

Disclosure of Global Systemically Important Banks (G-SIBs) indicators as of December 31, 2025

To comply with the disclosure requirements and methodology outlined in the July 2018 document titled “*Global Systemically Important Banks: revised assessment methodology and the higher loss absorbency requirement*”, we hereby disclose the information pertaining to the fiscal year 2025.

Although the BBVA group is not currently designated as a Global Systemically Important Bank (G-SIB), the obligation to disclose information is defined as follows: “*In accordance with the Committee’s standards, all banks with a leverage ratio exposure measure (including exposures arising from insurance subsidiaries) exceeding 200 billion euros (using the exchange rate applicable at the financial year-end) are required to publicly disclose information containing at least the 13 indicators, including the two sub-indicators that comprise the trading volume, as described in Appendix 5, within four months of the financial year- end*”¹.

The Basel Committee on Banking Supervision (henceforth BCBS) is conducting this data collection exercise as part of its methodology for assessing the systemic importance of banks on a global scale.

The assessment of a bank’s global systemic importance is determined by the extent of its potential impact on the international financial system and the broader economy in the event of its failure, rather than by the likelihood of such a failure occurring.

The assessment of global systemic importance follows an indicator-based measurement approach. These indicators are designed to capture various dimensions, including the size of banks, their level of interconnectedness, the absence of readily available substitutes or alternative financial infrastructure for the services they provide, the extent of their global (cross-jurisdictional) operations, and their structural complexity.

The indicators presented below are calculated in accordance with the specific instructions issued by the Basel Committee on Banking Supervision (BCBS) and, as a result, are not directly comparable to other disclosed information.

Please be advised that the disclosed information may be subject to modifications, as it remains under review by both the National Supervisory Authority and the Basel Committee on Banking Supervision (BCBS).

Articles 128 and 131 of Directive 2013/36/EU of the European Parliament establish, at the European level, the obligation to maintain capital buffers for global systemically important entities. This requirement has been transposed into Spanish regulation through Law 10/2014, “*Ley 10/2014, de 26 de junio, de ordenación, supervisión y solvencia de entidades de crédito*”.
