Issuer at the Credit Event Redemption Amount in the relevant Credit Linked Specified Currency on the Credit Event Redemption Date.

If Cash Settlement applies and "Mod R" is specified as applicable in the Issue Terms (whether by application of the Physical Settlement Matrix or otherwise) and/or the applicable Issue Terms identify a Transaction Type that is included in the Physical Settlement Matrix for which "Mod R" is specified as applicable in the Physical Settlement Matrix and Restructuring is the only Credit Event specified in a Credit Event Notice, then, unless the Valuation Obligation is a Prior Deliverable Obligation and Asset Package Delivery applies due to a Governmental Intervention, a Valuation Obligation may be included in the Valuation Obligations Portfolio only if it (i) is a Fully Transferable Obligation and (ii) has a final maturity date not later than the applicable Restructuring Maturity Limitation Date in each case as of each such date as the Calculation Agent determines relevant for purposes of the Hedging Arrangements.

If Cash Settlement applies and "Mod Mod R" is specified as applicable in the Issue Terms (whether by application of the Physical Settlement Matrix or otherwise) and/or the applicable Issue Terms identify a Transaction Type that is included in the Physical Settlement Matrix for which "Mod Mod R" is specified as applicable in the Physical Settlement Matrix and Restructuring is the only Credit Event specified in a Credit Event Notice, then unless the Valuation Obligation is a Prior Deliverable Obligation and Asset Package Delivery applies due to a Governmental Intervention, a Valuation Obligation may be included in the Valuation Obligations Portfolio only if it (i) is a Conditionally Transferable Obligation and (ii) has a final maturity date not later than the applicable Modified Restructuring Maturity Limitation Date, in each case, as of each such date as the Calculation Agent determines relevant for purposes of the Hedging Arrangements. For the purposes of this paragraph only and notwithstanding the foregoing, in the case of a Restructured Bond or Loan with a final maturity date on or prior to the 10-year Limitation Date, the final maturity date of such Bond or Loan shall be deemed to be the earlier of such final maturity date or the final maturity date of such Bond or Loan immediately prior to the relevant Restructuring.

If a Credit Event Determination Date has occurred and the Securities become redeemable in accordance with this Credit Linked Condition 3, upon payment of the Credit Event Redemption Amounts in respect of the Securities, the Issuer shall have discharged its obligations in respect of the Securities and shall have no other liability or obligation whatsoever in respect thereof. The Credit Event Redemption Amount may be less than the nominal amount of a Credit Linked Security. Any shortfall shall be borne by the Securityholders and no liability shall attach to the Issuer or the Guarantor. For the avoidance of doubt, following redemption of a portion of the Securities in accordance with the foregoing, the Issuer may still have payment obligations in respect of any outstanding portion of the Securities.

4. Physical Settlement

If a Credit Event Determination Date has occurred, then where Physical Delivery is specified as the applicable Settlement Method in the Issue Terms or if Credit Linked Condition 2(b)(iv)(y) above applies, then, subject to any prior redemption, the Issuer shall, following the receipt of a Calculation Agent Physical Settlement Notice, give notice (such notice a "**Notice of Physical Settlement**") to the Securityholders in accordance with General Condition 13 redeem all but not some only of the Credit Linked Securities, each Credit Linked Security being redeemed by the Issuer by the Delivery of the Deliverable Obligations comprising the Entitlement on the Credit Settlement Date, subject to and in accordance with the General Conditions and these Credit Linked Conditions. Where Asset Package Delivery applies, the provisions of the second paragraph of the definition of "Deliver" shall apply and the Calculation Agent may make any adjustment in relation to provisions for physical delivery and determination of the Entitlement to take account of the relevant Asset Package.

In the Notice of Physical Settlement, the Issuer shall specify the Deliverable Obligations comprising the Entitlement that it reasonably expects to Deliver. For the avoidance of doubt, the Issuer shall be entitled to select any of the Deliverable Obligations to constitute the Entitlement, irrespective of their market value. The Notice of

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

Physical Settlement shall include (i) details of the relevant Reference Entity, (ii) the Outstanding Principal Balance or Due and Payable Amount, as applicable, or the equivalent amount in the Settlement Currency (in each case the relevant "**Outstanding Amount**") and, if different, the face amount, of each such Deliverable Obligation. The aggregate Outstanding Amount of all Deliverable Obligations specified in the Notice of Physical Settlement that the Issuer intends to Deliver shall be the relevant "**Aggregate Outstanding Amount**".

The Issuer may, from time to time, amend a Notice of Physical Settlement by delivering a notice to Securityholders in accordance with General Condition 13, (each such notification, a "**Physical Settlement Amendment Notice**") that the Issuer is replacing, in whole or in part, one or more Deliverable Obligations specified in the Notice of Physical Settlement or a prior Physical Settlement Amendment Notice, as applicable, (to the extent the relevant Deliverable Obligation has not been Delivered as of the date such Physical Settlement Amendment Notice is effective). A Physical Settlement Amendment Notice shall specify each replacement Deliverable Obligation that the Issuer will Deliver (each, a "**Replacement Deliverable Obligation**") and shall also specify the Outstanding Amount of each Deliverable Obligation identified in the Notice of Physical Settlement or a prior Physical Settlement Amendment Notice, as applicable, that is being replaced (with respect to each such Deliverable Obligation, the "**Replaced Deliverable Obligation Outstanding Amount**"). The Outstanding Amount of each Replacement Deliverable Obligation identified in the Physical Settlement Amendment Notice shall be determined by applying the Revised Currency Rate to the relevant Replaced Deliverable Obligation Outstanding Amount. The Outstanding Amount of the Replacement Deliverable Obligation(s) specified in any Physical Settlement Amendment Notice in aggregate with the Outstanding Amount of the Deliverable Obligation(s) specified in the Notice of Physical Settlement or any earlier Physical Settlement Amendment Notice which, in each case, are not being replaced must not be greater than the Aggregate Outstanding Amount. Each such Physical Settlement Amendment Notice must be effective on or prior to the Credit Settlement Date (determined without reference to any change resulting from such Physical Settlement Amendment Notice). Notwithstanding the foregoing, (i) the Issuer may correct any errors or inconsistencies contained in the Notice of Physical Settlement or any Physical Settlement Amendment Notice, as applicable, by notice to Securityholders in accordance with General Condition 13, prior to the relevant Delivery Date; and (ii) if Asset Package Delivery is applicable, the Issuer shall on the PSN Effective Date, or as soon as reasonably practicable thereafter (but in any case, prior to the Delivery Date), notify the Securityholders (in accordance with General Condition 13) of the detailed description of the Asset Package, if any, that the Issuer will Deliver in lieu of the Prior Deliverable Obligation or Package Observable Bond, if any, specified in the Notice of Physical Settlement or Physical Settlement Amendment Notice, as applicable, it being understood in each case that any such notice of correction shall not constitute a Physical Settlement Amendment Notice.

If Physical Settlement applies and "Mod R" is specified as applicable in the Issue Terms (whether by application of the Physical Settlement Matrix or otherwise) and/or the applicable Issue Terms identify a Transaction Type that is included in the Physical Settlement Matrix for which "Mod R" is specified as applicable in the Physical Settlement Matrix and Restructuring is the only Credit Event specified in a Credit Event Notice, then, unless the Deliverable Obligation is a Prior Deliverable Obligation and Asset Package Delivery applies due to a Governmental Intervention, a Deliverable Obligation may be included in the Entitlement only if it (i) is a Fully Transferable Obligation and (ii) has a final maturity date not later than the applicable Restructuring Maturity Limitation Date in each case as of each such date as the Calculation Agent determines relevant for purposes of the Hedging Arrangements.

If Physical Settlement applies and "Mod Mod R" is specified as applicable in the Issue Terms (whether by application of the Physical Settlement Matrix or otherwise) and/or the applicable Issue Terms identify a Transaction Type that is included in the Physical Settlement Matrix for which "Mod Mod R" is specified as applicable in the Physical Settlement Matrix and Restructuring is the only Credit Event specified in a Credit Event Notice, then unless the Deliverable Obligation is a Prior Deliverable Obligation and Asset Package Delivery applies due to a Governmental Intervention, a Deliverable Obligation may be included in the Entitlement only if it (i) is a Conditionally Transferable Obligation and (ii) has a final maturity date not later than the applicable Modified Restructuring Maturity Limitation Date, in each case, as of each such date as the Calculation Agent determines relevant for purposes of the Hedging Arrangements. For the purposes of this paragraph only and notwithstanding the foregoing, in the case of a Restructured Bond or Loan with a final maturity date on or prior to the 10-year Limitation Date, the final maturity date of such Bond or Loan shall be deemed to be the earlier of such final maturity date or the final maturity date of such Bond or Loan immediately prior to the relevant Restructuring.

If a Credit Event Determination Date has occurred and the Securities become redeemable in accordance with this Credit Linked Condition 4, upon Delivery of the Deliverable Obligations and/or payment of the Partial

Cash Settlement Amounts, as the case may be, the Issuer shall have discharged its obligations in respect of the Securities and shall have no other liability or obligation whatsoever in respect thereof. The value of such Deliverable Obligations and/or the Partial Cash Settlement Amount, as the case may be, may be less than the nominal amount of a Credit Linked Security. Any shortfall shall be borne by the Securityholders and no liability shall attach to the Issuer or the Guarantor. For the avoidance of doubt, following redemption of a portion of the Securities in accordance with the foregoing, the Issuer may still have payment obligations in respect of any outstanding portion of the Securities.

If all or a portion of the Obligations comprising the Entitlement are Undeliverable Obligations and/or Hedge Disruption Obligations, the Issuer shall give notice (a "**Partial Cash Settlement Notice**") to the Securityholders in accordance with General Condition 13 and the Issuer shall pay in respect of each Undeliverable Obligation and/or Hedge Disruption Obligation, as the case may be, the Partial Cash Settlement Amount on the Partial Cash Settlement Date.

ADDITIONAL TERMS AND CONDITIONS FOR CREDIT LINKED SECURITIES

to be appropriate to reflect that the Reference Entity has been succeeded by more than one Successor (which amendments may, for the avoidance of doubt, include in the case of Tranching Linear Basket Credit Linked Securities, such adjustments as the Calculation Agent determines appropriate to the numbers of Reference Entities specified as "H" and "L", having regard to any adjustments made to the notional portfolio to which the Securities relate) and shall determine the effective date of that adjustment. The Calculation Agent shall be deemed to be acting in a commercially reasonable manner if it adjusts such of these Terms and Conditions and/or the Issue Terms in such a manner as to reflect the adjustment to and/or division of any credit derivative transaction(s) related to or underlying the Credit Linked Securities under the provisions of the 2014 ISDA Credit Derivatives Definitions.

Where pursuant to the provisions above or paragraph (b) of the definition of Reference Entity one or more Reference Entities (each an **"Affected Reference Entity"**) and/or the Issuer would, but for this provision, be identified as a Successor to another Reference Entity pursuant to the above provisions but no other entities (that are not Reference Entities or the Issuer) are identified as a Successor in respect of the relevant succession, each Affected Reference Entity and/or the Issuer, as applicable, shall not be regarded as a "Successor" for the purposes of the Securities and, in respect of each Affected Reference Entity or the Issuer, as applicable, the Calculation Agent shall use reasonable endeavours to (a) select an Alternative Reference Entity to be the Successor in respect of the relevant succession and (b) select an Alternative Reference Obligation to be the Reference Obligation in respect of such Alternative Reference Entity after the relevant succession and the Calculation Agent may make such adjustments to the Conditions and/or the Issue Terms as it determines to be necessary or desirable to reflect such Alternative Reference Entity and Alternative Reference Obligation. If the Calculation Agent is unable to select an Alternative Reference Entity or an Alternative Reference Obligation, then: (i) no Successor shall be appointed; (ii) the Affected Reference Entity to which the relevant succession

relates shall be deemed to have ceased to be a Reference Entity; (iii) that portion of any interest payable which is referable to the purchase of credit protection purchased by the Issuer under the Securities in respect of the Affected Reference Entity shall be reduced accordingly as determined by the Calculation Agent in its sole and absolute discretion; and (iv) the Calculation Agent may make such adjustments to the Conditions and/or the Issue Terms to account for the Successor Associated Costs, which may include, without limitation, reducing the Final Redemption Amount, Credit Event Redemption Amount or the Entitlement (as the case may be) by an amount equal to the Successor Associated Costs, in each case with effect from the date determined by the Calculation Agent to be the relevant Succession Date.

1. Disrupted Day

The Calculation Agent shall give notice as soon as practicable to the Issuer and the Issuer shall give notice as soon as practicable to the Principal Paying Agent and the Securityholders in accordance with General Condition 13 of the occurrence of a Disrupted Day on any day that, but for the occurrence of a Disrupted Day, would have been a Settlement Level Date.

2. Adjustments to a Custom Index

If a relevant Custom Index is (i) not calculated and announced by the Index Sponsor but is calculated and announced by a successor sponsor (the "**Successor Index Sponsor**") acceptable to the Calculation Agent, or (ii) replaced by a successor custom index using, in the determination of the Calculation Agent, the same or a substantially similar formula for and method of calculation as used in the calculation of that Custom Index, then in each case that custom index (the "**Successor Custom Index**") will be deemed to be the Custom Index.

(b) Modification and Cessation of Calculation of a Custom Index and Custom Index Disruption Event

If (i) on or prior to the last Settlement Level Date, the relevant Index Sponsor makes or announces that it will make a material change in the formula for, or the method of, calculating a relevant Custom Index or in any other way materially modifies that Custom Index (other than a modification prescribed in that formula or method to maintain that Custom Index in the event of changes in constituent component(s) and capitalisation, contracts or commodities and other routine events) (a "**Custom Index Modification**"), or permanently cancels a relevant Custom Index and no Successor Custom Index exists (a "**Custom Index Cancellation**"), or (ii) on a Settlement Level Date, the Index Sponsor or (if applicable) the Successor Index Sponsor fails to calculate and announce a relevant Custom Index or it is not a Custom Index Business Day (a "**Custom Index Disruption Event**" and, together with a Custom Index Modification and a Custom Index Cancellation, each a "**Custom Index Adjustment Event**"), then:

- (iii) where the Calculation Agent determines that no other action will produce a commercially reasonable result, the Issuer, in its sole and absolute discretion may, on giving notice to Securityholders in accordance with General Condition 13, redeem all but not some only of the Securities, each Security being redeemed by payment of an amount equal to the fair market value of a Security, taking into account

3. Correction of Custom Index

If the relevant level of the Custom Index made available on a given day which is used or to be used by the Calculation Agent to make any determination under the Securities is subsequently corrected and the correction is made available by the relevant Index Sponsor or (if applicable) the relevant Successor Index Sponsor within the Custom Index Correction Period, the level to be used shall be the level of the Custom Index as so corrected; provided that any corrections made available after the day which is three Custom Index Business Days prior to a due date for payment under the Securities calculated by reference to the level of the Custom Index will be disregarded by the Calculation Agent for the purposes of determining the relevant amount to be paid.

- (i) require the Calculation Agent to determine in its sole and absolute discretion the appropriate adjustment, if any, to be made to the Weighting and/or any of the other terms of the General Conditions, these Custom Index Linked Conditions and/or the Issue Terms to account for the Additional Disruption Event and determine the effective date of that adjustment; or
- (ii) redeem the Securities by giving notice to Securityholders in accordance with General Condition 13. If the Securities are so redeemed the Issuer will pay an amount to each Securityholder in respect of each Security held by him which amount shall be the fair market value of a Security, taking into account the Additional Disruption Event less the cost to the Issuer and/or its Affiliates of unwinding any underlying related hedging arrangements (the "**Calculated Additional Adjustment Amount**"), all as determined by the Calculation Agent in its sole and absolute discretion. FORM OF SECURITIES

FORM OF SECURITIES

The Securities of each Series will be in either bearer form, with or without interest coupons attached, or registered form, without interest coupons attached. Bearer Securities will be issued outside the United States in reliance on Regulation S. 3(a)(2) Notes will be issued only as Registered Securities. Registered Securities (other than 3(a)(2) Notes) will be issued both outside the United States in reliance on the exemption from registration provided by Regulation S and within the United States in reliance on Rule 144A, and such Registered Securities in definitive form may be sold, in the case of Securities issued by BBVA Global Markets B.V., to Institutional Accredited Investors who are also QPs and, in the case of Securities issued by BBVA Global Securities B.V., to Institutional Accredited Investors and, in either case, to non-US persons. Registered Securities issued by BBVA Global Securities B.V. may be issued as 3(a)(2) Notes. In this Base Prospectus, Bearer Securities and Registered Securities are collectively referred to as "**Certificated Securities**".

Bearer Securities

Each Tranche of Bearer Securities will be initially issued in the form of a temporary bearer global security (a "**Temporary Bearer Global Security**") or a permanent global security (a "**Permanent Bearer Global Security**") as indicated in the Issue Terms, which, in either case, will (i) if the Global Securities are intended to be issued in new global security ("NGS") form, as stated in the Issue Terms, be delivered on or prior to the original issue date of the Tranche to a common safekeeper for Euroclear and Clearstream, Luxembourg; or (ii) if the Global Securities are not intended to be issued in NGS form, as stated in the Issue Terms, be delivered on or prior to the original issue date of the Tranche to a common depositary for Euroclear and Clearstream, Luxembourg.

Where the Global Securities issued in respect of any Tranche are in NGS form, the applicable Issue Terms will also indicate whether such Global Securities are intended to be held in a manner which would allow Eurosystem eligibility. Any indication that the Global Securities are to be so held means that the Securities of a particular Tranche are intended upon issue to be deposited with one of the ICSDs as common safekeeper and does not necessarily mean that the Securities of the relevant Tranche will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any time during their life as such recognition depends upon satisfaction of the Eurosystem eligibility criteria. The common safekeeper for NGSs will either be Euroclear or Clearstream, Luxembourg or another entity approved by Euroclear and Clearstream, Luxembourg, as indicated in the applicable Issue Terms.

Whilst any Bearer Security is represented by a Temporary Bearer Global Security, payments of principal, interest (if any) and any other amount payable in respect of the Securities due prior to the Exchange Date (as defined below) will be made (against presentation of the Temporary Bearer Global Security if the Temporary Bearer Global Security is not intended to be issued in NGS form) only to the extent that certification of non-U.S. beneficial ownership, as required by U.S. Treasury regulations, has been received by Euroclear and/or Clearstream, Luxembourg, as applicable, has given a like certification (based on the certifications it has received) to the Principal Paying Agent.

On and after the date (the "**Exchange Date**") which is 40 days after a Temporary Bearer Global Security is issued, interests in such Temporary Bearer Global Security will be exchangeable (free of charge) upon a request as described therein either for (i) interests in a Permanent Bearer Global Security of the same Series or (ii) for definitive Bearer Securities of the same Series with, where applicable, coupons and talons attached (as indicated in the Issue Terms and subject, in the case of definitive Bearer Securities, to such notice period as is specified in the Issue Terms), in each case against certification of beneficial ownership as described above unless such certification has already been given, provided that purchasers in the United States and certain U.S. persons will not be able to receive definitive Bearer Securities. The holder of a Temporary Bearer Global Security will not be entitled to collect any payment of interest, principal or other amount due on or after the Exchange Date unless, upon due certification, exchange of the Temporary Bearer Global Security for an interest in a Permanent Bearer Global Security or for definitive Bearer Securities is improperly withheld or refused.

Payments of principal, interest (if any) or any other amounts on a Permanent Bearer Global Security will be made through Euroclear and/or Clearstream, Luxembourg (against presentation or surrender (as the case may be) of the Permanent Bearer Global Security if the Permanent Bearer Global Security is not intended to be issued in NGS form) without any requirement for certification.

FORM OF SECURITIES

The Issue Terms will specify that a Permanent Bearer Global Security will be exchangeable (free of charge), in whole but not in part, for definitive Bearer Securities with, where applicable, coupons and talons attached upon either (i) not less than 60 days' written notice from Euroclear and/or Clearstream, Luxembourg (acting on the instructions of any holder of an interest in such Permanent Bearer Global Security) to the Principal Paying Agent as described therein or (ii) only upon the occurrence of an Exchange Event. For these purposes, "**Exchange Event**" means that (1) an Event of Default (as defined in General Condition 9) has occurred and is continuing, (2) the Issuer has been notified that both Euroclear and Clearstream, Luxembourg have been closed for business for a continuous period of 14 days (other than by reason of holiday, statutory or otherwise) or have announced an intention permanently to cease business or have in fact done so and no successor clearing system is available or (3) the Issuer has or will become subject to adverse tax consequences which would not be suffered were the Securities represented by the Permanent Bearer Global Security in definitive form. The Issuer will promptly give notice to Securityholders in accordance with General Condition 13 if an Exchange Event occurs. In the event of the occurrence of an Exchange Event, Euroclear and/or Clearstream, Luxembourg (acting on the instructions of any holder of an interest in such Permanent Bearer Global Security) or the Issuer, as the case may be, may give notice to the Principal Paying Agent requesting exchange and, in the event of the occurrence of an Exchange Event as described in paragraph (ii) above, the relevant Issuer may also give notice to the Principal Paying Agent requesting exchange. Any such exchange shall occur not later than 60 days after the date of receipt of the first relevant notice by the Principal Paying Agent. If the Global Security is a NGS, the relevant Issuer shall procure that details of such exchange be entered *pro rata* in the records of the relevant clearing system.

In the event that the Permanent Bearer Global Security is exchanged for definitive Bearer Securities, such definitive Bearer Securities shall be issued in the minimum Specified Denomination only. Securityholders who hold Securities in the relevant clearing system in amounts that are not integral multiples of the Specified Denomination may need to purchase or sell, on or before the Exchange Date, a nominal amount of Securities such that their holding is an integral multiple of the Specified Denomination.

The following legend will appear on Bearer Securities:

"ANY UNITED STATES PERSON WHO HOLDS THIS OBLIGATION WILL BE SUBJECT TO LIMITATIONS UNDER THE UNITED STATES INCOME TAX LAWS, INCLUDING THE LIMITATIONS PROVIDED IN SECTIONS 165(j) AND 1287(a) OF THE INTERNAL REVENUE CODE."

The sections referred to provide that United States holders, with certain exceptions, will not be entitled to deduct any loss on Bearer Securities or Coupons and will not be entitled to capital gains treatment in respect of any gain on any sale, disposition, redemption or payment of principal in respect of such Securities or interest coupons.

Securities which are represented by a Bearer Global Security will only be transferable in accordance with the rules and procedures for the time being of Euroclear or Clearstream, Luxembourg, as the case may be.

Bearer Securities with a term of more than one year (taking into account any unilateral right to extend the term) will be issued either in accordance with the provisions of United States Treasury Regulations 1.163-5(c)(1)(ii) and 1.163-5(c)(2)(i)(D) ("**TEFRA D**"), which definition shall include any successor rules for the purposes of Section 4701 of the U.S. Internal Revenue Code of 1986) or in accordance with the provisions of United States Treasury Regulations 1.163-5(c)(1)(ii) and 1.163-5(c)(2)(i)(C) ("**TEFRA C**"), which definition shall include any successor rules for the purposes of Section 4701 of the U.S. Internal Revenue Code of 1986). Bearer Securities issued in accordance with TEFRA D will be represented upon issue by a Temporary Bearer Global Security. Bearer Securities issued in accordance with TEFRA C will be represented upon issue by a Permanent Bearer Global Security. Each Temporary Global Security and Permanent Global Security will be delivered on or prior to the issue date for the relevant tranche to a common depository (in the case of Securities not in NGS form) or common safekeeper (in the case of Securities in NGS form) acting as agent for Euroclear and Clearstream, Luxembourg. Beneficial interests in a Permanent Bearer Global Security issued in accordance with TEFRA C will be exchangeable at any time and without any requirement for certification for Definitive Bearer Securities, in accordance with the terms of such Permanent Bearer Global Security and as specified in the applicable Issue Terms. Interests in a Temporary Bearer Global Security issued in accordance with TEFRA D will be exchangeable either for Definitive Bearer Securities or for interests in a Permanent Bearer Global Security, on or after the date which is forty (40) days after the date on which such Temporary Bearer Global Security is issued and upon certification as to non-U.S. beneficial ownership thereof or otherwise as required by U.S. Treasury Regulations, in accordance with the terms of such Temporary Bearer Global Security and as specified in the applicable Issue Terms.

FORM OF SECURITIES

For the purposes of complying with TEFRA D, Bearer Securities may not be offered or sold to a United States person. "**United States person**" means any person who is, for U.S. federal income tax purposes, (i) a citizen or resident of the United States, (ii) a corporation, partnership or other entity created or organised under the laws of the United States or any political subdivision thereof or therein, or (iii) an estate or trust the income of which is subject to United States taxation regardless of its source.

Registered Securities

The Registered Securities of each Tranche offered and sold in reliance on Regulation S, which will be sold in offshore transactions to non-U.S. persons outside the United States, will initially be represented by a global security in registered form, without Receipts or Coupons, (a "**Regulation S Global Security**") which will be registered in the name of a nominee for a common safekeeper (if the Regulation S Global Security is issued under the new safekeeping structure ("**NSS**")) or a common depository for, and registered in the name of a common nominee of, Euroclear and Clearstream, Luxembourg. Prior to expiry of the distribution compliance period (as defined in Regulation S) applicable to each Tranche of the Securities, beneficial interests in a Regulation S Global Security may not be offered or sold to, or for the account or benefit of, a U.S. person save as otherwise provided in General Condition 2 and such Regulation S Global Security will bear a legend regarding such restrictions on transfer.

The Registered Securities of each Tranche issued by BBVA Global Markets B.V. may only be offered and sold in the United States or to U.S. persons in private transactions (a) to "qualified institutional buyers" within the meaning of Rule 144A ("**QIBs**") who are also "qualified purchasers" within the meaning of Section 2(a)(51)(A) of the United States Investment Company Act of 1940, as amended (the "**1940 Act**") and the rules and regulations thereunder ("**QPs**"), or (b) to "accredited investors" (as defined in Rule 501(a)(1), (2), (3), (7), (8), (9) or (12) under the Securities Act) that are institutions ("**Institutional Accredited Investors**") who are also "qualified purchasers" within the meaning of Section 2(a)(51)(A) of the United States Investment Company Act of 1940, as amended (the "**1940 Act**") and the rules and regulations thereunder ("**QPs**"), who agree to purchase the Securities for their own account and not with a view to the distribution thereof. The Registered Securities of each Tranche sold to QIBs who are also QPs will be represented by a global security in registered form (a "**Rule 144A Global Security**").

The Registered Securities of each Tranche issued by BBVA Global Securities B.V. (other than 3(a)(2) Notes) may only be offered and sold in the United States or to U.S. persons in private transactions (a) to QIBs or (b) to Institutional Accredited Investors who agree to purchase the Securities for their own account and not with a view to the distribution thereof. The Registered Securities of each Tranche sold to QIBs will be represented by a Rule 144A Global Security.

The Registered Securities of each Tranche that are 3(a)(2) Notes issued by BBVA Global Securities B.V. will be represented by a global security in registered form (a "**3(a)(2) Global Security**" and, together with a Regulation S Global Security and a Rule 144A Global Security, the "**Registered Global Securities**"). Unless otherwise set forth in the Issue Terms, 3(a)(2) Notes will be issued only in minimum denominations of US\$1,000 (or the approximate equivalent in the applicable Specified Currency).

Registered Global Securities will either (a) be deposited with a custodian for, and registered in the name of a nominee of, DTC for the accounts of Euroclear and Clearstream, Luxembourg or (b) be deposited with a common depository for, and registered in the name of a common nominee of, Euroclear and Clearstream, Luxembourg, as specified in the Issue Terms. Persons holding beneficial interests in Registered Global Securities will be entitled or required, as the case may be, under the circumstances described below, to receive physical delivery of definitive Securities in fully registered form.

Registered Global Securities issued in respect of any Tranche and deposited with one of the ICSDs as common safekeeper, and registered in the name of a nominee of one of the ICSDs acting as common safekeeper, that is, held under the New Safekeeping Structure for registered global securities, are intended to be held in a manner which would allow Eurosystem eligibility. This does not necessarily mean that the Securities of such Tranche will be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any time during their life, as such recognition depends upon satisfaction of the Eurosystem eligibility criteria.

Registered Securities of each Tranche issued on a partly paid basis ("**Partly Paid Securities**") will be in definitive form, registered in the name of the holder thereof. The Registered Securities of each Tranche issued by BBVA

FORM OF SECURITIES

Unless otherwise set forth in the Issue Terms, Definitive IAI Registered Securities will be issued only in minimum denominations of US\$250,000 and integral multiples of US\$1,000 in excess thereof (or the approximate equivalents in the applicable Specified Currency). Definitive IAI Registered Securities will be subject to the restrictions on transfer set forth therein and will bear the restrictive legend described under "*Subscription and Sale and Transfer and Selling Restrictions*". Institutional Accredited Investors who are also QPs that hold Definitive IAI Registered Securities issued by BBVA Global Markets B.V. and Institutional Accredited Investors that hold Definitive IAI Registered Securities issued by BBVA Global Securities B.V. may elect to hold such Securities through DTC, but transferees acquiring the Securities in transactions exempt from Securities Act registration pursuant to Regulation S or Rule 144 under the Securities Act (if available) may do so upon satisfaction of the requirements applicable to such transfer as described under "*Subscription and Sale and Transfer and Selling Restrictions*". The Rule 144A Global Security and the Definitive IAI Registered Securities will be subject to certain restrictions on transfer set forth therein and will bear a legend regarding such restrictions. Payments of principal, interest and any other amount in respect of the Registered Global Securities will, in the absence of provision to the contrary, be made to the persons shown on the Register (as defined in General Condition 1) as the registered holder of the Registered Global Securities. None of the Issuer, the Guarantor (if applicable), any Paying Agent or the Registrar will have any responsibility or liability for any aspect of the records relating to or payments or deliveries made on account of beneficial ownership interests in the Registered Global Securities or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

Payments of principal, interest or any other amount in respect of the Registered Securities in definitive form will, in the absence of provision to the contrary, be made to the persons shown on the Register on the relevant Record Date (as defined in General Condition 5) immediately preceding the due date for payment in the manner provided in that General Condition.

Interests in a Registered Global Security will be exchangeable (free of charge), in whole but not in part, for definitive Registered Securities without Receipts, Coupons or Talons attached only upon the occurrence of an Exchange Event. For these purposes, "**Exchange Event**" means that (a) an Event of Default has occurred and is continuing, (b) the Issuer has or will become subject to adverse tax consequences which would not be suffered were the Securities represented by the Registered Global Security in definitive form, (c) in the case of Securities registered in the name of a nominee for a common depository for Euroclear and Clearstream, Luxembourg, the Issuer has been notified that both Euroclear and Clearstream, Luxembourg have been closed for business for a continuous period of 14 days (other than by reason of holiday, statutory or otherwise) or have announced an intention permanently to cease business or have in fact done so and, no successor clearing system is available, (d) in the case of Securities registered in the name of a nominee for DTC, either DTC has notified the Issuer that it is unwilling or unable to continue to act as depository for the Securities and no alternative clearing system is available or DTC has ceased to constitute a clearing agency registered under the Exchange Act or (e) the Securities are required to be removed from (in the case of Securities registered in the name of a nominee for a common depository for Euroclear and Clearstream, Luxembourg) both Euroclear and Clearstream, Luxembourg or (in the case of Securities registered in the name of a nominee for DTC) DTC and, in either case, no alternative clearing system is available. The Issuer will promptly give notice to Securityholders in accordance with General Condition 13 if an Exchange Event occurs. In the event of the occurrence of an Exchange Event, DTC, Euroclear and/or Clearstream, Luxembourg (acting on the instructions of any holder of an interest in such Registered Global Security) or the Issuer, as the case may be, may give notice to the Registrar requesting exchange. Any such exchange shall occur not later than 60 days after the date of receipt of the first relevant notice by the Registrar.

In the case of Securities listed on MOT or admitted to trading on SeDeX or on EuroTLX, the Record Date will be fixed in accordance with the rules of Borsa Italiana and any relevant guidelines and may be specified in the applicable Issue Terms.

Transfer of Interests

Interests in a Registered Global Security may, subject to compliance with all applicable restrictions, be transferred to a person who wishes to hold such interest in another Registered Global Security or in the form of a Definitive IAI Registered Security and Definitive IAI Registered Securities may, subject to compliance with all applicable restrictions, be transferred to a person who wishes to hold such Securities in the form of an interest in a Registered Global Security. No beneficial owner of an interest in a Registered Global Security will be able to transfer such interest, except in accordance with the applicable procedures of DTC, Euroclear and Clearstream, Luxembourg,

in each case to the extent applicable, in each case. Registered Securities are also subject to the restrictions on transfer set forth therein and will bear a legend regarding such restrictions, see "*Subscription and Sale and Transfer and Selling Restrictions*".

General

Pursuant to the Agency Agreement (as defined under "*Terms and Conditions of the Securities*"), the Principal Paying Agent shall arrange that, where a further Tranche of Securities is issued which is intended to form a single Series with an existing Tranche of Securities at a point after the Issue Date of the further Tranche, the Securities of such further Tranche shall be assigned a common code, and ISIN and, where applicable, a CUSIP and CINS number which are different from the common code and ISIN, CUSIP and CINS assigned to Securities of any other Tranche of the same Series until such time as the Tranches are consolidated and form a single Series, which shall not be prior to the expiry of the distribution compliance period (as defined in Regulation S) applicable to the Securities of such Tranche.

For so long as any of the Securities is represented by a Global Security held on behalf of Euroclear and/or Clearstream, Luxembourg and/or DTC or its nominee each person (other than Euroclear or Clearstream, Luxembourg or DTC) who is for the time being shown in the records of Euroclear or of Clearstream, Luxembourg or of DTC as the holder of a particular nominal amount of such Securities (in which regard any certificate or other document issued by Euroclear or Clearstream, Luxembourg or DTC as to the nominal amount of such Securities standing to the account of any person shall be conclusive and binding for all purposes save in the case of manifest error) shall be treated by the Issuer, the Guarantor and their agents as the holder of such nominal amount of such Securities for all purposes other than with respect to the payment of principal or interest on such nominal amount of such Securities and, in the case of DTC or its nominee, voting, giving consents or making requests, for which purpose the bearer of the relevant Bearer Global Security or the registered holder of the relevant Registered Global Security shall be treated by the Issuer, the Guarantor and their agents as the holder of such nominal amount of such Securities in accordance with and subject to the terms of the relevant Global Security and the expressions "**Securityholder**" and "**holder of Securities**" and related expressions shall be construed accordingly.

Except in relation to Securities issued in NGS form, any reference herein to Euroclear and/or Clearstream, Luxembourg and/or DTC shall, whenever the context so permits, be deemed to include a reference to any additional or alternative clearing system specified in the Issue Terms or as may otherwise be approved by the Issuer and the Principal Paying Agent. A Security may be accelerated by the holder thereof in certain circumstances described in General Condition 9. In such circumstances, where any Security is still represented by a Global Security and the Global Security (or any part thereof) has become due and repayable in accordance with the Terms and Conditions of such Securities and payment in full of the amount due has not been made in accordance with the provisions of the Global Security within a period of 15 days from the giving of a notice by a holder with Euroclear or Clearstream, Luxembourg of such Securities so represented and credited to its securities account that it wishes to accelerate such Securities, then holders of interests in such Global Security credited to their accounts with Euroclear and/or Clearstream, Luxembourg and/or DTC, as the case may be, will become entitled to proceed directly against the Issuer on the basis of statements of account provided by Euroclear, Clearstream, Luxembourg and DTC on and subject to the terms of a deed of covenant dated June 17, 2025 and executed by the Issuer (the deed of covenant applicable to a Tranche of Securities, the "**Deed of Covenant**"). In addition, holders of interests in such Global Security credited to their accounts with DTC may require DTC to deliver Definitive Securities in registered form in exchange for their interest in such Global Security in accordance with DTC's standard operating procedures.

[Insert examples to illustrate the hypothetical payments for a number of scenarios]

12. [Selected Risk Considerations]

[The Notes are subject to risks generally associated with an investment in conventional debt securities and are senior unsecured obligations of the Issuer. Any payments to be made on the Notes depend on the ability of the Issuer and Guarantor to satisfy its obligations as they come due. Investors are subject to the credit risk, and to changes in the market's view of the creditworthiness of the Issuer and the Guarantor, and in the event the Issuer or Guarantor were to default on its obligation, an investor may not receive any amounts owed to it under the terms of the Notes. The credit ratings of the Issuer and the Guarantor are an assessment of their ability to pay their obligations, including those on the Notes. Consequently, any actual or anticipated declines in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the value of the Notes.

⁸ Include only for 3(a)(2) Notes that are Contingent Payment Securities and Foreign Currency Contingent Payment Securities.

⁹ Include only for 3(a)(2) Notes that are non-principal protected Securities that pay fixed coupons and do not provide for upside.

FORM OF PRICING SUPPLEMENT FOR 3(A)(2) NOTES

Additionally, the Notes also involve risks not associated with an investment in conventional debt securities. This section selects and adapts the most significant risks relating to the terms of the Notes. These risks are explained in more detail and other important risks are described in the "Risk Factors" beginning on page *[specify]* of the Base Listing Particulars.

USE OF PROCEEDS

USE OF PROCEEDS

The net proceeds of the issue of each Tranche of Securities will be fully and permanently invested in the Guarantor and will be applied by the Guarantor:

- (i) unless otherwise specified in the applicable Issue Terms, for the general corporate purposes of the Group; or
- (ii) where the applicable Issue Terms state that the securities shall have the condition of "Green Securities", "Social Securities" or "Sustainability Securities", the net proceeds will be used by the Guarantor to finance, refinance or invest in, in whole or in part,:
 - (a) "Green Projects" as described in this "*Use of Proceeds*" section, in which case the relevant Securities will be identified as "Green Securities" in the applicable Issue Terms ("**Green Securities**");
 - (b) "Social Projects" as described in this "*Use of Proceeds*" section, in which case the relevant Securities will be identified as "Social Securities" in the applicable Issue Terms ("**Social Securities**");
 - (c) a combination of "Green Projects" or "Social Projects", in which case the relevant Securities will be identified as "Sustainability Securities" in the applicable Issue Terms ("**Sustainability Securities**");

Hereinafter, Green Securities, Social Securities and Sustainability Securities, respectively, and, together, "**Sustainable Securities**". Such Sustainable Securities are not issued as "European Green Bonds" in accordance with the European Green Bond Regulation.

For any Sustainable Securities, an amount equal to the net proceeds from each issue of Sustainable Securities will be allocated by the Guarantor in financing or refinancing, in part or in full, on a portfolio basis, new and/or existing Green Projects and/or Social Projects (each as defined below and further described in the Guarantor's Sustainable Debt Financing Framework) (together, the "**Eligible Projects**"), all in accordance with the Sustainable Debt Financing Framework. In the case of Green Securities, such financing or refinancing shall be exclusively of new and/or existing Green Projects, in part or in full, in the case of Social Securities, such financing or refinancing shall be exclusively of new and/or existing Social Projects, in part or in full, and, in the case of Sustainability Securities, such financing or refinancing shall be exclusively of new and/or existing Green Projects and Social Projects, in part or in full.

Eligible Projects include any type of lending within the Guarantor's balance sheet aligned with the specified use of proceeds for the Sustainable Securities, including lending to clients whose business activities are fully aligned with the "green eligible categories" and/or "social eligible categories" described in the Sustainable Debt Financing Framework.

"**Green Projects**" means loans, investments and projects falling within any of the "green eligible categories" described in the Sustainable Debt Financing Framework of renewable energies, energy efficiency, green buildings, clean transport, sustainable water and wastewater management, pollution prevention and control, and environmentally sustainable management of living natural resources and land use, each as further described in the Sustainable Debt Financing Framework, and, at any time, include any other "green" projects in accordance with any update of the ICMA Green Bond Principles at such time.

The "**ICMA Green Bond Principles**" means the Green Bond Principles published by the International Capital Markets Association as updated from time to time, which as of the date of this Base Prospectus are the Green Bond Principles June 2021 (along with June 2022 Appendix 1) (https://www.icmagroup.org/assets/documents/Sustainable-finance/2022-updates/Green-Bond-Principles_June-2022-280622.pdf).

The "**Sustainable Debt Financing Framework**" means the BBVA Sustainable Debt Financing Framework (December 2023) published by the Guarantor on its website (<https://shareholdersandinvestors.bbva.com/wp->

USE OF PROCEEDS

[content/uploads/2024/02/202312-DEF-BBVA-Sustainable-Debt-Financing-Framework.pdf](#)), including as amended, supplemented, restated or otherwise updated on such website from time to time where so specified.

"**Social Projects**" means loans, investments and projects falling within any of the "social eligible categories" described in the Sustainable Debt Financing Framework of access to essential services (health and education), affordable core infrastructure (telecommunications and mass transit, housing, public works infrastructure, arts infrastructure, infrastructure with a social purpose, and social enterprises and foundations), and socioeconomic advancement and empowerment (financing for individuals qualifying as vulnerable or on low incomes, support for financial inclusion, and entrepreneurship and support for micro-businesses), each as further described in the Sustainable Debt Financing Framework, and, at any time, include any other "social" projects in accordance with any update of the ICMA Social Bond Principles at such time.

The "**ICMA Social Bond Principles**", means the Social Bond Principles published by the International Capital Markets Association as updated from time to time, which as of the date of this Base Prospectus are the Social Bond Principles June 2021 (along with June 2022 Appendix 1) (https://www.icmagroup.org/assets/documents/Sustainable-finance/2022-updates/Social-Bond-Principles_June-2022v3-020822.pdf).

The proceeds of any Sustainable Securities will not be used to finance excluded and/or prohibited activities within the defence, mining, energy, infrastructure and agribusiness sectors as reflected in BBVA's Environmental & Social Framework, which may be found on its website (<https://shareholdersandinvestors.bbva.com/sustainability-and-responsible-banking/principles-and-policies/>).

The Guarantor will endeavour to allocate the full amount of the net proceeds of any Sustainable Securities on-lent to it by the Issuer in financing or refinancing the relevant Eligible Projects following the issuance of such Sustainable Securities. If this is not possible, pending such allocation, the net proceeds will be applied by the Guarantor on the same basis as for the management of its treasury liquidity portfolio. The Guarantor will further endeavor to apply a percentage of the net proceeds of any Sustainable Securities to financing Green Projects and/or Social Projects, as appropriate, originated in the current year of issue such Sustainable Securities.

In the event that any Eligible Project to which the net proceeds of any Sustainable Securities are allocated ceases to comply with the relevant categories for such Eligible Project to constitute a Green Project or a Social Project, as the case may be, the Guarantor will substitute that Eligible Project within the relevant portfolio for a compliant Eligible Project on a best efforts basis and when reasonably practicable.

For so long as any Sustainable Securities remain outstanding, the Guarantor intends to publish an annual report (the "**Sustainable Report**") on its website (<https://shareholdersandinvestors.bbva.com>) including at least the following information:

- (i) the allocation of the net proceeds from the issue of Green, Social or Sustainability Securities under the Sustainable Debt Financing Framework in each "green" or "social" eligible category;
- (ii) the portion of such net proceeds used for financing or refinancing purposes;
- (iii) the remaining balance of unallocated proceeds from such Green, Social or Sustainability Securities and/or cash equivalents;
- (iv) an indication of which sustainable development goals apply to such "green" or "social" eligible categories;
- (v) relevant estimated environmental or social impacts for each relevant "green" or "social" eligible category and, if possible, actual impact metrics. Case studies of specific Eligible Projects may be provided to illustrate the relevant impact; and
- (vi) the calculation methodologies applied by the Guarantor for the calculation of environmental and social impacts.

Terms used above in relation to the intended content of the Sustainable Report have the meanings given to them in the Sustainable Debt Financing Framework.

USE OF PROCEEDS

The Guarantor has obtained an independent verification assessment from DNV GL Business Assurance Services Limited in respect of the Sustainable Debt Financing Framework. This independent verification assessment is published on the Guarantor's website (<https://shareholdersandinvestors.bbva.com/wp-content/uploads/2024/02/BBVA-SDF-Framework-20231231-DNV-SPO.pdf>).

The Guarantor further intends to obtain an independent verification assessment from an external verifier for each Series of Sustainable Securities it issues and will publish that verification assessment on its website (<https://shareholdersandinvestors.bbva.com>).

In addition, the Guarantor may request, on an annual basis starting one year after the issue of each Series of Sustainable Securities and until maturity (or until redemption in full), a limited assurance report on the allocation of the net proceeds of those Sustainable Securities to Green Projects and/or Social Projects, as the case may be, and the verification of the impact indicators published in the Sustainable Report and that such indicators are prepared in accordance with the calculation methodologies included in the Sustainable Report, which may be provided by its external auditor or another suitably qualified provider and published on its website (<https://shareholdersandinvestors.bbva.com>).

Neither the Sustainable Debt Financing Framework, nor any of the above reports, verification assessments or contents of any of the above websites are incorporated in or form part of this Base Prospectus.

BOOK-ENTRY CLEARANCE SYSTEMS

BOOK-ENTRY CLEARANCE SYSTEMS

*The information set out below is subject to any change in or reinterpretation of the rules, regulations and procedures of DTC, Euroclear or Clearstream, Luxembourg (together, the "**Clearing Systems**") currently in effect. The Issuer and the Guarantor take responsibility for the correct extraction and reproduction of the information in this section concerning the Clearing Systems, but none of the Issuer, the Guarantor nor any Dealer takes any responsibility for the accuracy thereof. Investors wishing to use the facilities of any of the Clearing Systems are advised to confirm the continued applicability of the rules, regulations and procedures of the relevant Clearing System. None of the Issuer, the Guarantor nor any other party to the Agency Agreement will have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial ownership interests in the Securities held through the facilities of any Clearing System or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.*

DTC

DTC has advised the Issuer and the Guarantor that it is a limited purpose trust company organised under the New York Banking Law, a "banking organisation" within the meaning of the New York Banking Law, a "clearing corporation" within the meaning of the New York Uniform Commercial Code and a "clearing agency" registered pursuant to Section 17A of the Exchange Act. DTC holds securities that its participants ("**Participants**") deposit with DTC. DTC also facilitates the settlement among Participants of securities transactions, such as transfers and pledges, in deposited securities through electronic computerised book-entry changes in Participants' accounts, thereby eliminating the need for physical movement of securities certificates. Direct Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organisations. DTC is owned by a number of its Direct Participants and by the New York Stock Exchange, Inc., the NYSE MKT LLC, Inc. and the Financial Industry Regulatory Authority, Inc. Access to the DTC system is also available to others such as securities brokers and dealers, banks and trust companies that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("**Indirect Participants**").

Under the rules, regulations and procedures creating and affecting DTC and its operations (the "**Rules**"), DTC makes book-entry transfers of Registered Securities among Direct Participants on whose behalf it acts with respect to Securities accepted into DTC's book-entry settlement system ("**DTC Securities**") as described below and receives and transmits distributions of principal and interest on DTC Securities. The Rules are on file with the Securities and Exchange Commission. Direct Participants and Indirect Participants with which beneficial owners of DTC Securities ("**Owners**") have accounts with respect to the DTC Securities similarly are required to make book-entry transfers and receive and transmit such payments on behalf of their respective Owners. Accordingly, although Owners who hold DTC Securities through Direct Participants or Indirect Participants will not possess Registered Securities, the Rules, by virtue of the requirements described above, provide a mechanism by which Direct Participants will receive payments and will be able to transfer their interest in respect of the DTC Securities.

Purchases of DTC Securities under the DTC system must be made by or through Direct Participants, which will receive a credit for the DTC Securities on DTC's records. The ownership interest of each actual purchaser of each DTC Security ("**Beneficial Owner**") is in turn to be recorded on the Direct and Indirect Participant's records. Beneficial Owners will not receive written confirmation from DTC of their purchase, but Beneficial Owners are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the DTC Securities are to be accomplished by entries made on the books of Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in DTC Securities, except in the event that use of the book-entry system for the DTC Securities is discontinued.

To facilitate subsequent transfers, all DTC Securities deposited by Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co. The deposit of DTC Securities with DTC and their registration in the name of Cede & Co. effect no change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the DTC Securities; DTC's records reflect only the identity of the Direct Participants to whose accounts such DTC Securities are credited, which may or may not be the Beneficial Owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by

BOOK-ENTRY CLEARANCE SYSTEMS

arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Redemption notices shall be sent to Cede & Co. If less than all of the DTC Securities within an issue are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed.

Neither DTC nor Cede & Co. will consent or vote with respect to DTC Securities, unless authorised by a Direct Participant in accordance with DTC's operational arrangements and the issuing/paying agent operating procedures for money market instruments ("**DTC's MMI Procedures**"). Under its usual procedures, DTC mails an omnibus proxy to the Issuer as soon as possible after the record date. The omnibus proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the DTC Securities are credited on the record date (identified in a listing attached to the omnibus proxy).

Principal and interest payments on the DTC Securities will be made to DTC. DTC's practice is to credit Direct Participants' accounts on the due date for payment in accordance with their respective holdings shown on DTC's records unless DTC has reason to believe that it will not receive payment on the due date. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name", and will be the responsibility of such Participant and not of DTC or the Issuer, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal and interest to DTC is the responsibility of the Issuer, disbursement of such payments to Direct Participants is the responsibility of DTC, and disbursement of such payments to the Beneficial Owners is the responsibility of Direct and Indirect Participants.

Under certain circumstances, including if there is an Event of Default under the Securities, DTC will exchange the DTC Securities for definitive Registered Securities, which it will distribute to its Participants in accordance with their proportionate entitlements and which, if representing interests in a Rule 144A Global Security, will be legended as set forth under "*Subscription and Sale and Transfer and Selling Restrictions*".

Since DTC may only act on behalf of Direct Participants, who in turn act on behalf of Indirect Participants, any Owner desiring to pledge DTC Securities to persons or entities that do not participate in DTC, or otherwise take actions with respect to such DTC Securities, will be required to withdraw its Registered Securities from DTC as described below.

Euroclear and Clearstream, Luxembourg

Euroclear and Clearstream, Luxembourg each holds securities for its customers and facilitates the clearance and settlement of securities transactions by electronic book-entry transfer between their respective account holders. Euroclear and Clearstream, Luxembourg provide various services including safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Euroclear and Clearstream, Luxembourg also deal with domestic securities markets in several countries through established depository and custodial relationships. Euroclear and Clearstream, Luxembourg have established an electronic bridge between their two systems across which their respective participants may settle trades with each other.

Euroclear and Clearstream, Luxembourg customers are world-wide financial institutions, including underwriters, securities brokers and dealers, banks, trust companies and clearing corporations. Indirect access to Euroclear and Clearstream, Luxembourg is available to other institutions that clear through or maintain a custodial relationship with an account holder of either system. For further information on Euroclear and Clearstream, Luxembourg relating to the Securities, please see "*Taxation*".

Book-entry Ownership of and Payments in respect of DTC Securities

The Issuer may apply to DTC in order to have any Tranche of Securities represented by a Registered Global Security accepted in its book-entry settlement system. Upon the issue of any such Registered Global Security, DTC or its custodian will credit, on its internal book-entry system, the respective nominal amounts of the individual beneficial interests represented by such Registered Global Security to the accounts of persons who have accounts with DTC. Such accounts initially will be designated by or on behalf of the relevant Dealer. Ownership of beneficial interests in such a Registered Global Security will be limited to Direct Participants or Indirect Participants, including, in the case of a Regulation S Global Security, the respective depositories of Euroclear and Clearstream, Luxembourg. Ownership of beneficial interests in a Registered Global Security accepted by DTC

BOOK-ENTRY CLEARANCE SYSTEMS

will be shown on, and the transfer of such ownership will be effected only through, records maintained by DTC or its nominee (with respect to the interests of Direct Participants) and the records of Direct Participants (with respect to interests of Indirect Participants).

Payments in US dollars of principal and interest in respect of a Registered Global Security accepted by DTC will be made to the order of DTC or its nominee as the registered holder of such Security. In the case of any payment in a currency other than US dollars, payment will be made to the Exchange Agent on behalf of DTC or its nominee and the Exchange Agent will (in accordance with instructions received by it) remit all or a portion of such payment for credit directly to the beneficial holders of interests in the Registered Global Security in the currency in which such payment was made and/or cause all or a portion of such payment to be converted into US dollars and credited to the applicable Participants' account.

The Issuer expects DTC to credit accounts of Direct Participants on the applicable payment date in accordance with their respective holdings as shown in the records of DTC unless DTC has reason to believe that it will not receive payment on such payment date. The Issuer also expects that payments by Participants to beneficial owners of Securities will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers, and will be the responsibility of such Participant and not the responsibility of DTC, the Principal Paying Agent, the Registrar or the Issuer. Payment of principal, premium, if any, and interest, if any, on Securities to DTC is the responsibility of the Issuer.

Transfers of Securities Represented by Registered Global Securities

Transfers of any interests in Securities represented by a Registered Global Security within DTC, Euroclear and Clearstream, Luxembourg will be effected in accordance with the customary rules and operating procedures of the relevant clearing system. The laws in some States within the United States require that certain persons take physical delivery of securities in definitive form. Consequently, the ability to transfer Securities represented by a Registered Global Security to such persons may depend upon the ability to exchange such Securities for Securities in definitive form. Similarly, because DTC can only act on behalf of Direct Participants in the DTC system who in turn act on behalf of Indirect Participants, the ability of a person having an interest in Securities represented by a Registered Global Security accepted by DTC to pledge such Securities to persons or entities that do not participate in the DTC system or otherwise to take action in respect of such Securities may depend upon the ability to exchange such Securities for Securities in definitive form. The ability of any holder of Securities represented by a Registered Global Security accepted by DTC to resell, pledge or otherwise transfer such Securities may be impaired if the proposed transferee of such Securities is not eligible to hold such Securities through a direct or indirect participant in the DTC system.

Subject to compliance with the transfer restrictions applicable to the Registered Securities described under "*Subscription and Sale and Transfer and Selling Restrictions*", cross-market transfers between DTC, on the one hand, and directly or indirectly through Clearstream, Luxembourg or Euroclear accountholders, on the other, will be effected by the relevant clearing system in accordance with its rules and through action taken by the Registrar, the Principal Paying Agent and any custodian ("**Custodian**") with whom the relevant Registered Global Securities have been deposited.

On or after the Issue Date for any Series, transfers of Securities of such Series between accountholders in Clearstream, Luxembourg and Euroclear will generally have a settlement date two business days after the trade date (T+2) and transfers of Securities of such Series between participants in DTC will generally have a settlement date one business day after the trade date (T+1). The customary arrangements for delivery versus payment will apply to such transfers.

Cross-market transfers between accountholders in Clearstream, Luxembourg or Euroclear and DTC participants will need to have an agreed settlement date between the parties to such transfer. Because there is no direct link between DTC, on the one hand, and Clearstream, Luxembourg and Euroclear, on the other, transfers of interests in the relevant Registered Global Securities will be effected through the Registrar, the Principal Paying Agent and the Custodian receiving instructions (and, where appropriate, certification) from the transferor and arranging for delivery of the interests being transferred to the credit of the designated account for the transferee. In the case of cross-market transfers, settlement between Euroclear or Clearstream, Luxembourg accountholders and DTC participants cannot be made on a delivery versus payment basis. The securities will be delivered on a free delivery basis and arrangements for payment must be made separately.

BOOK-ENTRY CLEARANCE SYSTEMS

DTC, Clearstream, Luxembourg and Euroclear have each published rules and operating procedures designed to facilitate transfers of beneficial interests in Registered Global Securities among participants and accountholders of DTC, Clearstream, Luxembourg and Euroclear. However, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued or changed at any time. None of the Issuer, the Guarantor, the Agents or any Dealer will be responsible for any performance by DTC, Clearstream, Luxembourg or Euroclear or their respective direct or indirect participants or accountholders of their respective obligations under the rules and procedures governing their operations and none of them will have any liability for any aspect of the records relating to or payments made on account of beneficial interests in the Securities represented by Registered Global Securities or for maintaining, supervising or reviewing any records relating to such beneficial interests.

Euroclear UK & International Limited

Following their delivery into a clearing system, interests in Securities may be delivered, held and settled in Euroclear UK & International Limited ("**CREST**") by means of the creation of dematerialised depository interests ("**CREST Depository Interests**") representing the interests in the relevant Securities ("**Underlying Securities**"). The CREST Depository Interests will be issued by CREST Depository Limited or any successor thereto (the "**CREST Depository**") to holders of the CREST Depository Interests and will be constituted and governed by English law. CREST International Nominees Limited or another entity appointed to act as nominee in accordance with the CREST Deed Poll (as defined below) (the "**CREST Nominee**") will hold the legal title to the Underlying Securities and the direct enforcement right in respect of the Underlying Securities.

The CREST Depository Interests will represent indirect interests in the interest of the CREST Nominee in the Underlying Securities. Pursuant to the documents setting out the legal relationship of CREST with its users and participants (the "**CREST Manual**"), Securities held in global form by the common depository may be settled through CREST, and the CREST Depository will issue CREST Depository Interests. The CREST Depository Interests will be independent securities which may be held and transferred through CREST.

Interests in the Underlying Securities will be credited to the CREST Nominee's account with Euroclear and the CREST Nominee will hold such interests as nominee for the CREST Depository which will issue CREST Depository Interests to the relevant CREST participants.

Each CREST Depository Interest will be treated by the CREST Depository as if it were one Underlying Security, for the purposes of determining all rights and obligations and all amounts payable in respect thereof. The CREST Depository will pass on to holders of CREST Depository Interests any interest or other amounts received by it as holder of the Underlying Securities on trust for such holder. Holders of CREST Depository Interests will also be able to receive from CREST notices of meetings of holders of Underlying Securities and other relevant notices issued by the Issuer.

Transfers of interests in Underlying Securities by a CREST participant to a participant of Euroclear or Clearstream, Luxembourg will be affected by cancellation of the CREST Depository Interests and transfer of an interest in such Securities underlying the CREST Depository Interests to the account of the relevant participant with Euroclear or Clearstream, Luxembourg. The CREST Depository Interests will have the same International Securities Identification Number ("**ISIN**") as the ISIN of the Underlying Securities and will not require a separate listing on the Official List of Euronext Dublin or the Official List of the United Kingdom Listing Authority.

Holders of CREST Depository Interests are referred to Chapter 8 of the CREST International Manual (as contained in the CREST Manual) which contains the form of the CREST Deed Poll to be entered into by the CREST Depository (the "**CREST Deed Poll**"). The rights of the holder of CREST Depository Interests will be governed by the arrangements between CREST, Euroclear, Clearstream, Luxembourg and the Issuer including the CREST Deed Poll executed by the CREST Depository. These rights may be different from those of holders of Securities which are not represented by CREST Depository Interests.

If issued, CREST Depository Interests will be delivered, held and settled in CREST, by means of the CREST International Settlement Links Service (the "**CREST International Settlement Links Service**"). The settlement

BOOK-ENTRY CLEARANCE SYSTEMS

of the CREST Depository Interests by means of the CREST International Settlement Links Service has the following consequences for holders of CREST Depository Interests:

- (i) holders of CREST Depository Interests will not be the legal owners of the Underlying Securities. The CREST Depository Interests are separate legal instruments from the Underlying Securities to which they relate and represent an indirect interest in such Underlying Securities;
- (ii) the Underlying Securities themselves (as distinct from the CREST Depository Interests representing indirect interests in such Underlying Securities) will be held in an account with a custodian. The custodian will hold the Underlying Securities through a clearing system. Rights in the Underlying Securities will be held through custodial and depository links through the appropriate clearing systems. The legal title to the Underlying Securities or to interests in the Underlying Securities will depend on the rules of the clearing system in or through which the Underlying Securities are held;
- (iii) rights under the Underlying Securities cannot be enforced by holders of CREST Depository Interests except indirectly through the intermediary depositaries and custodians described above. The enforcement of rights under the Underlying Securities will therefore be subject to the local law of the relevant intermediary. The rights of holders of CREST Depository Interests to the Underlying Securities are represented by the entitlements against the CREST Depository which (through the CREST Nominee) holds interests in the Underlying Securities. This could result in an elimination or reduction in the payments that otherwise would have been made in respect of the Underlying Securities in the event of any insolvency or liquidation of the relevant intermediary, in particular where the Underlying Securities held in clearing systems are not held in special purpose accounts and are fungible with other securities held in the same accounts on behalf of other customers of the relevant intermediaries;
- (iv) the CREST Depository Interests issued to holders of CREST Depository Interests will be constituted and issued pursuant to the CREST Deed Poll. Holders of CREST Depository Interests will be bound by all provisions of the CREST Deed Poll and by all provisions of or prescribed pursuant to, the CREST International Manual and the CREST Rules applicable to the CREST International Settlement Links Service (in each case as contained in the CREST Manual) and such holders must comply in full with all obligations imposed on them by such provisions;
- (v) the provisions of the CREST Deed Poll and the CREST Manual (including for the avoidance of doubt the provisions of the CREST International Manual and the CREST Rules) contain indemnities, warranties, representations and undertakings to be given by holders of CREST Depository Interests and limitations on the liability of the issuer of the CREST Depository Interests, being the CREST Depository;
- (vi) holders of CREST Depository Interests may incur liabilities resulting from a breach of any such indemnities, warranties, representations and undertakings in excess of the money invested by them. The attention of holders is drawn to the terms of the CREST Deed Poll and the CREST Manual (including for the avoidance of doubt the provisions of the CREST International Manual and the CREST Rules), copies of which are available from CREST at 33 Cannon Street, London EC4M 5SB or by calling +44 (0) 207 849 0000 or from the CREST website at: <https://www.euroclear.com/en.html>;
- (vii) holders of CREST Depository Interests may be required to pay fees, charges, costs and expenses to the CREST Depository in connection with the use of the CREST International Settlement Links Service. These will include the fees and expenses charged by the CREST Depository in respect of the provision of services by it under the CREST Deed Poll and any taxes, duties, charges, costs or expenses which may be or become payable in connection with the holding of the Securities through the CREST International Settlement Links Service;
- (viii) neither the Issuer, the Guarantor, the Dealer nor any Agent will have any responsibility for the performance by any intermediaries or their respective direct or indirect participants or accountholders of their respective obligations under the rules and procedures governing their operations; and
- (ix) Securities issued in temporary global form exchangeable for a Permanent Bearer Global Security will not be eligible for CREST settlement as CREST Depository Interests. As such, investors investing in any such Underlying Securities through CREST Depository Interests will only receive the CREST Depository Interests after such Temporary Bearer Global Security is exchanged for a Permanent Bearer Global Security, which could take up to 40 days after the issue of the Securities.

proposal for the merger of the two entities. The content of the written proposal sent to the Board of Directors of the Target Company was published on May 1, 2024, by BBVA through the publication of an inside information notice (*información privilegiada*) with the Spanish Securities and Exchange Commission (hereinafter "CNMV").

On May 6, 2024, the Target Company published an inside information notice (*información privilegiada*) informing of the rejection of the proposal by its Board of Directors.

Following such rejection, on May 9, 2024, BBVA announced, through the publication of an inside information notice (*información privilegiada*) (the "**Prior Announcement**"), the decision to launch a voluntary tender offer (the "**Offer**") for the acquisition of all of the issued shares of the Target Company, being a total of 5,440,221,447 ordinary shares with a par value of €0.125 each (representing 100% of the Target Company's share capital). The consideration initially offered by BBVA to the shareholders of the Target Company consisted of one (1) newly issued share of BBVA for each four and eighty-three hundredths (4.83) ordinary shares of the Target Company, subject to certain adjustments in the case of dividend distribution in accordance with what was indicated in the Prior Announcement.

In accordance with the Prior Announcement of the Offer and as a consequence of the interim dividend against the 2024 financial year results in the amount of €0.08 per share paid by the Target Company to its shareholders on October 1, 2024, BBVA proceeded to adjust the Offer consideration. Therefore, after applying the adjustment in the terms set forth in the Prior Announcement, the consideration offered by BBVA to the shareholders of the Target Company under the Offer was adjusted to one (1) newly issued ordinary share of BBVA for each five point zero one nine six (5.0196) ordinary shares of the Target Company.

Additionally, as a result of the interim dividend against the 2024 financial year results in the amount of €0.29 per share paid by BBVA to its shareholders on October 10, 2024, BBVA proceeded to adjust again the Offer consideration. Therefore, also in accordance with the provisions of the Prior Announcement, the Offer consideration was adjusted to one (1) newly issued ordinary share of BBVA and €0.29 in cash for every five point zero one nine six (5.0196) ordinary shares of the Target Company.

In addition, as a consequence of the final dividend against the 2024 financial year results in the gross amount of €0.1244 per share paid by the Target Company to its shareholders on March 28, 2025, BBVA proceeded to adjust again the Offer consideration. Therefore, after applying the adjustment in the terms set forth in the Prior Announcement, the consideration offered by BBVA to the shareholders of the Target Company under the Offer was adjusted to one (1) newly issued ordinary share of BBVA and €0.29 in cash for every five point three four five six (5.3456) ordinary shares of the Target Company.

Lastly, as a result of the final dividend against the 2024 financial year results in the gross amount of €0.41 per share paid by BBVA to its shareholders on April 10, 2025, BBVA proceeded to adjust again the Offer consideration. Accordingly, in accordance with the provisions of the Prior Announcement, the Offer consideration was adjusted to one (1) newly issued ordinary share of BBVA and €0.70 in cash for every five point three four five six (5.3456) ordinary shares of the Target Company.

Pursuant to the provisions of Royal Decree 1066/2007, of July 27, on the rules governing tender offers ("**Royal Decree 1066/2007**"), the Offer is subject to mandatory clearance by the CNMV. Additionally, pursuant to the provisions of Law 10/2014 and Royal Decree 84/2015, the acquisition by BBVA of control of the Target Company resulting from the Offer is subject to the duty of prior notification to the Bank of Spain and the obtention of the non-opposition of the European Central Bank (a condition that was satisfied on September 5, 2024, as described below).

In addition, completion of the Offer is also subject to the satisfaction of the conditions specified in the Prior Announcement, in particular (i) the acceptance of the Offer by a number of shares that allows BBVA to acquire at least more than half of the effective voting rights of the Target Company at the end of the Offer acceptance period, excluding the treasury shares that the Target Company may hold at that time, as this condition was amended by BBVA in accordance with the publication of the inside information notice (*información privilegiada*) dated January 9, 2025, (ii) approval by BBVA's General Shareholders' Meeting of the increase of BBVA's share capital through the issue of new ordinary shares through non-cash contributions in an amount that is sufficient to cover the consideration in shares offered to the shareholders of the Target Company (which condition was satisfied on July 5, 2024, as described below), (iii) the express or tacit authorisation of the economic concentration resulting from the Offer by the Spanish antitrust authorities, and (iv) the express or tacit authorisation of the indirect acquisition of control of the Target Company's banking subsidiary in the United Kingdom, TSB Bank PLC, by

DESCRIPTION OF BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

the United Kingdom Prudential Regulation Authority ("**PRA**") (a condition that was satisfied on September 2, 2024, as described below) .

On July 5, 2024, the BBVA's Extraordinary General Shareholders' Meeting resolved to authorize, with 96% votes in favor, an increase in the share capital of BBVA of up to a maximum nominal amount of €551,906,524.05 through the issuing and putting into circulation of up to 1,126,339,845 ordinary shares of €0.49 par value each to cover the consideration in shares offered to the shareholders of the Target Company. On March 21, 2025, BBVA's Ordinary General Shareholders' Meeting approved the renewal of such resolution for its exercise within a one (1) year period from such date.

On September 3, 2024, BBVA announced, through the publication of an inside information notice (información privilegiada), that, on September 2, 2024, it received the authorisation from the PRA for BBVA's indirect acquisition of control of TSB Bank PLC as a result of the Offer.

On September 5, 2024, BBVA announced, through the publication of an inside information notice (información privilegiada), that it received the decision of non-opposition from the European Central Bank to BBVA's taking control of the Target Company as a result of the Offer.

On April 30, 2025, BBVA announced, through the publication of Other Relevant Information notice (otra información relevante), that it received the notification of the Spanish National Markets and Competition authority (CNMC) confirming the approval of the economic concentration resulting from the Offer, subject to compliance with the commitments submitted by BBVA.

On May 27, 2025, the Spanish Minister of Economy, Trade and Business decided to refer the CNMC's resolution to the Council of Ministers for its review on the basis of general public interest. The Council of Ministers has one-month period to issue a decision.

As a consequence of the decision by the Spanish Minister of Economy, Trade and Business to refer the CNMC's resolution to the Council of Ministers, such resolution does not become final until a decision is issued by the Council of Ministers or the one month period elapses.

The Offer is subject to approval by the CNMV. The detailed terms of the Offer will be set out in the prospectus, which was submitted to the CNMV together with the request for the authorisation of the Offer on May 24, 2024, and will be published after obtaining the mandatory clearance of the CNMV.

Standards and interpretations that became effective in 2024 to date

Amendment to - IAS 21 "Effects of changes in foreign exchange rates"

On August 15, 2023, the IASB issued a series of amendments to IAS 21 - The effect of changes in foreign exchange rates. The standard has a double objective, on the one hand to provide guidance on when one currency is convertible into another and, on the other hand, how to determine the exchange rate to be used in accounting when it is concluded that such convertibility does not exist.

In relation to the first objective, one currency is convertible into another when an entity can obtain the other currency within a time frame that allows for a normal administrative delay; and through markets or exchange mechanisms in which an exchange transaction creates enforceable rights and obligations. If the entity determines that there is no convertibility between currencies, it must estimate an exchange rate. The standard does not establish a specific estimation technique for them, but rather establishes guidelines for their determination, allowing the use of an observable type without adjusting or using an estimation technique.

The modification to the standard entered into force on January 1, 2025. The standard has not had an impact on the BBVA Group's consolidated financial statements.

Amendment to IFRS 16 - Leases

The IASB has issued an amendment to IFRS 16 that clarifies the requirements for sale-and-leaseback transactions. The new requirements established that the seller-lessee shall determine 'lease payments' or 'revised lease payments' in a way such that the seller-lessee would not recognize any amount of the gain or loss that relates to the right of use retained by the seller-lessee. The amendments have become effective on January 1, 2024. The standard has not had any significant impact on the Consolidated Financial Statements.

Standards and interpretations issued but not yet effective as of March 31, 2025

IFRS 18 - "Presentation and Disclosures in Financial Statements"

On April 9, 2024, the IASB issued IFRS 18 "Presentation and Disclosures in Financial Statements" which introduces new requirements to improve the quality of information presented in financial statements and to promote analysis, transparency and comparability of companies' performance.

Specifically, IFRS 18 introduces three predefined expense categories (operating, investing, financing) and two subtotals ("operating profit" and "profit before financing and income taxes") to provide a consistent structure in the income statement and facilitate the analysis of the income statement. Additionally, it introduces disclosure requirements for management-defined performance measures (MPM). Finally, it establishes requirements and provides guidance on aggregation/disaggregation of the information to be provided in the primary financial statements.

This new standard will come into force on January 1, 2027, with early application permitted once it is adopted by the European Union.

Amendments to IFRS 9 and IFRS 7: Amendments to the classification and measurement of financial instruments

On May 30, 2024, the IASB issued amendments to IFRS 9 and IFRS 7 to clarify how to assess the contractual cash flow characteristics of financial assets that include contingent features such as environmental, social and governance (ESG). Additionally, they clarify that a financial liability should be derecognised on the 'settlement date' and introduce an accounting policy option to derecognize before that date financial liabilities that are settled using an electronic payment system. Finally, additional disclosures are required in IFRS 7 for financial instruments with contingent characteristics and equity instruments classified at fair value through other comprehensive income.

The amendments will come into force on January 1, 2026, although they may be applied earlier once they have been adopted by the European Union.

IFRS 19 "Subsidiaries without Public Accountability: Disclosures"

On May 9, 2024, the IASB issued IFRS 19 "Subsidiaries without Public Accountability: Disclosures" which allows certain eligible entities to elect to apply the reduced disclosure requirements of IFRS 19 while continuing to apply the requirements of recognition, valuation and presentation of other IFRS accounting standards.

This new standard will enter into force on January 1, 2027, allowing early application once it is adopted by the European Union. In the Group there are no eligible entities within the scope of this standard, so no significant impact on the BBVA Group's financial statements is expected.

Amendments to IFRS 9 and IFRS 7: Contracts that refer to nature-dependent electricity

On December 18, 2024, the IASB issued amendments to IFRS 9 and IFRS 7 to address the accounting for contracts for the purchase and sale of renewable electricity, called Power Purchase Agreements (PPA). The amendments include guidance on the "own use" exemption for purchasers of electricity and requirements to apply hedge accounting on these arrangements.

The amendments will come into force on January 1, 2026, although they can be applied earlier once they have been adopted by the European Union.

Financial assets at fair value of this operating segment (which includes the following portfolios: "Financial assets held for trading", "Non-trading financial assets mandatorily at fair value through profit or loss", "Financial assets designated at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income") amounted to €105,386 million as of March 31, 2025, a 3.8% decrease from the €109,569 million recorded as of December 31, 2024, mainly as a result of the decrease in derivatives recorded under "Financial assets held for trading", in the context of a relatively stable interest rate environment.

Financial assets at amortised cost of this operating segment as of March 31, 2025 amounted to €246,576 million, a 3.9% increase compared with the €237,279 million recorded as of December 31, 2024. Within this heading, loans and advances to customers amounted to €184,624 million as of March 31, 2025, a 2.8% increase compared with the €179,667 million recorded as of December 31, 2024, mainly due to the increases in corporate and business banking, corporate and investment banking and loans to non-financial enterprises. Financial liabilities held for trading and designated at fair value through profit or loss of this operating segment as of March 31, 2025 amounted to €68,956 million, an 8.2% decrease compared with the €75,143 million recorded as of December 31, 2024, mainly due to the decrease in derivatives recorded under "Financial liabilities held for trading", in the context of a relatively stable interest rate environment.

Off-balance sheet funds of this operating segment (which includes "Mutual funds" (including customers' portfolios) and "Pension funds") as of March 31, 2025 amounted to €110,547 million, a 1.7% increase compared with the €108,694 million recorded as of December 31, 2024, mainly due to the increase in mutual funds.

This operating segment's non-performing loan ratio (defined as non-performing loans divided by total credit risk and calculated as the sum of impaired loans and advances to customers, impaired guarantees to customers and other impaired commitments divided by the sum of loans and advances to customers, guarantees to customers and other commitments) decreased to 3.5% as of March 31, 2025 from 3.7% as of December 31, 2024. This ratio was positively affected by higher write-offs and, to a lesser extent, increases in corporate and business banking, corporate and investment banking and loans to non-financial enterprises, and negatively affected by modestly higher net entries in non-performing loans. This operating segment's non-performing loan coverage ratio (defined as allowance for credit losses divided by non-performing loans and calculated as loss allowances on loans and advances divided by the sum of impaired loans and advances to customers, impaired guarantees to customers and other impaired commitments) increased to 61% as of March 31, 2025 from 59% as of December 31, 2024.

Mexico

The Mexico operating segment includes the banking, insurance and asset management business conducted in Mexico by BBVA Mexico. It also includes BBVA Mexico's agency in Houston.

DESCRIPTION OF BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

The Mexican peso depreciated 2.3% against the euro as of March 31, 2025 compared with December 31, 2024, negatively affecting the business activity of the Mexico operating segment as of March 31, 2025 expressed in euros.

Cash, cash balances at central banks and other demand deposits amounted to €13,135 million as of March 31, 2025, a 4.5% increase compared with the €12,564 million recorded as of December 31, 2024, mainly due to increases in cash balances held in U.S. dollars at the Federal Reserve ("**Fed**"), mainly driven by the issuance of long-term debt and increasing volumes of foreign exchange swaps, partially offset by the reduction of repurchase agreements and the depreciation of the Mexican peso against the euro.

Financial assets at fair value of this operating segment (which includes the following portfolios: "Financial assets held for trading", "Non-trading financial assets mandatorily at fair value through profit or loss", "Financial assets designated at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income") as of March 31, 2025 amounted to €49,525 million, a 9.2% decrease from the €54,547 million recorded as of December 31, 2024, mainly due to decreases in governments bonds driven in part by decreases in interest reference rates by the Mexican Central Bank ("**BANXICO**") and the depreciation of the Mexican peso against the euro.

Financial assets at amortised cost of this operating segment as of March 31, 2025 amounted to €93,824 million, a 0.8% decrease compared with the €94,595 million recorded as of December 31, 2024. Within this heading, loans and advances to customers of this operating segment as of March 31, 2025 amounted to €88,522 million, a 0.2% decrease compared with the €88,725 million recorded as of December 31, 2024, mainly attributable to the depreciation of the Mexican peso against the euro, partially offset by the increase in loans to SMEs supported by specific initiatives aimed at promoting this portfolio and increases in consumer loans.

Financial liabilities held for trading and designated at fair value through profit or loss of this operating segment as of March 31, 2025 amounted to €24,943 million, a 19.2% decrease compared with the €30,885 million recorded as of December 31, 2024, mainly as a result of the decrease in deposits from BANXICO (through repurchase agreements) recorded under "Financial liabilities held for trading" and, to a lesser extent, the depreciation of the Mexican peso against the euro.

Customer deposits at amortised cost of this operating segment as of March 31, 2025 amounted to €86,731 million, a 2.1% increase compared with the €84,949 million recorded as of December 31, 2024, mainly as a result of increases in demand deposits (which bear a lower cost for BBVA than time deposits), partially offset by the depreciation of the Mexican peso against the euro.

Off-balance sheet funds of this operating segment (which includes "Mutual funds" (including customers' portfolios) and "Other placements") as of March 31, 2025 amounted to €58,655 million, a 2.4% increase compared with the €57,253 million as of December 31, 2024, mainly as a result of the continuing search by customers for higher profitability investments, which continued to boost mutual funds, partially offset by the depreciation of the Mexican peso against the euro.

This operating segment's non-performing loan ratio (as defined herein) decreased to 2.4% as of March 31, 2025 from 2.7% as of December 31, 2024 mainly due to lower net entries in non-performing loans and higher write-offs. As a result thereof, this operating segment's non-performing loan coverage ratio (as defined herein) increased to 129% as of March 31, 2025 from 121% as of December 31, 2024.

Turkey

This operating segment comprises the activities carried out by Garanti BBVA as an integrated financial services group operating in the banking, insurance and asset management business in Turkey, including corporate, commercial, SME, payment systems, retail, private and investment banking, together with its subsidiaries in pension and life insurance, leasing, factoring, brokerage and asset management, as well as its international subsidiaries in Romania and the Netherlands.

The Turkish lira depreciated 10.5% against the euro as of March 31, 2025 compared to December 31, 2024, adversely affecting the business activity of the Turkey operating segment as of March 31, 2025 expressed in euros.

Since the first half of 2022, the Turkish economy has been considered to be hyperinflationary as defined by IAS 29 "Financial Reporting in Hyperinflationary Economies". BBVA's operations in Turkey are subject to substantial regulation by Turkish national authorities.

DESCRIPTION OF BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

Cash, cash balances at central banks and other demand deposits amounted to €10,536 million as of March 31, 2025, a 19.3% increase compared with the €8,828 million recorded as of December 31, 2024, mainly due to the increase in cash obtained from customer deposits, both in Turkish-lira and foreign currency, partially offset by the reduction in repurchase agreements and the depreciation of the Turkish lira against the euro.

Financial assets at fair value of this operating segment (which includes the following portfolios: "Financial assets held for trading", "Non-trading financial assets mandatorily at fair value through profit or loss", "Financial assets designated at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income") as of March 31, 2025 amounted to €4,840 million, a 7.5% increase from the €4,503 million recorded as of December 31, 2024, mainly due to increases in local currency-denominated debt securities, whose valuation increased supported by the decrease in interest reference rates during the first three months ended March 31, 2025, partially offset by the depreciation of the Turkish lira against the euro.

Financial assets at amortised cost of this operating segment as of March 31, 2025 amounted to €66,113 million, a 1.9% increase compared with the €64,893 million recorded as of December 31, 2024. Within this heading, loans and advances to customers of this operating segment as of March 31, 2025 amounted to €47,892 million, a 0.8% decrease compared with the €48,299 million recorded as of December 31, 2024, mainly due to the depreciation of the Turkish lira against the euro, partially offset by the increase in Turkish lira-denominated credit card loans and consumer loans, due, in part, to the measures adopted by the Turkish authorities to encourage Turkish lira-denominated loans. In addition, within this heading, debt securities of this operating segment as of March 31, 2025 amounted to €6,893 million, a 7.1% decrease compared with the €7,417 million recorded as of December 31, 2024, mainly as a result of the depreciation of the Turkish lira against the euro, partially offset by increases in local currency-denominated bonds as part of our liquidity management measures. Further, loans and advances to central banks increased in the three months ended March 31, 2025, as a result of the increases in the volume of Turkish lira deposits and the continued existence of reserve ratio requirements in Turkish lira deposits established by the Central Bank of the Republic of Turkey ("CBRT") (5% and 4% in September 2024 and November 2024, respectively).

Financial liabilities held for trading and designated at fair value through profit or loss of this operating segment as of March 31, 2025 amounted to €1,854 million, a 4.6% decrease compared with the €1,943 million recorded as of December 31, 2024, mainly due to the depreciation of the Turkish lira against the euro, partially offset by the increase in trading derivatives.

Customer deposits at amortised cost of this operating segment as of March 31, 2025 amounted to €62,375 million, a 7.4% increase compared with the €58,095 million recorded as of December 31, 2024, mainly due to increases in Turkish lira and U.S. dollar deposits, mainly, in the wholesale portfolio, partially offset by the depreciation of the Turkish lira against the euro.

Off-balance sheet funds of this operating segment (which includes "Mutual funds" and "Pension funds") as of March 31, 2025 amounted to €18,572 million, a 2.7% increase compared with the €18,076 million as of December 31, 2024, mainly due to increases in mutual funds as a result of the shift towards higher profitability investments, partially offset by the depreciation of the Turkish lira against the euro.

The non-performing loan ratio (as defined herein) of this operating segment increased to 3.2% as of March 31, 2025 from 3.1% as of December 31, 2024, mainly as a result of the increase in the balance of non-performing retail loans (mainly credit card and consumer loans) due to the increase in retail loans, offset, in part, by the sale of non-performing loan portfolios and certain recoveries from the wholesale loan portfolios. This operating segment's non-performing loan coverage ratio (as defined herein) decreased to 93% as of March 31, 2025 from 96% as of December 31, 2024.

On the other hand, the Colombian peso appreciated against the euro by 1.0% compared to December 31, 2024. Overall, changes in exchange rates resulted in a negative exchange rate effect on the business activity of the South America operating segment as of March 31, 2025 expressed in euros.

As of March 31, 2025 and December 31, 2024, the Argentine and Venezuelan economies were considered to be hyperinflationary as defined by IAS 29 "Financial Reporting in Hyperinflationary Economies".

Financial assets at fair value for this operating segment (which includes the following portfolios: "Financial assets held for trading", "Non-trading financial assets mandatorily at fair value through profit or loss", "Financial assets designated at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income") as of March 31, 2025 amounted to €11,216 million, a 3.0% increase compared with the €10,884 million recorded as of December 31, 2024, mainly due to the increase of debt securities in Argentina, partially offset by the depreciation of the Argentine peso against the euro.

Financial assets at amortised cost of this operating segment as of March 31, 2025 amounted to €50,372 million, a 0.8% increase compared with the €49,983 million recorded as of December 31, 2024. Financial liabilities held for trading and designated at fair value through profit or loss of this operating segment as of March 31, 2025 amounted to €1,551 million, a 24.7% decrease compared with the €2,060 million recorded as of December 31, 2024, mainly due to the decrease in deposits recorded as "Financial liabilities held for trading" in Colombia, as a result, in part, of a gradual reduction in interest rates, which could have led investors to shift their funds toward higher-yielding financial instruments.

Customer deposits at amortised cost of this operating segment as of March 31, 2025 amounted to €50,317 million, a 0.8% decrease compared with the €50,738 million recorded as of December 31, 2024.

Off-balance sheet funds of this operating segment (which includes "Mutual funds", including customers' portfolios, in Argentina, Colombia and Peru) as of March 31, 2025 amounted to €8,559 million, a 7.8% increase compared with the €7,936 million as of December 31, 2024, mainly due to our strategy to boost private banking activities in the region, investors' search for more liquid and profitable instruments, partially offset by the depreciation of the Argentine peso against the euro.

The non-performing loan ratio (as defined herein) of this operating segment decreased to 4.3% as of March 31, 2025 from 4.5% as of December 31, 2024, mainly as a result of the decrease in non-performing loans, and higher write-offs in Peru and Colombia. This operating segment's non-performing loan coverage ratio (as defined herein) increased to 90% as of March 31, 2025, from 88% as of December 31, 2024 as a result of the abovementioned decrease in non-performing loans.

The U.S. dollar depreciated 3.9% against the euro as of March 31, 2025 compared to December 31, 2024, adversely affecting the business activity of the Rest of Business operating segment as of March 31, 2025 expressed in euros.

Cash, cash balances at central banks and other demand deposits as of March 31, 2025 amounted to €6,499 million, a 22.1% decrease compared with the €8,348 million recorded as of December 31, 2024, mainly due to the decrease in cash balances held at central banks within this operating segment, in particular, at the Fed, due in part to lower interest rates in the United States, supporting the shift towards liquid trading assets, which typically offer higher short-term yields, and the increased grant of loans on a constant exchange rates basis.

Financial assets at fair value for this operating segment (which includes the following portfolios: "Financial assets held for trading", "Non-trading financial assets mandatorily at fair value through profit or loss", "Financial assets designated at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income") as of March 31, 2025 amounted to €1,818 million, an 11.7% increase compared with the €1,627 million recorded as of December 31, 2024, mainly due to the increase in loans and advances (through reverse repurchase agreements) recorded under "Financial assets held for trading" in BBVA Securities Inc., our broker-dealer in the United States, and increases in debt securities in the New York branch, partially offset by the depreciation of the U.S. dollar against the euro.

Customer deposits at amortised cost of this operating segment as of March 31, 2025 amounted to €28,032 million, a 2.2% increase compared with the €27,432 million recorded as of December 31, 2024, mainly as a result of the growth in demand deposits in the branches located in Europe, partially offset by the depreciation of the U.S. dollar against the euro.

Legal Proceedings

The Spanish judicial authorities are investigating the activities of Centro Exclusivo de Negocios y Transacciones, S.L. ("Cenyt"). This investigation includes the provision of services to the Bank. In this regard, on July 29, 2019, BBVA was notified of the order issued by Central Investigative Court No. 6 of the National Court, which declared the Bank an investigated party in Preliminary Proceedings No. 96/2017 – Investigation Part No. 9 for alleged acts that could constitute the crimes of bribery, discovery and disclosure of business secrets, and corruption in business. Certain current and former Group executives and employees, as well as former directors, are also being investigated in connection with this case. Since the beginning of the investigation, the Bank has been proactively collaborating with judicial authorities, having shared with the courts the relevant documentation obtained in the internal investigation commissioned by the bank in 2019 to contribute to the clarification of the facts.

By order of the Criminal Division of the National Court, the investigation phase concluded on January 29, 2024. On June 20, 2024, the Judge issued an order ordering the continuation of the proceedings through the abbreviated procedure against the Bank and against certain current and previous Bank executives and employees, as well as certain former directors, for alleged acts that could constitute the crimes of bribery and discovery and disclosure of secrets.

It is not possible to predict at this time the possible outcomes or implications for the Group of this matter, including potential fines and damages or harm to the Group's reputation resulting from it.

The Group operates in legal and regulatory environments that expose it to potentially significant legal and regulatory actions and proceedings, including legal claims and proceedings, civil and criminal regulatory proceedings, governmental and judicial investigations and proceedings, tax proceedings and other proceedings in

DESCRIPTION OF BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

jurisdictions around the world. Legal and regulatory actions and proceedings are subject to many uncertainties, and their outcomes, including the timing thereof, the amount of fines or settlements or the form of any settlements arising therefrom, or changes in business practices the Group may need to introduce as a result thereof, any of which may be material and are often difficult to predict, particularly in the early stages of a particular legal or regulatory matter.

As of the date of this Base Prospectus, and in addition to as described above, the Guarantor and its subsidiaries are involved in a number of legal and regulatory actions and proceedings in various jurisdictions around the world (including, among others, Spain, Mexico and the United States), the adverse resolution of which may also adversely impact the Group. See *"Risk Factors—Legal, Regulatory, Tax and Compliance Risks— Legal Risks— The Group is party to a number of legal and regulatory actions and proceedings and The Spanish judicial authorities are carrying out a criminal investigation relating to possible bribery and revelation of secrets by BBVA"*.

The Group can provide no assurance that the legal and regulatory actions and proceedings to which it is subject, or to which it may become subject in the future or otherwise affected by, will not, if resolved adversely, result in a material adverse effect on the Group's business financial position or results of operations or liquidity.

Regulation of the New York Branch and of BBVA in the United States

The New York Branch is licensed by the Superintendent of Financial Services of the State of New York (the **"Superintendent"**) under the banking law of the State of New York. The New York Branch is examined by the New York State Department of Financial Services and the Board of Governors of the Federal Reserve System and is subject to banking laws and regulations applicable to a foreign bank that operates a branch in New York State.

New York State banking law authorises the Superintendent to take possession of the business and property of the New York branch of a foreign bank under circumstances similar to those that would permit the Superintendent to take possession of the business and property of a state-chartered bank. These circumstances include the violation of any law, unsafe business procedures, capital impairments, suspension of payment of obligations, the initiation of liquidation proceedings against the foreign bank in the jurisdiction of its domicile or elsewhere or the existence of reason to doubt its ability or willingness to pay in full the accepted claims specified in New York State banking law. Pursuant to Section 606.4 of New York State banking law, in liquidating or dealing with the foreign bank branch's business after taking possession of the branch, the claims of creditors which arose out of transactions with the branch may be accepted or rejected by the Superintendent; those which are not rejected are "accepted" with respect to the branch's assets to the exclusion of the claims of other creditors of the foreign bank, without prejudice to the rights of the holders of such "accepted" claims to be satisfied out of other assets of the foreign bank.

In addition to being subject to New York State banking law and regulations via the New York Branch, BBVA is subject to certain other state regulations and to United States federal regulation, including under the Bank Holding Company Act of 1956, as amended.

TAXATION

TAXATION

Tax legislation, including in the country where the investor is domiciled or tax resident and in the Issuer's country of tax residence, may have an impact on the income that an investor receives from the Securities.

Preliminary consideration: Tax residence of the Issuer

The Issuer is incorporated as a private company with limited liability under the laws of the Netherlands. On the basis of section 2 subsection 4 Dutch Corporate Income Tax Act 1969 (*Wet op de vennootschapsbelasting 1969*), a company which is incorporated under Dutch law, is considered to be resident of the Netherlands for Dutch domestic tax purposes. This notwithstanding the fact the effective management of the company is currently carried out from Spain, since the key management and commercial decisions that are necessary to conduct the entity's business are taken from Spain. On the basis of such circumstance, the Issuer is also regarded as resident in Spain for tax purposes, as provided by Law 27/2014, of November 27, on Corporate Income Tax (*Impuesto sobre Sociedades*).

Under this scenario in which the Issuer is resident for tax purposes both in Spain and in the Netherlands, the provisions contained in the Convention between the Netherlands and Spain for the Avoidance of Double Taxation with respect to Taxes on Income and on Net Wealth (the "**Convention**") apply. The Convention was ratified by Instrument made in Madrid on June 16, 1971 and was published on the Spanish National Gazette on October 16, 1972.

Pursuant to section 4 subsection 4 of the Convention (which deals with the general criteria followed by the Convention to consider a person as a resident of a Contracting State), an entity which is a resident of both Spain and the Netherlands is considered to be a resident of the State in which the place of its effective management is located (i.e., Spain).

Responsibility for Withholding

Payments in respect of Securities will be made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed or levied by or on behalf of Spain or any political subdivision thereof or any authority or agency therein or thereof having power to tax, unless the withholding or deduction of such taxes, duties, assessments or governmental charges is required by law. In that event, the Issuer or, as the case may be, the Guarantor will (subject to certain exceptions described in General Condition 7) pay such additional amounts as will result in the holders of Securities receiving such amounts as they would have received in respect of such Securities had no such withholding or deduction been required.

Spanish Taxation

The following summary refers solely to certain Spanish tax consequences of the acquisition, ownership and disposition of the Securities. The tax consequences described in this section are based on the general assumption that the Securities are initially registered for clearance and settlement in DTC, Euroclear and Clearstream, Luxembourg. It does not purport to be a complete analysis of all tax consequences relating to the Securities and does not purport to deal with the tax consequences applicable to all categories of investors, some of which might be subject to special rules. Prospective investors should consult their own tax advisors as to the consequences under the tax laws of the country of which they are resident for tax purposes and the tax laws of Spain of acquiring, holding and disposing of Securities and receiving any payments under the Securities. This summary is based upon the Spanish State law as in effect on the date of this Base Prospectus and is subject to any change in law that may take effect after such date. Regional tax laws may alter the consequences outlined in this summary in certain circumstances. References in this section to Securityholders include the beneficial owners of the Securities.

Acquisition of the Securities

The issue of, subscription for, transfer and acquisition of the Securities is exempt from Transfer and Stamp Tax (*Impuesto sobre Transmisiones Patrimoniales y Actos Jurídicos Documentados*) and Value Added Tax (*Impuesto sobre el Valor Añadido*).

TAXATION

Taxation on the income and transfer of the securities

The tax treatment of the acquisition, holding and subsequent transfer of the Securities is summarised below and is based on the tax regime applicable to the Securities pursuant to Royal Legislative Decree 5/2004 of March 5 approving the consolidated text of the Non-Resident Income Tax Law, as amended (*Impuesto sobre la Renta de los no Residentes*), Law 27/2014 of November 27, 2014 approving the consolidated text of the Corporate Income Tax Law, as amended (*Impuesto sobre Sociedades*) and Law 35/2006 of November 28, 2006 on Personal Tax Law, as amended (*Impuesto sobre la Renta de las Personas Físicas*), Law 19/1991 of June 6, 1991 approving the Wealth Tax Law, as amended (*Impuesto sobre el Patrimonio*), and Law 29/1987 of December 18, 1987 approving the Inheritance and Gift Tax Law, as amended (*Impuesto sobre Sucesiones y Donaciones*). Consideration has also been given to the rules for the implementation of such regulations (Royal Decree 1776/2004 of July 30 approving the Non-Resident Income Tax Regulations, Royal Decree 439/2007 of March 30, approving the Individuals Income Tax Regulations as amended by Royal Decree 1003/2014 of December 5, 2014 and Royal Decree 634/2015 of July 10, 2015 approving the Corporate Income Tax Regulations).

Consideration has also been given to Spanish legislation on the issuance of preferred securities and debt securities issued by Spanish financial and non-financial listed entities, either directly or through a subsidiary (Law 10/2014, and RD 1065/2007 (as amended by RD 1145/2011), approving the General Regulations relating to tax inspection and management procedures and developing the common rules of the procedures to apply taxes).

Income obtained by Securityholders who are Non-Resident Income Tax payers in Spain in respect of the Securities

Income obtained by Securityholders who are Non-Resident Income Tax payers, both in respect of interest and in connection with the transfer, repayment or redemption of the Securities, whether or not through a permanent establishment, shall be considered Spanish source income and therefore subject to taxation in Spain under Royal Legislative Decree 5/2004 of March 5 approving the consolidated text of the Non-Resident Income Tax Law, as amended, without prejudice to the provisions contained in any applicable tax treaty for the avoidance of double taxation ("**DTT**").

Income not obtained through a permanent establishment in Spain in respect of the Securities

Income obtained by Securityholders who are not tax resident in Spain acting for these purposes without a permanent establishment within Spain is exempt from Non-Resident Income Tax in the terms described under "*Tax Reporting Obligations of the Issuer and the Guarantor*" below.

Income obtained through a permanent establishment in Spain in respect of the Securities / Corporate Income Tax taxpayers

The holding of Securities by investors who are not resident for tax purposes in Spain will not in itself create the existence of a permanent establishment in Spain.

Income obtained by non-Spanish resident holders acting through a permanent establishment in Spain in respect of the Securities will be taxed under the rules provided by Chapter III of the Non-Resident Income Tax Law. These Securityholders will be subject to taxation substantially in the same manner as Spanish Corporate Income Tax taxpayers and, therefore, it shall be computed as taxable income in accordance with the general rules set out in the Corporate Income Tax Law and will therefore be taxed at the general current rate of 25 per cent. Special rates apply in respect of certain types of entities (such as qualifying collective investment undertakings), newly created entities (taxed at the rate of 15 per cent. for the first tax period in which the taxable base is positive and for the following period), and entities whose turnover is below a certain threshold (taxed at a rate between 17 per cent. and 20 per cent.).

Income derived from the transfer and holding of the Securities shall not be subject to withholding tax as provided by Section 61(s) of the Corporate Income Tax Regulations, to the extent that the Securities are traded on organised markets in OECD countries.

For withholding on income derived from payment of interest, redemption or repayment of the Securities see "*Tax Reporting Obligations of the Issuer and the Guarantor*".

TAXATION

Individuals with tax residency in Spain

Income obtained by Securityholders who are Personal Income Tax payers, both as interest and in connection with the transfer, redemption or repayment of the Securities, shall be considered income on investments obtained from the assignment of an individual's capital to third parties, as defined in Section 25.2 of Individuals Income Tax Law and therefore will be taxed as savings income at the applicable rate currently varying from 19 per cent. to 30 per cent. (in particular, 19 per cent. for taxable income up to €6,000; 21 per cent. for taxable income between €6,000.01 to €50,000; 23 per cent. for taxable income between €50,000.01 and €200,000; 27 per cent. for taxable income between €200,000.01 and €300,000; and 30 per cent. for taxable income in excess of €300,000).

As a general rule, the above mentioned income will be subject to the corresponding personal income tax withholding at the applicable tax rate (currently 19 per cent.). However, Article 44 of the RD 1065/2007 has established new information procedures for debt instruments issued under the Law 10/2014 (which do not require identification of the Securityholders) and has provided that the interest will be paid by the relevant Issuer to the Paying Agent for the whole amount, provided that such information procedures are complied with.

Nevertheless, withholding tax at the applicable rate (currently 19 per cent.) may have to be deducted by other entities (such as depositaries or financial entities), provided that such entities are resident for tax purposes in Spain or have a permanent establishment in Spanish territory.

The Issuer and the Guarantor consider that, according to RD 1145/2011, they are not obliged to withhold any tax amount provided that the new simplified information procedures (which do not require identification of the Securityholders) are complied with by the Paying Agent as it is described in section "*Tax Reporting Obligations of the Issuer and the Guarantor*".

However, regarding the interpretation of the "*Tax Reporting Obligations of the Issuer and the Guarantor*" please refer to "*Risk Factors – Spanish Tax Rules may impose withholding tax in certain circumstances (subject to certain exceptions) and neither the Issuer nor the Guarantor is obliged to pay additional amounts in such event.*"

Wealth Tax and Solidarity Tax

Under Law 19/1991, June 6, 1991, as amended, individuals with tax residency in Spain are subject to Wealth Tax on all their assets (such as the Securities) owned every 31 December irrespective of where the assets are located to the extent that their net worth exceeds €700,000. Therefore, they should take into account the value of the Securities which they hold as at December 31, 2025.

Individuals resident in a country with which Spain has entered into a DTT in relation to Wealth Tax would generally not be subject to such tax. Otherwise, non-Spanish resident individuals whose properties and rights located in Spain, or that can be exercised within the Spanish territory, exceed €700,000 would be subject to Wealth Tax at the applicable rates, ranging between 0.2 per cent. and 3.5 per cent., without prejudice of any exemption that should be applicable and the laws and regulations in force in each Autonomous Region.

Legal entities are not subject to Wealth Tax.

In addition to the above, the so-called "Solidarity Tax" was approved in December 2022 and, although it was introduced as a two year complementary wealth tax, it was extended indefinitely in December 2023 until. Regional financing system is reviewed. In general terms, it applies, under certain conditions, to those residents in an autonomous region where the Wealth Tax is partial or fully exempt. The amount payable for this tax could be reduced by the amount paid for Wealth Tax.

The current rates of the "Solidarity Tax" are as follows:

Taxable base up to (€)	Tax due (€)	Rest of taxable base (€)	Rate
0.00	0.00	3,000,000.00	0%
3,000,000.00	0.00	2,347,998.03	1.7%

TAXATION

5,347,998.03	39,915,97	5,347,998.03	2.1%
10,695,996.06	152,223,93	Any excess	3.5%

Notwithstanding the above, note that this regulation lays down a minimum exempt amount of €700,000 which means that its effective impact, in general, will occur when the net wealth, not tax exempt, are greater than €3.7 million.

Note that this tax information is applicable in the Spanish common territory, without prejudice to the regional tax regimes of Concert and Economic Agreement in force, respectively, in the historical territories of the Basque Country and in the Foral Community of Navarra, or those other exceptional ones that may be applicable by the specific characteristics of the relevant investors.

Prospective investors are advised to seek their own professional advice in this regard.

Inheritance and Gift Tax

The transfer of the Securities to individuals by inheritance, legacy or donation shall be subject to the general rules of Inheritance and Gift Tax (Impuesto sobre Sucesiones y Donaciones) in accordance with the applicable Spanish and State rules even if title passes outside Spain and neither the heir nor the beneficiary, as the case may be, is resident in Spain for tax purposes, without prejudice to the provisions of any DTT signed by Spain.

The effective tax rates, after applying all relevant factors, range between 0 per cent. and 81.6 per cent.

However, the Judgment from the European Court of Justice dated September 3, 2014 has declared that Spanish Inheritance and Gift Tax Law is against the principle of free movement of capital within the EU as the Spanish residents are granted tax benefits that, in practice, allow them to pay much lower taxes than non residents. According to Law 26/2014, it will be possible to apply tax benefits approved in some Spanish regions to EU residents following specific rules.

In the event that the beneficiary is an entity other than a natural person, the income obtained shall be subject to Corporate Income Tax or Non-Resident Income Tax, as the case may be, and without prejudice, in the latter event, to the provisions of any DTT that may apply.

Tax rules for payments made by the Guarantor

Payments which may be made by the Guarantor to Securityholders, if the Guarantee is enforced, will be subject to the same tax rules previously set out for payments made by the Issuer.

Tax Reporting Obligations of the Issuer and the Guarantor

RD 1145/2011 modified, among other provisions, article 44 of RD 1065/2007, which sets out the reporting obligations applicable to preference shares and debt instruments issued under Law 10/2014. The new procedures apply to interest deriving from preference shares and debt instruments to which Law 10/2014 refers, including debt instruments issued at a discount for a period equal to or less than twelve months.

Securities originally registered with the entities that manage clearing systems located outside Spain

According to the literal wording of article 44.5 of RD 1065/2007, income derived from securities originally registered with the entities that manage clearing systems located outside Spain, that are recognised by Spanish law or by the law of another OECD country (such as Euroclear or Clearstream), will be paid free of Spanish withholding tax provided that the Paying Agent appointed by the Issuer submits a statement to the issuer, in accordance with the form attached as annex to RD 1065/2007 (see "*Supplementary Annex*" below), with the following information:

- (i) identification of the securities; and
- (ii) total amount of the income corresponding to each clearing house located outside Spain.

For these purposes, "income" means interest and the difference, if any, between the aggregate redemption price paid upon the redemption of the Securities and the issue price of the Securities.

In accordance with Section 44 of RD 1065/2007, the statements mentioned above must be provided to the relevant Issuer on the business day immediately prior to each interest payment date. In the event that on the date, the entities obliged to provide the declaration fail to do so, the relevant Issuer or the Paying Agent on its behalf will make a withholding at the general rate (currently 19 per cent.) on the total amount of the return on the relevant Securities otherwise payable to such entity. Regarding the interpretation of Article 44 RD 1065/2007 and the new simplified information procedures please see *"Risk Factors - Spanish Tax Rules may impose withholding tax in certain circumstances (subject to certain exceptions) and neither the Issuer nor the Guarantor is obliged to pay additional amounts in such event."*

Please note that this is for general information purposes only and is not intended to be nor shall it be deemed to be, or constitute legal advice.

Refund by the Spanish tax authorities

Securityholders who might otherwise have been entitled to a gross payment but in respect of whom the Principal Paying Agent does not provide with the relevant Supplementary Annex on or before the 10th calendar day of the month that follows the month in which the interest is payable may seek a refund of Spanish tax withheld directly from the Spanish tax authorities.

Set out below is the Supplementary Annex in English which has been translated from the original Spanish. Such translation constitutes a direct, accurate and complete translation of the Spanish language text. In the event of any discrepancy between the Spanish language version of the Supplementary Annex and the corresponding English translation, the Spanish tax authorities will give effect to the Spanish language version of the relevant Supplementary Annex only.

Tax reporting related to Article 100.3 of the Spanish Personal Income Tax Law

According to Article 100.3 of the Spanish Personal Income Tax Law, in the case of any Individual with tax residence in Spain acquired an Implicit Yield Security, this Individual will only be entitled to either sale or obtain the reimbursement of the Implicit Yield Securities should the income derived from such Securities be subject to withholding tax, if the previous acquisition of these Securities was made with the intervention of a notary or a financial institution in a way that the previous acquisition is duly accredited, as well as the price of the aforementioned acquisition. The issuer or the financial institution in charge of the acquisition that should not make the reimbursement to the holder of the security according to the previous paragraph, must constitute a deposit for said amount at the disposal of the judicial authority.

According to Article 92.2 of the Spanish Individual Income Tax Regulation, either the issuer, or the financial institution acting on its behalf, or the notary, or the financial institution acting or intervening on behalf of the acquirer or depositor, as appropriate, must issue a certification accrediting the following:

- a) Date of the operation and identification of the asset.
- b) Name of the acquirer.
- c) Tax Identification Number of the aforementioned acquirer or depositor.
- d) Acquisition price.

Two copies of the aforementioned certification, which must be issued in triplicate, will be delivered to the acquirer, keeping in its possession another one the person or entity issuing that certification.

TAXATION

Irish Taxation

The following is a summary of the Irish withholding tax treatment of the Securities. It is based on the laws and practice of the Revenue Commissioners currently in force in Ireland as at the date of this Base Prospectus and may be subject to change. The summary does not purport to be a comprehensive description of all of the Irish tax considerations that may be relevant to a decision to purchase, own or dispose of the Securities. The summary does not constitute tax or legal advice and the comments below are of a general nature only and it does not discuss all aspects of Irish taxation that may be relevant to any particular holder of Securities, such as the consequences of the exchange or the conversion of the Securities. The summary does not address certain classes of persons such as entities treated as being associated with the Issuer for Irish tax purposes located in a zero tax, low tax or EU blacklisted jurisdiction. Prospective investors in the Securities should consult their professional advisers on the tax implications of the purchase, holding, redemption or sale of the Securities and the receipt of payments thereon under any laws applicable to them.

Withholding Tax

Irish withholding tax applies to certain payments including payments of:

- (a) Irish source yearly interest (yearly interest is interest payable on a loan that may exist for a period in excess of one year);
- (b) Irish source annual payments (annual payments are payments that are capable of being made for a period in excess of one year and are pure income-profit in the hands of the recipient); and
- (c) distributions (including interest that is treated as a distribution under Irish law) made by companies that are resident in Ireland for the purposes of Irish tax;

at the standard rate of income tax (currently 20 per cent.) in the case of paragraphs (a) and (b) above and at the rate of 25 per cent. in the case of paragraph (c) above.

On the basis that the Issuer is not resident in Ireland for the purposes of Irish tax, nor does the Issuer operate in Ireland through a branch or agency with which the issue of the Securities is connected, nor are the Securities held in Ireland through a depository or otherwise located in Ireland, then to the extent that payments of interest or annual payments arise on the Securities, such payments should not be regarded as payments having an Irish source for the purposes of Irish taxation. Similarly, the mere offering of the Securities to Irish investors or the listing of the Securities, for example, on Euronext Dublin (if applicable) should not cause the interest to have an Irish source.

Accordingly, the Issuer or any paying agent acting on behalf of the Issuer should not be obliged to deduct any amount on account of these Irish withholding taxes from payments made in connection with the Securities.

Separately, for as long as the Securities are quoted on a stock exchange, a purchaser of the Securities should not be obliged to deduct any amount on account of Irish tax from a payment made by it in connection with the purchase of the Securities.

Encashment Tax

Payments on any Securities paid by a paying agent in Ireland or collected or realised by an agent in Ireland acting on behalf of the beneficial owner of Securities should be subject to Irish encashment tax at a 25 per cent. rate, unless the beneficial owner of the Securities entitled to the interest or distribution (i) is not resident in Ireland for the purposes of Irish tax and has made a declaration to this effect in the prescribed form to the chargeable person and such interest or distribution is not deemed, under the provisions of Irish tax legislation, to be income of another person that is resident in Ireland or (ii) is a company which is or will be within the charge to Irish corporation tax in respect of the interest or distribution or (iii) is otherwise resident for the purposes of tax in Ireland and entitled to exemption from encashment tax in accordance with Schedule 2 of the Taxes Consolidation Act 1997 on a claim be made in the required manner to the Revenue Commissioners in Ireland.

TAXATION

Italian Taxation

The statements herein regarding Italian taxation are based on the laws in force and published practices of the Italian tax authorities issue as at the date of this Base Prospectus and is subject to any changes in law and interpretation occurring after such date, which changes could be made on a retroactive basis.

The following summary does not purport to be a comprehensive description of all the tax considerations which may be relevant to a decision to subscribe for, purchase, own or dispose of the Securities and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities or commodities) may be subject to additional or special rules. This summary does not describe the tax consequences for an investor with respect to Securities that may be redeemed by physical delivery (including Securities granting entitlement to receive assets qualifying as shares or other participations in the share capital or assets of Italian companies) nor the tax consequences for an investor with respect to the disposal or holding of the relevant assets that may be received through redemption by physical delivery of the relevant Securities (including assets qualifying as shares or other participations in the share capital or assets of Italian companies).

Prospective purchasers of the Securities are advised to consult their own tax advisors concerning the overall tax consequences of their ownership of the Securities. This summary will not be updated to reflect changes in laws or interpretation and if such a change occurs the information in this summary may become invalid.

In any case, Italian legal or tax concepts may not be identical to the concepts described by the same English term as they exist under terms of different jurisdictions and any legal or tax concept expressed by using the relevant Italian term shall prevail over the corresponding concept expressed in English terms.

Law No. 111 of 9 August 2023, published in the Official Gazette No. 189 of 14 August 2023 ("Law 111"), delegates power to the Italian Government to enact, within twenty-four months from its publication, one or more legislative decrees implementing the reform of the Italian tax system (the "Tax Reform"). According to Law 111, the Tax Reform will significantly change the taxation of financial incomes and capital gains and introduce various amendments in the Italian tax system at different levels. The precise nature, extent, and impact of these amendments cannot be quantified or foreseen with certainty at this stage.

Italian tax treatment of proceeds payable under the Securities

As clarified by the Italian tax authorities in Resolution No. 72/E of 12 July 2010, the Italian tax consequences of the purchase, ownership and disposal of the Securities may be different depending on whether:

- (a) they represent a securitised debt claim, implying a static "use of capital" (*impiego di capitale*), through which the subscriber of the Securities transfers to the Issuer a certain amount of capital for the purpose of obtaining a remuneration on the same capital and subject to the right to obtain its (partial or entire) reimbursement at maturity; or
- (b) they represent a securitised derivative financial instrument or bundle of derivative financial instruments not entailing a "use of capital" (*impiego di capitale*), through which the subscriber of the Securities invests indirectly in underlying financial instruments for the purpose of obtaining a profit deriving from the negotiation of such underlying financial instruments.

1. Tax treatment of Securities qualifying as bond or debentures similar to bonds

Legislative Decree No. 239 of 1 April 1996, as subsequently amended ("**Decree 239**"), provides for the applicable regime with respect to the tax treatment of interest, premium and other income (including the difference between the redemption amount and the issue price) from Securities falling within the category of bonds (*obbligazioni*) or debentures similar to bonds (*titoli similari alle obbligazioni*) issued, inter alia, by non-Italian resident issuers.

For these purposes, debentures similar to bonds are defined as debt instruments that:

- (a) incorporate an unconditional obligation to pay, at maturity, an amount not less than their nominal value (whether or not providing for any other periodic payment);
- (b) do not give any right to directly or indirectly participate in the management of the issuer or of the business in relation to which they are issued nor any type of control over the management; and

TAXATION

- (c) do not attribute the holders direct or indirect right to control or participate in the management of the issuer or in the management of the business in respect of which the notes have been issued.

Italian resident investor

Where an Italian resident investor is (i) an individual not engaged in an entrepreneurial activity to which the Securities are connected (unless he has opted for the application of the "*risparmio gestito*" regime where applicable – see "*Capital Gains Tax*" below (a "**Non-entrepreneurial Investor**"), (ii) a non-commercial partnership pursuant to Article 5 of the Italian Income Consolidated Code ("**TUIR**") (with the exception of general partnership, limited partnership and similar entities), (iii) a non-commercial private or public institution, or (iv) an investor exempt from Italian corporate income taxation (a "**Non-commercial Resident Investor**") interest, premium and other income relating to the Securities, accrued during the relevant holding period, are subject to a substitute tax, referred to as "*imposta sostitutiva*", levied at the rate of 26 per cent. In the event that the investor described under (i) and (iii) above is engaged in an entrepreneurial activity to which the Securities are connected, the *imposta sostitutiva* applies as a provisional tax and may be deducted from the final income tax due by the relevant investor.

Subject to certain limitations and requirements (including a minimum holding period), Italian resident individuals not acting in connection with an entrepreneurial activity may be exempt from any income taxation, including the *imposta sostitutiva*, on interest, premium and other income relating to the Securities if the Securities are included in a long-term savings account (*piano di risparmio a lungo termine*) that meets the requirements set forth in the Italian Law.

Where an Italian resident investor is a company or similar commercial entity pursuant to Article 73 of TUIR or a permanent establishment in Italy of a foreign company to which the Securities are effectively connected and the Securities are deposited with an authorised intermediary, interest, premium and other income from the Securities will not be subject to *imposta sostitutiva*, but must be included in the relevant investor's income tax return and are therefore subject to general Italian corporate taxation ("**IRES**"), generally levied at the rate of 24 per cent.) and, in certain circumstances, depending on the 'status' of the investor, also to the regional tax on productive activities ("**IRAP**"), generally levied at the rate of 3.90 per cent., but regional surcharges may apply).

If the investor is resident in Italy and is an open-ended or closed-ended investment fund (subject to the regime provided for by Law No. 77 of 23 March 1983, a "**Fund**") or a SICAV, and the Securities are held by an authorised intermediary, interest, premium and other income accrued during the holding period on the Securities will not be subject to *imposta sostitutiva* but must be included in the management result of the Fund or the SICAV. The Fund or SICAV will not be subject to taxation on such result, but a withholding tax at the rate of 26 per cent. will be levied on proceeds distributed by the Funds or the SICAV to certain categories of unitholders upon redemption or disposal of the units. The same tax regime applies to payments of interest made to an Italian resident SICAF not mainly investing in real estate assets and governed by Legislative Decree No. 44 of 4 March 2014.

Where an Italian resident investor is a pension fund (subject to the regime provided for by Article 17 of Legislative Decree No. 252 of 5 December 2005) and the Securities are deposited with an authorised intermediary, interest, premium and other income relating to the Securities and accrued during the holding period will not be subject to *imposta sostitutiva*, but must be included in the result of the relevant portfolio accrued at the end of the tax period, to be subject to the 20 per cent. substitute tax applicable to Italian pension funds.

Italian real estate funds created under Article 37 of Italian Legislative Decree No. 58 of 24 February 1998 and Article 14 bis of Law No. 86 of 25 January 1994 are not subject to any substitute tax at the fund level nor to any other income tax in the hands of the fund. A withholding tax may apply in certain circumstances at the rate of 26 per cent. on distributions made by real estate investment funds. The same tax regime applies to payments of interest made to an Italian resident SICAF mainly investing in real estate assets and governed by Legislative Decree No. 44 of 4 March 2014.

Pursuant to Decree No. 239, *imposta sostitutiva* is applied by banks, *Società di intermediazione mobiliare* ("**SIMs**") by fiduciary companies, and *Società di gestione del risparmio* ("**SGRs**") by stockbrokers and other entities identified by a decree of the Ministry of Economics and Finance (each, an "**Intermediary**").

For the Intermediary to be entitled to apply the *imposta sostitutiva*, it must: (i) be (a) resident in Italy or (b) resident outside Italy, with a permanent establishment in Italy or (c) an entity or a company not resident in Italy, acting through a system of centralised administration of securities and directly connected with the Department of

TAXATION

Revenue of the Italian Ministry of Finance having appointed an Italian representative for the purposes of Decree 239; and (ii) intervene, in any way, in the collection of interest or in the transfer of the Securities. For the purpose of the application of the *imposta sostitutiva*, a transfer of Securities includes any assignment or other act, either with or without consideration, which results in a change of the ownership of the relevant Securities.

Where the Securities are not deposited with an Intermediary, the *imposta sostitutiva* is applied and withheld by any entity paying interest to an investor. If interest and other proceeds on the Securities are not collected through an Intermediary or any entity paying interest and as such no *imposta sostitutiva* is levied, the Italian resident beneficial owners listed above under (i) to (iv) will be required to include interest and other proceeds in their yearly income tax return and subject them to a final substitute tax at a rate of 26 per cent.

Non-Italian resident investor

No Italian *imposta sostitutiva* is applied on payments to a non-Italian resident investor of interest or premium relating to the Securities provided that, if the Securities are held in Italy, the non-Italian resident investor declares itself to be a non-Italian resident according to Italian tax regulations.

Capital gains tax

Italian resident investor

Where the Italian resident investor is a Non-commercial Resident Investor, capital gains accrued under the sale, or the redemption of the Securities are subject to a 26 per cent. substitute tax (*imposta sostitutiva*).

The Italian resident individuals not engaged in an entrepreneurial activity to which the Securities are connected ("**Non-entrepreneurial Investors**") may opt for three different taxation criteria.

Under the tax declaration regime (*regime della dichiarazione*), which is the default regime for taxation of capital gains realised by Non-entrepreneurial Investors, the *imposta sostitutiva* on capital gains will be chargeable, on a yearly cumulative basis, on all capital gains, net of any offsettable capital loss, realised by Non-entrepreneurial Investors pursuant to all sales or redemptions of the Securities carried out during any given tax year. Non-entrepreneurial Investors must indicate the overall capital gains realised in any tax year, net of any relevant incurred capital loss, in the annual tax return and pay *imposta sostitutiva* on such gains together with any balance income tax due for such year. Capital losses in excess of capital gains may be carried forward against capital gains realised in any of the four succeeding tax years.

As an alternative to the tax declaration regime, Non-entrepreneurial Investors may elect to pay the *imposta sostitutiva* separately on capital gains realised on each sale or redemption of the Securities (the "*risparmio amministrato*" regime provided for by Article 6 of Legislative Decree No. 461 of 21 November 1997 ("**Decreto No.461**")). Such separate taxation of capital gains is allowed subject to (i) the Securities being deposited with Italian banks, SIMs or certain authorised financial intermediaries and (ii) an express valid election for the *risparmio amministrato* regime being punctually made in writing by the relevant investor. The depository is responsible for accounting for *imposta sostitutiva* in respect of capital gains realised on each sale or redemption of the Securities (as well as in respect of capital gains realised upon the revocation of its mandate), net of any incurred capital loss, and is required to pay the relevant amount to the Italian tax authorities on behalf of the taxpayer, deducting a corresponding amount from the proceeds to be credited to the investor or using funds provided by the investor for this purpose. Under the *risparmio amministrato* regime, where a sale or redemption of the Securities results in a capital loss, such loss may be deducted from capital gains subsequently realised, within the same securities management, in the same tax year or in the following tax years up to the fourth. Under the *risparmio amministrato* regime, the investor is not required to declare the capital gains in the annual tax return.

Any capital gains realised or accrued by Non-entrepreneurial Investors who have entrusted the management of their financial assets, including the Securities, to an authorised intermediary and have validly opted for the so-called *risparmio gestito* regime (regime provided for by Article 7 of Decree No. 461) will be included in the computation of the annual increase in value of the managed assets accrued, even if not realised, at year end, subject to a 26 per cent. substitute tax, to be paid by the managing authorised intermediary. Under this *risparmio gestito* regime, any depreciation of the managed assets accrued at year end may be carried forward against increase in value of the managed assets accrued in any of the four succeeding tax years. Under the *risparmio gestito* regime, the investor is not required to declare the capital gains realised in the annual tax return.

TAXATION

Subject to certain limitations and requirements (including a minimum holding period), capital gains in respect of Securities realised upon sale, transfer or redemption by Italian resident individuals holding the Securities not in connection with an entrepreneurial activity may be exempt from taxation, including the 26 per cent. *imposta sostitutiva*, if the Securities are included in a long-term individual savings account (*piano individuale di risparmio a lungo termine*) pursuant to the applicable Italian Law.

Where an Italian resident investor is a company or similar commercial entity, or the Italian permanent establishment of a foreign commercial entity to which the Securities are effectively connected, capital gains arising from the Securities will not be subject to *imposta sostitutiva*, but must be included in the relevant investor's income tax return and are therefore subject to Italian corporate tax and, in certain circumstances, depending on the 'status' of the investor, also form part of the net value of production for IRAP purposes.

Any capital gains realised by an investor which is a Fund or a SICAV will not be subject to *imposta sostitutiva* but will be included in the result of the relevant portfolio. Such result will not be taxed with the Fund or SICAV, but a withholding tax up at the rate of 26 per cent. will be levied on proceeds distributed by the Funds or the SICAV to certain categories of unitholders upon redemption or disposal of the units. The same tax regime applies to capital gains realised by an Italian resident SICAF not mainly investing in real estate assets and governed by Legislative Decree No. 44 of 4 March 2014.

Any capital gains realised by an investor which is an Italian pension fund (subject to the regime provided by Article 17 the Legislative Decree No. 252 of 5 December 2005) will be included in the result of the relevant portfolio accrued at the end of the tax period, to be subject to the 20 per cent. substitute tax applicable to Italian pension funds.

Any capital gains realised by an Italian real estate fund created under Article 37 of Italian Legislative Decree No. 58 of 24 February 1998 and Article 14 bis of Law No. 86 of 25 January 1994 shall not be subject to any substitute tax at the fund level nor to any other income tax in the hands of the fund. A withholding tax may apply in certain circumstances at the rate of 26 per cent. on distributions made by real estate investment funds. The same tax regime applies to capital gains realised by an Italian resident SICAF mainly investing in real estate assets and governed by Legislative Decree No. 44 of 4 March 2014.

Non-Italian resident investor

Capital gains realised by a non-Italian resident beneficial owner are not subject to Italian taxation provided that the Securities (i) are transferred on regulated markets, or (ii) if not transferred on regulated markets, are held outside Italy. Moreover, even if the Securities are held in Italy, no *imposta sostitutiva* applies if the non-Italian resident investor is resident for tax purposes in a country which recognises the Italian tax authorities' right to an adequate exchange of information or in a country which entered into a double taxation treaty with Italy allowing for the taxation of such capital gains only in the residence country of the recipient investor, provided that the relevant procedures and conditions are met.

2. Securitised derivatives

Pursuant to the generally followed interpretation, if the Securities qualify as securitised derivatives, where the Italian resident investor is (i) an individual not engaged in an entrepreneurial activity to which the Securities are connected, (ii) a non-commercial partnership, pursuant to Article 5 of TUIR (with the exception of general partnership, limited partnership and similar entities) (iii) a non-commercial private or public institution, or (iv) an investor exempt from Italian corporate income taxation (a "**Non-commercial Resident Investor**"), capital gains realised under the sale or the exercise of Securities are subject to a 26 per cent. substitute tax (*imposta sostitutiva*) (Article 67 of TUIR and Decree No. 461).

The Italian resident individuals not engaged in an entrepreneurial activity to which the Securities are connected ("**Non-entrepreneurial Investors**") may opt for three different taxation criteria.

Under the tax declaration regime (*regime della dichiarazione*), which is the default regime for taxation of capital gains realised by Non-entrepreneurial Investors (as defined under this paragraph), the *imposta sostitutiva* on capital gains will be chargeable, on a yearly cumulative basis, on all capital gains, net of any offsettable capital loss, realised by Non-entrepreneurial Investors (as defined under this paragraph) pursuant to all sales or redemptions of Securities carried out during any given tax year. Non-entrepreneurial Investors (as defined under this paragraph) must indicate the overall capital gains realised in any tax year, net of any relevant incurred capital

TAXATION

loss, in the annual tax return and pay *imposta sostitutiva* on such gains together with any balance income tax due for such year. Capital losses in excess of capital gains may be carried forward against capital gains realised in any of the four succeeding tax years.

As an alternative to the tax declaration regime, Non-entrepreneurial Investors (as defined under this paragraph) may elect to pay the *imposta sostitutiva* separately on capital gains realised on each sale or redemption of Securities (the "*risparmio amministrato*" regime provided for by Article 6 of Decree No. 461). Such separate taxation of capital gains is allowed subject to (i) the Securities being deposited with Italian banks, SIMs or certain authorised financial intermediaries and (ii) an express valid election for the *risparmio amministrato* regime being punctually made in writing by the relevant investor. The depository is responsible for accounting for *imposta sostitutiva* in respect of capital gains realised on each sale or redemption of Securities (as well as in respect of capital gains realised upon the revocation of its mandate), net of any incurred capital loss, and is required to pay the relevant amount to the Italian tax authorities on behalf of the taxpayer, deducting a corresponding amount from the proceeds to be credited to the investor or using funds provided by the investor for this purpose. Under the *risparmio amministrato* regime, where a sale or redemption of Securities results in a capital loss, such loss may be deducted from capital gains subsequently realised, within the same securities management, in the same tax year or in the following tax years up to the fourth. Under the *risparmio amministrato* regime, the investor is not required to declare the capital gains in the annual tax return.

Any capital gains realised or accrued by Non-entrepreneurial Investors (as defined under this paragraph) who have entrusted the management of their financial assets, including the Securities, to an authorised intermediary and have validly opted for the so-called "*risparmio gestito*" regime (regime provided for by Article 7 of Decree No. 461) will be included in the computation of the annual increase in value of the managed assets accrued, even if not realised, at year end, subject to a 26 per cent. substitute tax, to be paid by the managing authorised intermediary. Under this *risparmio gestito* regime, any depreciation of the managed assets accrued at year end may be carried forward against increase in value of the managed assets accrued in any of the four succeeding tax years. Under the *risparmio gestito* regime, the investor is not required to declare the capital gains realised in the annual tax return.

Subject to certain limitations and requirements (including a minimum holding period), capital gains in respect of Securities realised upon sale, transfer or redemption by Italian resident individuals holding the Securities not in connection with an entrepreneurial activity may be exempt from taxation, including the 26 per cent. *imposta sostitutiva*, if the Securities are included in a long-term individual savings account (*piano individuale di risparmio a lungo termine*) pursuant pursuant to the applicable Italian Law.

Where an Italian resident investor is a company or similar commercial entity, or the Italian permanent establishment of a foreign commercial entity to which the Securities are effectively connected, capital gains arising from Securities will not be subject to *imposta sostitutiva*, but must be included in the relevant investor's income tax return and are therefore subject to Italian corporate tax and, in certain circumstances, depending on the 'status' of the investor, also form part of the net value of production for IRAP purposes.

Any capital gains realised by an investor which is an open-ended or close-ended investment fund (subject to the tax regime provided by Law No. 77 of 23 March 1983, a "**Fund**") or a SICAV will be included in the result of the relevant portfolio accrued and will not be subject to substitutive tax nor to any other income tax in the hands of the Fund or the SICAV, but a withholding tax at the rate of 26 per cent. will be levied on proceeds distributed by the Funds or the SICAV to certain categories of unitholders upon redemption or disposal of the units. The same tax regime applies to capital gains realised by an Italian resident SICAF not mainly investing in real estate assets and governed by Legislative Decree No. 44 of 4 March 2014.

Any capital gains realised by an investor which is an Italian pension fund (subject to the regime provided by Article 17 of Legislative Decree No. 252 of 5 December 2005) will be included in the result of the relevant portfolio accrued at the end of the tax period, to be subject to the 20 per cent. substitute tax applicable to Italian pension funds.

Any capital gains realised by an Italian real estate fund created under Article 37 of Italian Legislative Decree No. 58 of 24 February 1998 and Article 14 bis of Law No. 86 of 25 January 1994 shall not be subject to any substitute tax at the fund level nor to any other income tax in the hands of the fund. A withholding tax may apply in certain circumstances at the rate of 26 per cent. on distributions made by real estate investment funds. The same tax regime applies to capital gains realised by an Italian resident SICAF mainly investing in real estate assets and governed by Legislative Decree No. 44 of 4 March 2014.

TAXATION

Capital gains realised by a non-Italian resident beneficial owner are not subject to Italian taxation provided that Securities (i) are transferred on regulated markets, or (ii) if not transferred on regulated markets, are held outside of Italy. Moreover, even if the Securities are held in Italy, no *imposta sostitutiva* applies if the non-Italian resident investor is resident for tax purposes in a country which recognises the Italian tax authorities' right to an adequate exchange of information or in a country which entered into a double taxation treaty with Italy allowing for the taxation of such capital gains only in the residence country of the recipient investor, provided that the relevant procedures and conditions are met.

In accordance with a different interpretation of current tax law, it is possible that Securities would be considered as "*atypical securities*" pursuant to Article 8 of Law Decree No. 512 of 30 September 1983 as implemented by Law No. 649 of 25 November 1983. In this event, payments relating to Securities may be subject to the tax treatment applicable to the "*atypical securities*" as indicated below.

3. Tax treatment of Securities qualifying as atypical securities

Securities that cannot be qualified as securitised derivatives or instruments similar to bonds under TUIR could be considered 'atypical' securities pursuant to Article 8 of Law Decree No. 512 of 30 September 1983 as implemented by Law No. 649 of 25 November 1983. In this event, payments relating to Securities may be subject to an Italian withholding tax, levied at the rate of 26 per cent.

The 26 per cent. withholding tax mentioned above does not apply to payments made to a non-Italian resident holder of the Securities and to an Italian resident holder of the Securities which is (i) a company or similar commercial entity (including the Italian permanent establishment of foreign entities), (ii) a commercial partnership, or (iii) a commercial private or public institution.

If the Securities are placed (*collocati*) in Italy, the withholding is levied by the Italian intermediary appointed by the Issuer, intervening in the collection of the relevant income or in the negotiation or repurchasing of the Securities. If the Securities are not placed (*collocati*) in Italy or in any case where payments on the Securities are not received through an entrusted Italian resident bank or financial intermediary (that is involved in the collection of payments on the Securities, in the repurchase or in the negotiation thereof) and no withholding tax is levied, the individual beneficial owners will be required to declare the payments in their income tax return and subject them to a final substitute tax at a rate of 26 per cent. The Italian individual investor may elect instead to pay ordinary personal income tax at the progressive rates applicable to them in respect of the payments; if so, the investor should generally benefit from a tax credit for withholding taxes applied outside Italy, if any.

Inheritance and gift taxes

Pursuant to Law Decree No. 262 of 3 October 2006, converted into Law No. 286 of 24 November 2006, the transfers of any valuable asset (including shares, bonds or other securities) as a result of death or donation are taxed as follows:

- transfers in favour of spouses and direct descendants or direct ancestors are subject to an inheritance and gift tax applied at a rate of 4 per cent. on the value of the inheritance or the gift exceeding EUR 1,000,000;
- transfers in favour of relatives to the fourth degree and relatives-in-law to the third degree are subject to an inheritance and gift tax applied at a rate of 6 per cent. on the entire value of the inheritance or the gift. Transfers in favour of brothers/sisters are subject to the 6 per cent. inheritance and gift tax on the value of the inheritance or the gift exceeding EUR 100,000; and
- any other transfer is, in principle, subject to an inheritance and gift tax applied at a rate of 8 per cent. on the entire value of the inheritance or the gift.

If the transfer is made in favour of persons with severe disabilities, the tax applies on that part of value that exceeds Euro 1,500,000.

Moreover, an anti-avoidance rule is provided in case of gift of assets, such as the Securities, whose sale for consideration would give rise to capital gains to be subject to the *imposta sostitutiva* provided for by Decree No. 461, as subsequently amended. In particular, if the donee sells the Securities for consideration within five years

TAXATION

from their receipt as a gift, the latter is required to pay the relevant *imposta sostitutiva* as if the gift had never taken place.

Subject to certain limitations and requirements, transfers of Securities as a result of death (but not as a result of an *inter vivos* gift or other transfers for no consideration) of Italian resident individuals holding the Securities not in connection with an entrepreneurial activity may be exempt from Italian inheritance tax if the Securities are included in a long-term individual savings account (*piano individuale di risparmio a lungo termine*) pursuant pursuant to the applicable Italian Law.

Transfer tax

Contracts relating to the transfer of securities are subject to the registration tax as follows: (i) public deeds and notarised deeds are subject to fixed registration tax at a rate of EUR 200; and (ii) private deeds are subject to registration tax only in case of use or voluntary registration.

Stamp duty

Pursuant to Article 19(1) of Decree No. 201 of 6 December 2011 ("**Decree 201**"), a proportional stamp duty applies on an annual basis to the periodic reporting communications sent by financial intermediaries to their clients for the securities deposited therewith. The stamp duty applies at a rate of 0.20 per cent. and, for taxpayers other than individuals, cannot exceed EUR14,000. This stamp duty is determined on the basis of the market value or – if no market value figure is available – the nominal value or redemption amount of the securities held. In case of reporting periods of less than 12 months, the stamp duty is pro-rated.

It may be understood that the stamp duty applies both to Italian resident and non-Italian resident investors, to the extent that the Securities are held with an Italian-based financial intermediary.

Stamp duty applies both to Italian resident and to non-Italian resident investors, to the extent that the relevant securities (including the Securities) are held with an Italian-based financial intermediary (and not directly held by the investor outside Italy), in which case Italian wealth tax (see below under "*Wealth tax on financial products held abroad*") applies to Italian resident investors only.

Wealth tax on securities deposited abroad

Pursuant to Article 19(18) of Decree 201, Italian resident individuals, individuals non-commercial entities and certain partnerships (*società semplici* or similar partnerships in accordance with Article 5 of Decree No. 917) resident in Italy for tax purposes holding the securities outside the Italian territory are required to pay an additional tax at a rate of 20 per cent. for each year (0.4 per cent., as of 2024, in case of financial assets held in States or territories with privileged tax regime identified by the Ministerial Decree of the Ministry of Economy and Finance of May 4, 1999) (**IVAFE**). For taxpayers other than individuals, IVAFE cannot exceed Euro 14,000 per year.

This tax is calculated on the market value of the Securities at the end of the relevant year, or – if no market value figure is available – the nominal value or the redemption value of such financial assets held outside the Italian territory. Taxpayers are entitled to an Italian tax credit equivalent to the amount of wealth taxes paid in the state where the financial assets are held (up to an amount equal to the Italian wealth tax due).

Italian Financial Transaction Tax

Law No. 228 of 24 December 2012 (the "**Stability Law**") introduced a fixed levy Italian Financial Transaction Tax ("**Italian FTT**") that applies to all transactions involving equity derivatives which have Italian shares, Italian equity-like instruments or Italian equity-related instruments as their underlying assets. An equity derivative is subject to the Italian FTT if the underlying or reference value constitutes more than 50 per cent. of the market value of Italian shares, Italian equity-like instruments or Italian equity-related instruments. The Italian FTT applies even if the transfer takes place outside Italy and/or any of the parties to the transaction are not resident in Italy. The Italian FTT on derivative trades also applies to transactions in bonds and debt securities which allow the acquisition, or the transfer of the financial instruments referred to above and which do not entail an unconditional obligation to pay, at maturity, an amount not lower than their nominal value. The amount of tax due depends on the type of derivative instrument and on the contract's value but is subject to a maximum of EUR 200. This Italian FTT is reduced to one-fifth of the relevant amount if the transfer takes place on a regulated market or multilateral trading system.

TAXATION

Securities could be included in the scope of application of the Italian FTT if they meet the requirements set out above. On the other hand, Securities falling within the category of bonds (*obbligazioni*) or debentures similar to bonds (*titoli similari alle obbligazioni*) are not included in the scope of the Italian FTT.

The Italian FTT on derivatives instruments is due from each party involved in the relevant transaction. The Italian FTT must be paid and accounted for to the Italian tax authorities by any intermediary intervening in any way in the execution of such transactions, e.g. banks, fiduciary companies or investment firms licensed to provide investment services on a professional basis to the public in accordance with Article 18 of Italian Legislative Decree No. 58 of 24 February 1998, including non-Italian resident intermediaries. However, an intermediary is permitted to refrain from executing the relevant transaction until it has received from the relevant person referred to above the amount of Italian FTT due on the transaction. In terms of compliance with the Italian FTT, non-Italian resident intermediaries may: (i) fulfil all the relevant obligations through their Italian permanent establishment, if any; (ii) appoint an Italian withholding agent as a tax representative; or (iii) identify themselves by filing a request with the Italian Tax Administration for an Italian tax code. In the event that several financial intermediaries are involved, the obligation to make payment of the Italian FTT to the Italian tax authorities falls on the party that directly receives the transaction order from the parties. If no intermediary is involved in a transaction, the relevant parties referred to above must pay the Italian FTT due directly to the Italian tax authorities.

If a derivative is equity-settled, the consequent share transaction is ordinarily subject to the Italian FTT on equity transactions (i.e. a stamp duty-like Italian FTT of 0.2 per cent. on the transfer of shares and other equity-like instruments issued by Italian resident entities). Some exemptions and exclusions may apply.

Tax monitoring obligations

Italian resident individuals (and certain other entities) are required to report in their yearly income tax return, according to Law Decree No. 167 of 28 June 1990, converted into law by Law No. 227 of 4 August 1990, for tax monitoring purposes; the amount of Securities held abroad (or beneficially owned abroad under Italian anti-money laundering provisions). This also applies in the case that at the end of the tax year, Securities are no longer held by the above Italian resident individuals and entities.

However, the above reporting obligation is not required with respect to Securities deposited for management with qualified Italian financial intermediaries and with respect to contracts entered into through their intervention, provided that the same intermediaries apply a withholding tax *or imposta sostitutiva* on any income derived from the Securities.

Dutch Taxation

General

The following is a general summary of certain material Dutch tax consequences of the acquisition, holding and disposal of the Securities. This summary does not purport to describe all possible tax considerations or consequences that may be relevant to a holder or prospective holder of Securities and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as trusts or similar arrangements) may be subject to special rules. In view of its general nature, this general summary should be treated with corresponding caution. For purposes of Dutch tax law, a Securityholder may include an individual or entity who does not have the legal title of these Securities, but to whom nevertheless the Securities or the income thereof is attributed based on specific statutory provisions or on the basis of such individual or entity having an interest in the Securities or the income thereof.

This summary is based on the tax laws of the Netherlands, published regulations thereunder, published authoritative case law and the Convention, all as in effect on the date hereof, and all of which are subject to change, possibly with retroactive effect. Where the summary refers to "the Netherlands" or "Dutch" it refers only to the part of the Kingdom of the Netherlands located in Europe. In addition, the summary is based on the assumption that the Securities issued by the Issuer do not qualify as equity of the Issuer for Dutch tax purposes.

This discussion is for general information purposes only and is not Dutch tax advice or a complete description of all Dutch tax consequences relating to the acquisition, holding and disposal of the Securities. Holders or prospective holders of Securities should consult their own tax advisors regarding the Dutch tax consequences relating to the acquisition, holding and disposal of the Securities in light of their particular circumstances.

TAXATION

This summary does not address the Dutch corporate and individual income tax consequences for:

- (a) investment institutions (fiscale beleggingsinstellingen);
- (b) pension funds, exempt investment institutions (*vrijgestelde beleggingsinstellingen*) or other Dutch tax resident entities that are not subject to or exempt from Dutch corporate income tax;
- (c) holders of Securities holding a substantial interest (*aanmerkelijk belang*) or deemed substantial interest (*fictief aanmerkelijk belang*) in the Issuer and holders of Securities of whom a certain related person holds a substantial interest in the Issuer. Generally speaking, a substantial interest in the Issuer arises if a person, alone or, where such person is an individual, together with his or her partner (statutorily defined term), directly or indirectly, holds or is deemed to hold (i) an interest of 5 per cent. or more of the total issued capital of the Issuer or 5 per cent. or more of the issued capital of a certain class of shares of the Issuer, (ii) rights to acquire, directly or indirectly, such interest or (iii) certain profit-sharing rights in the Issuer;
- (d) persons to whom the Securities and the income therefrom are attributed based on the separated private assets (*afgezonderd particulier vermogen*) provisions of the Dutch Income Tax Act 2001 (*Wet inkomstenbelasting 2001*);
- (e) entities which are a resident of Aruba, Curaçao or Sint Maarten and that have an enterprise which is carried on through a permanent establishment or a permanent representative on Bonaire, Sint Eustatius or Saba and the Securities are attributable to such permanent establishment or permanent representative; and
- (f) individuals to whom the Securities or the income there from are attributable to employment activities which are taxed as employment income in the Netherlands.

This summary does not describe the consequences of the exchange or the conversion of the Securities.

Tax position of the Issuer

Under the Convention, the Issuer is considered to be solely resident of Spain for tax purposes and therefore the Netherlands should refrain from levying corporate income tax on profits generated by the Issuer, except if and to the extent such profits are allocable to a Dutch permanent establishment or permanent representative of the Issuer.

Dutch Withholding tax

All payments of interest and principal made by or on behalf of the Issuer under the Securities may be made free of withholding or deduction of, for or on account of any taxes of whatever nature imposed, levied, withheld or assessed by the Netherlands or any political subdivision or taxing authority thereof or therein, except that Dutch withholding tax at a rate of 25.8 per cent. (rate for 2025) may apply with respect to payments of interest made or deemed to be made by or on behalf of the Issuer, if the interest payments are made or deemed to be made to an entity affiliated (*gelieerd*) to the Issuer (within the meaning of the Dutch Withholding Tax Act 2021; *Wet bronbelasting 2021*) (see below), if such affiliated entity:

- (a) is considered to be resident (*gevestigd*) in a jurisdiction that is listed in the yearly updated Dutch Regulation on low-taxing states and non-cooperative jurisdictions for tax purposes (*Regeling laagbelastende staten en niet-coöperatieve rechtsgebieden voor belastingdoeleinden*) (a "Listed Jurisdiction"); or
- (b) has a permanent establishment located in a Listed Jurisdiction to which the interest payment is attributable; or
- (c) is entitled to the interest payment with the main purpose or one of the main purposes of avoiding taxation for another person or entity and there is an artificial arrangement or transaction or a series of artificial arrangements or transactions; or
- (d) is not considered to be the recipient of the interest in its jurisdiction of residence because such jurisdiction treats another (lower-tier) entity as the recipient of the interest (a hybrid mismatch); or

TAXATION

- (e) is not resident in any jurisdiction (also a hybrid mismatch); or
- (f) is a reverse hybrid whereby the jurisdiction of residence of a higher-tier beneficial owner (*achterliggende gerechtigde*) that has a qualifying interest (*kwalificerend belang*) in the reverse hybrid treats the reverse hybrid as tax transparent and that higher-tier beneficial owner (*achterliggende gerechtigde*) would have been taxable based on one (or more) of the items in (a)-(e) above had the interest been due to him directly,

all within the meaning of the Dutch Withholding Tax Act 2021.

Affiliated entity

For purposes of the Dutch Withholding Tax Act 2021, an entity is considered an entity affiliated (*gelieerd*) to the Issuer if:

- (a) such entity has a Qualifying Interest (as defined below) in the Issuer;
- (b) the Issuer has a Qualifying Interest in such entity; or
- (c) a third party has a Qualifying Interest in both the Issuer and such entity.

The term "Qualifying Interest" means a direct or indirectly held interest – either by an entity individually or jointly if an entity is part of a qualifying unity (*kwalificerende eenheid*) – that enables such entity or such qualifying unity to exercise a definite influence over another entity's decisions and allows it to determine the other entity's activities (within the meaning of case law of the European Court of Justice on the right of freedom of establishment (*vrijheid van vestiging*)).

Taxes on income and capital gains

Residents of the Netherlands

If a Securityholder is a resident of the Netherlands or deemed to be a resident of the Netherlands for Dutch corporate income tax purposes and is fully subject to Dutch corporate income tax or is only subject to Dutch corporate income tax in respect of an enterprise to which the Securities are attributable, income derived from the Securities and gains realised upon the redemption, settlement or disposal of the Securities are generally taxable in the Netherlands (at up to a maximum rate of 25.8 per cent.).

If an individual is a resident of the Netherlands or deemed to be a resident of the Netherlands for Dutch individual income tax purposes, income derived from the Securities and gains realised upon the redemption, settlement or disposal of the Securities are taxable at the progressive rates (at up to a maximum rate of 49.5 per cent.) under the Dutch Income Tax Act 2001, if:

- (a) the individual is an entrepreneur (*ondernemer*) and has an enterprise to which the Securities are attributable or the individual has, other than as a shareholder, a co-entitlement to the net worth of an enterprise (*medegerechtigde*), to which enterprise the Securities are attributable; or
- (b) such income or gains qualify as income from miscellaneous activities (*resultaat uit overige werkzaamheden*), which includes activities with respect to the Securities that exceed regular, active portfolio management (*normaal, actief vermogensbeheer*).

If neither condition (a) nor condition (b) above applies, an individual that holds the Securities, must in principle determine taxable income with regard to the Securities on the basis of a deemed return on savings and investments (*sparen en beleggen*). This deemed return on savings and investments is determined based on the individual's yield basis (*rendementsgrondslag*) at the beginning of the calendar year (1 January), insofar as the individual's yield basis exceeds a statutory threshold (*heffingvrij vermogen*) (EUR 57,684 in 2025). The individual's yield basis is determined as the fair market value of certain qualifying assets held by the individual less the fair market value of certain qualifying liabilities on 1 January. The individual's deemed return is calculated by multiplying the individual's yield basis with a 'deemed return percentage' (*effectief rendementspercentage*), which percentage depends on the actual composition of the yield basis, with separate deemed return percentages for savings

TAXATION

(*banktegoeden*), other investments (*overige bezittingen*) and debts (*schulden*). As of 1 January 2025, the percentage for other investments, which include the Securities, is set at 5.88 per cent.

However, on 6 June 2024 the Dutch Supreme Court (*Hoge Raad*) ruled in a number of cases that the current system of taxation in relation to an individual's savings and investments based on a 'deemed return' contravenes with Section 1 of the First Protocol to the European Convention on Human Rights in combination with Section 14 of the European Convention on Human Rights if the deemed return applicable to the savings and investments exceeds the actual return in the respective calendar year. A legislative proposal, i.e. the Dutch Counterevidence Act (*Wet tegenbewijsregeling box 3*), was submitted to codify the case law of the Dutch Supreme Court, including the calculation of the actual return. If an individual demonstrates that the actual is lower than the deemed return, only the actual return should be taxed under the regime for savings and investments. The Dutch Counterevidence Act has not yet been adopted by the Dutch parliament.

The deemed or actual return on savings and investments is taxed at a rate of 36 per cent.

Non-residents of the Netherlands

If a person is not a resident of the Netherlands nor is deemed to be a resident of the Netherlands for Dutch corporate or individual income tax purposes, such person is not liable to Dutch income tax in respect of income derived from the Securities and gains realised upon the settlement, redemption or disposal of the Securities, unless:

- (a) the person is not an individual and such person: (i) has an enterprise that is, in whole or in part, carried on through a permanent establishment or a permanent representative in the Netherlands to which permanent establishment or permanent representative the Securities are attributable, or (ii) is (other than by way of securities) entitled to a share in the profits of an enterprise or a co-entitlement to the net worth of an enterprise, which is effectively managed in the Netherlands and to which enterprise the Securities are attributable;

This income is subject to Dutch corporate income tax at up to a maximum rate of 25.8 per cent.

- (b) the person is an individual and such individual (i) has an enterprise or an interest in an enterprise that is, in whole or in part, carried on through a permanent establishment or a permanent representative in the Netherlands to which permanent establishment or permanent representative the Securities are attributable, or (ii) realises income or gains with respect to the Securities that qualify as income from miscellaneous activities in the Netherlands which includes activities with respect to the Securities that exceed regular, active portfolio management (*normaal, actief vermogensbeheer*), or (iii) is other than by way of securities entitled to a share in the profits of an enterprise which is effectively managed in the Netherlands and to which enterprise the Securities are attributable.
- (c) Income derived from the Securities as specified under (i) and (ii) by an individual is subject to individual income tax at progressive rates up to a maximum rate of 49.5 per cent. Income derived from a share in the profits of an enterprise as specified under (iii) that is not already included under (i) or (ii) will be taxed on the basis of a deemed or actual return on income from savings and investments (as described above under "Residents of the Netherlands").

Gift and Inheritance Taxes

No gift or inheritance taxes will arise in the Netherlands with respect to a transfer of the Securities by way of gift by, or on the death of, a Securityholder, unless:

- (a) the Securityholder is a resident or deemed to be resident of the Netherlands for the purpose of the relevant Dutch tax law provisions;
- (b) in the case of a gift of the Securities by an individual who at the date of the gift was neither a resident nor deemed to be a resident of the Netherlands, such individual dies within 180 days after the date of the gift, while being a resident or deemed to be a resident of the Netherlands;
- (c) in the case of a gift of the Securities is made under a condition precedent, the Securityholder is resident or is deemed to be resident of the Netherlands at the time the condition is fulfilled; or

TAXATION

- (d) the transfer is otherwise construed as a gift or inheritance made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be resident of the Netherlands.

For the purpose of Dutch gift and inheritance tax, an individual who has the Dutch nationality will be deemed to be a resident of the Netherlands at the date of the gift or the date of his death, if he has been a resident of the Netherlands at any time during the ten years preceding the date of the gift or the date of his death.

For the purposes of Dutch gift tax, an individual who does not have Dutch nationality will be deemed to be a resident of the Netherlands, at the date of the gift, if he has been a resident of the Netherlands at any time during the twelve months preceding the date of the gift. Applicable tax treaties may override deemed residency.

Value Added Tax

No Value Added Tax (*omzetbelasting*) will arise in the Netherlands in respect of any payment in consideration for the issue of the Securities or with respect to any payment of principal or interest by the Issuer on the Securities.

Other Taxes and Duties

No registration tax, stamp duty or any other similar documentary tax or duty, other than court fees, will be payable in the Netherlands in respect of or in connection with the issue of the Securities or the payment of interest or principal by the Issuer on the Securities.

Swiss Taxation

The following discussion is a summary of certain material Swiss tax considerations relating to (i) Securities where the holder is tax resident in Switzerland or has a tax presence in Switzerland or (ii) Securities where the paying agent is located in Switzerland. The discussion is based on legislation as of the date of this Base Prospectus. It does not aim to be a comprehensive description of all the Swiss tax considerations that may be relevant for a decision with respect to an investment in Securities. The tax treatment for each investor depends on the particular situation. All prospective investors / investors are advised to consult with their professional tax advisors as to the respective Swiss tax consequences relevant events, such as e.g. of the purchase, ownership, disposition, lapse, exercise or redemption of Securities (or options embedded therein) in light of their particular circumstances.

Swiss Withholding Tax

Payments by the Issuer on Securities are not subject to Swiss federal withholding tax provided that the Issuer is at all times resident and managed outside Switzerland for Swiss tax purposes.

In recent years, the Swiss Federal Council aimed at reforming the Swiss withholding tax system for interest payments on bonds. Its proposals included replacing the current debtor-based system with a paying agent-based system for Swiss withholding tax and abolishing the withholding tax on interest payments on bonds. As the proposal to abolish the withholding tax on interest payments on bonds was rejected in a referendum in 2022, the Swiss Federal Council could aim to reform the withholding tax system by instead proposing a paying agent regime, as was already envisaged in the draft legislation published on 3 April 2020. Under such proposed paying agent-based regime, subject to certain exceptions, all interest payments made on bonds by paying agents acting out of Switzerland to individuals resident in Switzerland would have been subject to Swiss withholding tax, including any such interest payments made on bonds issued by entities organised in a jurisdiction outside Switzerland (such as interest payments on Securities). If such a proposal were to be accepted and enacted and were to result in the deduction or withholding of Swiss withholding tax on any interest payment under a Security, neither the relevant Issuer nor any paying agent nor any other person would, pursuant to the applicable Conditions, be obliged to pay any additional amounts with respect to any Security as a result of the deduction or withholding of such withholding tax.

Swiss Income Taxation

Securities held as Private Assets by a Swiss Resident Holder

- (a) Securities classified as Structured Products

TAXATION

If, for Swiss income tax purposes, a Security classifies as a structured product composed of a bond and one or more derivative financial instrument(s) embedded therein, its income tax treatment depends on (i) whether the bond and the derivative financial instrument(s) embedded therein are recognised, for Swiss income tax purposes, as separable from each other and the Security is classified as a transparent or non-transparent derivative financial instrument for Swiss income tax purposes, and (ii) whether the Security classifies, in terms of Swiss income tax law, as a structured product with or without a predominant one-time interest payment.

Non-transparent derivative financial instrument: If the embedded bond is not recognised, for Swiss tax income purposes, as separable from the embedded derivative financial instrument(s), the Security classifies as a "non-transparent" derivative financial instrument, meaning that any return over the initial investment classifies as a taxable income item. Non-transparent derivative financial instruments generally include a predominant one-time interest payment in terms of Swiss income tax law. On this basis, Swiss resident private investors in Securities classified as non-transparent derivative financial instruments will be taxed on any interest payments and on any gains, including capital and foreign exchange gains, realised on the Securities ("differential taxation method").

Transparent derivative financial instrument without a predominant one-time interest payment: If the embedded bond is recognised, for Swiss income tax purposes, as separable from the embedded derivative financial instrument(s) and the yield-to-maturity at issue is considered, in terms of Swiss income tax law, to solely or predominantly derive from periodic interest payments and not from a one-time interest-payment (see below "*Transparent derivative financial instrument with a predominant one-time interest payment*"), then any periodic interest payments and any one-time interest payment are taxed when paid to the current holder of the Security. Any gain, including in respect of the derivative financial instrument(s) embedded in the Security, or e.g. interest accrued or changes in foreign exchange rates or the level of market interest rates realised on the sale of the Security is a tax-free private capital gain, whereas a loss is a non-tax-deductible private capital loss (see below "*Swiss Capital Gains Taxation – Securities held as Private Assets by a Swiss Resident Holder*"). The same applies if a Security is redeemed except that interest accrued is taxed when paid on behalf of the Issuer.

Transparent derivative financial instrument with a predominant one-time interest payment: If the embedded bond is recognised, for Swiss income tax purposes, as separable from the embedded derivative financial instrument(s) and the yield-to-maturity at issue is considered, in terms of Swiss income tax law, to exclusively or predominantly derive from a one-time interest-payment such as an original issue discount or a redemption premium, and not from periodic interest payments, then any interest payments received as well as any positive difference between the relevant Swiss income tax value of the embedded bond at sale or redemption and at issuance or (secondary market) purchase, as applicable, (which difference may include e.g., interest accrued although not yet due and paid on such Security or gains in respect of foreign exchange rate or market interest rate changes) ("modified differential taxation method") constitutes taxable income. A loss, as determined accordingly, realised on the sale or redemption of the Security may be offset against any qualifying taxable income items (including periodic interest payments) realised within the same taxation period from all financial instruments with a predominant one-time interest component in terms of Swiss income tax law. Any residual return realised on the embedded derivative financial instrument(s) is a tax-free private capital gain, and any residual loss is a non-tax-deductible private capital loss (see below "*Swiss Capital Gains Taxation – Securities held as Private Assets by a Swiss Resident Holder*").

(b) Securities classified as Bonds

Securities without a predominant one-time interest payment: If, for Swiss income tax purposes, a Security classifies as a pure bond and the yield-to-maturity at issue of the Security is classified for Swiss income tax law purposes, to exclusively or predominantly derive from periodic interest payments and not from a one-time interest-payment, Swiss tax resident private investors will be taxed on the periodic and any one-time interest payments they receive. Any gain (which may include e.g., interest accrued although not yet due and paid on such Security or gains in respect of foreign exchange rate or market interest rate changes), realised on the sale of a Security is a tax-free private capital gain, whereas a loss is a non-tax-deductible private capital loss (see below "*Swiss Capital Gains Taxation – Securities held as Private Assets by a Swiss Resident Holder*").

TAXATION

Securities with a predominant one-time interest payment: If, for Swiss income tax purposes, a Security classifies as a pure bond and the yield-to-maturity at issue of the Security is considered, in terms of Swiss income tax law, to exclusively or predominantly derive from a one-time interest-payment such as an original issue discount or a redemption premium and not from periodic interest payments, Swiss tax resident private investors will be taxed on any interest payments received and any positive difference between the relevant Swiss income tax value of such Security at sale or redemption and its value at issuance or (secondary market) purchase, as applicable (which difference may include e.g., interest accrued although not yet due and paid on such Security or gains in respect of foreign exchange or market interest rate changes) ("differential taxation method"). Any losses, as determined accordingly, realised on the sale or redemption of the Security may be offset against any qualifying taxable income items (including periodic interest payments) realised within the same taxation period from all financial instruments with a predominant one-time interest component in terms of Swiss income tax law.

(c) Pure Derivative Financial Instruments

If a Security classifies, for Swiss income tax purposes, as a pure derivative financial instrument (such as e.g., plain vanilla call or put options on shares, commodities, precious metals, currencies or interest rate; whereby a Security's characterisation as a pure derivative financial instrument, for Swiss tax purposes, may, depending on the product, such as e.g. in the case of low exercise price call options, depend on the extent of any prefunding and the product term) and such Security is held as part of the taxpayer's private assets in terms of Swiss income tax law, only any periodic and / or one-time dividend equalisation payments constitute taxable investment income, and any other return, including option premium payments and gain realised on the sale or redemption of such a Security, is a tax-exempt private capital gain, whereas a loss is a non-tax deductible private capital loss (see below "*Swiss Capital Gains Taxation – Securities held as Private Assets by a Swiss Resident Holder*").

(d) Fund-like Products

A Security which classifies, for Swiss income tax purposes, as an interest in a collective capital investment scheme or as collective capital investment-like product will be considered a pass-through instrument for Swiss income tax purposes if dividend and interest income from, and capital gains and losses realised on, the underlying assets, are reported and distributed separately as required for Swiss income tax purposes. Under such conditions and under the condition that the Issuer reports the income items and the capital gain and loss items to the Swiss Federal Tax Administration, an individual holding such a Security as part of his or her private assets must declare annually the dividend and interest distribution (in case the Security is distributing the income realised on the underlying investments) or the dividend and interest credited (in case the Security is reinvesting the income realised on the underlying investments) as taxable investment income (less attributable costs) on the underlying instruments. Any distributions or credits relating to items of qualifying capital gain on the underlying assets constitute tax-free private capital gains and, conversely any loss attributable a non-tax-deductible private capital loss. Gain realised on the sale of such a Security (including gains relating to dividends and interest accrued on the underlying assets) is exempt from income taxation as a private capital gain, and, conversely, any loss is not tax-deductible (see below "*Swiss Capital Gains Taxation – Securities held as Private Assets by a Swiss Resident Holder*"). If the dividend and interest income from, and capital gains and losses realised on, the underlying assets, are not reported and distributed separately as required for Swiss income tax purposes, or the income items and capital gain and loss items are not reported to the Swiss Federal Tax Administration, the relevant Swiss tax authority can determine a taxable yield on the basis of a discretionary estimate (taking into account the nature of the assets in which the product is invested).

Securities held as Assets of a Business with Swiss Tax Nexus

Corporate entities, and individuals who hold Securities as business assets (as opposed to private assets) in terms of Swiss income tax law, with relevant tax nexus to Switzerland (i.e., whether e.g. as tax residents of Switzerland or, in the case of non-residents, through a permanent establishment in Switzerland) are required to recognise any payments on, and any capital gains or losses realised on the sale or redemption of, any such Securities (irrespective of their nature) in their income statement and will be taxed on any net taxable earnings for the respective taxation period.

TAXATION

The same taxation treatment also applies to individuals who are classified by the tax authorities as "professional securities dealers" for reasons of, *inter alia*, frequent dealing or leveraged investments in securities (including Securities).

Swiss Capital Gains Taxation

Securities held as Private Assets by a Swiss Resident Holder

A gain or a loss realised by an individual tax resident in Switzerland upon the sale or other disposal of a Security held as part of his or her private assets in terms of Swiss income tax law, is a tax-free private capital gain or a non-tax deductible private capital loss, respectively (see above under "*Securities held as Assets of a Business with Swiss Tax Nexus*" for a summary of the tax treatment of individuals classified as "professional securities dealers"). Notwithstanding the foregoing, concerning the taxation treatment of Securities which classify as for Swiss income tax purposes as non-transparent derivative financial instruments or Securities which classify as securities with a predominant one-time interest payment in terms of Swiss income tax law, see the taxation principles set forth above with regard to the different instruments under "*Swiss Income Taxation – Securities held as Private Assets by a Swiss Resident Holder*").

Securities held as Assets of a Business with Swiss Tax Nexus

Capital gains realised on Securities held as assets of a business with relevant Swiss tax nexus are taxed in accordance with the taxation principles set forth above under "*Swiss Income Taxation – Securities held as Assets of a Business with Swiss Tax Nexus*".

Swiss Federal Securities Turnover Tax

The issue and the sale of a Security by the Issuer on the issuance day (i.e., a qualifying primary market transaction in terms of the Swiss federal stamp tax act) and the redemption of a Security are not subject to Swiss federal securities turnover tax, except that the issuance of a Security classified as a fund-like product where a Swiss domestic bank or a Swiss domestic securities dealer is a party to, or acts as an intermediary for, the transaction, all as defined in the Swiss federal stamp tax act for the relevant purpose, may be subject to Swiss federal securities turnover tax of up to 0.30 per cent. on the consideration.

Secondary market transactions in a Security with a maturity in excess of 12 months where a Swiss domestic bank or a Swiss domestic securities dealer (as defined in the Swiss federal stamp tax act) is a party to, or acts as an intermediary for, the transaction, may, if no statutory exemptions apply, be subject to Swiss securities turnover tax at a rate of up to 0.30 per cent. on the consideration. In contrast, a secondary market transaction in a Security is generally exempt from Swiss federal securities turnover tax if the Security classifies, for this purpose, as pure derivative financial instrument (c.f. above "*Swiss Income Taxation – Securities held as Private Assets by a Swiss Resident Holder – Pure Derivative Financial Instruments*").

The delivery of an Underlying, where such Underlying classifies as a taxable security for purposes of the Swiss federal stamp tax act, such as a stock, a bond or an interest in a fund-like product, to the holder of a Security, is subject to Swiss federal securities turnover tax at a rate of 0.15 per cent. if the Underlying is a taxable security issued by a Swiss domestic issuer and at a rate of 0.30 per cent. if the Underlying is a taxable security issued by an issuer not qualifying as a Swiss domestic issuer, however, only if a Swiss securities dealer is a party to, or acts as an intermediary for, the transaction and if no exemption applies, all as defined in the Swiss federal stamp tax act for the relevant purpose.

Swiss Gift, Inheritance and Estate Taxes

Subject to an applicable international tax treaty in an international scenario, transfers of Securities may be subject to cantonal and/or communal inheritance tax, estate tax or gift tax if the deceased person had his or her last domicile in Switzerland, or if the donor is resident in Switzerland; or in the case of a deceased or donor not tax resident in Switzerland for the purpose of such taxes, the transfer involves an unincorporated business (partnership or sole proprietorship) in Switzerland and Securities are held as part of such business. No such taxes exist at the federal level. The tax rate depends on the relationship between the deceased and the heirs, or between the donor and the donee, and the relevant value of the inheritance or gift. Interspousal gifts and gifts to descendants in direct line, as well as inheritances of the surviving spouse and descendants in direct line are exempt or taxed at privileged

TAXATION

rates in most Swiss cantons/municipalities. Gifts and inheritances from unrelated persons are taxed at rates ranging from approx. 20 per cent. to 60 per cent. The taxable base is usually the market value of the asset transferred.

Swiss Net Worth and Capital Taxes

A holder of a Security who is (i) an individual and tax resident in Switzerland or (ii) a corporate tax resident in Switzerland or (iii) an individual or a corporate tax resident outside Switzerland holding the Security through a permanent establishment in Switzerland, is required to report such Security as part of the wealth tax relevant assets or as part of the business assets with Swiss tax nexus, as applicable, and is subject to annual cantonal and/or communal wealth tax or capital tax, as applicable, on any net taxable wealth (including the Securities) or net taxable capital, as applicable, which tax will, if such holder is an individual or corporate taxpayer resident outside of Switzerland holding the Security as described in clause (iii) above, be limited to the extent such net taxable wealth or capital, as applicable, is attributable to Switzerland.

The proposed financial transactions tax ("FTT")

On February 14, 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the participating Member States). However, Estonia has since stated that it will not participate.

The Commission's Proposal has very broad scope and could, if introduced in its current form, apply to certain dealings in the Securities (including secondary market transactions) in certain circumstances. The issuance and subscription of Securities should, however, be exempt.

Under the Commission's Proposal the FTT could apply in certain circumstances to persons both within and outside of the participating Member States. Generally, it would apply to certain dealings in the Securities where at least one party is a financial institution, and at least one party is established in a participating Member State. A financial institution may be, or be deemed to be, "established" in a participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a participating Member State.

However, the FTT proposal remains subject to negotiation between the participating Member States and the scope of any such tax is uncertain. Additional EU Member States may decide to participate.

Prospective holders of Securities are advised to seek their own professional advice in relation to the FTT.

Automatic exchange of tax information between States

On November 17, 2015, the Spanish Government published Royal Decree 1021/2015, of November 13, (the "**Royal Decree**") in force since January 1, 2016 which establish the obligation on financial institutions to identify the tax residence of persons holding or controlling certain financial accounts and to report them to the Spanish tax authorities within the context of mutual assistance.

The Royal Decree implements into Spanish domestic legislation the rules on the information to be reported to the tax authorities in respect of financial accounts and due diligence procedures that must be applied by affected financial institutions when obtaining such information per EC Council Directive 2011/16/EU on administrative cooperation in the field of taxation (as amended by EC Council Directive 2014/107/EU) as regards mandatory automatic exchange of information in the field of taxation and the provisions of article 29 bis and additional provision twenty-two of Spanish General Taxation Law.

Based on the Royal Decree, as amended by Royal Decree 366/2021 of May 25, BBVA may be compelled to provide the Spanish tax authorities with certain information in respect of certain categories of financial accounts held or controlled by some investors in the Securities.

UNITED STATES FEDERAL TAXATION

The following is a general discussion of certain U.S. federal income tax consequences of the ownership and disposition of the Securities. This discussion applies only to initial investors in the Securities who:

TAXATION

- purchase the Securities at the "issue price," which will equal the first price at which a substantial amount of the Securities is sold to the public (not including bond houses, brokers, or similar persons or organisations acting in the capacity of underwriters, placement agents or wholesalers); and
- hold the Securities as capital assets within the meaning of Section 1221 of the Internal Revenue Code of 1986, as amended (the "**Code**").

Subject to any additional discussion in the applicable Issue Terms, it is expected, and the discussion below assumes, that, for U.S. federal income tax purposes, the issue price of a Security is equal to its stated issue price indicated in the applicable Issue Terms.

This discussion does not describe all of the tax consequences that may be relevant to a holder in light of the holder's particular circumstances or to holders subject to special rules, such as:

- certain financial institutions;
- insurance companies;
- certain dealers and traders in securities or commodities;
- investors holding the Securities as part of a "straddle," conversion transaction, integrated transaction or constructive sale transaction;
- U.S. Holders (as defined below) whose functional currency is not the U.S. dollar;
- partnerships or other entities or arrangements classified as partnerships for U.S. federal income tax purposes;
- regulated investment companies;
- real estate investment trusts; or
- tax-exempt entities, "individual retirement accounts" or "Roth IRAs" as defined in Section 408 or 408A of the Code, respectively.

If an entity or arrangement that is classified as a partnership for U.S. federal income tax purposes holds a Security, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. If you are a partnership holding a Security, or a partner in such a partnership, you should consult your tax adviser as to the particular U.S. federal tax consequences of holding and disposing of the Security to you.

We will not attempt to ascertain whether any issuer of any shares of a corporation (or equity interests treated as shares of a corporation for U.S. federal income tax purposes) to which a Security relates, or any issuer of any shares of a corporation (or equity interests treated as shares of a corporate for U.S. federal income tax purposes) included in an index to which a Security relates (such shares hereafter referred to as "**Underlying Shares**") is treated as a "passive foreign investment company" ("**PFIC**") within the meaning of Section 1297 of the Code or as a "United States real property holding corporation" ("**USRPHC**") within the meaning of Section 897 of the Code. If any issuer of Underlying Shares were so treated, certain adverse U.S. federal income tax consequences might apply to a U.S. Holder in the case of a PFIC, and to a Non-U.S. Holder (as defined below) in the case of a USRPHC, upon the sale, exchange or retirement of a Security. You should refer to information filed with the SEC or other governmental authorities by the issuers of the Underlying Shares and consult your tax adviser regarding the possible consequences to you if any issuer of Underlying Shares is or becomes a PFIC or USRPHC.

This summary also does not address the U.S. federal income tax consequences of holding or disposing of Credit-Linked Securities, Bond Linked Securities, Custom Index Linked Securities or EUA-Contract Linked Securities. The U.S. federal income tax consequences of holding or disposing of Credit-Linked Securities, Bond Linked Securities, Custom Index Securities or EUA-Contract Linked Securities will be set forth in the applicable Issue Terms or Drawdown Prospectus. U.S. Holders should consult their tax advisers regarding the U.S. federal income

TAXATION

tax consequences of holding or disposing of Credit-Linked Securities, Bond Linked Securities, Custom Index Securities or EUA-Contract Linked Securities.

This summary assumes that any Fund or other reference asset to which a Security relates will not be treated as a partnership for U.S. federal income tax purposes. If any such Fund or other reference asset were so treated, certain adverse U.S. federal income tax consequences might apply. You should consult your tax adviser regarding the possible consequences to you if any Fund or other reference asset to which a Security relates is or becomes treated as a partnership for U.S. federal income tax purposes.

This discussion is based on the Code, administrative pronouncements, judicial decisions and final, temporary and proposed Treasury regulations, all as of the date hereof, changes to any of which subsequent to the date hereof may affect the tax consequences described herein. This discussion is necessarily general and does not address all aspects of U.S. federal income taxation, including the alternative minimum tax, special tax accounting rules under Section 451 of the Code or the Medicare tax on investment income, or any U.S. federal taxes other than income taxes (such as U.S. federal estate and gift tax) or any state, local or non-U.S. tax laws to

a holder of Securities. Persons considering the purchase of Securities should consult their tax advisers with regard to the application of the U.S. federal income tax laws to their particular situations as well as any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

This discussion is subject to any additional disclosure regarding U.S. federal taxation contained in the applicable Issue Terms. Accordingly, you should also consult the applicable Issue Terms for any additional discussion of U.S. federal taxation with respect to the specific Securities offered thereunder.

TAX CONSEQUENCES TO U.S. HOLDERS

This section only addresses Securities that are in registered form for U.S. federal income tax purposes. If a Security is not in registered form for U.S. federal income tax purposes, certain adverse U.S. federal income tax consequences will apply to U.S. Holders. You should consult your tax adviser regarding the U.S. federal tax consequences of holding and disposing of a Security that is not in registered form for U.S. federal income tax purposes.

This section applies to you only if you are a U.S. Holder. As used herein, the term "**U.S. Holder**" means a beneficial owner of a Security that is for U.S. federal income tax purposes:

- a citizen or individual resident of the United States;
- a corporation, or other entity taxable as a corporation, created or organised in or under the laws of the United States, any state thereof or the District of Columbia; or
- an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes

This section discusses only Securities treated as debt instruments for U.S. federal income tax purposes. Securities for which the principal amount payable at maturity or upon early settlement must equal or exceed the issue price should be treated as indebtedness for U.S. federal income tax purposes.

Taxable gain upon the sale, exchange or retirement of Securities, including any taxable gain attributable to fluctuations in currency exchange rates, will be treated as U.S.-source income. Interest income (including original issue discount, if any) from an investment in Securities will be treated as non-U.S. source income. U.S. Holders should consult their tax advisers regarding additional U.S. federal income tax consequences of an investment in the Securities, including the rules applicable to foreign tax credits or deductions, in light of their own particular circumstances.

Payments of Stated Interest. Unless otherwise specified in the applicable Issue Terms and subject to the discussions below, stated interest paid on a Security will be taxable to a U.S. Holder as ordinary interest income at the time it accrues or is received in accordance with the holder's method of accounting for U.S. federal income tax purposes.

TAXATION

Special rules governing the treatment of interest paid with respect to discount securities, short-term securities, floating rate securities, foreign currency securities, foreign currency contingent payment securities and contingent payment securities are described under "*Discount Securities*," "*Short-Term Securities*," "*Floating Rate Securities*," "*Foreign Currency Securities*," "*Adjustments to Interest Accruals on the Securities*" and "*Contingent Payment Securities*" below.

Discount Securities

General. A Security (other than a short-term security, a contingent payment security or a foreign currency contingent payment security, all as defined below) that is issued at an issue price less than its "stated redemption price at maturity" will be considered to have been issued with "original issue discount" for U.S. federal income tax purposes (and will be referred to in this discussion as a "**discount security**") unless the Security satisfies a *de minimis* threshold (as defined below). The amount of original issue discount is equal to the excess of the stated redemption price at maturity over the issue price. The "stated redemption price at maturity" of a Security equals the sum of all payments required under the Security other than payments of "qualified stated interest." "Qualified stated interest" is stated interest unconditionally payable as a series of payments (other than in debt instruments of the issuer) at least annually during the entire term of the Security. For a Security that provides for interest solely at a single fixed rate, qualified stated interest is equal to the outstanding principal balance of the Security multiplied by the single fixed rate of interest. Subject to the discussion below under "*Securities Subject to Early Redemption or Repurchase*," if a Security provides for more than one fixed rate of stated interest, interest payable at the lowest stated fixed rate generally is qualified stated interest and the excess, if any, is included in the stated redemption price at maturity for purposes of determining whether the Security will be issued with original issue discount. See "*Floating Rate Securities*" below with regard to qualified stated interest in the case of floating rate securities.

A Security will not be considered to have original issue discount if the difference between the Security's stated redemption price at maturity and its issue price is less than a *de minimis* amount, generally defined by applicable Treasury regulations as $\frac{1}{4}$ of 1 percent of the stated redemption price at maturity multiplied by the number of complete years to maturity or, in the case of an installment obligation (as defined by applicable Treasury regulations), the weighted average maturity. The weighted average maturity is the sum of the following amounts determined for each payment under the Security other than a payment of qualified stated interest: (i) the number of complete years from the issue date of the Security until the payment is made, multiplied by (ii) a fraction, the numerator of which is the amount of the payment and the denominator of which is the Security's stated redemption price at maturity.

A U.S. Holder of discount securities will be required to include any qualified stated interest payments in income in accordance with the U.S. Holder's method of accounting for U.S. federal income tax purposes. U.S. Holders of discount securities will be required to include original issue discount in income for U.S. federal income tax purposes as it accrues, in accordance with a constant yield method based on a compounding of interest, without regard to the timing of the receipt of cash payments attributable to this income. Under this method, U.S. Holders of discount securities generally will be required to include in income increasingly greater amounts of original issue discount in successive accrual periods.

A U.S. Holder may make an election to include in gross income all interest that accrues on any Security (including stated interest, original issue discount and *de minimis* original issue discount, as adjusted by any amortizable bond premium (as defined below)) in accordance with a constant yield method based on the compounding of interest (a "**constant yield election**"). Such election may be revoked only with the permission of the IRS.

Additional rules applicable to discount securities that are denominated in a specified currency other than the U.S. dollar, or have payments of interest or principal determined by reference to the value of one or more currencies other than the U.S. dollar, are described under "*Foreign Currency Securities*" below.

Securities Subject to Early Redemption or Repurchase. A Security that is subject to redemption or repurchase prior to maturity may be subject to rules that differ from the general rules described above for purposes of determining the yield and maturity of the Security (which may affect whether the Security is treated as issued with original issue discount and, if so, the timing of accrual of the original issue discount). Under applicable Treasury regulations, the relevant Issuer will generally be presumed to exercise an unconditional option to redeem a Security if the exercise of the option will lower the yield on the Security. Conversely, you will generally be presumed to exercise an unconditional option to require the relevant Issuer to repurchase a Security if the exercise of the option will increase the yield on the Security. If such an option is not in fact exercised, the Security will be

TAXATION

treated, solely for purposes of calculating original issue discount, as if it were redeemed and a new Security were issued on the presumed exercise date for an amount equal to the Security's "adjusted issue price" on that date. A Security's "adjusted issue price" generally is defined as the sum of its issue price and the aggregate amount of previously accrued original issue discount, less any prior payments on the Security other than payments of qualified stated interest.

Under these rules, if a Security provides for multiple fixed rates of interest that increase over the term of the Security, the Security's issue price is not below its stated principal amount and the relevant Issuer has an option to redeem the Security for an amount equal to the stated principal amount prior to the first date on which an increased rate of interest is in effect, the yield on the Security will be lowered if the relevant Issuer redeems the Security before the initial increase in the interest rate, and therefore the relevant Issuer's redemption option will be treated as exercised. Since the Security will therefore be treated as if it were redeemed prior to the initial increase in the interest rate, the Security will not be treated as issued with original issue discount. If a Security is not treated as issued with original issue discount and if, contrary to the presumption in the applicable Treasury regulations, the relevant Issuer does not redeem the Security before the initial increase in the interest rate, the Security will be treated, solely for purposes of calculating original issue discount, as redeemed and reissued. The rules governing short-term debt instruments (as described under "—*Short-Term Securities*" below) may apply to a Security deemed reissued if the term of the deemed reissued Security (as determined under the applicable Treasury regulations) is one year or less. You should consult your tax adviser concerning the possible application of these rules.

Floating Rate Securities

General. Securities that pay interest at a variable rate are subject to special rules. The following discussion applies to a Security (a "**floating rate security**") that satisfies the following conditions:

- the issue price does not exceed the total noncontingent principal payments due under the floating rate security by more than a specified *de minimis* amount;
- it provides for stated interest, paid or compounded at least annually, at current values of:
 - o one or more qualified floating rates,
 - o a single fixed rate and one or more qualified floating rates,
 - o a single objective rate, or
 - o a single fixed rate and a single objective rate that is a qualified inverse floating rate,
 - o each as defined in the applicable Treasury regulations; and
- certain other conditions, as set forth in the applicable Treasury regulations, are satisfied.

In general, a "**qualified floating rate**" is any variable rate where variations in the value of such rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds in the currency in which the floating rate security is denominated. For example, the commercial paper rate and SOFR will generally be treated as qualified floating rates. In general, a variable rate is not a "qualified floating rate" if it is subject to (i) a restriction or restrictions on the maximum stated interest rate (a "**cap**"), (ii) a restriction or restrictions on the minimum stated interest rate (a "**floor**"), (iii) a restriction or restrictions on the amount of increase or decrease in the stated interest rate (a "**governor**"), or (iv) any other restrictions similar to (i), (ii) and (iii). Notwithstanding the preceding sentence, the following restrictions will not cause a variable rate to fail to be a "qualified floating rate":

- a cap, floor, or governor that is fixed throughout the term of the floating rate security;
- a cap or similar restriction that is not reasonably expected as of the issue date to cause the yield on the floating rate security to be significantly less than the expected yield determined without the cap;
- a floor or similar restriction that is not reasonably expected as of the issue date to cause the yield on the floating rate security to be significantly more than the expected yield determined without the floor; or
- a governor or similar restriction that is not reasonably expected as of the issue date to cause the yield on the floating rate security to be significantly more or significantly less than the expected yield determined without the governor.

TAXATION

In general, an "**objective rate**" is a rate that is not itself a qualified floating rate but that is determined using a single fixed formula that is based on objective financial or economic information. A "**qualified inverse floating rate**" generally is any objective rate (i) that is equal to a fixed rate minus a qualified floating rate and (ii) the variations which can reasonably be expected to inversely reflect contemporaneous variations in the qualified floating rate (disregarding any caps, floors, governors or similar restrictions that would not, as described above, cause a rate to fail to be a qualified floating rate).

Unless otherwise provided in the applicable Issue Terms, it is expected, and the discussion below assumes, that a floating rate security should qualify as a "variable rate debt instrument." If a floating rate security with a term of more than one year (after taking into account the last possible day that the Security could be outstanding under its terms) does not qualify as a "variable rate debt instrument," then such a floating rate security will generally be treated as a "contingent payment debt instrument." For a description of the treatment of "contingent payment debt instruments," see the discussion under "*Contingent Payment Securities*" below.

Floating Rate Securities that Provide for a Single Variable Rate. All stated interest on a floating rate security will constitute qualified stated interest and will be taxable accordingly (as described under "*Discount Securities—General*" above) if:

- the floating rate security provides for stated interest at a single variable rate throughout the term thereof; and
- the stated interest on the floating rate security is unconditionally payable in cash or other property (other than debt instruments of the issuer) at least annually.

Thus, such a floating rate security will generally not be treated as issued with original issue discount unless the floating rate security is issued at an issue price below its stated principal amount and the difference between the issue price and the stated principal amount is equal to or greater than a specified *de minimis* amount, as defined above under "*Discount Securities—General*" For this purpose, and for purposes of the discussion below under "*Floating Rate Securities that Provide for Multiple Rates*," if a floating rate security provides for stated interest at a fixed rate for an initial period of one year or less followed by a variable rate and if the variable rate on the floating rate security's issue date is intended to approximate the fixed rate (which will be presumed to be the case if the value of the variable rate on the issue date does not differ from the value of the fixed rate by more than 0.25 per cent.), then the fixed rate and the variable rate together will constitute a single variable rate. In addition, two or more qualified floating rates that can reasonably be expected to have approximately the same values throughout the term of the floating rate security (which will be presumed to be the case for two or more qualified floating rates with values within 0.25 per cent. of each other as determined on the issue date) will be treated as a single qualified floating rate.

If a floating rate security that provides for stated interest at a single variable rate is issued with original issue discount equal to or greater than a specified *de minimis* amount, as discussed above, the amount of qualified stated interest and the amount of original issue discount that accrues during an accrual period on the floating rate security are determined under the rules applicable to fixed rate debt instruments, discussed under "*Discount Securities*" above, by assuming that the variable rate is a fixed rate equal to:

- in the case of a qualified floating rate or qualified inverse floating rate, the value, as of the issue date, of the qualified floating rate or qualified inverse floating rate; or
- in the case of an objective rate (other than a qualified inverse floating rate), a fixed rate that reflects the yield that is reasonably expected for the floating rate security.

The qualified stated interest required to be recognised in an accrual period is increased (or decreased) if the interest actually paid during the accrual period exceeds (or is less than) the interest assumed to be paid during the accrual period pursuant to the foregoing rules.

Floating Rate Securities that Provide for Multiple Rates. In general, a floating rate security that provides for (i) multiple floating rates or (ii) one or more floating rates in addition to a single fixed rate (other than an initial fixed rate for one year or less that meets the conditions described above) will be converted into an "equivalent" fixed rate debt instrument for purposes of determining the amount and accrual of original issue discount and qualified stated interest on the floating rate security. A floating rate security that only provides for multiple floating rates must be converted into an "equivalent" fixed rate debt instrument by replacing any qualified floating rate or

TAXATION

qualified inverse floating rate provided for under the terms of the floating rate security with a fixed rate equal to the value of the qualified floating rate or qualified inverse floating rate, as the case may be, as of the floating rate security's issue date. In the case of a floating rate security that provides for stated interest at a fixed rate in addition to either one or more qualified floating rates or a qualified inverse floating rate, the fixed rate is initially converted into a qualified floating rate (or a qualified inverse floating rate, if the floating rate security provides for a qualified inverse floating rate). Under such circumstances, the qualified floating rate or qualified inverse floating rate that replaces the fixed rate must be such that the fair market value of the floating rate security as of the floating rate security's issue date is approximately the same as the fair market value of an otherwise identical debt instrument that provides for the substitute qualified floating rate or qualified inverse floating rate, as appropriate, rather than the fixed rate. Subsequent to converting the fixed rate into either a qualified floating rate or a qualified inverse floating rate, the floating rate security is then converted into an "equivalent" fixed rate debt instrument in the manner described above.

Once the floating rate security is converted into an "equivalent" fixed rate debt instrument pursuant to the foregoing rules, the amount of original issue discount and qualified stated interest, if any, are determined for the "equivalent" fixed rate debt instrument by applying the general original issue discount rules to the "equivalent" fixed rate debt instrument, and a U.S. Holder of the floating rate security must account for such original issue discount and qualified stated interest as if the U.S. Holder held the "equivalent" fixed rate debt instrument, as described under "*Discount Securities*" above. In each accrual period, appropriate adjustments must be made to the amount of qualified stated interest (or, in certain circumstances, original issue discount) assumed to have been accrued or paid with respect to the "equivalent" fixed rate debt instrument in the event that such amounts differ from the actual amount of interest accrued or paid on the floating rate security during the accrual period.

Amortizable Bond Premium

If a U.S. Holder purchases a Security (other than a contingent payment security or foreign currency contingent payment security, as defined below) for an amount that is greater than the sum of all amounts payable on the Security other than qualified stated interest, the holder will be considered to have purchased the Security with amortizable bond premium equal to such excess. A U.S. Holder generally may elect to amortize such bond premium allocable to an accrual period to offset qualified stated interest required to be included in such holder's income with respect to the Security in that accrual period. However, special rules may limit the amount of bond premium that can be amortised during certain accrual periods in the case of Securities that are subject to optional redemption. A holder who elects to amortise bond premium must reduce its tax basis in the Security by the amount of the premium previously amortised. If an election to amortize bond premium is not made, a U.S. Holder will take premium into account in computing its gain or loss on the sale or other disposition of the Security, which may reduce such capital gain or increase such capital loss. An election to amortise bond premium applies to all taxable debt obligations then owned and thereafter acquired by the holder and may be revoked only with the consent of the IRS.

If a holder makes a constant yield election (as described under "*Discount Securities*" above) for a Security with amortizable bond premium, such election will result in a deemed election to amortise bond premium for all of the holder's debt instruments with amortizable bond premium and may be revoked only with the permission of the IRS with respect to debt instruments acquired after revocation.

Sale, Exchange or Retirement of the Securities

Upon the sale, exchange or retirement of a Security, a U.S. Holder will recognise taxable gain or loss equal to the difference between the amount realised on the sale, exchange or retirement and the holder's adjusted tax basis in the Security. The amount realised upon the sale, exchange or retirement of a Security is generally equal to the amount of cash plus the fair market value of any other property received by the U.S. Holder, from the sale, exchange or retirement of the Security. For these purposes, the amount realised does not include any amount attributable to accrued but unpaid qualified stated interest. Amounts attributable to accrued but unpaid qualified stated interest are treated as interest as described under "*Payments of Stated Interest*" above. A U.S. Holder's adjusted tax basis in a Security will equal the cost of the Security to the holder, increased by the amounts of any original issue discount previously included in income by the holder with respect to the Security, and reduced by any principal payments received by the holder, by the amounts of any bond premium previously amortised by the holder and by the amounts of any other payments that do not constitute qualified stated interest.

Except as described below or as otherwise provided in the applicable Issue Terms, gain or loss recognised on the sale, exchange or retirement of a Security will generally be capital gain or loss and will be long-term capital gain

TAXATION

or loss if at the time of sale, exchange or retirement the Security has been held for more than one year. Exceptions to this general rule apply in the case of a short-term security, to the extent of any accrued discount not previously included in the holder's taxable income. See "*Short-Term Securities*" below. In addition, other exceptions to this general rule apply in the case of certain foreign currency securities, foreign currency contingent payment securities and contingent payment securities. See the discussions under "*Foreign Currency Securities*," "*Adjustments to Interest Accruals on the Securities*" and "*Contingent Payment Securities*" below.

Short-Term Securities

A Security that matures (after taking into account the last possible date that the Security could be outstanding under its terms) one year or less from its issue date will be treated as a "short-term security." As described below, certain aspects of the tax treatment of short-term securities with certain features are uncertain. U.S. Holders of short-term securities should consult their tax advisers as to the U.S. federal tax consequences of the ownership and disposition of such short-term securities.

Tax Treatment Prior to Maturity of the Short-Term Securities. Under the applicable Treasury regulations, a short-term security will be treated as being issued at a discount, the amount of which will be equal to the excess of the sum of all payments on the short-term security (including all stated interest and the amount to be paid at maturity) over its issue price. No payments on a short-term security are treated as qualified stated interest.

A U.S. Holder who is a cash-method taxpayer generally will not be required to include the discount in income as it accrues for U.S. federal income tax purposes unless the holder elects to do so. A U.S. Holder who is a cash-method taxpayer and does not make such election should generally include the stated interest payments on the short-term securities, if any, as ordinary income upon receipt. Except in the case of stated interest payments, cash-method holders generally will not be required to recognise income with respect to the short-term securities prior to maturity, other than pursuant to a sale, exchange or retirement, as described below.

A U.S. Holder who is an accrual-method taxpayer will be required to include the discount in income as it accrues on a straight-line basis, unless the holder makes an election to accrue the discount according to a constant yield method based on daily compounding.

Tax Treatment at Maturity of the Short-Term Securities. Upon retirement of the short-term securities at maturity, any gain recognised will be treated as ordinary income.

Sale, Exchange or Retirement of the Short-Term Securities. Upon a sale, exchange or retirement of a short-term security, a U.S. Holder should treat any gain recognised as ordinary income to the extent of the discount accrued on a straight-line basis (or, if elected, according to a constant yield method based on daily compounding) and not yet included in income. Any gain in excess of this amount will be treated as short-term capital gain. Any loss recognised will be treated as a capital loss.

Tax Treatment of Short-Term Securities that Provide for a Payment at Maturity that is Not Fixed as of the Issue Date. Except as specifically stated below, the tax treatment of short-term securities that provide for a payment at maturity that is not fixed as of the issue date ("**contingent short-term securities**") is the same as described above for short-term securities. As described below, certain aspects of the tax treatment of contingent short-term securities are uncertain. Although accrual-method holders, and cash-method holders that have elected to apply an accrual method of tax accounting to the short-term securities, generally are required to accrue the discount on the short-term securities in income on a current basis over the term of the Securities, in the case of contingent short-term securities, because the amount payable at maturity with respect to the contingent short-term securities is uncertain, it is unclear how such accruals should be determined. Additionally, in the case of contingent short-term securities, it is unclear whether or to what extent gain from a sale, exchange or retirement prior to maturity should be treated as capital gain or ordinary income. U.S. Holders should consult their tax advisers regarding the proper treatment of an investment in contingent short-term securities.

Interest on Indebtedness Incurred to Purchase the Short-Term Securities. A cash-method U.S. Holder who does not elect to apply an accrual method of tax accounting to the short-term securities will be required to defer deductions for certain interest paid on indebtedness incurred to purchase or carry the short-term securities until the U.S. Holder includes the discount on the Securities in income or disposes of the Securities in a taxable transaction. As noted above, however, there is no authority regarding the proper method of accrual of discount on short-term debt instruments such as contingent short-term securities. It is therefore unclear how, if at all, the rules

TAXATION

regarding deferral of interest deductions would apply to contingent short-term securities. U.S. Holders should consult their tax advisers regarding these deferral rules.

Foreign Currency Securities

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities (i) that are denominated in a specified currency other than the U.S. dollar or (ii) the payments of interest and principal on which are payable in (or determined by reference to) a specified currency other than the U.S. dollar, which are referred to herein as "**foreign currency securities**." For a description of the treatment of foreign currency securities that provide for contingent payments or for payments made in or determined by reference to multiple currencies, see the discussion under "*Adjustments to Interest Accruals on the Securities*" below.

The rules applicable to foreign currency securities could require gain or loss realised upon the sale, exchange or other disposition (including retirement) of the Securities that is attributable to fluctuations in currency exchange rates ("**foreign currency gain or loss**") to be recharacterised as ordinary income or loss. The rules applicable to foreign currency securities are complex and their application may depend on the holder's particular U.S. federal income tax situation. For example, various elections are available under these rules, and whether a holder should make any of these elections may depend on the holder's particular U.S. federal income tax situation. U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of the ownership and disposition of foreign currency securities.

Payments of Interest on Foreign Currency Securities. A U.S. Holder who uses the cash method of accounting for U.S. federal income tax purposes and who receives a payment of qualified stated interest (or who receives proceeds from a sale, exchange or other disposition (including retirement) attributable to accrued qualified stated interest) in a foreign currency with respect to a foreign currency security will be required to include in income the U.S. dollar value of the foreign currency payment as determined on the date of actual or constructive receipt by such U.S. Holder, using the spot rate of exchange on such date, regardless of whether the payment is in fact converted to U.S. dollars at that time, and this U.S. dollar value will be the U.S. Holder's tax basis in the foreign currency. To the extent that a cash-method holder is required to accrue original issue discount on a foreign currency security, rules similar to the rules described in the following paragraph will apply with respect to the original issue discount.

In the case of a U.S. Holder that uses the accrual method of accounting for U.S. federal income tax purposes, the holder will be required to include in income the U.S. dollar value of the amount of interest income (including original issue discount, but reduced by amortizable bond premium to the extent applicable) that has accrued and is otherwise required to be taken into account with respect to a foreign currency security during an accrual period. The U.S. dollar value of the accrued income will be determined by translating the income at an average rate of exchange for the accrual period or, with respect to an accrual period that spans two taxable years, at the average rate for the partial period within the taxable year. Alternatively, a U.S. Holder may elect to translate interest income (including original issue discount) for an interest accrual period into U.S. dollars at the spot rate on the last day of the interest accrual period (or, in the case of a partial accrual period, the spot rate on the last day of the taxable year) or, if the date of receipt is within five business days of the last day of the interest accrual period, the spot rate on the date of receipt. A U.S. Holder that makes this election must apply it consistently to all debt instruments from year to year and cannot change the election without the consent of the IRS. In addition to the interest income accrued as described above, the U.S. Holder will recognise foreign currency gain or loss as ordinary income or loss (which will not be treated as interest income or expense) with respect to accrued interest income on the date the interest payment or proceeds from the sale, exchange or other disposition (including retirement) attributable to accrued interest are actually received. The amount of ordinary income or loss recognised will equal the difference between the U.S. dollar value of the foreign currency payment received (determined based on a spot rate on the date the payment is received) in respect of the accrual period (or, where a holder receives U.S. dollars, the amount of the payment in respect of the accrual period) and the U.S. dollar value of interest income that has accrued during the accrual period (as determined above).

Original Issue Discount and Amortizable Bond Premium on Foreign Currency Securities. Original issue discount and amortizable bond premium (each as defined above) on a foreign currency security are to be determined in the relevant foreign currency. If an election to amortise bond premium is made, amortizable bond premium taken into account on a current basis will reduce interest income in units of the relevant foreign currency. Foreign currency gain or loss is realised on amortised bond premium with respect to any period by treating the bond premium amortised in the same period as a return of principal that is treated in the same manner as on the sale, exchange

TAXATION

or retirement of the foreign currency security (as discussed below). Any foreign currency gain or loss will be ordinary income or loss as described below.

Tax Basis in Foreign Currency Securities. A U.S. Holder's tax basis in a foreign currency security, and the amount of any subsequent adjustment to the holder's tax basis, will be the U.S. dollar value of the foreign currency amount paid for such foreign currency security, or of the foreign currency amount of the adjustment, determined on the date of the purchase or adjustment (or, in the case of cash-method and electing accrual-method taxpayers, the date of settlement for Securities that are traded on an established securities market). A U.S. Holder who purchases a foreign currency security with previously owned foreign currency will recognise ordinary income or loss in an amount equal to the difference, if any, between such U.S. Holder's tax basis in the foreign currency and the U.S. dollar fair market value of the foreign currency security on the date of purchase.

Sale, Exchange or Retirement of Foreign Currency Securities. Foreign currency gain or loss recognised upon the sale, exchange or retirement of a foreign currency security will be ordinary income or loss that will not be treated as interest income or expense. The amount of foreign currency gain or loss generally will equal the difference between (i) the U.S. dollar value of the U.S. Holder's purchase price (excluding any amortizable bond premium previously accrued) in the foreign currency of the Security, determined on the date the payment is received in exchange for the Security or the Security is disposed of, and (ii) the U.S. dollar value of the U.S. Holder's purchase price (excluding any amortizable bond premium previously accrued) in the foreign currency of the Security, determined on the date the U.S. Holder acquired the Security. Payments received attributable to accrued interest will be treated in accordance with the rules applicable to payments of interest on foreign currency securities described above. Foreign currency gain or loss realised upon the sale, exchange or retirement of any foreign currency security will be recognised only to the extent of the total gain or loss realised by a U.S. Holder on the sale, exchange or retirement of the foreign currency security. Any gain or loss realised by a U.S. Holder in excess of the foreign currency gain or loss will be capital gain or loss (except in the case of a short-term security, to the extent of any discount not previously included in the holder's income). If a U.S. Holder recognises an ordinary loss upon a sale or other disposition of a foreign currency security and such loss is above certain thresholds, the holder may be required to file a disclosure statement with the IRS. See "*Disclosure Requirements*" below.

A U.S. Holder will have a tax basis in any foreign currency received on the sale, exchange or retirement of a foreign currency security equal to the U.S. dollar value of the foreign currency, determined at the time of such sale, exchange or retirement. A cash-method taxpayer who buys or sells a foreign currency security that is traded on an established securities market is required to translate units of foreign currency paid or received into U.S. dollars at the spot rate on the settlement date of the purchase or sale. Accordingly, no exchange gain or loss will result with respect to such foreign currency from currency fluctuations between the trade date and the settlement of the purchase or sale. An accrual-method taxpayer may elect the same treatment for all purchases and sales of foreign currency obligations if such obligations are traded on an established securities market. This election cannot be changed without the consent of the IRS. Any gain or loss realised by a U.S. Holder on a sale or other disposition of foreign currency (including its exchange for U.S. dollars or its use to purchase foreign currency securities) will be ordinary income or loss.

Foreign Currency Contingent Payment Securities

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities that (i) are denominated in a specified currency other than the U.S. dollar or the payments of interest and principal on which are payable in (or determined by reference to) a specified currency other than the U.S. dollar and provide for contingent payments or (ii) provide for payments made in or determined by reference to multiple currencies (other than the U.S. dollar) (such Securities hereinafter referred to as "**foreign currency contingent payment securities**"). These Securities will be subject to special rules that govern the tax treatment of foreign currency contingent payment securities under applicable Treasury regulations (the "**foreign currency contingent debt regulations**").

Pursuant to the foreign currency contingent debt regulations, a U.S. Holder of a Security will be required to accrue interest income on the Security on a constant yield basis, based on a comparable yield, as described below, regardless of whether such holder uses the cash or accrual method of accounting for U.S. federal income tax purposes. All determinations and computations required under the foreign currency contingent debt regulations (including the relevant Issuer's determination of the "comparable yield" and "projected payment schedule" for the Security, each as defined below) will be made in the denomination currency of the Security. The foreign currency contingent debt regulations provide that the denomination currency of Securities that have principal or interest payments denominated in, or determined by reference to, more than one currency is the currency with the greatest

TAXATION

value determined by comparing the values of the noncontingent and projected payments denominated in, or determined by reference to, each currency on the issue date, discounted to present value and, if necessary, translated into U.S. dollars at the spot rate on the issue date.

The foreign currency contingent debt regulations provide that a U.S. Holder must accrue into income original issue discount for U.S. federal income tax purposes for each accrual period prior to and including the maturity date of the Security. The amount of original issue discount that a U.S. Holder must accrue for each accrual period is determined in the denomination currency by applying the "noncontingent bond method" to the Security in the denomination currency and equals the product of:

- the adjusted issue price (as defined below) of the Security in the denomination currency as of the beginning of the accrual period;
- the comparable yield of the Security, adjusted for the length of the accrual period; and
- a fraction, the numerator of which is the number of days during the accrual period that the U.S. Holder held the Security and the denominator of which is the number of days in the accrual period.

The "**adjusted issue price**" of a Security is its issue price, increased by any interest income previously accrued (determined without regard to any net positive or net negative adjustments as described below), and decreased by the amount of any projected payments that previously have been scheduled to be made in respect of the Security, each determined in the denomination currency.

The term "**comparable yield**" as used in the foreign currency contingent debt regulations is determined in the denomination currency and is equal to the greater of (i) the annual yield the relevant Issuer would pay, as of the issue date, on a fixed rate debt instrument in the denomination currency with no contingent payments, but with terms and conditions otherwise comparable to those of the Security, and (ii) a rate of interest that is analogous to the applicable federal rate that would be used if the U.S. dollar were the denomination currency.

The foreign currency contingent debt regulations require that the relevant Issuer provides to U.S. Holders, solely for U.S. federal income tax purposes, a schedule of the projected amounts of payments in the denomination currency (the "projected payment schedule") on a Security. This schedule must produce a yield to maturity that equals the comparable yield.

The comparable yield and the projected payment schedule will not be provided for any purpose other than to determine a U.S. Holder's interest accruals and adjustments thereto in respect of the Security for U.S. federal income tax purposes. The comparable yield and the projected payment schedule will not constitute a projection or representation by the relevant Issuer regarding the actual amounts that will be paid on the Security.

Translation of Amounts Determined Under Noncontingent Bond Method. The accruals of interest computed with respect to a Security in the denomination currency (adjusted by certain net positive or negative adjustments as described below) must be translated into U.S. dollars. The U.S. dollar value of the accrued income will be determined by translating the income at an average rate of exchange for the accrual period or, with respect to an accrual period that spans two taxable years, at an average rate for the partial period within the taxable year. A U.S. Holder may elect to translate interest income for an interest accrual period into U.S. dollars at the spot rate on the last day of the interest accrual period (or, in the case of a partial accrual period, the spot rate on the last day of the taxable year). A U.S. Holder that makes this election must apply it consistently to all debt instruments from year to year and cannot change the election without the consent of the IRS.

Adjustments to Interest Accruals on the Securities. If, during any taxable year, a U.S. Holder of a Security receives actual payments with respect to such Security that, in the aggregate, exceed the total amount of projected payments for that taxable year, as determined in the denomination currency, the U.S. Holder will incur a "net positive adjustment" under the foreign currency contingent debt regulations equal to the amount of such excess. The U.S. Holder will treat a net positive adjustment as additional interest income in that taxable year, translated into U.S. dollars at the spot rate on the last day of the taxable year in which the adjustment is taken into account or, if earlier, the date of a sale, exchange or retirement of the Security.

If a U.S. Holder receives in a taxable year actual payments with respect to a Security that, in the aggregate, are less than the amount of projected payments for that taxable year, as determined in the denomination currency, the

TAXATION

U.S. Holder will incur a "net negative adjustment" under the foreign currency contingent debt regulations equal to the amount of such deficit. This net negative adjustment:

- (i) will first reduce interest on the Security that otherwise would accrue in the denomination currency for that taxable year and be included in income in the taxable year;
- (ii) to the extent of any excess after applying (i), will give rise to an ordinary loss to the extent of the U.S. Holder's accrued but unpaid interest on the Security in prior taxable years (translated into U.S. dollars at the spot rate used to translate interest in the relevant prior taxable year);
- (iii) to the extent of any excess after applying (i) and (ii), will give rise to an ordinary loss to the extent of the U.S. Holder's accrued and paid interest on the Security in prior taxable years (translated into U.S. dollars at the spot rate on the date the Security was issued or, if later, acquired); and
- (iv) to the extent of any excess after applying (i), (ii) and (iii), will be treated as a net negative adjustment carryforward that will be applied to reduce interest accruals in subsequent years and the amount realised in the year of a sale, exchange or retirement of the Security (in the denomination currency).

Sale, Exchange or Retirement of Foreign Currency Contingent Payment Securities. Generally, the sale, exchange or retirement of a Security will result in taxable gain or loss to a U.S. Holder. The amount of gain or loss on a sale, exchange or retirement of a Security will be equal to the difference between the amount realised on the sale, exchange or retirement and such holder's adjusted tax basis in the Security. As discussed above, to the extent a U.S. Holder has any net negative adjustment carryforward, the U.S. Holder may use such net negative adjustment from a previous year to reduce the amount realised in the denomination currency on the sale, exchange or retirement of the Security.

A U.S. Holder's adjusted tax basis in a Security will equal the U.S. dollar cost as of the day the U.S. Holder purchased the Security, increased by the U.S. dollar value of the holder's total interest accruals with respect to the Security (determined without regard to any adjustments to interest accruals as described above), translated as described above, and decreased by the amount of any projected payments that previously have been scheduled to be made in respect of the Security (translated into U.S. dollars).

The amount realised on the sale, exchange or unscheduled retirement of a Security is generally equal to the U.S. dollar value of cash and the fair market value of any other property received by the U.S. Holder, reduced by the amount of any net negative adjustment carryforward (translated into U.S. dollars). Any gain, other than foreign currency gain (as discussed below), will be treated as interest income. Any loss, other than foreign currency loss (as discussed below), will be treated as an ordinary loss to the extent of the excess of the holder's total interest accruals over the total net negative adjustments previously taken into account as ordinary losses in respect of the Security, and as a capital loss thereafter. If a U.S. Holder recognises an ordinary loss upon a sale, exchange or retirement of a Security and such loss is above certain thresholds, the holder may be required to file a disclosure statement with the IRS. See "*Disclosure Requirements*" below.

For purposes of determining the amount realised at maturity of a Security, the U.S. Holder will be deemed to receive the projected amount of any contingent payment due on that date, reduced by the amount of any net negative adjustment carryforward. The projected amount is translated into U.S. dollars by translating the portion attributable to principal into U.S. dollars at the spot rate on the issue date and translating the portion attributable to accrued interest into U.S. dollars at the rates at which such amounts of interest were translated when accrued. To the extent that the actual amount a U.S. Holder receives at the maturity of a Security is greater or less than the projected amount, a U.S. Holder will incur a net positive adjustment or a net negative adjustment, which will be treated as described above under "*Adjustments to Interest Accruals on the Securities*." To the extent that there is any net negative adjustment carryforward as described above under "*Adjustments to Interest Accruals on the Securities*," it will reduce the amount realised on the Security (translated into U.S. dollars at the spot rate on the issue date of the Security).

Foreign Currency Gain or Loss on Foreign Currency Contingent Payment Securities. A U.S. Holder may recognise foreign currency gain or loss with respect to a Security when the U.S. Holder receives payments on the Security. The amount of foreign currency gain or loss attributable to payments of interest previously accrued on the Security is determined by translating the amount of interest received into U.S. dollars at the spot rate on the date of receipt and subtracting from such amount the amount determined by translating the interest received into U.S. dollars at the rate at which such interest was accrued as described above. The amount of foreign currency

TAXATION

gain or loss attributable to payments of principal is determined by translating the amount of principal received into U.S. dollars at the spot rate on the date of receipt and subtracting from such amount the amount determined by translating the principal received into U.S. dollars at the spot rate on the date the Security was issued or, if later, acquired. For purposes of determining the amount of foreign currency gain or loss, the amount received (i) shall first be attributed to any net positive adjustment on the Security that has not previously been taken into account and (ii) then to accrued but unpaid interest remaining after reduction by any net negative adjustment and (iii) any remaining amount shall be attributed to the principal.

Upon a sale, exchange or unscheduled retirement of a Security, a U.S. Holder would also recognise foreign currency gain or loss. Payments received upon such a sale, exchange or unscheduled retirement of a Security shall first be applied against the principal of the Security and then against accrued but unpaid interest (and treated, in each case, as described in the preceding paragraph).

The total amount of foreign currency gain or loss on a Security is equal to the sum of the foreign currency gains or losses on principal and interest, calculated as described above. Any such foreign currency gain or loss will be treated as ordinary income or loss. Prospective purchasers should consult their tax advisers regarding these rules. If a U.S. Holder recognises an ordinary loss upon a sale or other disposition of a foreign currency contingent payment security and such loss is above certain thresholds, the holder may be required to file a disclosure statement with the IRS. See "*Disclosure Requirements*" below.

Special rules will apply if one or more contingent payments on a Security become fixed. If one or more contingent payments on a Security (determined in the denomination currency) become fixed more than six months prior to the date each such payment is due, a U.S. Holder will be required to make a positive or negative adjustment, as appropriate, equal to the difference between the present value of the amounts that are fixed and the present value of the projected amounts of the contingent payments as provided in the projected payment schedule (determined in the denomination currency), using the comparable yield as the discount rate in each case. If all remaining scheduled contingent payments on a Security become fixed substantially contemporaneously, a U.S. Holder will be required to make adjustments to account for the difference between the amounts treated as fixed and the projected payments in a reasonable manner over the remaining term of the Security. For purposes of the preceding sentence, a payment (including an amount payable at maturity) will be treated as fixed if (and when) all remaining contingencies with respect to it are remote or incidental within the meaning of the applicable Treasury regulations. A U.S. Holder's tax basis in the Security and the character of any gain or loss on the sale of the Security will also be affected. U.S. Holders should consult their tax advisers concerning the application of these special rules.

Contingent Payment Securities

General. Unless otherwise noted in the applicable Issue Terms, a Security that has principal or interest determined by reference to commodities, funds, securities or indices, other than a Short-Term Security (see the discussion under "*Short-Term Securities*" above), or a Foreign Currency Contingent Payment Security (see the discussion under "*Adjustments to Interest Accruals on the Securities*" above), (such Securities hereinafter referred to as "contingent payment securities") will generally be treated as a "contingent payment debt instrument" for U.S. federal income tax purposes. As a result, the contingent payment securities will be subject to special rules that govern the tax treatment of debt obligations that are treated under applicable Treasury regulations (the "**contingent debt regulations**") as providing for contingent payments.

Pursuant to the contingent debt regulations, a U.S. Holder of a contingent payment security will be required to accrue interest income on the contingent payment security on a constant yield basis, based on a comparable yield, as described below, regardless of whether such holder uses the cash or accrual method of accounting for U.S. federal income tax purposes. As a result, a U.S. Holder may be required to include interest in income each year in excess of any stated interest payments actually received in that year.

The contingent debt regulations provide that a U.S. Holder must accrue an amount of ordinary interest income, as original issue discount for U.S. federal income tax purposes, for each accrual period prior to and including the maturity date of the contingent payment security that equals the product of:

- the adjusted issue price (as defined below) of the contingent payment security as of the beginning of the accrual period;
- the comparable yield (as defined below) of the contingent payment security, adjusted for the length of the accrual period; and

TAXATION

- a fraction, the numerator of which is the number of days during the accrual period that the U.S. Holder held the contingent payment security and the denominator of which is the number of days in the accrual period.

The "**adjusted issue price**" of a contingent payment security is its issue price, increased by any interest income previously accrued, determined without regard to any adjustments to interest accruals described below, and decreased by the projected amount of any payments (in accordance with the projected payment schedule described below) previously made with respect to the contingent payment security.

The term "**comparable yield**" as used in the contingent debt regulations means the greater of (i) the annual yield the relevant Issuer would pay, as of the issue date, on a fixed-rate, nonconvertible debt instrument with no contingent payments, but with terms and conditions otherwise comparable to those of the contingent payment securities, and (ii) the applicable federal rate.

The contingent debt regulations require that the relevant Issuer provides to U.S. Holders, solely for U.S. federal income tax purposes, a schedule of the projected amounts of payments (the "projected payment schedule") on the contingent payment securities. This schedule must produce a yield to maturity that equals the comparable yield.

The comparable yield and the projected payment schedule will not be provided for any purpose other than to determine a U.S. Holder's interest accruals and adjustments thereto in respect of the contingent payment securities for U.S. federal income tax purposes. They will not constitute a projection or representation by the relevant Issuer regarding the actual amounts that will be paid on the contingent payment securities.

Adjustments to Interest Accruals on the Securities. If, during any taxable year, a U.S. Holder of a contingent payment security receives actual payments with respect to such contingent payment security that, in the aggregate, exceed the total amount of projected payments for that taxable year, the U.S. Holder will incur a "net positive adjustment" (i.e., the excess of projected payments over actual payments) under the contingent debt regulations equal to the amount of such excess. The U.S. Holder will treat a net positive adjustment as additional interest income in that taxable year.

If a U.S. Holder receives in a taxable year actual payments with respect to the contingent payment security that, in the aggregate, are less than the amount of projected payments for that taxable year, the U.S. Holder will incur a "net negative adjustment" under the contingent debt regulations equal to the amount of such deficit. This net negative adjustment:

- (i) will first reduce the U.S. Holder's interest income on the contingent payment security for that taxable year;
- (ii) to the extent of any excess after applying (i) above, will give rise to an ordinary loss to the extent of the U.S. Holder's interest income on the contingent payment security during prior taxable years, reduced to the extent such interest was offset by prior net negative adjustments; and
- (iii) to the extent of any excess after applying (i) and (ii) above, will be carried forward as a negative adjustment to offset future interest income with respect to the contingent payment security or to reduce the amount realised on a sale, exchange or retirement of the contingent payment security.

Generally, the sale, exchange or retirement of a contingent payment security will result in taxable gain or loss to a U.S. Holder. The amount of gain or loss on a sale, exchange or retirement of a contingent payment security will be equal to the difference between (a) the amount of cash plus the fair market value of any other property received by the U.S. Holder (the "**amount realised**"), from the sale, exchange or retirement of the contingent payment security and (b) the U.S. Holder's adjusted tax basis in the contingent payment security. As discussed above, to the extent that a U.S. Holder has any net negative adjustment carryforward, the U.S. Holder may use such net negative adjustment from a previous year to reduce the amount realised on the sale, exchange or retirement of the contingent payment security.

For purposes of determining the amount realised on the scheduled retirement of a contingent payment security, a U.S. Holder will be treated as receiving the projected amount of any contingent payment due at maturity. As previously discussed, to the extent that actual payments with respect to the contingent payment securities during the year of the scheduled retirement are greater or less than the projected payments for such year, a U.S. Holder

TAXATION

will incur a net positive or negative adjustment, resulting in additional ordinary income or loss, as the case may be.

A U.S. Holder's adjusted tax basis in a contingent payment security generally will be equal to the U.S. Holder's original purchase price for the contingent payment security, increased by any interest income previously accrued by the U.S. Holder (determined without regard to any adjustments to interest accruals described above) and decreased by the amount of any projected payments that previously have been scheduled to be made in respect of the contingent payment security (without regard to the actual amount paid).

Gain recognised by a U.S. Holder upon a sale, exchange or retirement of a contingent payment security generally will be treated as ordinary interest income. Any loss will be ordinary loss to the extent of the excess of previous interest inclusions over the total net negative adjustments previously taken into account as ordinary losses in respect of the contingent payment security, and thereafter capital loss (which will be long-term capital loss if the contingent payment security has been held for more than one year). The deductibility of capital losses is subject to limitations. If a U.S. Holder recognises a loss upon a sale or other disposition of a contingent payment security and such loss is above certain thresholds, the holder may be required to file a disclosure statement with the IRS. See "*Disclosure Requirements*" below.

Special rules will apply if one or more contingent payments on a contingent payment security become fixed. If one or more contingent payments on a contingent payment security become fixed more than six months prior to the date each such payment is due, a U.S. Holder will be required to make a positive or negative adjustment, as appropriate, equal to the difference between the present value of the amounts that are fixed and the present value of the projected amounts of the contingent payments as provided in the projected payment schedule, using the comparable yield as the discount rate in each case. If all remaining scheduled contingent payments on a contingent payment security become fixed substantially contemporaneously, a U.S. Holder will be required to make adjustments to account for the difference between the amounts treated as fixed and the projected payments in a reasonable manner over the remaining term of the contingent payment security. For purposes of the preceding sentence, a payment (including an amount payable at maturity) will be treated as fixed if (and when) all remaining contingencies with respect to it are remote or incidental within the meaning of the applicable Treasury regulations. A U.S. Holder's tax basis in the contingent payment security and the character of any gain or loss on the sale of the contingent payment security will also be affected. U.S. Holders should consult their tax advisers concerning the application of these special rules.

Securities Treated as Open Transactions

This discussion applies to Securities that do not pay coupons and provide for a single payment at maturity or early settlement that is determined by reference to the performance of a relevant Reference Item and that thus may be greater than or substantially lower than the Security's issue price. Due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities or instruments that are similar to the Securities for U.S. federal income tax purposes, no assurance can be given that the IRS or a court will agree with the tax treatment described herein. We intend to treat the Securities for U.S. federal income tax purposes as a single financial contract that is an "open transaction" for U.S. federal income tax purposes.

Our counsel has not rendered an opinion as to the proper U.S. federal income tax treatment of the Securities, and due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities described above no assurance can be given that the IRS or a court will agree with the treatment described herein. Significant aspects of the U.S. federal income tax consequences of an investment in the Securities are uncertain. Accordingly, you should consult your tax adviser regarding all aspects of the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments) and with respect to any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction. Unless otherwise stated, the following discussion is based on the treatment of each Security as described in the previous paragraph.

Taxable gain upon the sale, exchange or retirement of Securities, including any taxable gain attributable to fluctuations in currency exchange rates, will be treated as U.S.-source income. U.S. Holders should consult their tax advisers regarding additional U.S. federal income tax consequences of an investment in the Securities, including the rules applicable to foreign tax credits or deductions, in light of their own particular circumstances.

TAXATION

Tax Treatment of Securities Treated as Open Transactions

Tax Treatment Prior to Settlement. Subject to the discussions below under "*Possible Taxable Events*" and "*Possible Application of Section 1256 of the Code*," a U.S. Holder should not be required to recognise taxable income over the term of the Securities prior to settlement, other than pursuant to a sale or exchange as described below.

Tax Basis. Subject to the discussions below under "*Possible Taxable Events*" and "*Possible Application of Section 1256 of the Code*," a U.S. Holder's tax basis in a Security should equal the amount paid by the U.S. Holder to acquire the Security.

Sale, Exchange or Settlement of a Security. Upon a sale, exchange or settlement of a Security for cash, a U.S. Holder should recognise gain or loss equal to the difference between the amount realised on the sale, exchange or settlement and the U.S. Holder's tax basis in the Security sold, exchanged or settled. Subject to the discussion above regarding the possible application of the PFIC rules and the discussions below regarding the possible application of Sections 1260, 1258, 1256 and 988 of the Code and under "*Possible Taxable Events*," any gain or loss recognised should be long-term capital gain or loss if the U.S. Holder has held the Security for more than one year at the time of the sale, exchange or settlement, and short-term capital gain or loss otherwise.

Possible Taxable Events

In the event of a change in the methodology by which a Reference Item to which a Security relates is calculated, a change in the components of such a Reference Item, the discontinuance of such a Reference Item, the designation of a successor to such a Reference Item or other similar circumstances resulting in a material change to such a Reference Item, it is possible that a Security could be treated, in whole or in part, as terminated and reissued for U.S. federal income tax purposes. Similar consequences could apply if the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Securities. In the event of a deemed retirement, a U.S. Holder might be required to recognise gain or loss (subject to the possible application of the wash sale rules) with respect to the Security. Moreover, the tax treatment of the Security after the deemed reissuance could be materially adversely affected. U.S. Holders should consult their tax advisers regarding the risk of such an event.

Possible Application of Section 1260 of the Code

If a Security (other than a Security that provides for only a single fixed upside payment if the relevant Reference Item increases in value over the term of the Security or a Security that provides for an upside payment only if the relevant Reference Item decreases in value over the term of the Security) is linked to an equity interest in one of a specified list of entities ("**Pass-Thru Entities**"), including an exchange-traded fund or other regulated investment company, a real estate investment trust, a partnership or a PFIC, there is a substantial risk that an investment in the Security will be treated as a "constructive ownership transaction," as defined in Section 1260 of the Code. If an investment in the Security is treated as a constructive ownership transaction, all or a portion of any long-term capital gain recognised by a U.S. Holder in respect of the Security could be recharacterised as ordinary income (the "**Recharacterised Gain**"). In addition, an interest charge would be imposed on any deemed underpayment of tax for each year that the constructive ownership transaction was outstanding. The amount of the interest charge is determined by treating any Recharacterised Gain as having accrued such that the gain in each successive year is equal to the gain in the prior year increased by the applicable federal rate (determined as of the date of sale, exchange or settlement of the Security) during the term of the constructive ownership transaction.

The amount of the Recharacterised Gain (if any) that would be treated as ordinary income in respect of the Security equals the excess of (i) any long-term capital gain recognised by the U.S. Holder in respect of the Security over (ii) the "net underlying long-term capital gain" (as defined in Section 1260 of the Code). Even if an investment in the Security is treated as a constructive ownership transaction, the amount of net underlying long-term capital gain, and therefore the amount of Recharacterised Gain, is unclear. It is possible, for example, that the net underlying long-term capital gain is equal to the aggregate net capital gain that the U.S. Holder would have had if the Underlying Shares had been acquired for fair market value on the issue date of the Security and sold for fair market value upon the date of sale, exchange or settlement of the Security (which would reflect the percentage increase, without any multiple, in the value of the Underlying Shares over the term of the Security). However, the net underlying long-term capital gain could alternatively be calculated using a number of Underlying Shares that reflects the multiple upon which any gain on the Security will be calculated, in which case the amount of Recharacterised Gain would generally be zero. Moreover, other features of a Security (such as a Security linked

TAXATION

to multiple Pass-Thru Entities or a Pass-Thru Entity and one or more indices which do not contain any Pass-Thru Entities), may also give rise to uncertainty about the proper method for calculating the amount of Recharacterised Gain. Under Section 1260 of the Code, the amount of net underlying long-term capital gain is treated as zero unless otherwise "established by clear and convincing evidence." Furthermore, if a Pass-Thru Entity holds certain commodities, the long-term capital gain that a U.S. Holder would otherwise recognise in respect of the Security up to the amount of the net underlying long-term capital gain could, if the U.S. Holder is an individual or other non-corporate investor, be subject to tax at the higher rates applicable to "collectibles" instead of the general rates that apply to long-term capital gain.

Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether or how Section 1260 of the Code applies to Securities linked to Pass-Thru Entities. U.S. Holders should consult their tax advisers regarding the potential application of the "constructive ownership" rule to the Securities.

Possible Application of Section 1258 of the Code

It is possible that an investment in certain Securities, particularly those that provide for a single fixed upside payment, could be treated as a "conversion transaction" under Section 1258 of the Code. A conversion transaction includes, among others, a transaction marketed or sold as producing capital gains and from which substantially all of the taxpayer's expected return is attributable to the time value of the taxpayer's net investment. If an investment in the Securities were treated as a conversion transaction, the gain from the sale, exchange or settlement of the Securities would be treated as ordinary income to the extent of the "applicable imputed income amount." The applicable imputed income amount is an amount equal to the amount of interest that would have accrued on the taxpayer's net investment in the conversion transaction (i.e., the amount paid by the U.S. Holder to acquire the Securities) for the period ending on the date of sale (including a deemed sale described above under "*Possible Taxable Events*" or under the mark-to-market treatment discussed below under "*Possible Application of Section 1256 of the Code*"), exchange or settlement at a rate equal to 120 percent of the applicable federal rate. U.S. Holders should consult their tax advisers regarding the possible application of Section 1258 of the Code to the Securities.

Possible Application of Section 1256 of the Code

Special rules will apply if a Security constitutes, in whole or in part, a "Section 1256 Contract" under Section 1256 of the Code. Section 1256 Contracts include, among others, "listed options." Accordingly, if a Security or a relevant Reference Item is listed on (or subject to the rules of) an exchange, board of trade or market, it is possible that the Security may be treated, in whole or in part, as a Section 1256 Contract. If Section 1256 of the Code were to apply to a Security, U.S. Holders would be required (i) to mark to market all or a portion of the Security as if it were sold at its fair market value on the last business day of each year it is held, and (ii) to recognise any gain or loss in respect of the portion of the Security that is treated as a Section 1256 Contract as 40 per cent. short-term capital gain or loss and 60 per cent. long-term capital gain or loss. U.S. Holders should consult their tax advisers regarding the potential application of Section 1256 of the Code to the Securities.

Possible Application of Section 988 of the Code

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities that are open transactions and for which the Reference Item includes one or more currencies (other than the U.S. dollar).

Sale, Exchange or Retirement. Because the return on the Security is "determined by reference to the value" of one or more foreign currencies, unless otherwise provided in the applicable Issue Terms, we intend to treat the Security as subject to Section 988 of the Code. In that case, any gain or loss recognised on the Security (including any gain or loss resulting from the possible application of Section 1256 of the Code, as discussed above) generally will be ordinary income or loss unless an election under Section 988(a)(1)(B) of the Code to treat such gain or loss as capital gain or loss (the "**Section 988 election**") is available and the U.S. Holder makes such election before the close of the day on which the U.S. Holder purchases the Security. While a taxpayer may make a Section 988 election to treat gain or loss on certain forward contracts, futures contracts or option contracts linked to one or more foreign currencies as capital gain or loss, it is unclear whether a Section 988 election is available for the Security. Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether the Section 988 election is available for the Security. U.S. Holders should consult their tax advisers about the potential application of Section 988 of the Code and the Section

TAXATION

988 election to the Security. In addition, a U.S. Holder might be subject to special reporting requirements that apply to foreign currency losses that exceed certain thresholds.

Possible Alternative Tax Treatments of an Investment in a Security

Due to the absence of authorities that directly address the proper tax treatment of the Security, no assurance can be given that the IRS will accept, or that a court will uphold, the treatment described above. The IRS could, for instance, seek to treat a Security as a debt instrument. The risk that financial instruments providing for downside protection features would be recharacterised, for U.S. federal income tax purposes, as debt instruments giving rise to ordinary income and possible accrual of income prior to maturity or disposition of the Security, rather than as open transactions, is greater than the risk of recharacterisation for comparable financial instruments that do not have such features. If the Security were recharacterised as a debt instrument, the U.S. federal income tax consequences to the U.S. Holder would depend on the terms of the Security and could be materially adverse to the U.S. Holder. For a description of the tax treatment of Securities that are treated as debt instruments, see the discussion under "*Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes*" above.

Even if debt treatment does not apply to the Security, other alternative U.S. federal income tax treatments of the Security are possible, which, if applied, could significantly affect the timing and character of the income or loss with respect to the Security. It is possible, for example, that a Security could be treated as a unit consisting of a loan and a forward contract, in which case a U.S. Holder might be required to accrue OID into income on a current basis.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asked for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; and whether these instruments are or should be subject to the "constructive ownership" rule (as discussed above under "*Possible Application of Section 1260 of the Code*"). While the notice requested comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Security, possibly with retroactive effect.

Prospective investors should consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the Security, including the possible implications of the IRS notice.

Payments in a Currency Other Than U.S. Dollars

General. Subject to the discussion above under "*Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes—Foreign Currency Securities*," the following discussion describes certain special rules applicable to a U.S. Holder of Securities if the holder acquires a Security with a currency other than the U.S. dollar or receives a payment on a Security or proceeds of a sale of a Security in a currency other than the U.S. dollar.

Payments in a Currency Other Than U.S. Dollars. Subject to the discussions below under "*Payments of Contingent Coupons to Accrual Method Taxpayers*" and "*Payments of Coupons on Deposit Portion of Securities Treated as Put Rights Plus a Deposit*," a U.S. Holder who receives a payment in a foreign currency with respect to a Security generally should determine the amount received based on the U.S. dollar value of the foreign currency payment regardless of whether the payment is in fact converted to U.S. dollars at that time, and this U.S. dollar value will be the U.S. Holder's tax basis in the foreign currency. Any gain or loss realised by a U.S. Holder on a subsequent sale or other disposition of the foreign currency received will be ordinary income or loss.

Payments of Contingent Coupons to Accrual Method Taxpayers. While there are no clear authorities to address how a U.S. Holder that uses the accrual method of accounting for U.S. federal income tax purposes should account for contingent coupons paid in a foreign currency with respect to a Security, we believe that it is reasonable for such a holder to determine the U.S. dollar value of the amount of the coupon payment that has accrued and is otherwise required to be taken into account with respect to a Security during an accrual period by translating the coupon at an average rate of exchange for the accrual period or, with respect to an accrual period that spans two taxable years, at the average rate for the partial period within the taxable year.

TAXATION

In addition to the coupons accrued as described above, the U.S. Holder will recognise foreign currency gain or loss as ordinary income or loss (which will not be treated as interest income or expense) with respect to accrued coupon payments on the date the coupon payment or proceeds from the sale, exchange or other disposition (including retirement) attributable to an accrued coupon are actually received. The amount of ordinary income or loss recognised will equal the difference between the U.S. dollar value of the foreign currency payment received (determined based on a spot rate on the date the payment is received) in respect of the accrual period (or, where a holder receives U.S. dollars, the amount of the payment in respect of the accrual period) and the U.S. dollar value of the coupon payment that has accrued during the accrual period (as determined above).

Payments of Coupons on Deposit Portion of Securities Treated as Put Rights Plus a Deposit. A coupon that is paid to a U.S. Holder in a foreign currency with respect to the Deposit portion of a Security that is treated as a Put Right plus a Deposit will be treated as an interest payment described under "*Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes—Foreign Currency Securities.*"

Securities Providing for Upside Potential and Treated as Single Financial Contracts with Associated Coupons

This discussion applies to Securities that pay coupons and provide for a single payment at maturity or early settlement that is determined by reference to the performance of a relevant Reference Item and that thus may be greater than or substantially lower than the Security's issue price. Due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities or instruments that are similar to the Securities for U.S. federal income tax purposes, no assurance can be given that the IRS or a court will agree with the tax treatment described herein. We intend to treat the Securities for U.S. federal income tax purposes as a single financial contract that provides for a coupon that will be treated as gross income to you at the time received or accrued in accordance with your regular method of tax accounting.

Our counsel has not rendered an opinion as to the proper U.S. federal income tax treatment of the Securities, and due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities described above, no assurance can be given that the IRS or a court will agree with the treatment described herein. Significant aspects of the U.S. federal income tax consequences of an investment in the Securities are uncertain. Accordingly, you should consult your tax adviser regarding all aspects of the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments) and with respect to any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction. Unless otherwise stated, the following discussion is based on the treatment of each Security as described in the previous paragraph.

Taxable gain upon the sale, exchange or retirement of Securities, including any taxable gain attributable to fluctuations in currency exchange rates, will be treated as U.S.-source income. Coupon payments received from an investment in Securities will be treated as non-U.S. source income. U.S. Holders should consult their tax advisers regarding additional U.S. federal income tax consequences of an investment in the Securities, including the rules applicable to foreign tax credits or deductions, in light of their own particular circumstances.

Tax Treatment of the Securities

Assuming the treatment of the Securities as set forth above is respected, the following U.S. federal income tax consequences should result.

Tax Basis. Subject to the discussions below under "*Possible Taxable Events*" and "*Possible Application of Section 1256 of the Code*," a U.S. Holder's tax basis in the Securities should equal the amount paid by the U.S. Holder to acquire the Securities.

Coupon Payments on the Securities. Any coupon payments on the Securities should be taxable as ordinary income to a U.S. Holder at the time received or accrued, in accordance with the U.S. Holder's regular method of accounting for U.S. federal income tax purposes.

Sale, Exchange or Settlement of the Securities. Upon a sale, exchange or settlement of the Securities for cash, a U.S. Holder should recognise gain or loss equal to the difference between the amount realised on the sale, exchange or settlement and the U.S. Holder's tax basis in the Securities so sold, exchanged or settled. For this purpose, the amount realised does not include any coupon paid at settlement, and may not include sale proceeds attributable to an accrued coupon, which may be treated as a coupon payment. Subject to the discussion above

TAXATION

regarding the possible application of the PFIC rules and the discussions below regarding the possible application of Sections 1260, 1258, 1256 and 988 of the Code and under "*Possible Taxable Events*," any such gain or loss recognised should be long-term capital gain or loss if the U.S. Holder has held the Securities for more than one year at the time of the sale, exchange or settlement, and should be short-term capital gain or loss otherwise. The ordinary income treatment of the coupon payments, in conjunction with the capital loss treatment of any loss recognised upon the sale, exchange or settlement of the Securities, could result in adverse tax consequences to holders of the Securities because the deductibility of capital losses is subject to limitations.

Possible Taxable Events

In the event of a change in the methodology by which a Reference Item to which a Security relates is calculated, a change in the components of such a Reference Item, the discontinuance of such a Reference Item, the designation of a successor to such a Reference Item or other similar circumstances resulting in a material change to such a Reference Item, it is possible that a Security could be treated, in whole or in part, as terminated and reissued for U.S. federal income tax purposes. Similar consequences could apply if the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Securities. In the event of a deemed retirement, a U.S. Holder might be required to recognise gain or loss (subject to the possible application of the wash sale rules) with respect to the Security. Moreover, the tax treatment of the Security after the deemed reissuance could be materially adversely affected. U.S. Holders should consult their tax advisers regarding the risk of such an event.

Possible Application of Section 1260 of the Code

If a Security (other than a Security that provides for only a single fixed upside payment if the relevant Reference Item increases in value over the term of the Security or a Security that provides for an upside payment only if the relevant Reference Item decreases in value over the term of the Security) is linked to an equity interest in one of a specified list of entities ("**Pass-Thru Entities**"), including an exchange-traded fund or other regulated investment company, a real estate investment trust, a partnership or a PFIC, there is a substantial risk that an investment in the Security will be treated as a "constructive ownership transaction," as defined in Section 1260 of the Code. If an investment in the Security is treated as a constructive ownership transaction, all or a portion of any long-term capital gain recognised by a U.S. Holder in respect of the Security could be recharacterised as ordinary income (the "**Recharacterised Gain**"). In addition, an interest charge would be imposed on any deemed underpayment of tax for each year that the constructive ownership transaction was outstanding. The amount of the interest charge is determined by treating any Recharacterised Gain as having accrued such that the gain in each successive year is equal to the gain in the prior year increased by the applicable federal rate (determined as of the date of sale, exchange or settlement of the Security) during the term of the constructive ownership transaction.

The amount of the Recharacterised Gain (if any) that would be treated as ordinary income in respect of the Security equals the excess of (i) any long-term capital gain recognised by the U.S. Holder in respect of the Security over (ii) the "net underlying long-term capital gain" (as defined in Section 1260 of the Code). Even if an investment in the Security is treated as a constructive ownership transaction, the amount of net underlying long-term capital gain, and therefore the amount of Recharacterised Gain, is unclear. It is possible, for example, that the net underlying long-term capital gain is equal to the aggregate net capital gain that the U.S. Holder would have had if the Underlying Shares had been acquired for fair market value on the issue date of the Security and sold for fair market value upon the date of sale, exchange or settlement of the Security (which would reflect the percentage increase, without any multiple, in the value of the Underlying Shares over the term of the Security). However, the net underlying long-term capital gain could alternatively be calculated using a number of Underlying Shares that reflects the multiple upon which any gain on the Security will be calculated, in which case the amount of Recharacterised Gain would generally be zero. Moreover, other features of a Security (such as a Security linked to multiple Pass-Thru Entities or a Pass-Thru Entity and one or more indices which do not contain any Pass-Thru Entities), may also give rise to uncertainty about the proper method for calculating the amount of Recharacterised Gain. Under Section 1260 of the Code, the amount of net underlying long-term capital gain is treated as zero unless otherwise "established by clear and convincing evidence." Furthermore, if a Pass-Thru Entity holds certain commodities, the long-term capital gain that a U.S. Holder would otherwise recognise in respect of the Security up to the amount of the net underlying long-term capital gain could, if the U.S. Holder is an individual or other non-corporate investor, be subject to tax at the higher rates applicable to "collectibles" instead of the general rates that apply to long-term capital gain.

Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether or how Section 1260 of the Code applies to Securities linked to Pass-

Thru Entities. U.S. Holders should consult their tax advisers regarding the potential application of the "constructive ownership" rule to the Securities.

Possible Application of Section 1258 of the Code

It is possible that an investment in certain Securities, particularly those that provide for a single fixed upside payment, could be treated as a "conversion transaction" under Section 1258 of the Code. A conversion transaction includes, among others, a transaction marketed or sold as producing capital gains and from which substantially all of the taxpayer's expected return is attributable to the time value of the taxpayer's net investment. If an investment in the Securities were treated as a conversion transaction, the gain from the sale, exchange or settlement of the Securities would be treated as ordinary income to the extent of the "applicable imputed income amount." The applicable imputed income amount is an amount equal to the amount of interest that would have accrued on the taxpayer's net investment in the conversion transaction (i.e., the amount paid by the U.S. Holder to acquire the Securities) for the period ending on the date of sale (including a deemed sale described above under "*Possible Taxable Events*" or under the mark-to-market treatment discussed below under "*Possible Application of Section 1256 of the Code*"), exchange or settlement at a rate equal to 120 percent of the applicable federal rate. U.S. Holders should consult their tax advisers regarding the possible application of Section 1258 of the Code to the Securities.

Possible Application of Section 1256 of the Code

Special rules will apply if a Security constitutes, in whole or in part, a "Section 1256 Contract" under Section 1256 of the Code. Section 1256 Contracts include, among others, "listed options." Accordingly, if a Security or a relevant Reference Item is listed on (or subject to the rules of) an exchange, board of trade or market, it is possible that the Security may be treated, in whole or in part, as a Section 1256 Contract. If Section 1256 of the Code were to apply to a Security, U.S. Holders would be required (i) to mark to market all or a portion of the Security as if it were sold at its fair market value on the last business day of each year it is held, and (ii) to recognise any gain or loss in respect of the portion of the Security that is treated as a Section 1256 Contract as 40 per cent. short-term capital gain or loss and 60 per cent. long-term capital gain or loss. U.S. Holders should consult their tax advisers regarding the potential application of Section 1256 of the Code to the Securities.

Possible Application of Section 988 of the Code

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities that are single financial contracts with associated coupons and for which the Reference Item includes one or more currencies (other than the U.S. dollar).

Sale, Exchange or Retirement. Because the return on the Security is "determined by reference to the value" of one or more foreign currencies, unless otherwise provided in the applicable Issue Terms, we intend to treat the Security as subject to Section 988 of the Code. In that case, any gain or loss recognised on the Security (including any gain or loss resulting from the possible application of Section 1256 of the Code, as discussed above) generally will be ordinary income or loss unless an election under Section 988(a)(1)(B) of the Code to treat such gain or loss as capital gain or loss (the "**Section 988 election**") is available and the U.S. Holder makes such election before the close of the day on which the U.S. Holder purchases the Security. While a taxpayer may make a Section 988 election to treat gain or loss on certain forward contracts, futures contracts or option contracts linked to one or more foreign currencies as capital gain or loss, it is unclear whether a Section 988 election is available for the Security. Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether the Section 988 election is available for the Security. U.S. Holders should consult their tax advisers about the potential application of Section 988 of the Code and the Section 988 election to the Security. In addition, a U.S. Holder might be subject to special reporting requirements that apply to foreign currency losses that exceed certain thresholds.

Possible Alternative Tax Treatments of an Investment in the Securities

Due to the absence of authorities that directly address the proper tax treatment of the Security, no assurance can be given that the IRS will accept, or that a court will uphold, the treatment described above. The IRS could, for instance, seek to treat a Security as a debt instrument. The risk that financial instruments providing for downside protection features would be recharacterised, for U.S. federal income tax purposes as debt instruments giving rise to ordinary income and possible accrual of income prior to maturity or disposition of the Security, rather than as single financial contracts with associated coupons, is greater than the risk of recharacterisation for comparable

TAXATION

financial instruments that do not have such features. If the Security were recharacterised as a debt instrument, the U.S. federal income tax consequences to the U.S. Holder would depend on the terms of the Security and could be materially adverse to the U.S. Holder. For a description of the tax treatment of Securities that are treated as debt instruments, see the discussion under "*Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes*" above.

Even if debt treatment does not apply to the Security, other alternative U.S. federal income tax treatments of the Security are possible, which, if applied, could significantly affect the timing and character of the income or loss with respect to the Security. It is possible, for example, that a Security could be treated as a unit consisting of a loan and a forward contract, in which case a U.S. Holder might be required to accrue OID into income on a current basis.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asked for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; and whether these instruments are or should be subject to the "constructive ownership" rule (as discussed above under "*Possible Application of Section 1260 of the Code*"). While the notice requested comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Security, possibly with retroactive effect.

Prospective investors should consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the Security, including the possible implications of the IRS notice.

Securities Treated as Single Financial Contracts with Associated Coupons That Do Not Provide for Upside

This discussion applies to Securities that pay contingent coupons and provide for a single payment at maturity or early settlement that is determined by reference to the performance of a relevant Reference Item and that may be substantially lower than but may not exceed the Security's issue price (other than the contingent coupons). Due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities or instruments that are similar to the Securities for U.S. federal income tax purposes, no assurance can be given that the IRS or a court will agree with the tax treatment described herein. We intend to treat the Securities for U.S. federal income tax purposes as a single financial contract that provides for a coupon that will be treated as gross income to you at the time received or accrued in accordance with your regular method of tax accounting.

Our counsel has not rendered an opinion as to the proper U.S. federal income tax treatment of the Securities, and due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities described above, no assurance can be given that the IRS or a court will agree with the treatment described herein. Significant aspects of the U.S. federal income tax consequences of an investment in the Securities are uncertain. Accordingly, you should consult your tax adviser regarding all aspects of the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments) and with respect to any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction. Unless otherwise stated, the following discussion is based on the treatment of each Security as described in the previous paragraph.

Taxable gain upon the sale, exchange or retirement of Securities, including any taxable gain attributable to fluctuations in currency exchange rates, will be treated as U.S.-source income. Coupon payments received from an investment in Securities will be treated as non-U.S. source income. U.S. Holders should consult their tax advisers regarding additional U.S. federal income tax consequences of an investment in the Securities, including the rules applicable to foreign tax credits or deductions, in light of their own particular circumstances.

Tax Treatment of the Securities

Assuming the treatment of the Securities as set forth above is respected, the following U.S. federal income tax consequences should result.

TAXATION

Tax Basis. Subject to the discussions below under "*Possible Taxable Events*" a U.S. Holder's tax basis in the Securities should equal the amount paid by the U.S. Holder to acquire the Securities.

Coupon Payments on the Securities. Any coupon payments on the Securities should be taxable as ordinary income to a U.S. Holder at the time received or accrued, in accordance with the U.S. Holder's regular method of accounting for U.S. federal income tax purposes.

Sale, Exchange or Settlement of the Securities. Upon a sale, exchange or settlement of the Securities for cash, a U.S. Holder should recognise gain or loss equal to the difference between the amount realised on the sale, exchange or settlement and the U.S. Holder's tax basis in the Securities so sold, exchanged or settled. For this purpose, the amount realised does not include any coupon paid at settlement, and may not include sale proceeds attributable to an accrued coupon, which may be treated as a coupon payment. Subject to the discussions below regarding the possible application of Sections 988 and 1256 of the Code under "*Possible Taxable Events*," any such gain or loss recognised should be long-term capital gain or loss if the U.S. Holder has held the Securities for more than one year at the time of the sale, exchange or settlement, and should be short-term capital gain or loss otherwise. The ordinary income treatment of the coupon payments, in conjunction with the capital loss treatment of any loss recognised upon the sale, exchange or settlement of the Securities, could result in adverse tax consequences to holders of the Securities because the deductibility of capital losses is subject to limitations.

Possible Taxable Events

In the event of a change in the methodology by which a Reference Item to which a Security relates is calculated, a change in the components of such a Reference Item, the discontinuance of such a Reference Item, the designation of a successor to such a Reference Item or other similar circumstances resulting in a material change to such a Reference Item, it is possible that a Security could be treated, in whole or in part, as terminated and reissued for U.S. federal income tax purposes. Similar consequences could apply if the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Securities. In the event of a deemed retirement, a U.S. Holder might be required to recognise gain or loss (subject to the possible application of the wash sale rules) with respect to the Security. Moreover, the tax treatment of the Security after the deemed reissuance could be materially adversely affected. U.S. Holders should consult their tax advisers regarding the risk of such an event.

Possible Application of Section 1258 of the Code

It is possible that an investment in certain Securities, particularly those that provide for a single fixed upside payment, could be treated as a "conversion transaction" under Section 1258 of the Code. A conversion transaction includes, among others, a transaction marketed or sold as producing capital gains and from which substantially all of the taxpayer's expected return is attributable to the time value of the taxpayer's net investment. If an investment in the Securities were treated as a conversion transaction, the gain from the sale, exchange or settlement of the Securities would be treated as ordinary income to the extent of the "applicable imputed income amount." The applicable imputed income amount is an amount equal to the amount of interest that would have accrued on the taxpayer's net investment in the conversion transaction (i.e., the amount paid by the U.S. Holder to acquire the Securities) for the period ending on the date of sale (including a deemed sale described above under "*Possible Taxable Events*" or under the mark-to-market treatment discussed below under "*Possible Application of Section 1256 of the Code*"), exchange or settlement at a rate equal to 120 percent of the applicable federal rate. U.S. Holders should consult their tax advisers regarding the possible application of Section 1258 of the Code to the Securities.

Possible Application of Section 1256 of the Code

Special rules will apply if a Security constitutes, in whole or in part, a "Section 1256 Contract" under Section 1256 of the Code. Section 1256 Contracts include, among others, "listed options." Accordingly, if a Security or a relevant Reference Item is listed on (or subject to the rules of) an exchange, board of trade or market, it is possible that the Security may be treated, in whole or in part, as a Section 1256 Contract. If Section 1256 of the Code were to apply to a Security, U.S. Holders would be required (i) to mark to market all or a portion of the Security as if it were sold at its fair market value on the last business day of each year it is held, and (ii) to recognise any gain or loss in respect of the portion of the Security that is treated as a Section 1256 Contract as 40 per cent. short-term capital gain or loss and 60 per cent. long-term capital gain or loss. U.S. Holders should consult their tax advisers regarding the potential application of Section 1256 of the Code to the Securities.

TAXATION

Possible Application of Section 988 of the Code

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities that are single financial contracts with associated coupons and for which the Reference Item includes one or more currencies (other than the U.S. dollar).

Sale, Exchange or Retirement. Because the return on the Security is "determined by reference to the value" of one or more foreign currencies, unless otherwise provided in the applicable Issue Terms, we intend to treat the Security as subject to Section 988 of the Code. In that case, any gain or loss recognised on the Security generally will be ordinary income or loss unless an election under Section 988(a)(1)(B) of the Code to treat such gain or loss as capital gain or loss (the "**Section 988 election**") is available and the U.S. Holder makes such election before the close of the day on which the U.S. Holder purchases the Security. While a taxpayer may make a Section 988 election to treat gain or loss on certain forward contracts, futures contracts or option contracts linked to one or more foreign currencies as capital gain or loss, it is unclear whether a Section 988 election is available for the Security. Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether the Section 988 election is available for the Security. U.S. Holders should consult their tax advisers about the potential application of Section 988 of the Code and the Section 988 election to the Security. In addition, a U.S. Holder might be subject to special reporting requirements that apply to foreign currency losses that exceed certain thresholds.

Possible Alternative Tax Treatments of an Investment in the Securities

Due to the absence of authorities that directly address the proper tax treatment of the Security, no assurance can be given that the IRS will accept, or that a court will uphold, the treatment described above. The IRS could, for instance, seek to treat a Security as a debt instrument. The risk that financial instruments providing for downside protection features would be recharacterised for U.S. federal income tax purposes as debt instruments giving rise to ordinary income and possible accrual of income prior to maturity or disposition of the Security, rather than as single financial contracts with associated coupons, is greater than the risk of recharacterisation for comparable financial instruments that do not have such features. If the Security were recharacterised as a debt instrument, the U.S. federal income tax consequences to the U.S. Holder would depend on the terms of the Security and could be materially adverse to the U.S. Holder. For a description of the tax treatment of Securities that are treated as debt instruments, see the discussion under "*Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes*" above.

Even if debt treatment does not apply to the Security, other alternative U.S. federal income tax treatments of the Security are possible, which, if applied, could significantly affect the timing and character of the income or loss with respect to the Security. In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asked for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; and whether these instruments are or should be subject to the "constructive ownership" rule (as discussed above under "*Possible Application of Section 1260 of the Code*"). While the notice requested comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Security, possibly with retroactive effect.

Prospective investors should consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the Security, including the possible implications of the IRS notice.

Securities Treated as Put Rights and Deposits

General. This discussion applies to Securities that pay coupons at a fixed rate and provide for a single payment at maturity or early settlement that is determined by reference to the performance of a relevant Reference Item and that may be substantially lower than but may not exceed the Security's issue price (other than the coupon). Except as otherwise provided in the applicable Issue Terms, we intend (in the absence of an administrative determination or judicial ruling to the contrary) to treat each Security, under current law, for U.S. federal income tax purposes, as a unit consisting of the following:

TAXATION

- (i) a put right (the "**Put Right**") written by the investor to the Issuer that, if exercised, requires the investor to pay the Issuer an amount equal to the Deposit (as defined below) in exchange for a cash amount based on the performance of the relevant Reference Item (or, if the relevant Reference Item consists of Underlying Shares, the cash value of such Underlying Shares as determined on the determination date (or, if applicable, the date of acceleration)); and
- (ii) a deposit with the Issuer of a fixed amount of cash, equal to the issue price, to secure the investor's obligation under the Put Right (the "**Deposit**") that pays interest based on the Issuer's cost of borrowing at the time of issuance (the "**Yield on the Deposit**").

Assuming the characterisation of the Securities as set forth above is respected, a portion of the coupon on the Securities will be treated as Yield on the Deposit and the remainder will be attributable to the premium on the Put Right (the "**Put Premium**"). The Yield on the Deposit will be determined as of the pricing date and set forth in the applicable Issue Terms.

Unless otherwise indicated in the applicable Issue Terms, we will allocate 100 per cent. of the issue price of the Securities to the Deposit and none to the Put Right. The Issuer's allocation of the issue price between the Put Right and the Deposit will be binding on investors in the Securities, unless an investor timely and explicitly discloses to the IRS that its allocation is different from ours. The treatment of the Securities described above and the Issuer's allocation are not, however, binding on the IRS or a court. No statutory, judicial or administrative authority directly addresses the treatment of the Securities or instruments similar to the Securities for U.S. federal income tax purposes, and no ruling is being requested from the IRS with respect to the Securities.

Our counsel has not rendered an opinion as to the proper U.S. federal income tax treatment of the Securities, and due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities described above, no assurance can be given that the IRS or a court will agree with the treatment described herein. Significant aspects of the U.S. federal income tax consequences of an investment in the Securities are uncertain, and no assurance can be given that the IRS or a court will agree with the treatment described herein. Accordingly, you should consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the Securities (including alternative treatments of the Securities). Unless otherwise stated, the following discussion is based on the treatment of each Security and the allocation described above.

Taxable gain upon the sale, exchange or retirement of Securities, including any taxable gain attributable to fluctuations in currency exchange rates, and the portion of any coupon payments attributable to the Put Premium will be treated as U.S.-source income. The portion of any coupon payments attributable to the Yield on the Deposit will be treated as non-U.S. source income. U.S. Holders should consult their tax advisers regarding additional U.S. federal income tax consequences of an investment in the Securities, including the rules applicable to foreign tax credits or deductions, in light of their own particular circumstances.

Unless otherwise provided in the applicable Issue Terms, the following U.S. federal income tax consequences should result.

Securities with a Term Equal to or Less Than One Year

The following discussion describes certain U.S. federal income tax consequences of ownership and disposition of a Security with a term that is equal to or less than one year (taking into account the last possible date that the Securities could be outstanding under its terms).

Coupon Payments on the Securities. Under the characterisation described above under "*General*", only a portion of the coupon payments on the Securities will be attributable to the Yield on the Deposit. The remainder of the coupon payments will represent payments attributable to the Put Premium. The Put Premium will generally not be taxable to a U.S. Holder upon receipt, but instead will be accounted for as described below.

The Deposit will be treated as a "short-term obligation" for U.S. federal income tax purposes. Accordingly, to the extent attributable to the Yield on the Deposit, coupon payments on the Securities will generally be taxable to a U.S. Holder as ordinary interest income, as set forth herein. A U.S. Holder who is a cash-method taxpayer will not be required to include the Yield on the Deposit currently in income for U.S. federal income tax purposes prior to receipt of such amounts unless the holder elects to do so. A U.S. Holder who is a cash-method taxpayer and does not make such election should include the Yield on the Deposit as income upon receipt. An accrual-method

TAXATION

U.S. Holder will be required to include the Yield on the Deposit in income as it accrues on a straight-line basis, unless the holder makes an election to accrue the Yield on the Deposit according to a constant yield method based on daily compounding.

Additionally, a cash-method U.S. Holder who does not elect to accrue the Yield on the Deposit will be required to defer deductions for certain interest paid on indebtedness incurred to purchase or carry the Securities until the Yield on the Deposit is included in income. The amount of deductions required to be deferred should not exceed the amount of the Yield on the Deposit the U.S. Holder would have taken into income under an election to accrue such amounts.

Tax Basis. Based on the Issuer's determination set forth above, the U.S. Holder's tax basis in the Put Right will be zero, and the U.S. Holder's tax basis in the Deposit will be 100 per cent. of the issue price, increased by any accrued Yield on the Deposit previously included in income and decreased by the amount of any payment received on the Deposit.

Expiration of the Put Right

Receipt of Stated Principal Amount in Cash upon Settlement or Early Redemption of the Securities. If a U.S. Holder receives the stated principal amount of a Security in cash (excluding cash attributable to coupon payments on the Securities, which will generally be taxed as described above under "*Coupon Payments on the Securities*"), the Put Right will be deemed to have expired unexercised. In that case, the U.S. Holder will not recognise any gain upon the return of the Deposit, but will recognise the total amount of Put Premium received by the U.S. Holder over the term of the Securities (including Put Premium received at maturity) as short-term capital gain at such time.

Exercise of the Put Right

Receipt of Cash Based on the Performance of the Reference Item Upon Maturity of the Securities. If a U.S. Holder receives an amount of cash (excluding cash attributable to coupon payments on the Securities, which will generally be taxed as described above under "*Coupon Payments on the Securities*") that is less than the stated principal amount of the Securities (such difference, the "**Deficit**"), the Put Right will be deemed to have been exercised and the U.S. Holder will be deemed to pay the Deficit to the Issuer upon settlement of the Put Right. In that case, the U.S. Holder will recognise short-term capital gain or loss with respect to the Put Right in an amount equal to the difference between (i) the total Put Premium received by the holder over the term of the Securities (including Put Premium received at maturity) and (ii) the Deficit.

Sale or Exchange of the Securities Prior to Maturity. Upon the sale or exchange of the Securities, a U.S. Holder will generally recognise gain or loss with respect to the Deposit and the Put Right. For the purpose of determining such gain or loss, a U.S. Holder should apportion the amount realised on the sale or exchange of the Securities between the Deposit and the Put Right based on their respective values on the date of such sale or exchange. The amount of gain or loss on the Deposit will equal the amount realised that is attributable to the Deposit, less the U.S. Holder's adjusted tax basis in the Deposit. Such gain will be treated as ordinary interest income to the extent of the amount of any accrued but unpaid Yield on the Deposit not previously included in income, and any remaining gain will be treated as short-term capital gain. Loss on the Deposit will be treated as short-term capital loss. The amount realised that is attributable to the Put Right, together with the total Put Premium received over the term of the Securities, will be treated as short-term capital gain.

If the value of the Deposit on the date of the sale or exchange exceeds the amount realised, the U.S. Holder will be treated as having (i) sold or exchanged the Deposit for an amount equal to its value on that date and (ii) made a payment (the "**Put Right Assumption Payment**") to the purchaser of the Securities equal to the amount of the excess, in exchange for the purchaser's assumption of the U.S. Holder's rights and obligations under the Put Right. In that case, the U.S. Holder will recognise gain or loss in respect of the Put Right, as set forth in the previous paragraph, in an amount equal to the total Put Premium received over the term of the Securities, less the amount of the Put Right Assumption Payment deemed to be made by the U.S. Holder.

Stop-Loss Event. Although the tax consequences of a Stop-Loss Event are uncertain, we intend to treat a Stop-Loss Event as (i) the repayment by the Issuer of the Deposit for a price equal to the Deposit plus the present value of the portion of the remaining scheduled payments on the Securities (from and including the date of acceleration) that is attributable to the Yield on the Deposit, (ii) the payment by the Issuer of the remaining Put Premium equal to the present value of the portion of the remaining scheduled payments on the Securities (from and including the

TAXATION

date of acceleration) that is attributable to the Put Premium, and (iii) the exercise of the Put Right, followed by settlement through the delivery by the U.S. Holder to the Issuer of the Deposit in exchange for the cash value of the Underlying Shares. We will also pay cash representing unpaid coupon payments on the Securities that accrued up to but excluding the date of acceleration.

Any cash received with respect to accrued coupon payments on the Securities will be taxed as described above under "*Coupon Payments on the Securities*".

Assuming the characterisation of the Stop-Loss Event described above is respected, any amount received attributable to the unaccrued Put Premium should be treated as Put Premium received under the Put Right. A U.S. Holder will, with respect to the amount paid by BBVA and/or the Group to repay the Deposit, generally recognise short-term capital gain equal to the difference between such amount and the U.S. Holder's adjusted tax basis in the Deposit and ordinary income to the extent of the accrued Yield on the Deposit. In the case of an initial investor, such difference would equal the present value of the portion of the remaining scheduled payments on the Securities attributable to the unaccrued Yield on the Deposit. In general, other than gain recognised on the Deposit as described in the previous sentences, the tax treatment of the Issuer's exercise of the Put Right upon a Stop-Loss Event would be the same as described above under "*Exercise of the Put Right—Receipt of Cash Equal to the Value of Reference Item Upon Maturity of the Securities*".

Securities with a Term of More Than One Year

The following discussion describes certain U.S. federal income tax consequences of ownership and disposition of a Security with a term of more than one year (taking into account the last possible date that the Securities could be outstanding under its terms).

Coupon Payments on the Securities. Only a portion of the coupon payments on the Securities will be attributable to the Yield on the Deposit. The remainder of the coupon payments will represent payments attributable to the Put Premium. The Put Premium will generally not be taxable to a U.S. Holder upon receipt, but instead will be accounted for as described below.

To the extent attributable to the Yield on the Deposit, coupon payments on the Securities will generally be taxable to a U.S. Holder as ordinary interest income at the time accrued or received, in accordance with the U.S. Holder's regular method of accounting for U.S. federal income tax purposes. If any portion of the stated interest payments on a Security described in this section is treated as original issue discount its treatment will be as described above under "*Tax Consequences to U.S. Holders—Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes—Discount Securities*".

Tax Basis. Based on BBVA and/or the Group's determination set forth above, the U.S. Holder's tax basis in the Put Right will be zero, and the U.S. Holder's initial tax basis in the Deposit will be 100 per cent. of the issue price.

Expiration of the Put Right

Receipt of Stated Principal Amount in Cash upon Settlement or Early Redemption of the Securities. If a U.S. Holder receives the stated principal amount of the Securities in cash (excluding cash attributable to coupon payments on the Securities, which would be taxed as described above under "*Coupon Payments on the Securities*"), the Put Right will be deemed to have expired unexercised. In that case, the U.S. Holder will generally not recognise any gain upon the return of the Deposit, but will recognise the total amount of Put Premium received by the U.S. Holder over the term of the Securities (including Put Premium received at maturity) as short-term capital gain at such time.

Exercise of the Put Right

Receipt of Cash Equal to the Value of Reference Item Upon Maturity of the Securities. If a U.S. Holder receives an amount of cash (excluding cash attributable to coupon payments on the Securities, which would be taxed as described above under "*Coupon Payments on the Securities*") that is less than the stated principal amount of the Securities (such difference, the "**Deficit**"), the Put Right will be deemed to have been exercised and the U.S. Holder will be deemed to pay the Deficit to the Issuer upon settlement of the Put Right. In that case, the U.S. Holder will not recognise any gain in respect of the Deposit, but will recognise short-term capital gain or loss in an amount equal to the difference between (i) the total Put Premium received by the holder over the term of the Securities (including Put Premium received at maturity) and (ii) the Deficit.

TAXATION

Sale or Exchange of the Securities Prior to Maturity. Upon the sale or exchange of the Securities, a U.S. Holder will generally recognise long-term capital gain or loss with respect to the Deposit if the U.S. Holder has held the Securities for more than one year at the time of such sale or exchange and short-term capital gain or loss otherwise. The U.S. Holder will also generally recognise short-term capital gain or loss with respect to the Put Right. For the purpose of determining gain or loss, a U.S. Holder should apportion the amount realised on the sale or exchange of the Securities (excluding any amount attributable to accrued but unpaid Yield on the Deposit, which would be taxed as described above under "*Coupon Payments on the Securities*") between the Deposit and the Put Right based on their respective values on the date of such sale or exchange. The amount of capital gain or loss on the Deposit will equal the amount realised that is attributable to the Deposit, less the U.S. Holder's adjusted tax basis in the Deposit. The amount realised that is attributable to the Put Right, together with the total Put Premium received by the U.S. Holder over the term of the Securities, will be treated as short-term capital gain.

If the value of the Deposit on the date of the sale or exchange exceeds the total amount realised, the U.S. Holder will be treated as having (i) sold or exchanged the Deposit for an amount equal to its value on that date and (ii) made a payment (the "**Put Right Assumption Payment**") to the purchaser of the Securities equal to the amount of such excess, in exchange for the purchaser's assumption of the U.S. Holder's rights and obligations under the Put Right. In that case, the U.S. Holder will recognise short-term capital gain or loss in respect of the Put Right in an amount equal to the total Put Premium received by the U.S. Holder over the term of the Securities, less the amount of the Put Right Assumption Payment deemed to be made by the U.S. Holder.

Stop-Loss Event. Although the tax consequences of a Stop-Loss Event are uncertain, we intend to treat a Stop-Loss Event as (i) the repayment by the Issuer of the Deposit for a price equal to the Deposit plus the present value of the portion of the remaining scheduled payments on the Securities (from and including the date of acceleration) that is attributable to the Yield on the Deposit, (ii) the payment by the Issuer of the remaining Put Premium equal to the present value of the portion of the remaining scheduled payments on the Securities (from and including the date of acceleration) that is attributable to the Put Premium, and (iii) the exercise of the Put Right, followed by settlement through the delivery by the U.S. Holder to the Issuer of the Deposit in exchange for the cash value of the Underlying Shares. We will also pay cash representing unpaid coupon payments on the Securities that accrued up to but excluding the date of acceleration.

Any cash received with respect to accrued coupon payments on the Securities will be taxed as described above under "*Coupon Payments on the Securities*".

Assuming the characterisation of the Stop-Loss Event described above is respected, any amount received attributable to the unaccrued Put Premium will be treated as Put Premium received under the Put Right. A U.S. Holder would, with respect to the amount paid by the Issuer to repay the Deposit, generally recognise capital gain or loss equal to the difference between such amount and the U.S. Holder's adjusted tax basis in the Deposit. In the case of an initial investor, such difference would equal the present value of the portion of the remaining scheduled payments on the Securities attributable to the unaccrued Yield on the Deposit. In general, other than gain recognised on the Deposit as described in the previous sentences, the tax treatment of the Issuer exercise of the Put Right upon a Stop-Loss Event would be the same as described above under "*Exercise of the Put Right—Receipt of Cash Equal to the Value of Reference Item Upon Maturity of the Securities*".

Other Tax Considerations Pertaining to Securities

The following discussion describes certain U.S. federal income tax consequences of the ownership and disposition of a Security, regardless of the length of the term of the Security.

Possible Taxable Events

In the event of a change in the methodology by which a Reference Item to which a Security relates is calculated, a change in the components of such a Reference Item, the discontinuance of such a Reference Item, the designation of a successor to such a Reference Item or other similar circumstances resulting in a material change to such a Reference Item, it is possible that a Security could be treated, in whole or in part, as terminated and reissued for U.S. federal income tax purposes. Similar consequences could apply if the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Securities. In the event of a deemed retirement, a U.S. Holder might be required to recognise gain or loss (subject to the possible application of the wash sale rules) with respect to the Security. Moreover, the tax treatment of the Security after the deemed reissuance could be materially adversely affected. U.S. Holders should consult their tax advisers regarding the risk of such an event.

TAXATION

Possible Application of Section 988 of the Code

General. The following discussion describes certain special rules applicable to a U.S. Holder of Securities that are treated as a Put Right plus a Deposit and for which the Reference Item includes one or more currencies (other than the U.S. dollar).

Sale, Exchange or Retirement. Because the return on the Security is "determined by reference to the value" of one or more foreign currencies, unless otherwise provided in the applicable Issue Terms, we intend to treat the Security as subject to Section 988 of the Code. In that case, any gain or loss recognised on the Security generally will be ordinary income or loss unless an election under Section 988(a)(1)(B) of the Code to treat such gain or loss as capital gain or loss (the "**Section 988 election**") is available and the U.S. Holder makes such election before the close of the day on which the U.S. Holder purchases the Security. While a taxpayer may make a Section 988 election to treat gain or loss on certain forward contracts, futures contracts or option contracts linked to one or more foreign currencies as capital gain or loss, it is unclear whether a Section 988 election is available for the Security. In addition, any such election, if available, would not apply to the Deposit portion of the Security. Unless otherwise provided in the applicable Issue Terms, due to the lack of governing authority, our counsel expects to be unable to opine as to whether the Section 988 election is available for the Security. U.S. Holders should consult their tax advisers about the potential application of Section 988 of the Code and the Section 988 election to the Security. In addition, a U.S. Holder might be subject to special reporting requirements that apply to foreign currency losses that exceed certain thresholds.

Possible Alternative Tax Treatments of an Investment in the Securities

Due to the absence of authorities that directly address the proper tax treatment of the Security, no assurance can be given that the IRS will accept, or that a court will uphold, the treatment described above. The IRS could, for instance, seek to treat the entire Security as a debt instrument. The risk that financial instruments providing for downside protection features would be recharacterised for U.S. federal income tax purposes as debt instruments giving rise to ordinary income and possible accrual of income prior to maturity or disposition of the Security, rather than as a Put Right plus a Deposit, is greater than the risk of recharacterisation for comparable financial instruments that do not have such features. If the entire Security were recharacterised as a debt instrument, the federal income tax consequences to the U.S. Holder would depend on the terms of the Security and could be materially adverse to the U.S. Holder. For a description of the tax treatment of Securities that are treated as debt instruments, see the discussion under "*Securities Treated as Indebtedness for U.S. Federal Income Tax Purposes*" above.

Even if debt treatment does not apply to the entire Security, other alternative U.S. federal income tax treatments of the Security are possible, which, if applied, could significantly affect the timing and character of the income or loss with respect to the Security. In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asked for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; and whether these instruments are or should be subject to the "constructive ownership" rule (as discussed above under "*Possible Application of Section 1260 of the Code*"). While the notice requested comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Security, possibly with retroactive effect.

Prospective investors should consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the Security, including the possible implications of the IRS notice.

General Considerations for U.S. Holders

Backup Withholding and Information Reporting

Backup withholding may apply in respect of payments on the Securities and the payment of proceeds from a sale or other disposition of the Securities, unless a U.S. Holder provides proof of an applicable exemption or a correct taxpayer identification number and otherwise complies with applicable requirements of the backup withholding rules. The amounts withheld under the backup withholding rules are not an additional tax and may be refunded

TAXATION

or credited against the U.S. Holder's U.S. federal income tax liability, provided that the required information is timely furnished to the IRS. In addition, information returns may be filed with the IRS in connection with payments on the Securities and the payment of proceeds from a sale or other disposition of the Securities unless the U.S. Holder provides proof of an applicable exemption from the information reporting rules.

Disclosure Requirements

Applicable Treasury regulations require taxpayers that participate in certain "reportable transactions" to disclose their participation to the IRS by attaching Form 8886 to their tax returns and to retain a copy of all documents and records related to the transaction. In addition, organisers and sellers of such transactions are required to maintain records, including lists identifying investors in the transaction, and must furnish those records to the IRS upon demand. A transaction may be a "reportable transaction" based on any of several criteria. Whether an investment in a Security constitutes a "reportable transaction" for any holder depends on the holder's particular circumstances. In particular, for example, certain transactions in which a U.S. Holder realizes a foreign currency loss in excess of certain thresholds can be a "reportable transaction." Holders should consult their tax advisers concerning any possible disclosure obligation that they may have with respect to their investment in the Securities and should be aware that the relevant Issuer (or other participants in the transaction) may determine that the disclosure or investor list maintenance requirement applies to the transaction and comply accordingly with these requirements.

Individual U.S. Holders (and certain entities) that own "specified foreign financial assets," including financial instruments issued by non-U.S. issuers, or non-U.S. financial accounts through which they may be held, may be required to file an information report with respect to such assets with their tax returns. You should consult your tax adviser regarding the application of these rules to your ownership of the Securities.

TAX CONSEQUENCES TO NON-U.S. HOLDERS

This section applies to you only if you are a Non-U.S. Holder. As used herein, the term "**Non-U.S. Holder**" means a beneficial owner of a security that is for U.S. federal income tax purposes:

- an individual who is classified as a nonresident alien;
- a foreign corporation; or
- a foreign estate or trust.

The term "Non-U.S. Holder" does not include any of the following holders:

- a holder who is an individual present in the United States for 183 days or more in the taxable year of disposition and who is not otherwise a resident of the United States for U.S. federal income tax purposes;
- certain former citizens or residents of the United States;
- a holder for whom income or gain in respect of the Securities is effectively connected with the conduct of a trade or business in the United States; or
- a holder who holds or invests in a Security through a U.S. financial institution or intermediary, or through a financial institution or intermediary that is related to a U.S. financial institution or intermediary.

Such holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the Securities. In addition, non-U.S. Holders that hold Securities through U.S. or certain U.S.-related intermediaries should consult their tax advisers regarding any certification requirements that may need to be complied with to avoid U.S. backup withholding.

General

Subject to the discussions below under "*Possible Application of Section 871(m) of the Code*" and "*FATCA*", and the discussion above concerning Section 897, the Issuers expect to treat payments on the Securities, and any gain realised on a disposition of a Security (including at maturity or early settlement), as exempt from U.S. federal income tax (including withholding tax).

TAXATION

Possible Application of Section 871(m) of the Code

Section 871(m) of the Code and Treasury regulations promulgated thereunder ("**Section 871(m)**") impose a withholding tax of 30 per cent. (or lower treaty rate applicable to dividends) on certain "dividend equivalents" paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities. Subject to the discussion below concerning Securities issued before January 1, 2027, a Security linked to U.S. equities or indices that include U.S. equities (a "**U.S. equity linked Security**") will generally be subject to the Section 871(m) withholding regime if at issuance it (i) has a "delta" of 0.80 or higher with respect to the underlying U.S. equity or (ii) substantially replicates the economic performance of the underlying U.S. equity, as determined by a "substantial equivalence" test that, among other factors, takes into account the initial number of shares of the underlying U.S. equity needed to hedge the transaction fully. The tests described above are set forth in the regulations, and the applicable test will depend on the terms of the relevant U.S. equity linked Security. Under these rules, withholding may apply even where the relevant U.S. equity linked Security does not provide for any payment that is explicitly linked to a dividend. The regulations provide for certain exceptions to the withholding requirements, in particular for instruments linked to certain broad-based indices (a "**qualified index**") that meet standards set forth in the regulations, as well as certain securities that track a qualified index.

Pursuant to an IRS notice, Section 871(m) will not apply to Securities issued before January 1, 2027 that do not have a "delta" of one with respect to any U.S. equity. If the terms of a U.S. equity linked Security are significantly modified (including in the event the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Security) and if such modification or substitution results in a deemed exchange of the Security for U.S. federal income tax purposes, the U.S. equity linked Security will generally be treated as reissued at the time of the significant modification. Under Treasury regulations, certain "benchmark" rate replacements would not give rise to deemed exchanges for U.S. federal income tax purposes, provided that certain conditions set forth in the regulations are met.

The calculations of "delta" are generally made at the "calculation date," which is the earlier of (i) the time of pricing of the Security, i.e., when all material terms have been agreed on, and (ii) the issuance of the Security. However, if the time of pricing is more than 14 calendar days before the issuance of the Security, the calculation date is the date of the issuance of the Security. In those circumstances, information regarding the Issuer's final determinations for purposes of Section 871(m) may be available only after the issuance of the Security. As a result, a Non-U.S. Holder should acquire such a Security only if it is willing to accept the risk that the Security is treated as subject to withholding.

The amount of a "dividend equivalent" is equal to, for a "simple" contract, the product of (a) the per-share dividend amount, (b) the number of shares of the underlying U.S. equity referenced in the U.S. equity linked Security and (c) the delta, and, for a "complex" contract, the product of (a) the per-share dividend amount and (b) the initial hedge.

The dividend equivalent amount will be determined on the earlier of (a) the record date of the dividend and (b) the day prior to the ex-dividend date. The dividend equivalent amount will include the amount of any actual or, under certain circumstances, estimated dividend. If a Security is subject to withholding in respect of dividend equivalents, withholding will, depending on the applicable withholding agents' circumstances, generally be required either (i) on the underlying dividend payment date or (ii) when cash payments are made on the relevant U.S. equity linked Security or upon the date of maturity, lapse or other disposition thereof by the Non-U.S. Holder.

The relevant Issuer will determine whether a U.S. equity linked Security is subject to withholding under Section 871(m). If the Issuer has determined, as specified in the applicable Issue Terms, that a U.S. equity linked Security should be subject to withholding under Section 871(m), the relevant Issuer shall instruct or be deemed to instruct its agents and withholding agents that withholding is required, unless such agent or withholding agent knows or has reason to know otherwise. Where payments on coupon-bearing Securities are subject to withholding under Section 871(m), it is possible that dividend equivalent payments on the Securities will exceed the coupons paid. Under such circumstances, a Non-U.S. holder of the Securities may be subject to additional U.S. withholding tax at a 30 per cent. rate on the difference between the dividend equivalent payments and the coupons. In addition, it is possible that the relevant Issuer (or the applicable withholding agent) may determine that treaty benefits that may otherwise be applicable to coupons may not apply to withholding tax on dividend equivalent payments. It is also possible that a withholding agent will withhold under Section 871(m) with respect to the Securities, notwithstanding the withholding tax imposed on any coupon amounts, in which case the application of Section 871(m) to the Securities could

TAXATION

significantly increase a Non-U.S. holder's tax liability in respect of the Securities. The relevant Issuer (or the applicable withholding agent) is entitled to withhold taxes on any payments treated as dividend equivalents without being required to pay any additional amounts with respect to amounts so withheld. If withholding is required, the relevant Issuer will not be required to pay any additional amounts with respect to the amounts so withheld.

The relevant Issuer's determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on the Non-U.S. Holder's particular circumstances. For example, the application of Section 871(m) may be affected if a Non-U.S. Holder enters into another transaction in connection with the acquisition of a U.S. equity linked Security. Accordingly, Non-U.S. Holders should consult their tax advisers regarding the potential application of Section 871(m) to the Securities in their particular circumstances.

FATCA

Legislation commonly referred to as "FATCA" generally imposes a withholding tax of 30 per cent. on payments to certain non-U.S. entities (including financial intermediaries) with respect to certain financial instruments, unless various U.S. information reporting and due diligence requirements have been satisfied. An intergovernmental agreement between the United States and the non-U.S. entity's jurisdiction may modify these requirements. FATCA generally applies to certain financial instruments that are treated as paying U.S.-source interest or dividends or other U.S.-source "fixed or determinable annual or periodical" income ("**FDAP Income**"). Withholding (if applicable) applies to any payment of amounts treated as U.S.-source interest or dividend equivalents (as discussed above under "*Possible Application of Section 871(m) of the Code*") on the Securities. Although, under current law, withholding under FATCA does not apply to payments of non-U.S. source income, such withholding could apply in the future with respect to certain payments attributable to U.S.-source income ("**foreign passthru payments**"). Securities that pay only foreign passthru payments that are not treated as equity for U.S. federal income tax purposes and have a stated expiration date are generally grandfathered from FATCA withholding if issued prior to the date that is six months after final Treasury regulations that define the term "foreign passthru payments" are published. However, such Securities may become subject to FATCA withholding if they are significantly modified after the grandfathering date (including in the event the relevant Issuer is replaced and substituted by another entity as the principal debtor under the Security) if such modification or substitution results in a deemed exchange of the Securities for U.S. federal income tax purposes. Under Treasury regulations, certain "benchmark" rate replacements would not give rise to deemed exchanges for U.S. federal income tax purposes, provided that certain conditions set forth in the regulations are met. In addition, proposed U.S. Treasury regulations delay the effective date of withholding on payments of "foreign passthru payments" until the date that is two years after the date on which final U.S. Treasury regulations defining the term "foreign passthru payment" are filed with the U.S. Federal Register. Moreover, Securities that give rise to dividend equivalent payments pursuant to Section 871(m) are generally grandfathered from FATCA withholding if issued prior to the date that is six months after the date on which obligations of its type are first treated as giving rise to dividend equivalent payments (as discussed above under "*Possible Application of Section 871(m) of the Code*"). If withholding under current or future law applies to the Securities, the relevant Issuer will not be required to pay any additional amounts with respect to amounts withheld under FATCA. Non-U.S. Holders should consult their tax advisers regarding the potential application of FATCA to the Securities.

SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS

SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS

The Dealer(s) have, in a programme agreement (as further modified and/or supplemented and/or restated from time to time, the "**Programme Agreement**") dated June 17, 2025 agreed with the Issuer and the Guarantor a basis upon which they or any of them may from time to time agree to purchase Securities. Any such agreement will extend to those matters stated under "*Form of Securities*" and "*Terms and Conditions of the Securities*". In the Programme Agreement, the Issuer (and, failing which, the Guarantor) have agreed to reimburse the Dealer(s) for certain of their expenses in connection with the establishment and any future update of the Programme and the issue of Securities under the Programme and to indemnify the Dealer(s) against certain liabilities incurred by them in connection therewith.

The Dealers and their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and its affiliates in the ordinary course of business.

In order to facilitate the offering of any Tranche of the Securities, certain persons participating in the offering of the Tranche may engage in transactions that stabilise, maintain or otherwise affect the market price of the relevant Securities during and after the offering of the Tranche. Specifically such persons may over-allot or create a short position in the Securities for their own account by selling more Securities than have been sold to them by the Issuer. Such persons may also elect to cover any such short position by purchasing Securities in the open market. In addition, such persons may stabilise or maintain the price of the Securities by bidding for or purchasing Securities in the open market and may impose penalty bids, under which selling concessions allowed to syndicate members or other broker-dealers participating in the offering of the Securities are reclaimed if Securities previously distributed in the offering are repurchased in connection with stabilisation transactions or otherwise. The effect of these transactions may be to stabilise or maintain the market price of the Securities at a level above that which might otherwise prevail for a limited period after the Issue Date. The imposition of a penalty bid may also affect the price of the Securities to the extent that it discourages resales thereof. No representation is made as to the magnitude or effect of any such stabilisation or other transactions. Such transactions, if commenced, may be discontinued at any time and must be brought to an end after a limited period. Under UK laws and regulations stabilisation activities may only be carried on by the Stabilisation Manager named in the Issue Terms (or persons acting on its behalf) and may only continue for a limited period following the Issue Date (or, if the ending day would be earlier, 60 days after the date of allotment) of the relevant Tranche of Securities.

Conflicts of Interest

BBVA Securities Inc. is an affiliate of BBVA Global Securities B.V. and the Guarantor and, as such, will have a "conflict of interest" in any offering of 3(a)(2) Notes in which it participates, as either principal or agent, within the meaning of Rule 5121 of the Financial Industry Regulatory Authority, Inc. ("**FINRA**") (or any successor rule thereto) ("**Rule 5121**"). Consequently, any such offering will be conducted in compliance with the provisions of Rule 5121. BBVA Securities Inc. is not permitted to sell Notes in any such offering to an account over which it exercises discretionary authority without the prior specific written approval of the account holder.

Securities Selling Restrictions

General Selling Restrictions

This Base Prospectus has been prepared on the basis that Securities may be directed to any category of investors unless specified otherwise in the applicable Issue Terms.

Each Dealer has agreed, and each further Dealer appointed under the Programme will be required to agree, that:

- (i) unless specified otherwise in the applicable Issue Terms, no action has been or will be taken in any country or jurisdiction by the Issuer or the Dealers that would permit a public offering of Securities, or possession or distribution of any offering material in relation thereto, in such country or jurisdiction where action for that purpose is required; and
- (ii) it will (to the best of its knowledge and belief) comply with all applicable securities laws and regulations in force in any jurisdiction in which it purchases, offers, sells or delivers Securities or possesses or distributes this Base Prospectus and will obtain any consent, approval or permission required by it for the purchase, offer, sale or delivery by it of Securities under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers, sales or deliveries and neither the Issuer, the Guarantor nor the Dealers shall have any responsibility therefor.

None of the Issuer, the Guarantor nor the Dealer(s) represents that Securities may at any time lawfully be sold in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to any exemption available thereunder, or assumes any responsibility for facilitating such sale.

Persons into whose hands the Base Prospectus, any Issue Terms or any Security comes are required by the Issuer and the Dealers to comply with all applicable laws and regulations in each country or jurisdiction in or from which they purchase, offer, sell or deliver Securities or have in their possession or distribute such offering material, in all cases at their own expense.

Accordingly, any such purported transferee or other holder will not be entitled to any rights as a Securityholder and the Issuer shall have the right, in accordance with the conditions of the Securities, to force the transfer of, transfer on behalf of the Securityholder or redeem, any such Securities.

Such Securities will be offered by BBVA (acting through its agent BBVA Securities Inc.) (in such capacity, the "**Initial Purchaser**").

The Securities in bearer form are subject to U.S. tax law requirements and may not be offered, sold or delivered within the United States or its possessions or to a United States person, except in certain transactions permitted by U.S. Treasury regulations. Terms used in this paragraph have the meanings given to them by the U.S. Internal Revenue Code of 1986, as amended, and Treasury regulations promulgated thereunder. The Issue Terms will identify whether TEFRA C rules or TEFRA D rules apply or whether TEFRA is not applicable.

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that, in connection with any Securities which are offered or sold outside the United States in reliance on an exemption from the registration requirements of the Securities Act provided under Regulation S ("**Regulation S Securities**"), that it will not offer, sell or deliver such Regulation S Securities (a) as part of their distribution at any time or (b) otherwise until 40 days after the completion of the distribution, as determined and certified by the relevant Dealer or, in the case of an issue of Securities on a syndicated basis, the relevant lead manager, of all Securities of the Tranche of which such Regulation S Securities are a part, within the United States or to, or for the account or benefit of, U.S. persons. Each Dealer has further agreed, and each further Dealer appointed under the Programme will be required to agree, that it will send to each dealer to which it sells any Regulation S Securities during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Regulation S Securities within the United States or to, or for the account or benefit of, U.S. persons.

As used herein, "**United States**" means the United States of America (including the States and the District of Columbia), its territories, its possessions and other areas subject to its jurisdiction; and "**U.S. person**" means (i) an individual who is a citizen or resident of the United States; (ii) a corporation, partnership or other entity organised in or under the laws of the United States or any political subdivision thereof or which has its principal place of business in the United States; (iii) any estate or trust which is subject to United States federal income taxation regardless of the source of its income; (iv) any trust if a court within the United States is able to exercise primary supervision over the administration of the trust and if one or more United States trustees have the authority to control all substantial decisions of the trust; (v) a pension plan for the employees, officers or principals of a corporation, partnership or other entity described in clause (ii) above; (vi) any entity organised principally for passive investment, 10 per cent. or more of the beneficial interests in which are held by persons described in (i) to (v) above if such entity was formed principally for the purpose of investment by such persons in a commodity pool the operator of which is exempt from certain requirements of Part 4 of the CFTC's regulations by virtue of its participants being non-U.S. persons; or (vii) any other "U.S. Person" as such term may be defined in Regulation S under the Securities Act or in regulations adopted under the Commodity Exchange Act, as amended.

SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS

Until 40 days after the commencement of the offering of any Series of Securities, an offer or sale of such Securities within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act if such offer or sale is made otherwise than in accordance with an available exemption from registration under the Securities Act.

Dealer(s) may arrange for the resale of Securities issued by BBVA Markets B.V. to QIBs who are also QPs pursuant to Rule 144A and Dealer(s) may arrange for the resale of Securities issued by BBVA Global Securities B.V. to QIBs pursuant to Rule 144A and each such purchaser of Securities is hereby notified that the Dealer(s) may be relying on the exemption from the registration requirements of the Securities Act provided by Rule 144A and one or more exemptions and/or exclusions from regulation under the CEA. The minimum aggregate nominal amount of Securities which may be purchased by a QIB pursuant to Rule 144A is US\$250,000 (or the approximate equivalent thereof in any other currency). To the extent that the Issuer is not subject to or does not comply with the reporting requirements of Section 13 or 15(d) of the Exchange Act or the information furnishing requirements of Rule 12g3-2(b) thereunder, the Issuer has agreed to furnish to holders of Securities and to prospective purchasers designated by such holders, upon request, such information as may be required by Rule 144A(d)(4) so long as the Securities are considered restricted securities within the meaning of Rule 144A(a)(3) under the Securities Act.

The Securities, the Guarantee and any Entitlement(s) do not constitute, and have not been marketed as, contracts of sale of a commodity for future delivery (or options thereon) subject to the CEA, and trading in the Securities has not been approved by the U.S. Commodity Futures Trading Commission pursuant to the CEA.

Each issuance of Securities shall be subject to such additional U.S. selling restrictions as the Issuer and the relevant Dealer may agree as a term of the issuance and purchase of such Securities, which additional selling restrictions shall be set out in the Issue Terms.

GENERAL INFORMATION

S&P Global

An obligor rated "A" has strong capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in higher-rated categories.

An S&P Global negative outlook means that a rating may be lowered. (Source: <https://disclosure.spglobal.com/ratings/en/regulatory/article/-/view/sourceId/504352>).

Moody's

Obligations rated "A" are considered upper-medium-grade and are subject to low credit risk. (Source: https://www.moodys.com/Pages/amr002002.aspx?stop_mobi=yes).

Fitch

"A" ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings. The procedures agreed and described in the Agency Agreement dated June 17, 2025 (the "**Agency Agreement**") may, in the future, be amended to comply with Spanish tax law and regulations and operational procedures of the European Clearing Systems. The Guarantor and the Issuer may from time to time, at their discretion, appoint an agent to intermediate with the European Clearing Systems in the provision of such information. Details of any such appointment will be set out in the Issue Terms.

In the case of any Securities which are held in The Depository Trust Company ("**DTC**"), the Issuer and the Guarantor may agree procedures with DTC and, if necessary, an intermediary agent appointed by the Issuer and the Guarantor to facilitate the collection of such details.
